Application for Open Storage and Port Back-up Uses
(TPB PG-No.13F)

1. On 27.3.2020, the Town Planning Board Guidelines for Application for Open Storage and Port Back-up Uses under Section 16 of the Town Planning Ordinance (TPB PG-No. 13F) were promulgated, which set out the following criteria for the various categories of area:
 - (a) Category 1 areas: considered suitable for open storage and port-backup uses. Favourable consideration will normally be given to applications within these areas, subject to no major adverse departmental comments and local objections, or the concerns of the departments and local residents can be addressed through the implementation of approval conditions. Technical assessments should be submitted if the proposed uses may cause significant environmental and traffic concerns;
 - (b) Category 2 areas: planning permission could be granted on a temporary basis up to a maximum period of 3 years, subject to no adverse departmental comments and local objections, or the concerns of the departments and local residents can be addressed through the implementation of approval conditions. Technical assessments, where appropriate, should be submitted to demonstrate that the proposed uses would not have adverse drainage, traffic, visual, landscaping and environmental impacts on the surrounding areas;
 - (c) Category 3 areas: within these areas, “existing” and approved open storage and port back-up uses are to be contained and further proliferation of such uses is not acceptable. Applications would normally not be favourably considered unless the applications are on sites with previous planning approvals. Sympathetic consideration may be given if the applicants have demonstrated genuine efforts in compliance with approval conditions of the previous planning applications and included in the fresh applications relevant technical assessments/proposals (if required) to demonstrate that the proposed uses would not generate adverse drainage, traffic, visual, landscaping and environmental impacts on the surrounding areas. Planning permission could be granted on a temporary basis up to a maximum period of 3 years, subject to no adverse departmental comments and local objections, or the concerns of the departments and local residents can be addressed through the implementation of approval conditions; and
 - (d) Category 4 areas: applications would normally be rejected except under exceptional circumstances. For applications on sites with previous planning approvals, and subject to no adverse departmental comments and local objections, sympathetic consideration may be given if the applicants have demonstrated genuine efforts in compliance with approval conditions of the previous planning applications and included in the fresh applications relevant technical assessments/proposals (if required) to demonstrate that the proposed uses would not generate adverse drainage, traffic, visual, landscaping and environmental impacts on the surrounding areas. The intention is however to encourage the phasing out of such non-conforming uses as early as possible. A maximum period of 2 years may be allowed upon renewal of planning permission for an applicant to identify suitable sites for relocation.

No further renewal of approval will be given unless under very exceptional circumstances and each application for renewal of approval will be assessed on its individual merit.

2. In assessing applications for open storage and port back-up uses, the other major relevant assessment criteria are also summarized as follows:
 - (a) The use of sites less than 1,000m² for open storage uses and 2,000m² for port back-up uses in rural areas, is generally not encouraged, other than sites located in major corridors, industrial/godown/workshop areas, quarrying activities or where it is demonstrated that optimum use is made of the site. This is to prevent the further proliferation of small sites in rural areas, minimizing sprawl over countryside areas and reducing travel trips;
 - (b) port back-up sites and those types of open storage generating adverse noise, air pollution and visual intrusion and frequent heavy vehicle traffic should not be located adjacent to sensitive receivers such as residential dwellings, hospitals, schools and other community facilities;
 - (c) port back-up uses are major generators of traffic, with container trailer/tractor parks generating the highest traffic per unit area. In general, port back-up sites should have good access to the strategic road network, or be accessed by means of purpose built roads;
 - (d) adequate screening of the sites through landscaping and/or fencing should be provided where sites are located adjacent to public roads or are visible from surrounding residential areas;
 - (e) there is a general presumption against conversion of agricultural land and fish ponds to other uses on an ad-hoc basis, particularly in flood prone areas or sites which would obstruct natural drainage channels and overland flow; and
 - (f) for applications involving sites with previous planning approvals, should there be no evidence to demonstrate that the applicants have made any genuine effort to comply with the approval conditions of the previous planning applications, planning permission may be refused, or a shorter compliance period for the approval conditions may be imposed, notwithstanding other criteria set out in the Guidelines are complied with.

