[2] Since the amount of the pollutants of Year 2030 would be highest among the three years, Year 2030 is chosen as the assessment year for the air quality impact assessment.

Appendix 4-5 Derivation of Cumulative Annual Average NO_x to NO_2 Conversion Equation Using Jenkin Method

DERIVATION OF CUMULATIVE ANNUAL AVERAGE NO_X TO NO_2 CONVERSION EQUATION USING JENKIN METHOD

Introduction

In order not to overestimate the NO_2 emissions during the conversion of NO_x to NO_2, besides Ozone Limiting Method (OLM) and Discrete Parcel Method (DPM), an alternative method using the Jenkin Method[1] is proposed. This method can estimate annual NO_2 based on a project-specific empirical relationship of NO_x to NO_2 derived from a fitted curve by making reference to the monitoring data of annual NO_2 and NO_x.

Jenkin Method

With reference to "*Review of Methods for NO to NO_2 Conversion in Plumes at Short Ranges*" published by Environment Agency of UK in 2007[2], the annual NO_2 concentrations can be estimated by adopting Jenkin Method with the derived project-specific empirical relationship of NO_x to NO_2 and the latest available and representative data from EPD's air quality monitoring stations (AQMSs). The empirical relationship can be described by selected monitoring data of annual average NO_2 & NO_x concentrations and fitted curve[1]. The annual average NO_2 concentrations can then be determined from the functional form curve by using the total annual average NO_x concentrations. The functional form is presented as below[1]:

$$[NO_2] = \frac{\left([NO_x] + [O_x] + \frac{J}{k}\right) - \sqrt{\left([NO_x] + [O_x] + \frac{J}{k}\right)^2 - 4 \times [NO_x] \times [O_x]}}{2}$$

where

$[NO_2]$ is Annual Average NO_2 Concentration;

$[NO_x]$ is Annual Average NO_x Concentration;

$[O_x]$ is the Sum of Annual Average NO_2 Concentration and Annual Average O_3 Concentration (i.e. $[O_x] = [NO_2] + [O_3]$;

J is the Photolysis Rate of NO_2;

k is the Rate Coefficient for the Reaction between NO and O_3.

Derivation Process

<u>Adoption of Representative Data from EPD's AQMSs</u>

Three AQMSs are selected to analyse the relationship between the annual average NO_x and NO_2 concentrations, including Central/Western & Tap Mun General Stations, and Causeway Bay Roadside Stations. The latest five years (i.e. 2020 to 2024) annual average data of NO_2 and NO_x are extracted from "*Annual Quality in Hong Kong*" published by EPD and presented in **Table 1** below.

[1] J. M. E., "*Analysis of Sources and Partitioning of Oxidant in the UK – Park 1: The NO_x-dependence of Annual Mean Concentrations of Nitrogen Dioxide and Ozone*", Atmospheric Environment, 2004.

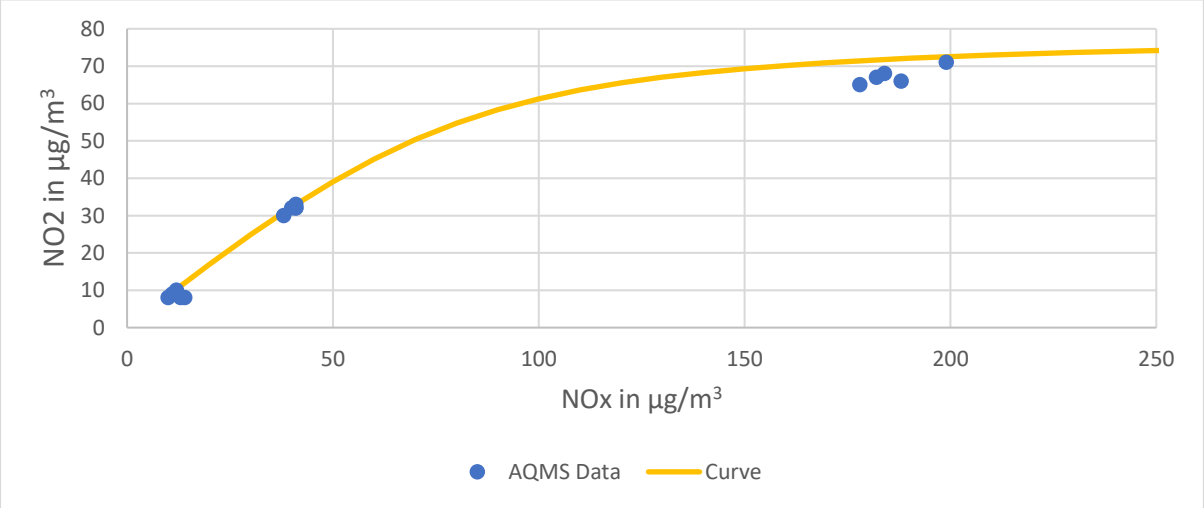
Plotting and Fitting Functional Form Curve

With the use of $[O_x]$ = 78.9 μg/m^3 and 11.12727 μg/m^3, annual average NO_2 concentrations can be calculated from the functional form based on the measured annual average NO_x concentrations shown in **Table 1** above.

A plot for annual average NO_2 versus annual average NO_x obtained from selected EPD's AQMSs from the latest 5 years is plotted in **Graph 1** below. The functional form curve, adopting $[O_x]$ of 78.9 μg/m^3 and J/k of 11.12727 μg/m^3 provided by SAMP, would fit with all annual average data from the selected EPD's AQMSs. Underestimation of the annual average NO_2 concentration is not expected.



Graph 1 AQMS NO_2 vs NO_x Concentration and Functional Form Curve by Jenkin Method

Conversion of Predicted Cumulative Annual Average NO_x results to Cumulative Annual Average NO_2 Results

The functional form curve would be adopted for NO_x to NO_2 conversion, where the predicted cumulative annual average NO_x results could be converted to the predicted cumulative annual average NO_2 results. The equation for the conversion is as below:

$$[NO_2]_p = \frac{\left([NO_x]_p + 78.9 + 11.12727\right) - \sqrt{\left([NO_x]_p + 78.9 + 11.12727\right)^2 - 4 \times [NO_x]_p \times 78.9}}{2}$$

where

$[NO_2]_p$ is the Predicted Cumulative Annual Average NO_2 Concentration;

$[NO_x]_p$ is the Predicted Cumulative Annual Average NO_x Concentration.
