

Relevant Revised Interim Criteria for Consideration of
Application for NTEH/Small House in New Territories
(promulgated on 7.9.2007)

- (a) sympathetic consideration may be given if not less than 50% of the proposed NTEH/Small House footprint falls within the village 'environs' ('VE') of a recognized village and there is a general shortage of land in meeting the demand for Small House development in the "Village Type Development" ("V") zone of the village;
- (b) if more than 50% of the proposed NTEH/Small House footprint is located outside the 'VE', favourable consideration could be given if not less than 50% of the proposed NTEH/Small House footprint falls within the "V" zone, provided that there is a general shortage of land in meeting the demand for Small House development in the "V" zone and the other criteria can be satisfied;
- (c) development of NTEH/Small House with more than 50% of the footprint outside both the 'VE' and the "V" zone would normally not be approved unless under very exceptional circumstances (e.g. the application site has a building status under the lease, or approving the application could help achieve certain planning objectives such as phasing out of obnoxious but legal existing uses);
- (d) application for NTEH/Small House with previous planning permission lapsed will be considered on its own merits. In general, proposed development which is not in line with the criteria would normally not be allowed. However, sympathetic consideration may be given if there are specific circumstances to justify the cases, such as the site is an infill site among existing NTEHs/Small Houses, the processing of the Small House grant is already at an advance stage;
- (e) an application site involves more than one NTEH/Small House, application of the above criteria would be on individual NTEH/Small House basis;
- (f) the proposed development should not frustrate the planning intention of the particular zone in which the application site is located;
- (g) the proposed development should be compatible in terms of land use, scale, design and layout, with the surrounding area/development;
- (h) the proposed development should not encroach onto the planned road network and should not cause adverse traffic, environmental, landscape, drainage, sewerage and geotechnical impacts on the surrounding areas. Any such potential impacts should be mitigated to the satisfaction of relevant Government departments;
- (i) the proposed development, if located within water gathering grounds, should be able to be connected to existing or planned sewerage system in the area except under very special circumstances (e.g. the application site has a building status under the lease or the applicant can demonstrate that the water quality within water gathering grounds will not be affected by the proposed development^);

- (j) the provision of fire service installations and emergency vehicular access, if required, should be appropriate with the scale of the development and in compliance with relevant standards; and
 - (k) all other statutory or non-statutory requirements of relevant Government departments must be met. Depending on the specific land use zoning of the application site, other Town Planning Board guidelines should be observed, as appropriate.
- ^i.e. the applicant can demonstrate that effluent discharge from the proposed development will be in compliance with the effluent standards as stipulated in the Water Pollution Control Ordinance Technical Memorandum.

*` Appeal (against an advisory clause) dismissed by Town Planning Appeal Board on 2.8.2007

Approval Conditions

- A1. The submission/provision of drainage facilities
- A2. The provision of fire services installations (FSIs)
- A3. The submission and implementation of landscape proposal
- A4. The provision of septic tank, as proposed by the applicant, at a location to the satisfaction of the Director of Lands or of the Town Planning Board
- A5. The disposal of spoils during the site formation and construction period
- A6. The connection/provision of septic tank and soakaway pit for foul effluent disposal and the sewerage connection at a distance of not less than 30m from any watercourses
- A7. The connection of the foul water drainage system to the public sewers
- A8. The provision of protective measures to ensure no pollution or siltation occurs to water gathering ground (WGG)

- A9. The provision of fire fighting access, water supplies and FSIs
- A10. The submission and implementation of landscape and tree preservation proposal
- A11. The submission and implementation of a tree preservation and replanting proposal
- A12. The provision of adequate space for the existing footpath to pass over the application site for public access purpose
- A13. The connection of the foul water drainage system to the planned public sewerage system in the area and the whole of the foul water drainage system to the planned public sewerage system upon its completion

Appeal dismissed by Town Planning Appeal Board on 1.9.2016

Rejection Reasons

- R1. The proposed development did not comply with the Interim Criteria in that it was not able to be connected to existing or planned sewerage system in the area. There was insufficient information in the submission to demonstrate that the proposed development, which was located within WGG, would not cause adverse impact on water quality in the area.
- R2. There was no information in the submission to demonstrate that the existing trees within the application site which should be preserved as far as possible, would not be affected by the proposed development.
- R3. The application was not in line with the planning intention of the “Agriculture” (“AGR”) zone, which was primarily to retain and safeguard good quality agricultural land/farm/fish ponds for agricultural purposes. It was also intended to retain fallow arable land with good potential for rehabilitation for cultivation and other agricultural purposes. No strong justifications had been provided in the submission for a departure from the planning intention.

