

Appendix D

Revised Traffic Impact Assessment

DOCUMENT STATUS CONTROL RECORD

**Application for Amendment of Plan under Section 12A of the Town Planning Ordinance
(Cap. 131) to Rezone the Application Site from "Green Belt" and Area Shown as "Road"
to "Residential (Group C)5" for Proposed Residential Development at Various Lots in
D.D. 210 and Adjoining Government Land, Pak Wai, Sai Kung**

Traffic Impact Assessment Report

Originating Organisation : LLA Consultancy Limited Unit 610, 6/F, Island Place Tower, 510 King's Road, North Point, Hong Kong	Prepared by: SKL	SKL	Date: 21 October 2025
	Approved by: SLN	SLN	Date: 21 October 2025
	Revision No.: -		Date of Issue: 21 October 2025

Note: LLA Consultancy Limited. All rights reserved. Except for the internal use by the client for whom this document is prepared by LLA Consultancy Limited. No part of this document, which contains valuable trade secrets of a confidential nature to LLA Consultancy Limited may be (1) reproduced, stored in a retrieval system, or transmitted in any format or by any means, electronic, mechanical, photocopying, recording or otherwise; or (2) disclosed to any third party, without the prior consent of LLA Consultancy Limited.

1 INTRODUCTION

1.1 Background

- 1.1.1 The Applicant intends to develop the Site into a residential development at various lots in D.D.210, Pak Wai, Sai Kung ("the Site").
- 1.1.2 The Site is currently zoned as "Green Belt" ("GB") and "Road" under the Draft Ho Chung Outline Zoning Plan (OZP) No. S/SK-HC/12. The Applicant proposes amendments to the Draft Ho Chung Outline Zoning Plan (OZP) No. S/SK-HC/12 by rezoning the Application Site from "Green Belt" ("GB") and area shown as "Road" to "Residential (Group C)5" ("R(C)5"), with a maximum plot ratio of 0.6 and maximum building heights (BH) of 4 storeys (excluding basements) to facilitate the proposed residential development.
- 1.1.3 LLA Consultancy Limited was commissioned to carry out a traffic impact assessment study for the proposal to assess the potential traffic impact on its adjacent road network, in support of the planning application. This report presents the finding of the study.

1.2 Objectives

- 1.2.1 The objectives of the traffic impact assessment study are as follows:
- to review the existing traffic conditions in the surrounding road network;
 - to estimate the potential traffic generation due to the proposed development;
 - to assess the future traffic situation in the surrounding road network;
 - to appraise the potential traffic impact of the proposed development; and
 - to recommend the transport facilities provisions for the proposed development.

2 THE PROPOSED DEVELOPMENT

2.1 The Site

- 2.1.1 As shown in **Figure 2.1**, the Site is located near the J/O Hiram's Highway/Hing Keng Shek Road. The Site area is about 12,692 m².

2.2 Development Schedule

- 2.2.1 The Site will comprise of 4 residential towers with 120 residential units. The development parameters are summarized in **Table 2.1**.

Table 2.1 Proposed Development Schedule

Item	Parameter
Site Area	About 12,692 m ²
Plot Ratio	About 0.6
Total GFA	About 7,615.2 m ²
Domestic GFA	About 7,615.2 m ²
Number of Residential Blocks	4 blocks
Number of Residential Units	120 units
Estimated Residential Population	360

3 EXISTING TRAFFIC SITUATION

3.1 Existing Traffic Conditions

- 3.1.1 Hing Keng Shek Road serves as a local road connecting to Hiram's Highway. It is a single carriageway with few accesses for the low-density developments and villages nearby.
- 3.1.2 Hiram's Highway is a major road in the eastern part of New Territories connecting Sai Kung with Clear Water Bay Road. The section of Hiram's Highway between Clear Water Bay Road and Po Tung Road carried an AADT of 22,860 vehicles in 2023.

3.2 Existing Junction Capacity Assessment

- 3.2.1 In order to assess the existing traffic conditions, a traffic count survey was carried out at the following locations in the vicinity of the Site on 13 October 2025 (Monday) during 07:30 – 09:30 and 17:30 – 19:30 and 11 October 2025 (Saturday) from 12:00 to 19:00. The locations of the surveyed junctions are presented in Figure 3.1.

