- Response to Comments Table
- Annex 2 - Revised Swept Path Analysis
- Annex 3 - Proposed Pedestrian Facilities and Management Measures

**Annex 1 - Response to Comments Table**

No.	Comments Received	Our Responses
<b>1. <i>Comments from Transport Department received on 20 January 2026</i></b>		
a	The swept path analyses does not accurately reflect the actual situation of the maneuvering of the 7.5m x 2.5m light bus/LGV entering and exiting the subject site, within the subject site and into/out of the parking spaces. Please review and revise the swept paths.	Noted. The swept path analysis has been revised accordingly in <b>Annex 2</b> .
b	For the pedestrian facilities and management measures, the applicant should illustrate how to ensure the pedestrian safety. The measures for pedestrian leaving / entering the subject site is missing.	<p>Noted. The proposed pedestrian facilities and management measures have been shown and revised on the layout plan in <b>Annex 3</b>.</p> <p>As mentioned in previous submitted further information dated 12.1.2026, pedestrian access to the proposed development will be provided via a dedicated entrance along the western boundary, connecting directly to the existing public footpath/road. Internal pedestrian circulation will be defined by the proposed building layout, with pathways of minimum 4 m width linking the main entrance to key facilities including the training hall and eastern training zone.</p> <p>To ensure pedestrian safety, vehicular movement will be restricted to designated roads and loading areas, segregated from pedestrian routes. A site management plan will be implemented, incorporating defined drop-off/pick-up points, pedestrian priority signage and staff supervision during peak and training periods.</p>
