

**Relevant Interim Criteria for Consideration of  
Application for NTEH/Small House in New Territories**  
(promulgated on 7.9.2007)

- (a) sympathetic consideration may be given if not less than 50% of the proposed NTEH/Small House footprint falls within the village 'environs' ('VE') of a recognized village and there is a general shortage of land in meeting the demand for Small House development in the "Village Type Development" ("V") zone of the village;
- (b) if more than 50% of the proposed NTEH/Small House footprint is located outside the 'VE', favourable consideration could be given if not less than 50% of the proposed NTEH/Small House footprint falls within the "V" zone, provided that there is a general shortage of land in meeting the demand for Small House development in the "V" zone and the other criteria can be satisfied;
- (c) development of NTEH/Small House with more than 50% of the footprint outside both the 'VE' and the "V" zone would normally not be approved unless under very exceptional circumstances (e.g. the application site has a building status under the lease, or approving the application could help achieve certain planning objectives such as phasing out of obnoxious but legal existing uses);
- (d) application for NTEH/Small House with previous planning permission lapsed will be considered on its own merits. In general, proposed development which is not in line with the criteria would normally not be allowed. However, sympathetic consideration may be given if there are specific circumstances to justify the cases, such as the site is an infill site among existing NTEHs/Small Houses, the processing of the Small House grant is already at an advance stage;
- (e) if an application site involves more than one NTEH/Small House, application of the above criteria would be on individual NTEH/Small House basis;
- (f) the proposed development should not frustrate the planning intention of the particular zone in which the application site is located;
- (g) the proposed development should be compatible in terms of land use, scale, design and layout, with the surrounding area/development;
- (h) the proposed development should not encroach onto the planned road network and should not cause adverse traffic, environmental, landscape, drainage, sewerage and geotechnical impacts on the surrounding areas. Any such potential impacts should be mitigated to the satisfaction of relevant Government departments;
- (i) the proposed development, if located within water gathering grounds, should be able to be connected to existing or planned sewerage system in the area except under very special circumstances (e.g. the application site has a building status under the lease or the applicant can demonstrate that the water quality within water gathering grounds will not be affected by the proposed development\*);

- (j) the provision of fire service installations and emergency vehicular access, if required, should be appropriate with the scale of the development and in compliance with relevant standards; and
- (k) all other statutory or non-statutory requirements of relevant Government departments must be met. Depending on the specific land use zoning of the application site, other Town Planning Board guidelines should be observed, as appropriate.

\*i.e. the applicant can demonstrate that effluent discharge from the proposed development will be in compliance with the effluent standards as stipulated in the Water Pollution Control Ordinance Technical Memorandum.

### Remarks

- \*1: The application no. A/NE-LK/30 involves the same site as the application no. A/NE-LK/109
- \*2: The application no. A/NE-LK/73 involves the site of the applications no. A/NE-LK/106 and A/NE-LK/107
- \*3: The application no. A/NE-LK/77 involves the same site as the application no. A/NE-LK/111
- \*4: The rejected application no. A/NE-LK/78 and approved application no. A/NE-LK/80 involve the same site as the approved application no. A/NE-LK/112

### Approval Conditions:

- A1 The provision of drainage facilities
- A2 The submission and implementation of landscaping proposals
- A3 The commencement clause
- A4 The design and provision of firefighting access, water supplies for firefighting and fire service installations
- A5 The submission and implementation of drainage proposals
- A6 The provision of firefighting access, water supplies for firefighting and fire service installations
- A7 The submission and implementation of tree preservation and landscape proposals
- A8 The provision of septic tank
- A9 The provision of fire services installations
- A10 The provision of fire fighting access to the site

- A11 The design and provision of drainage facilities
- A12 The design and provision of fire-fighting access, water supplies and fire service installations
- A13 The setting back of the application site boundary to avoid encroaching onto the land requirement area under the 'Feasibility Study of Review of Drainage Master Plans in Yuen Long and North District'

## Rejected Applications

## Remarks

\*1: The rejected application no. A/NE-LK/78 and approved application no. A/NE-LK/80 involve the same site as the approved application no. A/NE-LK/112

\*2: The application no. A/NE-LK/122 involves part of the site of the applications no. A/NE-LK/92 and A/NE-LK/93

## Rejection Reasons:

R1 The proposed development was not in line with the planning intention of the “Agriculture” zone in the Luk Keng and Wo Hang area which was primarily to retain and safeguard good quality agricultural land/farm/fish ponds for agricultural purposes and to retain fallow arable land with good potential for rehabilitation for cultivation and other agricultural purposes. There was no strong planning justification in the submission for a departure from the planning intention.

R2 The proposed development was located in the immediate vicinity of a natural stream. There was insufficient information in the subject application to demonstrate that the proposed development would not cause adverse impact on the stream.