- Hiram's Highway/Hing Keng Shek Road Roundabout
- Hiram's Highway/Ho Chung Road
- Hiram's Highway/ New Hiram's Highway/ Nam Pin Wai Road

- 3.2.2 The identified weekday AM, weekday PM and weekend peak hours were 08:00 – 09:00, 17:45 – 18:45 and 16:45 – 17:45, respectively and the surveyed traffic flows are presented in Figure 3.2.

3.3 Existing Junction Capacity Assessment

- 3.3.1 Based on the existing traffic flows, the performances of the key junctions during the peak hour were assessed. The results are summarized and presented in Table 3.1 and the detailed junction capacity calculation sheets are attached in Appendix A.

Table 3.1 Existing Junction Performance

No.	Junction Location	Type/ Capacity Index ⁽¹⁾	Junction Performance		
			Weekday AM Peak	Weekday PM Peak	Weekend Peak
J1	Hiram's Highway/Hing Keng Shek Road Roundabout	Roundabout /DFC	0.51	0.43	0.50
J2	Hiram's Highway/Ho Chung Road	Signalized/RC	106%	78%	97%
J3	Hiram's Highway/ New Hiram's Highway/ Nam Pin Wai Road	Roundabout/ DFC	0.58	0.57	0.50

Note: (1) RC = Reserve Capacity; DFC = Design Flow to Capacity ratio

3.4 Existing Link Capacity Assessment

- 3.4.1 The Volume to Capacity (V/C) Ratios of Hiram's Highway were assessed and the results are presented in Table 3.2.

Table 3.2 Link Capacity Assessment

Direction	Bound	Capacity (pcu/hr) ⁽¹⁾	Traffic Flow (pcu/hr)			V/C Ratio		
			AM	PM	WN	AM	PM	WN
Hiram's Highway ⁽²⁾	EB	1,020	761	1,005	974	0.75	0.99	0.95
	WB	1,020	1,031	785	1,008	1.01	0.77	0.99
Hiram's Highway ⁽³⁾	NB	3,120	750	1,019	1,005	0.24	0.33	0.32
	SB	3,120	1,083	799	1,039	0.35	0.26	0.33
Hiram's Highway ⁽⁴⁾	NB	3,120	786	1,121	1,066	0.25	0.36	0.34
	SB	3,120	1,177	850	1,065	0.38	0.27	0.34
Hiram's Highway ⁽⁵⁾	NB	3,120	878	1,256	1,149	0.28	0.40	0.37
	SB	3,120	1,282	932	1,133	0.41	0.30	0.36
Hing Keng Shek Road	2-way	120	51	38	69	0.43	0.32	0.58

Notes: AM – Weekday AM Peak Hour; PM – Weekday PM Peak Hour; WN – Weekend Peak Hour

- (1) Capacity refers to TPDM Vol.2 Ch. 2.4. A factor of 1.2 (based on the traffic count survey result) is adopted to convert the capacity from veh/hr to pcu/hr.
- (2) The section between Hing Keng Shek Road and Pak Sha Wan Street.
- (3) The section between access of Luk Cheung Road and Hing Keng Shek Road.
- (4) The section between Ho Chung Road and Luk Mei Tsuen Road.
- (5) The section between Nam Pin Wai Road and Ho Chung Road.

3.4.2 As shown in **Table 3.2**, the concerned road sections are operating with spare capacity during weekday AM, weekday PM and weekend peak hours, except the section of Hiram's Highway between Hing Keng Shek Road and Pak Sha Wan Street which is operating at its capacity.

3.5 Public Transport Services

3.5.1 At present, there are few franchised bus and green minibus routes travelling along Hiram's Highway and the details of these routes. The nearby bus stops of the Site are listed out in **Table 3.3** and shown in **Figure 3.3**, respectively.