- R4. The approval of the proposed development would set an undesirable precedent for other similar applications within WGG in the New Territories and would lead to irreversible damage to the water quality of the WGGs in Kau Lung Hang and other areas in the New Territories.
- R5. The proposed development did not comply with the Interim Criteria in that the proposed house with more than 50% of the footprint outside both the village environs and the "Village Type Development" ("V") zone of recognised villages.
- R6. The proposed development did not comply with the Interim Criteria in that more than 50% of the footprint of the proposed Small House fell outside both the "V" zone and the village 'environs' of Yuen Leng, Kau Lung Hang Lo Wai and Kau Lung Hang San Wai, and it was uncertain whether the proposed Small House located within the WGG could be connected to the planned sewerage system in the area.
- R7. The proposed development did not comply with the Interim Criteria in that the proposed Small House located within the WGG would not be able to be connected to the existing/planned sewerage system in the area as there was no fixed programme for implementation of such system at this juncture.
- R8. There was no information in the submission to demonstrate that the proposed development would have no adverse drainage and sewerage disposal impacts on the surrounding areas.
- R9. Land was still available within the "V" zone of Yuen Leng, Kau Lung Hang San Wai and Kau Lung Hang Lo Wai which was primarily intended for Small House development. It was considered more appropriate to concentrate the proposed Small House development within "V" zone for more orderly development pattern, efficient use of land and provision of infrastructure and services.
- R10. The proposed development would be subject to adverse noise impact generated by the East Rail nearby, and there was no information in the submission to demonstrate that the proposed development would be in compliance with the Noise Control Ordinance (Cap. 400).

Detailed Comments from Relevant Government Departments

1. Land Administration

Comments of the District Lands Officer/Tai Po, Lands Department (DLO/TP, LandsD):

- (a) no objection to the application;
- (b) the applicant is an indigenous villager of Kau Lung Hang Village of Tai Po as confirmed by the respective Indigenous Inhabitant Representative (IIR). However, his eligibility of Small House grant has yet to be ascertained;
- (c) the Site is held under Block Government Lease demised for agricultural use. The Small House application submitted by the applicant for the Site is still under processing;
- (d) the Site is not covered by any Modification of Tenancy or Building Licence;
- (e) the Site falls within the village 'environs' ('VE') of Yuen Leng and Kau Lung Hang;
- (f) the number of outstanding Small House applications and the number of 10-year Small House demand for the villages concerned are as follow:

<u>Village</u>	<u>No. of outstanding Small House applications</u>	<u>No. of 10-year Small House demand</u> *
Kau Lung Hang	51	100
Yuen Leng	83	261

(* The figures of 10-year Small House demand were estimated and provided by the IIR of concerned villages and the information so obtained is not verified in any way by LandsD); and

- (g) if and after planning permission has been given by the Town Planning Board (the Board), LandsD will process the Small House application. However, there is no guarantee at this stage that the Small House application would be approved. If the Small House application is approved by LandsD acting in the capacity as landlord at its sole discretion, such approval will be subject to such terms and conditions as may be imposed by LandsD. There is no guarantee to the grant of a right of way to the Small House concerned or approval of the emergency vehicular access (EVA) thereto.

2. Traffic

Comments of the Commissioner for Transport (C for T):

- (a) in general, he has reservation on the application. Such type of development should be confined within the "Village Type Development" ("V") zone as far as possible. Although additional traffic generated by the proposed development is

not expected to be significant, such type of development outside the "V" zone, if permitted, will set an undesirable precedent case for similar applications in the future. The resulting cumulative adverse traffic impact could be substantial; and

- (b) notwithstanding the above, he considers that the application only involving the development of a Small House can be tolerated on traffic grounds.

3. **Environment**

Comments of the Director of Environmental Protection (DEP):

- (a) the Site falls within "Agriculture" ("AGR") zone, and is within the Water Gathering Grounds (WGG). The applicant proposes the use of septic tank and soakaway system to treat wastewater generated onsite, which should be avoided within WGG according to Chapter 9 of the Hong Kong Planning Standards and Guidelines (HKPSG), "use of septic tank and soakaway systems within WGG should be avoided". Therefore, he does not support the application unless the following conditions are imposed;
 - (i) the proposed Small House will be connected to the public sewer for sewage disposal;
 - (ii) adequate land space within the Site will be reserved for connection of the proposed Small House to the public sewer;
 - (iii) written consent(s) can be obtained from the adjacent lot owner(s)/ and or LandsD for laying and maintaining sewerage pipes across the adjacent lots; and
 - (iv) the cost of sewer connection will be borne by the applicant;
- (b) the nearest foul sewer under the recently completed Kau Lung Hang Lo Wai sewerage system is at some 30m away from the Site. The area has sufficient capacity to serve this Small House. The level drop between the lot and the existing public sewer is marginal but still feasible from technical point of view by adopting suitable design in the connection. The applicant may explore the technical feasibility of connecting the proposed Small House to the public sewerage system and seek consent/permission from concerned lot owners and/or LandsD for laying and maintaining sewage pipes across the concerned lots. DSD's advice should be sought on the technical feasibility of the sewer connection;
- (c) the Site is located next to a stream. Should the application be approved, the applicant should be advised to make reference to Environmental Protection Department Practice Notes for Professional Person (ProPECC PN) 1/94 - "Construction Site Drainage" and adopt appropriate mitigation measures to avoid water quality impact during construction; and
- (d) the Site is located at more than 90m, about 130m and about 220m from the East Rail Line (EAL), the slip roads of Heung Yuen Wai Highway and Fanling Highway respectively. The proposed Small House will be partially shielded from the EAL and Fanling Highway by other village houses. As the slip roads