- R3 The proposed development was not in line with the planning intention of the “Green Belt” (“GB”) zone in the Luk Keng and Wo Hang area which was primarily for defining the limits of urban and sub-urban development areas by natural features and to contain urban sprawl as well as to provide passive recreational outlets. There was a general presumption against development within this zone. There was no strong planning justification in the submission for a departure from the planning intention.
- R4 The proposed development did not comply with the Interim Criteria for Consideration of Application for New Territories Exempted House/Small House in New Territories and Town Planning Board Guidelines No. 10 on ‘Application for Development within “GB” Zone under Section 16 of the Town Planning Ordinance’ in that the proposed development would involve clearance of vegetation and would affect the existing natural landscape on the surrounding environment.
- R5 Land was still available within the “Village Type Development” zone of Ma Tseuk Leng where land was primarily intended for Small House development. It was considered more appropriate to concentrate the proposed Small House development close to the existing village cluster for orderly development pattern, efficient use of land and provision of infrastructure and services.
- R6 The approval of the application would set an undesirable precedent for similar applications in the area. The cumulative impacts of approving such applications would result in a general degradation of the environment and landscape quality of the area.
- R7 Land was still available within the “Village Type Development” zone of Ma Tseuk Leng, Ma Tseuk Leng San Uk Ha and Shek Kiu Tau village cluster where land was primarily intended for Small House development. It was considered more appropriate to concentrate the proposed Small House development close to the existing village cluster for orderly development pattern, efficient use of land and provision of infrastructures and services.
- R8 The proposed development did not comply with the Interim Criteria for Consideration of Application for New Territories Exempted House/Small House in New Territories in that the proposed development would cause adverse drainage impacts on the surrounding areas.

## **Detailed Comments from Relevant Government Departments**

### **1. Land Administration**

Comments of the District Lands Officer/North, Lands Department (DLO/N, LandsD):

- (a) the Site falls within the village ‘environs’ (‘VE’) of Ma Tseuk Leng, Ma Tseuk Leng San Uk Ha and Wo Tong Kong;
- (b) the applicant claimed himself to be indigenous villager of Ma Tseuk Leng, Sha Tau Kok Heung. His eligibility for Small House grant has yet to be ascertained;
- (c) the Site is not covered by any Modification of Tenancy / Building Licence;
- (d) the number of outstanding Small House applications and the number of 10-year Small House demand for the villages concerned are as follows:

Village	No. of outstanding Small House applications	No. of 10-year Small House demand*
Sheung Ma Tseuk Leng	51	50
Ha Ma Tseuk Leng		88
Shek Kiu Tau	5	380

\* The figures of the 10-year Small House demand forecast were provided by the relevant Indigenous Inhabitant Representatives without any supporting evidence and his office is not in a position to verify the forecasts; and

- (e) the Small House grant application was made to his office on 17.8.2020.

### **2. Traffic**

Comments of the Commissioner for Transport (C for T):

- (a) she has reservation on the application. Such type of development should be confined within the “V” zone as far as possible. Although additional traffic generated by the proposed development is not expected to be significant, such type of development outside the “V” zone, if permitted, will set an undesirable precedent case for similar applications in the future. The resulting cumulative adverse traffic impact could be substantial; and
- (b) notwithstanding the above, the application involves the construction of one Small House. She considers that the application can be tolerated unless being rejected on other grounds.

### **3. Environment**

Comments of the Director of Environmental Protection (DEP):

- (a) in view of the small scale of the proposed development, the application alone is unlikely to cause major pollution; and

- (b) septic tank and soakaway system is an acceptable means for collection, treatment and disposal of the sewage provided that its design and construction follow the requirements of the ProPECC PN 5/93 “Drainage Plans subject to Comment by the Environmental Protection Department” and are duly certified by an Authorized Person.

#### 4. **Landscape**

Comments of the Chief Town Planner/Urban Design and Landscape, Planning Department (CTP/UD&L, PlanD):

- (a) she has no objection to the application from the landscape planning point of view;
- (b) according to the aerial photo of 2020 and the site photos taken by her office on 23.11.2020, the Site is a scrubland and no significant vegetation was observed within the Site. It is located in an area of rural landscape character predominated by abandoned farmlands, tree groups, and village houses. The applied use is considered not incompatible with the landscape character of the surrounding area. The layout of proposed house is not in conflict with any existing trees;
- (c) considering that a large *Dimocarpus longan* (龍眼) (300mm DBH, 8m height, 9m spread) is near the main entrance outside the Site boundary, the applicant is reminded to adopt precautionary measures to avoid damaging the tree especially during construction period. The applicant should observe ‘Tree Maintenance – Tree Care During Construction’ promulgated by the Development Bureau ([https://www.greening.gov.hk/en/tree\\_care/tree\\_maintenance.html](https://www.greening.gov.hk/en/tree_care/tree_maintenance.html)); and
- (d) as significant landscape impact arising from the proposed development is not anticipated, it is considered not necessary to impose any landscape condition should the application be approved by the Board.