Table 3.3 Existing Public Transport Services

Mode	Route No.	Terminating Points	Frequency (min)
Bus	92	Sai Kung – Diamond Hill Station	15 – 30
	96R ⁽¹⁾	Wong Shek Pier – Diamond Hill Station	25 – 30
	292P	Sai Kung – Kwun Tong (Yue Man Square)	07:30
	792M	Sai Kung – Tseung Kwan O Station	15 – 30
GMB	1	Sai Kung – Kowloon Bay (Telford Gardens)	8 – 20
	1A	Sai Kung – Diamond Hill (Choi Hung Road) Public Transport Interchange	4
	1S ⁽²⁾	Sai Kung – Diamond Hill (Choi Hung Road) Public Transport Interchange	10 – 15
	2	Sai Kung – Ho Chung	15 – 30
	12	Sai Kung – Po Lam	10 – 15

Mode	Route No.	Terminating Points	Frequency (min)
	101M	Sai Kung – Hang Hau Station (via Sai Kung North Public Transport Interchange)	3 – 30

Note: (1) Service on Saturdays, Sundays and Holidays.
(2) Overnight Service.

3.5.2 An on-site observation was carried out to identify the occupancy of the franchised bus and green minibus services in the AM peak hour and the results are summarized in **Table 3.4**.

Table 3.4 Occupancy of Existing Franchised Bus and Green Minibus Services during AM Peak Hour

Route No.	Observed Vehicular Trips	Passenger Capacity ⁽¹⁾	Passengers on Bus upon Arrival	Total No. of passengers		Passengers on Bus upon Leave	Occupancy
				Boarding	Alighting		
		[a]	[b]	[c]	[d]	[e] = [b]+[c]-[d]	[f] = [e] / [a]
Sai Kung Bound							
Bus 92	3	360	80	0	4	76	21%
Bus 792M	3	360	50	0	0	50	14%
GMB 1	7	112	56	2	0	58	52%
GMB 1A	22	352	229	3	5	227	64%
GMB 2	3	48	23	0	0	23	48%
GMB 12	4	64	20	0	0	20	31%
GMB 101M	20	320	178	0	2	176	55%
Total	62	1616	636	5	11	630	39%
Kowloon Bound							
Bus 92	2	240	90	2	1	91	38%
Bus 792M	2	240	90	5	0	95	40%
GMB 1	4	64	64	0	0	64	100%
GMB 1A	23	368	361	2	0	363	99%
GMB 2	2	32	16	0	0	16	50%
GMB 12	2	32	32	0	0	32	100%
GMB 101M	17	272	272	0	0	272	100%
Total	52	1248	925	9	1	933	75%

Note: (1) Assume the capacity of each franchised bus and green minibus is 120 pax and 16 pax, respectively.

4 FUTURE TRAFFIC SITUATION

4.1 Design Year

- 4.1.1 The completion year of the proposed development is expected to be 2031. As a result, the design year of the traffic impact assessment should be three years after the completion year, i.e., 2034.

4.2 Traffic Forecast

ATC Historical Data

- 4.2.1 Reference was made to the 2019 to 2023 Annual Traffic Census Reports, published by the Transport Department, to determine the traffic growth. The traffic data recorded at the counting stations in the vicinity of the Development Site is shown in **Table 4.1**.

Table 4.1 Annual Traffic Census Data

Stn. No.	Road Section			AADT ⁽¹⁾					Average Growth%
	Road	From	To	2019	2020	2021	2022	2023	
5017	Clear Water Bay Rd	On Sau Rd	Hiram's Highway	28,980	28,900 (-0.3%)	29,100 (0.7%)	27,720 (-4.7%)	29,080 (4.9%)	0.1%
5466	Clear Water Bay Rd	Hang Hau Rd	Hiram's Highway	20,240	19,110 (-5.6%)	20,020 (4.8%)	19,140 (-4.4%)	19,160 (0.1%)	-1.4%
6055	Hiram's Highway	Clear Water Bay Rd	Po Tung Rd	24,280	23,360 (-3.8%)	24,460 (4.7%)	23,480 (-4%)	22,860 (-2.6%)	-1.5%
Total				73,500	71,370 (-2.9%)	73,580 (3.1%)	70,340 (-4.4%)	71,100 (1.1%)	-0.8%

Note: (1) Figures in bracket indicated the % increase between two years.

