10. Justifications 理由

The applicant is invited to provide justifications in support of the application. Use separate sheets if necessary.
現請申請人提供申請理由及支持其申請的資料。如有需要，請另頁說明。

CLP received 3-ph (380V), 100A electricity supply application at location near DD 129 Tsim Bei Tsui.

Based on "**Cap. 406 Electricity Ordinance**"

Part III

Electricity Supplier's Powers and Obligations

13. Connection and continued supply

- (1) Where a fixed electrical installation complies with this Ordinance an electricity supplier shall, within a reasonable time after being requested to do so by the owner of the installation, connect the electricity supply to the installation.

1.) For the new power supply of LOT 256 RP in Tsim Bei Tsui, CLP planned to lay new 2 x 300mm sq. cables for this project.

2.) This project is proposed for power supply to the captioned area for private farmland and simple office use only, for example, water pump, CCTV, refrigerator, and basic lighting etc.

3.) After considering of the applicant, simple structure for the agriculture office will be formed after s.16 application succussed. The material of the structure is proposed to be wood or fiberboard.

The most shortest cable route is to lay and connect cable from existing cable network to the customer's meter box. Since the existing cable located in CPA zone, The new cable laying work will also fall into the CPA zone unavoidably.

New underground cables laid under vancant, which bring minor impact to existing landscape of CPA zone. No visual impact would occur after the underground cable laying works.

In conclusion, the above method is the best method with least environmental impact for this application.
