

回應 DSW 的擬問

After review, the FI-03 is considered insufficient to prove and demonstrate that the proposed development would cause no material increase in pollution effect to the Water Gathering Grounds ('WGG'). Specific concerns are provided as follows from the perspective of water resources protection:

The application involves construction activities such as construction of meter room, office and drainage facilities. The applicant is required to clarify whether the "Conditions for Working within Water Gathering Grounds" will be complied with during the construction phase.

上述提及的電錶房及辦公室，不須要進行現場建築工程，構築物全部使用貨櫃箱改裝，在送達停車場之前已完成所有裝置工程，因此不會產生污水的情況出現。

回應 WSD 的擬問

We noted that the offices and the meter room are ready made and constructed before delivery. Please demonstrate that the “Conditions of Working within Water Gathering Grounds” would be complied with, for minimizing pollution effect in the water gathering grounds during the construction phase, especially for the construction of the drainage system.

如獲批准，我等在此承諾在進行排水系統施工期間，我等必定遵守集水區條例列明的指引進行施工及以最大限度地減少對集水區污染的影響。