- 4.2.2 **Table 4.1** shows that the AADT at the concerned ATC stations has an overall annual growth of **negative 0.8%** in between the years 2019 to 2023.

Territorial Population and Employment Data Matrix (TPEDM) Projection Data

- 4.2.3 Reference was also made to the 2019-based TPEDM published by the Planning Department. The population and employment data of year 2019 and 2031 in the Southeast New Territories (Other Area) are summarized in **Table 4.2**.

Table 4.2 Population and Employment Data in Southeast New Territories (Other Area)

Year	2019	2026	2031
Population	68,900	65,800	59,750
Employment	27,250	27,750	28,100
Total	96,150	93,550	87,850
Average Annual Growth %		-0.4% (2019 to 2026)	-1.2% (2026 to 2031)

4.2.4 As shown in **Table 4.2**, the projected average annual growth rates of the population and employment total number under the TPEDM in Southeast New Territories (Other Area) are negative 0.4% and negative 1.2% between the years 2019 – 2026 and 2026 – 2031, respectively. Having considered the rates derived from ATC and TPEDM data, to be conservative, a nominal growth rate of +1.0% will be adopted for the subsequent traffic forecast.

4.3 Traffic Generation of the Proposed Development

4.3.1 Reference was also made to the latest set of traffic generation and attraction rates documented in Chapter 3 "Transport Considerations of Town Plans" of the TPDM, for the estimation of the traffic generated by the proposed development. The traffic generation and attraction numbers were shown in **Table 4.3**

Table 4.3 Development Traffic Generation

Proposed Use	Unit / Content	Weekday AM Peak Hour			Weekday PM Peak Hour			Weekend Peak Hour ⁽¹⁾		
		Gen.	Att.	Total	Gen.	Att.	Total	Gen.	Att.	Total
Mean Trip rates from TPDM										
Residential – 70m²	pcu/hr/flat	0.0888	0.0515	-	0.0356	0.0480	-	0.0356	0.0480	-
Traffic Generation/Attraction										
Proposed Development	120 flats	11	7	18	5	6	11	5	6	11

Note: Gen. – Generation; Att. – Attraction.

(1) The trip rates for PM peak hour are adopted for the weekend peak hour.

4.3.2 In view of the above, the proposed development would generate two-way traffic flows of 18 pcu/hr in the weekday AM peak hour, 11 pcu/hr in the weekday PM peak hour and 11 pcu/hr in the weekend peak hour. The traffic distribution is shown diagrammatically in **Figure 4.1**.

4.4 Planned and Approved Developments

4.4.1 To estimate the future traffic flows generated and attracted by the nearby planned and approved developments, updated information has been obtained from available information regarding the planned and approved developments in the vicinity of the proposed development site, the details of these developments are listed in **Table 4.4**.

Table 4.4 Planned and Approved Developments

Ref.	Location	Use	Development Parameters
A	Various Lot in D.D. 210, Ho Chung	Residential	2,422 m ² GFA (15 flats)
B	Lot 1003 in D.D. 214, Ho Chung	Residential	5,344 m ² GFA (90 flats)
C	Lot 2189 in D.D. 244, Nam Pin Wai	Residential	8,320 m ² GFA (139 flats)
D	Various Lots in D.D. 244 and Adjoining Government Land, Ho Chung, Sai Kung	Residential	13,719 m ² GFA (58 flats)
E	Various Lots in D.D. 210 and 244 and Adjoining Government Land, Ho Chung, Sai Kung	Residential	2,393 m ² GFA (8 flats)

4.4.2 Reference is made to Volume 1 of the TPDM published by the TD on the trip rates of the foregoing developments to estimate their traffic generation and attraction. The total traffic generation and attraction by these adjacent planned/committed developments are summarized in **Table 4.5**.