of Heung Yuen Wai Highway are elevated roads, the proposed Small House will be located underneath the slips roads and hence it would have no direct line of sight over these roads. Trackside noise barrier has been erected along the EAL and roadside noise barriers at the concerned section of highway have been constructed under the Widening Project of Tolo Highway/ Fanling Highway between Island Interchange and Fanling to protect those village developments closer to the road. In view of the above, no insurmountable railway and traffic noise impacts would be anticipated.

4. Drainage and Sewerage

- 4.1 Comments of the Chief Engineer/Construction, Water Supplies Department (CE/C, WSD):
- (a) objects to the application;
 - (b) the Site is located within upper indirect WGG and is less than 30m from the nearest stream; and
 - (c) the Site falls entirely within the “AGR” zone of Kau Lung Hang OZP and DEP indicates that the Site is able to connect to the public sewerage system in the area. However, the applicant proposes to adopt septic tank systems for foul water disposal and the wastewater generated from the proposed Small Houses will have the potential to cause water pollution to the WGG. It is considered that the compliance with the item (i) of the Interim Criteria cannot be established.
- 4.2 Comments of the Chief Engineer/Mainland North, Drainage Services Department (CE/MN, DSD):
- (a) no in-principle objection to the application from public drainage viewpoint;
 - (b) if the application is approved, an approval condition on submission and implementation of drainage proposal for the Site is recommended to ensure that it will not cause adverse drainage impact to the adjacent areas;
 - (c) while there is DSD’s public stormwater drains in the area, the applicant should have his own stormwater collection and discharge system to cater for the runoff generated within the Site and overland flow from surrounding of the Site, e.g. surface channel of sufficient size along the perimeter of the Site; sufficient openings should be provided at the bottom of the boundary wall/fence to allow surface runoff to pass through the Site if any boundary wall/fence are to be erected. Any existing flow path affected should be re-provided. The applicant should neither obstruct overland flow nor adversely affect the existing natural streams, village drains, ditches and the adjacent areas. The applicant is required to maintain the drainage systems properly and rectify the systems if they are found to be inadequate or ineffective during operation. The applicant shall also be liable for and shall indemnify claims and demands arising out of damage or nuisance caused by failure of the systems;

- (d) public sewers are available for connection in the vicinity of the Site. The applicant should follow the established procedures and requirements for connecting sewers from the Site to the public sewerage system. A connection proposal should be submitted for approval beforehand. Moreover, the sewerage connection will be subject to DSD's technical audit, for which an audit fee will be charged; and
- (e) for works to be undertaken outside the lot boundary, prior consent and agreement from LandsD and/or relevant private lot owners should be sought.

4.3 Comments of the Chief Engineer/Consultant Management, Drainage Services Department (CE/CM, DSD):

the public sewerage works at Kau Lung Hang in the vicinity of the Site was completed and handed over to Mainland North Division of DSD for maintenance in 2018. There is no ongoing sewerage works in the vicinity of the Site.

5. Landscape

Comments of the Chief Town Planner/Urban Design and Landscape, Planning Department (CTP/UD&L, PlanD) :

- (a) no objection to the application from the landscape planning perspective;
- (b) the Site is situated in an area of rural landscape character comprising scattered tree groups, village houses and abandoned farmlands;
- (c) the Site is vacant and covered with gravels. Three existing palms of *Archontophoenix alexandrae* (假檳榔) are found within the Site and one existing *Clausena lansium* (黃皮) and one *Macaranga tanarius* (血桐) are found adjacent to the northern and western boundary respectively. Although the proposed layout is in direct conflict with existing trees, given the affected trees are common species and can be easily found in local market, significant adverse impact on landscape resources due to the proposed development is not anticipated; and
- (d) since the footprint of proposed house covers most of the Site, there is inadequate space for meaningful landscape to benefit public realm. Should the Board approve the application, it is considered unnecessary to impose any condition for submission and implementation of landscaping proposal.

