Rejected Application

	<u>Application No.</u>	<u>Proposed Uses</u>	<u>Date of Consideration (RNTPC/TPB)</u>	<u>Main Reason(s) for Rejection</u>
1	A/YL-KTN/156	Proposed Small Scale Dog Kennel for a Period of 3 Years	8.11.2002	(1), (2)

Rejection Reasons

- (1) The proposed development was not in line with the planning intention of the "Agriculture" zone and no strong justification in the submission for a departure from such planning intention, even on a temporary basis.
- (2) No information in the submission to demonstrate that the proposed development would not cause adverse environmental and drainage impacts on the surrounding areas.

Advisory clauses

- (a) note DLO/YL, LandsD's comments that the Site comprises an Old Scheduled Agricultural Lot held under the Block Government Lease which contains the restriction that no structures are allowed to be erected without the prior approval of the Government. The lot owner(s) will need to apply to his office to permit the structure(s) to be erected or regularize any irregularities on site, if any. Besides, given the proposed use is temporary in nature, only application for regularization or erection of temporary structure(s) will be considered. Applications for any of the above will be considered by LandsD acting in the capacity as the landlord or lessor at its sole discretion and there is no guarantee that such application(s) will be approved. If such application(s) is approved, it will be subject to such terms and conditions, including among others the payment of rent or fee, as may be imposed by the LandsD;
- (b) note C for T's comments that the Site is connected to the public road network via a section of a local access road which is not managed by Transport Department (TD). The land status of the local access road should be checked with the LandsD. Moreover, the management and maintenance responsibilities of the local access road should be clarified with the relevant lands and maintenance authorities accordingly;
- (c) note CHE/NTW, HyD's comments that HyD shall not be responsible for the maintenance of any access connecting the Site and Chi Ho Road. Adequate drainage measures should be provided to prevent surface water running from the Site to the nearby public roads and drains;
- (d) note DEP's comments that the applicant is advised to properly design and maintain the facilities to minimize any potential environmental nuisance e.g. the proposed structures for animal boarding establishment (including dog washing facility, dog recreation centre and the dog kennel) should be enclosed with soundproofing materials with provision of 24-hours mechanical ventilation and air-condition system. The applicant is also advised to follow the requirements in the latest "Code of Practice on Handling the Environmental Aspects of Temporary Uses and Open Storage Site". Effluent discharge from the Site are subject to control under the Water Pollution Control Ordinance. If connection to public sewers is not feasible, septic tank and soakaway system can be used. Its design, construction and operation should follow the Environmental Protection Department's (EPD) requirements of Practice Note for Professional Person (ProPECC) PN 5/93 "Drainage Plans subject to Comment by the Environmental Protection Department" including percolating test, with certification by an Authorized Person;
- (e) note DAFC's comments that the applicant should not disturb / pollute the Kam Tin River nearby. Under the Public Health (Animals) (Boarding Establishment) Regulations, Cap. 139I, any person who provides food and accommodation for animals in return for a fee paid by the owner must apply for a Boarding Establishment Licence from his department. Detailed information and guidance on

Animal Boarding Establishment will be provided when the applicant submits the licence application;

- (f) note CE/MN of DSD's comments on the submitted drainage plan that the applicant should provide site photos to show existing condition of the culvert which receives the discharge from the Site, provide associated connection details, and demonstrate the existing culvert has spare capacity to cater for additional discharge, if any, from the proposed development. The cover levels and invert levels of the proposed u-channels, catchpits/ sand traps should be shown on the drainage plan. The applicant should advise how to delineate the catchment area outside the Site. Cross sections showing the existing and proposed ground levels of the Site with respect to the adjacent areas should be given. Noting that there is an existing watercourse laying within/ next to the Site at the western side, the applicant should advise how this watercourse can be preserved. Besides, the drainage plan should show how the existing flow paths as well as the run-off falling onto and passing through the Site could be intercepted. Sand trap or provision alike should be provided before the collected runoff is discharged to the public drainage facilities. Standard details should be provided to indicate the sectional details of the proposed u-channel and the catchpit/ sand trap. Where walls or hoarding are erected are laid along the site boundary, adequate opening should be provided to intercept the existing overland flow passing through the Site. The development should neither obstruct overland flow nor adversely affect existing natural streams, village drains, ditches and the adjacent areas, etc.. The applicant should consult DLO/YL, LandsD and seek consent from the relevant owners for any drainage works to be carried out outside his lot boundary before commencement of the drainage works;
- (g) note D of FS' comments that in consideration of the design/nature of the proposal, fire service installations (FSIs) are anticipated to be required. Therefore, the applicant is advised to submit relevant layout plans incorporated with the proposed FSIs to his department for approval. The layout plans should be drawn to scale and depicted with dimensions and nature of occupancy. The location of where the proposed FSI to be installed should be clearly marked on the layout plans. If the proposed structure(s) is required to comply with the Buildings Ordinance (BO) (Cap. 123), detailed fire service requirements will be formulated upon receipt of formal submission of general building plans;
- (h) note CBS/NTW, BD's comments that if the existing structures (not being a New Territories Exempted House) are erected on leased land without the approval of BA, they are unauthorized building works (UBW) under the BO and should not be designated for any proposed use under the application. For UBW erected on leased land, enforcement action may be taken by BD to effect their removal in accordance with the prevailing enforcement policy against UBW as and when necessary. The granting of any planning approval should not be construed as an acceptance of any existing building works or UBW on the Site under the BO. Before any new building works (including containers/open sheds as temporary buildings, demolition and land filling, etc.) are to be carried out on the Site, prior approval and consent of the BA should be obtained, otherwise they are UBW. An Authorized Person should be appointed as the co-ordinator for the proposed building works in accordance with the BO. The Site shall be provided with means of obtaining access thereto from a street and emergency vehicular access in

accordance with Regulations 5 and 41D of the Building (Planning) Regulations (B(P)R) respectively. The Site does not abut on a specified street of not less than 4.5 m wide and its permitted development intensity shall be determined under Regulation 19(3) of the B(P)R at the building plan submission stage. Any temporary shelters or converted containers for office, storage, washroom or other uses are considered temporary buildings are subject to the control of Part VII of B(P)R. If the proposed use under application is subject to issue of a license, the applicant should be reminded that any existing structures on the Site intended to be used for such purposes are required to comply with the building safety and other relevant requirements as may be imposed by the licensing authority. Detailed checking under the BO will be carried out at building plan submission stage; and

- (i) note DFEH's comments that proper licence / permit issued by the Food and Environmental Hygiene Department (FEHD) is required if there is any food business / catering service / activities regulated by the DFEH under the Public Health and Municipal Services Ordinance (Cap. 132) and other relevant legislation for the public and the operation of any business should not cause any obstruction. If the proposal involves any commercial/trading activities, there should be no encroachment on the public place and no environmental nuisance should be generated to the surroundings. Its state should not be a nuisance or injurious or dangerous to health and surrounding environment. Also, for any waste generated from the activities in the premises, the applicant should handle on their own/at their expenses. Any animal carcass / parts shall be properly wrapped or bagged before disposal.