Table 4.5 Traffic Generation of the Planned and Approved Developments

Use	Use / Content	AM Peak Hour			PM Peak Hour			Weekend Peak Hour ⁽¹⁾		
		Gen.	Att.	Total	Gen.	Att.	Total	Gen.	Att.	Total
Adopted TPDM Mean Trip Rates										
Residential – 60m ²	pcu/hr/flat	0.0718	0.0425	-	0.0286	0.0370	-	0.0286	0.0370	-
Residential – 180m ²	pcu/hr/flat	0.2772	0.1769	-	0.1635	0.2394	-	0.1635	0.2394	-
Residential – 240m ²	pcu/hr/flat	0.3012	0.2189	-	0.2235	0.3234	-	0.2235	0.3234	-
Residential – 300m ²	pcu/hr/flat	0.3252	0.2609	-	0.2835	0.4074	-	0.2835	0.4074	-
Traffic Generation										
Site A	15 flats	5	3	8	3	4	7	3	4	7
Site B	90 flats	7	4	11	3	4	7	3	4	7
Site C	139 flats	10	6	16	4	6	10	4	6	10
Site D	58 flats	18	13	31	13	19	32	13	19	32
Site E	8 flats	3	3	6	3	4	7	3	4	7
Total		43	29	72	26	37	63	26	37	63

Note: Gen. – Generation; Att. – Attraction.

(1) The trip rates for PM peak hour are adopted for weekend peak hour.

4.4.3 As shown in **Table 4.5**, the planned/committed developments will generate a total two-way traffic of 72, 63 and 63 pcu/hr during weekday AM, weekday PM peak hour and weekend peak hour respectively. The estimated traffic generation will be assumed to be travelling in the local road network in the same proportions as the existing traffic demands when traffic forecast is prepared in this Study.

4.5 Reference and Design Flows

4.5.1 The 2034 Reference Flows, i.e. the traffic flows in the vicinity without the proposed development, were estimated based on the following equation.

$$2034 \text{ Reference Flows} = 2025 \text{ Existing Traffic Flows} \times (1 + 1.0\%)^9$$

4.5.2 The 2034 Design Flows, i.e. the traffic flows in the local road network with the traffic generated by the proposed residential development, were estimated based on the following equation:

$$2034 \text{ Design Flows} = 2034 \text{ Reference Flows} + \text{Traffic Flows Generated by the Proposed Development}$$

4.5.3 The 2034 Reference and Design Flows are shown in **Figures 4.2** and **4.3**, respectively.

4.6 Junction Capacity Assessment

4.6.1 Junction capacity analysis was carried out for the assessment year 2034. The assessment results are shown in **Table 4.6** and the detailed calculation sheets are attached in **Appendix B**.

Table 4.6 2034 Junction Capacity Assessments

No.	Junction Location	Type/ Index ⁽¹⁾	Reference			Design		
			AM	PM	WN	AM	PM	WN
J1	Hiram's Highway/Hing Keng Shek Road Roundabout	Roundabout /DFC	0.56	0.47	0.55	0.56	0.47	0.55
J2	Hiram's Highway/Ho Chung Road	Signalized /RC	86%	69%	80%	85%	67%	80%
J3	Hiram's Highway/ New Hiram's Highway/ Nam Pin Wai Road	Roundabout/ DFC	0.65	0.63	0.56	0.65	0.64	0.56

Notes: AM – Weekday AM Peak Hour; PM – Weekday PM Peak Hour; WN – Weekend Peak Hour.

(1) RC = Reserved Capacity; DFC = Design Flow to Capacity Ratio.

4.6.2 As shown in **Table 4.6**, all the concerned junctions will perform with spare capacity for both the Reference and Design Scenarios in 2034. Therefore, the adjacent road network will be able to cope with the traffic generated by the proposed development.

4.7 Link Capacity Assessment

4.7.1 The V/C Ratios of Hiram's Highway were assessed and the results are presented in **Table 4.7**.

Table 4.7 Year 2034 Link Capacity Assessments

Direction	Bound	Capacity (pcu/hr) ⁽¹⁾	Traffic Flow (pcu/hr)			V/C Ratio		
			AM	PM	WN	AM	PM	WN

Hing Keng Shek Road	2-way	960 ⁽⁷⁾	74	52	86	0.08	0.05	0.09

Notes: AM – Weekday AM Peak Hour; PM – Weekday PM Peak Hour; WN – Weekend Peak Hour

