Subject: Submission of Soft Copy of New s.16 Planning Application No. A/YL-LFS/590

Dear Sir/Madam,

Urgent Return receipt Expand Group Restricted Prevent Copy

We refer to your hard copy submission of the attached s.16 planning application [*See attachment "2502845.pdf"*] to the Town Planning Board Secretariat (the Secretariat). For meeting the submission requirement, please upload the soft copy of the supplementary information (e.g. planning report and technical assessments) of the application via the link below in accordance with the Guidance Notes on “Application for Permission under Section 16/16A/12A of the Town Planning Ordinance” (Guidance Notes) ([https://www\(tpb.gov.hk/en/plan_application/apply.html](https://www(tpb.gov.hk/en/plan_application/apply.html)) to complete the submission:

https://fespld.pland.gov.hk/FsShare?key=A_YL-LFS_590

Please ensure that the soft copy of the documents to be uploaded should be the same as the submitted hard copy, and no personal data (except names) should be included in the supplementary information of your submission (including plans, drawings, planning statement, technical assessments, etc.). Under no circumstances will the Secretariat accept any liabilities for any inaccuracies, discrepancies or disclosure of personal data in the submission.

Please also be reminded that currently the application submission is still incomplete and the Secretariat will not process the application until you have submitted the soft copy via the link above and notified the Secretariat of the submission by replying this email by **29.12.2025**. The date of receipt of application will be the date when the Secretariat receives all necessary information and documents. If the submission of soft copy and the notification are not completed by **29.12.2025**, without further notice, the Secretariat will take that you do not wish to continue the application. The submitted hard copies will be returned to you. For how to upload the documents, you may refer to the **Annex** and also the Guidance Notes for details.

[*See attachment "Annex (fff).pdf"*]

Any subsequent soft copy submissions for the above application, including further information and review application under s.17 of the Town Planning Ordinance, must be made via the Secretariat’s Electronic Planning Application Submission System (EPASS) ([https://eservices2\(tpb.gov.hk/epass/](https://eservices2(tpb.gov.hk/epass/)) or the above link. For submission via the above link, it must be followed by notification to the Secretariat of the submission by email (tpbsubmission@pland.gov.hk). Otherwise, the Secretariat may refuse to consider the submission. Under no circumstances will the Secretariat accept any liabilities for any inaccuracies, discrepancies or disclosure of personal data in the submission.

Should you have any enquiries on this application, please contact the Secretariat by email (tpbsubmission@pland.gov.hk) or through telephone hotline (2231 4810 or 2231 4835).

CLP received 3-ph (380V), 100A electricity supply application at location near DD 129 Tsim Bei Tsui,

Based on "**Cap. 406 Electricity Ordinance**"

Part III

Electricity Supplier's Powers and Obligations

13. Connection and continued supply

- (1) Where a fixed electrical installation complies with this Ordinance an electricity supplier shall, within a reasonable time after being requested to do so by the owner of the installation, connect the electricity supply to the installation.

For the new power supply of LOT 256 RP in Tsim Bei Tsui, CLP planned to lay new 2 x 300mm sq. cables for this project.

The Captioned power application is for office use only and there is lack of power supply before.

The most shortest cable route is to lay and connect cable from existing cable network to the customer's meter box. Since the existing cable located in CPA zone, The new cable laying work will also fall into the CPA zone unavoidably.

New underground cables laid under vacant, which bring minor impact to existing landscape of CPA zone. No visual impact would occur after the underground cable laying works.

In conclusion, the above method is the best method with least environmental impact for this application.