Approval Conditions

- (1) Submission and implementation of landscaping/tree preservation proposal.
- (2) Submission and implementation of drainage proposal / provision of drainage facilities/ submission of drainage record
- (3) Revocation of planning approval if condition is not complied with at any time/by specified date.
- (4) Reinstatement of the site after the expiry of the planning approval.
- (5) Fencing of the site.
- (6) Vehicular access arrangement.
- (7) Provision of environmental mitigation measures.
- (8) No dismantling/maintenance/repairing/washing/paint spraying/workshop activities
- (9) Painting of the boundary fencing.
- (10) Maintenance of landscape planting and/or drainage facilities.
- (11) Restriction on operation hours.
- (12) Maintenance of solid boundary wall / fencing.
- (13) Setting back of the development from the works limit of the "Yuen Long, Kam Tin, Ngau Tam Mei and Tin Shui Wai Drainage Improvement Stage 1, Phase 2B" project.
- (14) Submission and implementation of fire service installations proposal / provision of fire service installations
- (15) Provision of fire extinguisher
- (16) No vehicle is allowed to queue back to or reverse onto / from public road at any time

Approval Conditions

- (1) No dismantling/maintenance/car washing/cleansing/assembling/repairing/paint spraying/or other workshop activities to be carried out on site.
- (2) Restriction on operation hours/time.
- (3) Provision/maintenance of boundary fence/ peripheral fence wall.
- (4) Submission and implementation of landscape/tree preservation proposal or provision/maintenance/replacement of existing trees/ landscape planting or submission of six-monthly tree monitoring report.
- (5) Submission and implementation of drainage proposal /maintenance of existing drainage facilities
- (6) Revocation of planning approval if condition is not complied with at any time/by specified date.
- (7) Reinstatement of the site after the expiry of the planning approval.
- (8) Submission and implementation of emergency vehicular access/water supply for fire fighting/fire service installations proposal
- (9) No medium or heavy vehicles or container trailers/tractors are allowed for the operation of the site.
- (10) Restriction on stacking height of the materials stored within the site.
- (11) Provision of fire extinguisher
- (12) Submission of the record of the existing drainage facilities
- (13) Submission of a run-in proposal at Kam Sheung Road and provision/maintenance of access/ run-in between the site and the public road
- (14) Implementation of the replacement tree planting
- (15) No vehicular reversing in or out from the site/ No vehicle is allowed to queue back to or reverse onto/from of public road/ submission/implementation of proposal on buffer zone at site entrance to avoid queuing on road

	<u>Application No.</u>	<u>Proposed Use(s)</u>	<u>Date of Consideration (RNTPC)</u>	<u>Rejection Reasons</u>
3	A/YL-KTS/589	Temporary open storage of machinery and containers for storing vehicle parts and mechanical parts for a period of 3 years	11.1.2013	(1), (2), (3)
4	A/YL-KTS/616	Temporary open storage of new coaches and new vehicle parts with ancillary workshop for a period of 1 year	5.9.2014 (on review)	(2), (3), (5)
5	A/YL-KTS/664	Proposed temporary open storage of private cars (including new right-hand drive and second hand cars) for sale for a period of 3 years	22.5.2015	(1), (2), (3)

Rejection Reasons

- (1) The planning intention of the "Other Specified Uses" annotated "Rural Use" ("OU(RU)") zone was for the preservation of the character of the rural area. Non-conforming and undesirable industrial-related uses such as the open storage use at the application site within the zone should be gradually phased out to help achieve the implementation of the planning intention to upgrade the environmental quality of the area. The surrounding land uses in the vicinity were predominated by residential structures/dwellings/ development, agricultural land and vacant/unused land. Besides, there had been material change in the planning circumstances upon approval of a proposed residential development to the immediate northeast of the site which would act as a catalyst to realise the planning intention. The continuation of the temporary open storage use at the site would jeopardize the compatible permanent uses hence the planning intention of the "OU(RU)" zone and contradict with existing and future residential land uses in the vicinity
- (2) The application did not comply with the Town Planning Board Guidelines for "Application for Open Storage and Port Back-up Uses" in that the development was not compatible with the surrounding land uses; no previous approval was granted; there were adverse departmental comments against the applied use; and/or the development would generate adverse environmental, drainage, landscape and traffic impacts
- (3) The approval of the application would set an undesirable precedent for similar uses to proliferate in the "OU(RU)" zone. The cumulative effect of approving such applications would result in a general degradation of the environment of the area
- (4) The continuation of the temporary open storage use at the Site would jeopardize the compatible permanent uses hence the planning intention of the "OU(RU)" zone and contradict with existing and future residential land uses in the vicinity
- (5) The continuation of the temporary open storage use at the site would not be compatible with permanent uses and hence jeopardise the materialisation of the planning intention of the "OU(RU)" zone
- (6) The application did not comply with TPB PG-No. 13E in that the applicant failed to KTS 872

demonstrate the genuine efforts in complying with the approval conditions of the previous applications, and that there were adverse departmental comments and public objections against the application