- (1) Capacity refers to TPDM Vol.2 Ch. 2.4. A factor of 1.2 (based on the traffic count survey result) is adopted to convert the capacity from veh/hr to pcu/hr.
- (2) The section between Hing Keng Shek Road and Pak Sha Wan Street.
- (3) The section of Hiram's Highway will be widened to dual two-lane carriageway under Hiram's Highway Improvement Stage 2.
- (4) The section between access of Luk Cheung Road and Hing Keng Shek Road.
- (5) The section between Ho Chung Road and Luk Mei Tsuen Road.
- (6) The section between Nam Pin Wai Road and Ho Chung Road.
- (7) The section between proposed vehicular access and Hiram's Highway will be widened (discussed in **Section 5.1** below).

4.7.2 As shown in **Table 4.6**, all the concerned road sections will operate with capacity during weekday AM, weekday PM and weekend peak hours in both reference and design scenarios.

4.8 Review of Public Transport Facilities

4.8.1 Based on the tentative flat mix, the overall population of the proposed development is about 360. Reference has been made to the published "Travel Characteristics Survey (TCS) 2011 Final Report". According to the Report, the daily mechanized trip rate per population is 1.83 trips (two-way) and the morning peak hour accounted for about 12% of the daily trips for the two-way trips. It is assumed that 90% of the trips are in outbound direction in the AM peak hour. Based on the above and most of residents would use public transport services, the estimated public transport demand of the proposed development in outbound direction in AM peak hour is about 72 pax/hr (i.e. $360 \times 1.83 \times 0.12 \times 0.9$).

4.8.2 The public transport demand induced by the planned developments mentioned in **Section 4.4** is also considered. According to "Hong Kong Annual Digest of Statistics" published by the Census and Statistic Department, the average household size for the territory in year 2022 is 2.7, this figure is adopted for estimating the population of these developments. By following the methodology described in the aforesaid paragraph, the estimated public transport demand of the planned developments in outbound direction in AM peak hour is about 166 pax/hr (i.e. $(15+90+139+58+8) \times 2.7 \times 1.83 \times 0.12 \times 0.9$).

4.8.3 Based on the existing public transport vacancy (as estimated in **Table 3.3**) and the above projected demand, the existing bus/green minibus services will still operate with capacity after accommodating the future demand induced by the proposed development and the planned developments.

5 PROVISION OF TRANSPORT FACILITIES

5.1 Vehicular Access Arrangement

5.1.1 The vehicular access of the proposed development will be located at Hing Keng Shek Road. It is proposed to widen the existing section of Hing Keng Shek Road between the proposed vehicular access and Hiram's Highway to 6.0m for a 2-lane single carriageway. A 2.0m wide footpath will be also provided within the Site connecting the proposed development and Hiram's Highway and the footpath will also be opened for public use. The proposed traffic arrangement is shown in **Figure 5.1**. The project proponent will be responsible for implementing the improvement works and will undertake the management and maintenance responsibility for the footpath within the Site.

5.1.2 Swept path analysis is conducted to demonstrate the manoeuvring of vehicles entering and leaving the Site via the proposed vehicular access and shown in **Figures 5.2 – 5.3**. To ensure sufficient sightline is provided for the proposed run-out, a sightline analysis is conducted and presented in **Figure 5.4**.

5.2 Internal Transport Facilities

5.2.1 The internal transport facilities for the proposed development will be provided in accordance with the Hong Kong Planning Standards and Guidelines (HKPSG). The required and the proposed provisions for the proposed development are shown in **Table 5.1**.

Table 5.1 Proposed Car Parking and Loading/Unloading Facilities

Type	HKPSG's Requirements						Required Provision	Proposed Provision
Proposed Residential Development (120 flats)								
Car Parking Space	For Residents Parking Requirements = GPS x R1 x R2 x R3 where						14 – 24	24
	Unit Size	No. of Unit	GPS	R1	R2	R3		
	40 m ² <FS ≤ 70 m ²	60	1 space per 4 – 7 units	1.2	1	1.3		
	70 m ² < FS ≤ 100 m ²	60		2.4	1	1.3		
	For Visitors Visitor car parking for private residential developments with more than 75 units per block should be provided at 5 visitor spaces per block in addition to the requirements, or as determined by the Authority. For private residential developments with 75 units or less per block, the visitor car parking provision will be determined by TD on a case-by-case basis.						8	8
	TOTAL CAR PARKING						49 – 79	79
Motorcycle Parking Space	1 space per 100 - 150 flats						1 – 2	2
Loading / Unloading Bay	1 bay per residential block or as determined by the Authority.						4	4

5.2.2 **Table 5.2** lists out a summary of the numbers and the dimensions required for each type of spaces in the proposed development. The proposed car park layout plan is enclosed in **Appendix C**.

