Note:
1. Shaded cell in orange denotes the predicted air quality exceeds the relevant HKAQOs.
2. Bolded and underlined cell denotes the largest value.

Appendix 10 Reply of Estimated % of VKT for Local and Rural Roads with Possible Starting Emission

Outlook

[redacted]

From Steven TM LEE/EPD [redacted]
Date Fri 3/28/2025 17:00
To Billy Fan [redacted]
Cc [redacted]

Dear Billy,

Thank you for your email dated 26 Mar 25 below concerning the captioned.

We agree with your suggested approach to handle the % Roads with Start Emission in SAMP v2.1. Please proceed with the remaining work to complete the report.

File: EP24/DYAT/2

Subject: [redacted]

Dear Josephine and Jacky,

For your update, we have received an updated reply from TD's officer directly (the email is attached for your reference). With the suggested road grouping and following the methodology stated in the Traffic Census 2023, the figures in the table of Section 3.4 of Traffic Census 2023 can be obtained.

With the calculated vehicle kilometre of Local Distributor (LD) and Rural Road (RR) in Hong Kong can be obtained. By using these data, the % of LD and RR can be obtained, which is 21.7988%. Generally, LD and RR should be the roads considered with start emission. Therefore, I would propose using this % as the entry of % Roads with Start Emission on SAMP V2.1.

You are much appreciated if you can advise your view on this issue. Many thanks.

Kind regards

Billy Fan