#### 5. **Drainage**

Comments of the Chief Engineer/Mainland North, Drainage Services Department (CE/MN, DSD):

- (a) he has no objection to the application from the public drainage viewpoint;
- (b) should the application be approved, a condition should be included to request the applicant to submit and implement a drainage proposal for the Site to ensure that it will not cause adverse drainage impact to the adjacent area; and
- (c) the Site is in an area where no public sewerage connection is available. EPD should be consulted regarding the sewage treatment/disposal facilities for the proposed development.

## **6. Nature Conservation and Agriculture**

Comments of the Director of Agriculture, Fisheries and Conservation (DAFC):

the Site falls within “AGR” zone and is currently an abandoned land. Agricultural activities are active in the vicinity and agricultural infrastructures such as road access and water source are available. The Site can be used for agricultural activities such as open-field cultivation, greenhouses, plant nurseries, etc. As the Site possesses potential for agricultural rehabilitation, the applications is not supported from agricultural point of view.

## **7. Fire Safety**

Comments of the Director of Fire Services (D of FS):

- (a) he has no in-principle objection to the application; and
- (b) the applicant is reminded to observe ‘New Territories Exempted Houses – A Guide to Fire Safety Requirements’ published by LandsD. Detailed fire safety requirements will be formulated upon receipt of formal application referred by LandsD.

## **8. District Officer’s Comments**

Comments of the District Officer (North), Home Affairs Department (DO(N), HAD):

he has consulted the locals regarding the application. The Resident Representative (RR) of Ma Tseuk Leng Ha objected to the application on the grounds of adverse drainage impact on the nearby houses. The Indigenous Inhabitant Representative (IIR) of Ma Tseuk Leng Ha supported the application provided that the applicant is an indigenous villager of the concerned village and no selling of Small House rights is involved. The Chairman of Sha Tau Kok District Rural Committee and the incumbent North District Council member of the subject constituency had no comment on the application.

## **9. Demand and Supply of Small House Sites**

According to DLO/N’s records, the total number of outstanding Small House applications for Ma Tseuk Leng, Ma Tseuk Leng San Uk Ha and Shek Kiu Tau village cluster is 56 while the 10-year Small House demand forecast for the same village cluster is 518\*. According to the latest estimate by PlanD, about 2.27 ha (equivalent to 90 Small House sites) of land are available within the “V” zone of Ma Tseuk Leng, Ma Tseuk Leng San Uk Ha and Shek Kiu Tau village cluster for Small House development (**Plan A-2b**). There is insufficient land in the “V” zone of Ma Tseuk Leng, Ma Tseuk Leng San Uk Ha and Shek Kiu Tau village cluster to meet the demand of land for Small House development (i.e. about 14.35 ha of land which is equivalent to 574 Small House sites).

---

\* The number of outstanding Small House applications and the number of 10-year Small House demand forecast for Ma Tseuk Leng and Ma Tseuk Leng San Uk Ha are 51 and 138 respectively, whereas that for Shek Kiu Tau are 5 and 380 respectively.

**Recommended Advisory Clauses**

- (a) to note the comments of D of FS that the applicant should observe ‘New Territories Exempted Houses – A Guide to Fire Safety Requirements’ published by LandsD. Detailed fire safety requirements will be formulated upon receipt of formal application referred by LandsD;
- (b) to note the comments of CE/MN, DSD that the Site is in an area where no public sewerage connection is available. EPD should be consulted regarding the sewage treatment/disposal facilities for the proposed development;
- (c) to note the advice of DEP that septic tank and soakaway system is an acceptable means for collection, treatment and disposal of the sewage provided that its design and construction follow the requirements of the ProPECC PN 5/93 “Drainage Plans subject to Comment by the Environmental Protection Department” and are duly certified by an Authorized Person;
- (d) to note the advice of CTP/UD&L, PlanD that considering that a large *Dimocarpus longan* (龍眼) (300mm DBH, 8m height, 9m spread) is near the main entrance outside the Site boundary, the applicant is reminded to adopt precautionary measures to avoid damaging the tree especially during construction period. The applicant should observe ‘Tree Maintenance – Tree Care During Construction’ promulgated by the Development Bureau ([https://www.greening.gov.hk/en/tree\\_care/tree\\_maintenance.html](https://www.greening.gov.hk/en/tree_care/tree_maintenance.html)); and
- (e) to note that the permission is only given to the development under application. If provision of an access road is required for the proposed development, the applicant should ensure that such access road (including any necessary filling/excavation of land) complies with the provisions of the relevant statutory plan and obtain planning permission from the Town Planning Board where required before carrying out the road works.
