主旨: 回覆: 申請編號: A/NE-TK/649

Dear Sir,

Mobile:

Please find our following reply:

To facilitate the processing of the planning application No. A/NE-TK/649, please provide the following information/clarification:

- 1. what is the use of the covered area (i.e. under the solar panels)? 保持現狀, 不作其他用途.
- 2. how to install the steel rack? using poles? how about the pond? 使用100mm x 100mm 方形鐵通, 插進泥土(地面及水池同一安裝方法), 高位會用焊接接駁.
- 3. is the remaining part of the pond outside the application site owned by the applicant?

地介線外的水池位置,由其他人擁有.

4. what are the reasons that the applicant proposes to erect a rack rather than on the roof top of the existing house / on the ground?

使用鐵架安裝方法,是為了避免以下2種情況:

- a) 因為現場的屋頂是金字型建築, 即安裝太陽能板的角度不理想, 採光度不足.
- b) 地面安裝會受到周邊的雜草遮擋, 也會造成採光度不足.
- 5. please provide information on the site coverage of the solar energy system? whether it is 100% covered? If negative, what is the site coverage? are the space in between solar panels covered or not?
 - 1) 會有95%的地面面積會被鐵架覆蓋, 鐵架面積的90%被太陽能板覆蓋.
 - 2) 鐵架頂部會使用极輕的彩鋼板做物料
 - 3) 太陽能板和板中間的空隙, 也會安裝彩鋼板.

If you have any queries, please feel free to contact the undersigned.

Regards, George Ngai (Project Manager)

主旨: 申請編號: A/NE-TK/649

Dear Sir/Madam,

本人就環保署提出的問題,作出以下回覆:

Comments from Director of Environmental Protection - Subject Officer: Ms. W. S. TO (Tel: 2835 1335)

(a) Please note that under Item D.1 of Part 1 of Schedule 2 of the Environmental Impact Assessment Ordinance (EIAO), "Public utility electricity power plant" is a Designated Project (DP). If this project is confirmed to be a DP, then an environmental permit would be required prior to start of its construction and operation; and

答:本人就上述申請建造小型太陽能發電設施,是配合環境局局長黃錦星先生與中華電力推行的<可再生能源上網>計劃.此項目是非常小型的私人發電設施,並非公

共大型發電項目,所以應該不屬於DP項目. 另外,在2018年剛剛發表的行政長官施政報告上, 也明顯看到政府對小型可再生能源發電上的支持,並大大放寬了在天

台建造太陽能設備的規限.

- (b) furthermore, the applicant is required to provide more detailed information to DEP for his consideration of possible DP status of the proposal, including the following:
- (i) the amount of electricity expected to be generated by the solar energy system per year;

答: 預計每年總發電量為: 53,746.25千瓦小時 (附件一計算表)

(ii) whether the proposed solar energy system will be connected to and supply electricity to the public electricity grid;

答:中華電力公司已經有一套完善的小市民發電上網計劃,只要有供電網的位置,就能提供電力上網.就本人申請之項目,

已得到中華電力公司確認,可接駁至電網

(iii) any particular reason the proposed Project will not supply electricity to the existing house within the site;

答: 此小型太陽能發電設施, 不會供電給現場的房屋, 原因如下:

a) 太陽能發電的時間是在早上10:00 至下午5:30, 在這段時間內, 屋內住戶已番工, 並沒有人士活動, 所以不須要用電. 如果將電儲在電池內,

等晚上住戶回來用,此做法須要非常大量的儲電池,不合乎環保原則,因儲電池本身有壽命的限制,需要在指定的時間內更換.

- b) 將太陽能發電設施, 在發電期間, 立即將電力上網, 供給其他用電戶使用, 此舉合乎黃錦星先生提出的再生能源有效運用的目的
- (iv) any direct arrangement of sale of electricity from the applicant to the public at large;

答: 此小型太陽能發電設施, 已參加了中華電力公司的<再生能源上網計劃>.

(v) the expected potential impacts on the environment from the proposed works; and 答: 此小型太陽能發電設施, 只是在地面上建造小型的鋼架, 用來安裝太陽能板, 工程非常細小. 對以下的環境類別應該不會有影響:

a) 空氣質素 - 是次小型工程只是建造簡單鋼架, 建造時間短, 不會對空氣質素有任何污染

- b)生命危險-對於此小型工程項目在建造和營運上,都不會排出任何污染物,所以不會影響附近人類的安全
- c)噪音 根據本人參觀其他國家的太陽能發場經驗, 太陽發電營運期間, 不會產生任何的噪音.
- d)水質 是次小型太陽能發電設施是建造在鋼架上,不會和地面或地下水源有任何的直接接觸.
- e)生態 是次小型太陽能發電設施是建造在現有的屋頂及荒廢多年的農地上,並沒有對任何自然生態的影響
- f)視覺影響 是次小型太陽能設施建造在附近有購築物的土地上,並和附近的分別不大,大致上都有一般至良好的視野.
- g)文化遺產 是次小型太陽能設施附近, 經過現場考察, 並沒有發現任何文化遺產.
 - 1. (vi) applicant's own view on whether or not his proposed development and associated works constitute a DP under EIAO, with reasons and justifications, and any measures/practices proposed to address the potential environmental impacts.

答: 答案和項目v一樣.

If you have any queries, please feel free to contact the undersigned. *Regards*,