Good Practice Guidelines for Open Storage Sites

Good Practice Guidelines for Open Storage Sites

		Internal access for fire appliances	Lot boundaries (clear width)	Distance between storage cluster and temporary structure	Cluster size	Storage height
1.	Open Storage of Containers		2m	4.5m		
2.	Open Storage of non-combustibles or limited combustibles	4.5m	2m	4.5m		
3.	Open Storage of combustibles	4.5m	2m	4.5m	40m x 40m	3m

Remarks: Smoking and naked flame activities shall not be allowed within the open storage/recycling site.

Advisory clauses

- (a) prior planning permission should have been obtained before commencement of the development at the Site;
- (b) note DLO/YL's comments that the Site comprises Old Schedule Agricultural Lots held under the Block Government Lease which contains the restriction that no structures are allowed to be erected without the prior approval of the Government. The STW holder(s) will need to apply to his office for modification of the STW conditions where appropriate. Besides, given the proposed use is temporary in nature, only application for regularization or erection of temporary structure(s) will be considered. Applications for any of the above will be considered by LandsD acting in the capacity as the landlord or lessor at its sole discretion and there is no guarantee that such application(s) will be approved. If such application(s) is approved, it will be subject to such terms and conditions, including among others the payment of rent or fee, as may be imposed by LandsD;
- (c) note C for T's comments that the Site is connected to the public road network via a section of a local access road which is not managed by Transport Department. The land status of the local access road should be checked with the LandsD. Moreover, the management and maintenance responsibilities of the local access road should be clarified with the relevant lands and maintenance authorities accordingly;
- (d) note CHE/NTW, HyD's comments that HyD shall not be responsible for the maintenance of any access connecting the Site and Kam Sheung Road. Adequate drainage measures should be provided to prevent surface water running from the Site to the nearby public roads and drains;
- (e) follow the relevant mitigation measures and requirements in the latest "Code of Practice on Handling the Environmental Aspects of Temporary Uses and Open Storage Sites" issued by the DEP to minimize any potential environmental nuisance;
- (f) note D of FS' comments that in consideration of the design / nature of the proposal, FSIs are anticipated to be required. Therefore the applicant is advised to submit relevant layout plans incorporated with the proposed FSIs to his department for approval. The layout plans should be drawn to scale and depicted with dimensions and nature of occupancy. The location of where the proposed FSI to be installed should be clearly marked on the layout plans. The good practice guidelines for open storage in **Appendix V** of the RNTPC paper should be adhered to. To address the approval condition on provision of fire extinguisher(s), the applicant should submit a valid fire certificate (FS251) to his department for approval. The applicant is reminded that if the proposed structure(s) is required to comply with the Buildings Ordinance (BO) (Cap.123), detailed fire service requirements will be formulated upon receipt of formal submission of general building plans; and
- (g) note CBS/NTW, BD's comments that if the existing structures (not being a New Territories Exempted Houses) are erected on leased land without approval of the BA, they are unauthorized building works (UBW) under the BO and should not be

designated for any use under the application. For UBW erected on leased land, enforcement action may be taken by the BD to effect their removal in accordance with the prevailing enforcement policy against UBW as and when necessary. The granting of any planning approval should not be construed as an acceptance of any existing building works or UBW on the Site under the BO. Before any new building works (including containers / open sheds as temporary buildings, demolition and land filling, etc.) are to be carried out on the Site, prior approval and consent of the BA should be obtained, otherwise they are UBW. An Authorized Person should be appointed as the coordinator for the proposed building works in accordance with the BO. The Site shall be provided with means of obtaining access thereto from a street and emergency vehicular access in accordance with Regulations 5 and 41D of the Building (Planning) Regulations (B(P)R) respectively. The Site does not abut on a specified street of not less than 4.5m wide and its permitted development intensity shall be determined under Regulation 19(3) of the B(P)R at the building plan submission stage. Any temporary shelters or converted containers for office, storage, washroom or other uses are considered as temporary buildings and are subject to the control of Part VII of the B(P)R. Detailed checking under the BO will be carried out at building plan submission stage.