Table 5.2 Summary of Overall Transport Facilities Provision

Facilities	Dimensions	Proposed Provision
Car Parking Space	2.5m (W) x 5.0m (L) x 2.4 (H)	77
Disable Car Parking Space	3.5m (W) x 5.0m (L) x 2.4 (H)	2
Goods Vehicle Loading and Unloading Bay	3.5m (W) x 11.0m (L) x 4.7m(H)	4
Motorcycle Parking Space	1.0m (W) x 2.4m (L) x 2.4 (H)	2

5.3 Pedestrian Access Arrangement

5.3.1 At present, there is a cautionary crossing for pedestrians to walk across Hiram's Highway to reach the bus layby for Kowloon/TKO-bound buses. For the pedestrians to walk to the bus layby for Sai Kung-bound buses, it is proposed to improve the pedestrian connectivity by providing a cautionary crossing to walk across Hing Keng Shek Road as shown in **Figure 5.5**.

6 SUMMARY AND CONCLUSION

6.1 Summary

- 6.1.1 The Applicant intends to develop the Site into a residential development at various lots in D.D.210, Pak Wai, Sai Kung. The proposal will have about 120 residential units.
- 6.1.2 Traffic count surveys were carried out on 13 October 2025 (Monday) during 07:30 – 09:30 and 17:30 – 19:30 and 11 October 2025 (Saturday) from 12:00 to 19:00. The identified weekday AM, weekday PM and weekend peak hours were 08:00 – 09:00, 17:45 – 18:45 and 16:45 – 17:45, respectively. Junction and link capacity assessment based on the observed flows shows that all concerned junctions and road links are performing satisfactorily during weekday AM, weekday PM and weekend peak hours, except the section of Hiram's Highway between Hing Keng Shek Road and Pak Sha Wan Street which is operating at its capacity.
- 6.1.3 The proposed development would generate two-way traffic flows of 18 pcu/hr in the weekday AM peak hour, 11 pcu/hr in the weekday PM peak hour and 11 pcu/hr in the weekend peak hour. By assigning the additional development traffic to the 2034 Reference Flows, the 2034 Design Flows were obtained.
- 6.1.4 Junction and link capacity assessments were carried out for the key junctions and road links in the vicinity for the year 2034. The results indicated that all junctions and road links will operate satisfactorily for both reference and design scenarios. Therefore, it is anticipated that the proposed development will not induce significant traffic impact to the surrounding road network.
- 6.1.5 The vehicular access of the proposed development will be located at Hing Keng Shek Road. It is proposed to widen the existing section of Hing Keng Shek Road between the proposed vehicular access and Hiram's Highway to 6.0m for a 2-lane single carriageway. A 2.0m wide footpath will be also provided within the Site connecting the proposed development and Hiram's Highway and the footpath will also be opened for public use. The project proponent will be responsible for implementing the improvement works and will undertake the management and maintenance responsibility for the footpath within the Site. In order to improve the pedestrian connectivity, the project proponent will also be responsible for the construction of a cautionary crossing to walk across Hing Keng Shek Road under the proposed development.
- 6.1.6 The internal transport facilities of the proposed development will be provided in accordance with the recommendations in the HKPSG. The proposed development will provide a total of 79 private car parking spaces (including 2 nos. of parking space for disabled users), 2 motorcycle parking spaces and 4 goods vehicle loading / unloading bays.

6.2 Conclusion

- 6.2.1 The findings of the traffic impact assessment indicated that the road network in the vicinity of the Site would be able to cope with the proposed development and the project is considered acceptable in traffic viewpoint.