6. Agriculture

Comments of the Director of Agriculture, Fisheries and Conservation (DAFC):

the Site is overgrown with some vegetation. There are active agricultural activities in the vicinity and agricultural infrastructure such as water source and road access is

available. The Site possesses potential for agricultural rehabilitation. As such, the application is not supported from agricultural point of view.

7. **Fire Safety**

Comments of the Director of Fire Services (D of FS):

- (a) no in-principle objection to the application; and
- (b) the applicant is reminded to observe 'New Territories Exempted Houses – A Guide to Fire Safety Requirements' published by the LandsD. Detailed fire safety requirements will be formulated upon receipt of formal application referred by LandsD.

8. **Demand and Supply of Small House Sites**

According to the DLO/TP, LandsD's record, the total number of outstanding Small House applications for Yuen Leng and Kau Lung Hang is 134 while the 10-year Small House demand forecast for the same villages is 361. Based on the latest estimate by the PlanD, about 6.28 ha of land (equivalent to about 250 Small House sites) are available within the "V" zone of Yuen Leng and Kau Lung Hang. Therefore, the land available cannot fully meet the future Small House demand of 495 Small Houses (equivalent to about 12.38 ha of land).

Recommended Advisory Clauses

- (a) to note the comments of the District Lands Officer/Tai Po, Lands Department (DLO/TP, LandsD) that if the Small House application is approved by LandsD acting in the capacity as landlord at its sole discretion, such approval will be subject to such terms and conditions as may be imposed by LandsD. There is no guarantee to the grant of a right of way to the Small House concerned or approval of the emergency vehicular access (EVA) thereto;
- (b) to note the comments of the Director of Environmental Protection (DEP) that:
 - (i) the proposed Small House should be connected to the public sewer;
 - (ii) adequate land space within the Site should be reserved for connection of the proposed Small House to the public sewer;
 - (iii) written consent(s) should be obtained from the adjacent lot owner(s) for construction and maintenance of the sewerage pipes and intermediate private manholes across the adjacent lot(s);
 - (iv) the cost of sewer connection should be borne by the applicant;
 - (v) the nearest foul sewer under the recently completed Kau Lung Hang Lo Wai sewerage system is at some 30m away from the Site. The area has sufficient capacity to serve this Small House. The level drop between the lot and the existing public sewer is marginal but still feasible from technical point of view by adopting suitable design in the connection. The applicant may explore the technical feasibility of connecting the proposed Small House to the public sewerage system and seek consent/permission from concerned lot owners and/or LandsD for laying and maintaining sewage pipes across the concerned lots. Drainage Services Department's advice should be sought on the technical feasibility of the sewer connection; and
 - (vi) the Site is located next to a stream. The applicant should make reference to Environmental Protection Department Practice Notes for Professional Person (ProPECC PN) 1/94 - "Construction Site Drainage" and adopt appropriate mitigation measures to avoid water quality impact during construction;
- (c) to note the comments of the Chief Engineer/Mainland North, Drainage Services Department (CE/MN, DSD) that:
 - (i) there is no existing DSD maintained public drain available for connection in the area. The applicant should have his own stormwater collection and discharge system to cater for the runoff generated within the Site and overland flow from surrounding of the Site, e.g. surface channel of sufficient size along the perimeter of the Site; sufficient openings should be provided at the bottom of the boundary wall/fence to allow surface runoff to pass through the Site if any boundary wall/fence are to be erected. Any existing flow path affected should be re-provided. The applicant should neither obstruct overland flow nor adversely affect the existing natural streams, village drains, ditches and the

adjacent areas. The applicant is required to maintain the drainage systems properly and rectify the systems if they are found to be inadequate or ineffective during operation. The applicant shall also be liable for and shall indemnify claims and demands arising out of damage or nuisance caused by failure of the systems;

- (ii) public sewers are available for connection in the vicinity of the Site. The applicant should follow the established procedures and requirements for connecting sewers from the Site to the public sewerage system. A connection proposal should be submitted for approval beforehand. Moreover, the sewerage connection will be subject to DSD's technical audit, for which an audit fee will be charged; and
 - (iii) for works to be undertaken outside the lot boundary, prior consent and agreement from LandsD and/or relevant private lot owners should be sought;
- (d) to note the comments of the Director of Fire Services that the applicant should observe 'New Territories Exempted Houses – a Guide to Fire Safety Requirements' published by LandsD. Detailed fire safety requirements will be formulated upon receipt of formal application referred by LandsD; and
- (e) to note that the permission is only given to the development under application. If provision of an access road is required for the proposed development, the applicant should ensure that such access road (including any necessary filling/excavation of land) complies with the provisions of the relevant statutory plan and obtain planning permission from the Town Planning Board where required before carrying out the road works.
