

Urban Design and Landscape Section, Planning Department (Contact Person: Mr. NGAI Chak-man, Tel: 3565 3955)

With reference with the site photos taken on 12.8.2025, the application site (the Site) is generally flat, fenced-off and vegetated by wild grasses. One existing tree of common species (approximately 7.5m high *Melaleuca quinquenervia* (白千層)) is located at the northern tip of the site boundary. No tree information is provided in the application. It is stated in Part 6(A)(e)(iii) of Application Form No. S16-III that no tree felling will be involved. The applicant should advise if the existing tree falls within the Site and clarify whether the development proposal would cause any adverse impact to the existing tree and advise the proposed tree treatment with associated mitigation measures, if any.

回覆園景組的提問

有關的白千層樹並不位於發展的範圍內（見圖一），發展不會砍伐任何樹木，並不會對該白千層樹造成不良的影響
