Representations in respect of the Draft Pok Fu Lam Outline Zoning Plan No. S/H10/22 are available for public inspection at the Planning Enquiry Counters of the Planning Department and on the Town Planning Board's website at <https://www.tpb.gov.hk/en/plan_making/S_H10_22.html>.

**SCHEDULE OF AMENDMENTS TO
THE APPROVED POK FU LAM OUTLINE ZONING PLAN NO. S/H10/21
MADE BY THE TOWN PLANNING BOARD
UNDER THE TOWN PLANNING ORDINANCE (Chapter 131)**

I. Amendments to Matters shown on the Plan

- Item A – Rezoning of a site between Pok Fu Lam Road and Victoria Road from “Green Belt” (“GB”), “Residential (Group C)6” and area shown as ‘Road’ to “Other Specified Uses” annotated “Global Innovation Centre” (“OU(Global Innovation Centre)”).
- Item B1 – Rezoning of strips of land along Victoria Road from area shown as ‘Road’ to “GB”.
- Item B2 – Rezoning of strips of land along Victoria Road from “GB” to area shown as ‘Road’.
- Item C – Rezoning of a strip of land to the south of Wah Mei House, Wah Fu Estate from “Open Space” to “Residential (Group A)”.

II. Amendment to the Notes of the Plan

- (a) Incorporation of a new set of Notes for the “OU(Global Innovation Centre)” zone.

Town Planning Board

22 March 2024

Draft Pok Fu Lam Outline Zoning Plan No. S/H10/22 (Draft OZP)

Agenda Item 4

[Open Meeting (Presentation and Question Sessions Only)]

Proposed Amendments to the Approved Pok Fu Lam Outline Zoning Plan No. S/H10/21
(MPC Paper No. 3/24)

5. The Secretary reported that the proposed amendments to the Outline Zoning Plan (OZP) for the planning area of Pok Fu Lam involved rezoning of a site at Victoria Road to facilitate the development of the proposed Global Innovation Centre (Amendment Item A), and rezoning of strips of land along Victoria Road (Amendment Items B1 and B2) and in Wah Fu Estate (Amendment Item C) to reflect the as-built conditions. The University of Hong Kong (HKU) was the project proponent of the proposed Global Innovation Centre.

The following Members had declared interests on the item:

- | | |
|---|--|
| Mr Wilson Y.W. Fung
(<i>Vice-chairman</i>) | - being the Chairman of the Accounting Advisory Board of School of Business, HKU; |
| Ms Lilian S.K. Law | - being an Adjunct Associate Professor of the Department of Social Work and Social Administration, HKU; |
| Professor Jonathan W.C. Wong | - having close relative living in Pok Fu Lam; |
| Professor Roger C.K. Chan | - being an Honorary Associate Professor of the Department of Urban Planning and Design, HKU; |
| Mr Ben S.S. Lui | - co-owning with spouse a flat in Pok Fu Lam, his spouse owning a car parking space in Pok Fu Lam, and being a director of a company which owned flats and car parking spaces in Pok Fu Lam; and |
| Professor Bernadette W.S. Tsui | - being an Adjunct Professor of the Department of Social Work and Social Administration, HKU”. |

6. The Committee noted that Mr Ben S.S. Lui had tendered an apology for being unable to attend the meeting, and according to the procedure and practice adopted by the Town Planning Board, as the proposed amendments to the OZP in relation to the Global Innovation Centre (the proposed Centre) were proposed by the Planning Department (PlanD), the interests of Members having affiliations with HKU on the item only need to be recorded and they could stay in the meeting. The Committee agreed that as the residence of the close relative of Professor Jonathan W.C. Wong had no direct view of the amendment sites, he could stay in the meeting.

Presentation and Question Sessions

7. The following representatives from the Innovation, Technology and Industry Bureau (ITIB), PlanD and HKU were invited to the meeting at this point:

ITIB

Miss Fung Long Yin, Betty - Assistant Secretary for Innovation, Technology and Industry (AS/IT&I)

PlanD

Ms Janet K.K. Cheung - District Planning Officer/Hong Kong (DPO/HK)
Ms Erica S.M. Wong - Senior Town Planner/Hong Kong (STP/HK)
Mr Ronald C.H. Chan - Town Planner/Hong Kong (TP/HK)

HKU

Professor Xiang Zhang]
Professor Richard Y.C. Wong] President's Office
Mr Syrus Tsui]

Professor Vivian Yam]
Professor Xiaobo Yin] Professoriate Staff
Professor Anderson Shum]

Mr Jeffrey Sy]
Ms Bella Fan]
Mr Joseph Kong] Estates Office
Ms Deborah Chung]
Dr Paul Hunt]

Ms Michelle Lam - Communications and Public Affairs Office

HKU's Consultants

Mr Lim Wan Fung, Bernard Vincent] Architecture Design and Research Group
Mr Chan Chun Yu, Ricco] Limited

Mr Chan Kim On] Vision Planning Consultants Limited
Mr Wong Sai Wai, Wilson]

Mr Joseph C.C. Wong - Ho Wan SPB Limited

Mr Ko Yow

- Ko Landscape Architects Limited

8. With the aid of a PowerPoint presentation, Ms Erica S.M. Wong, STP/HK, PlanD, briefed Members on the background of the proposed amendments to the OZP, technical considerations, consultation conducted and departmental comments as details in the Paper. The proposed amendments were:

- (a) Amendment Item A - rezoning of a site between Pok Fu Lam Road and Victoria Road (Item A Site) from “Green Belt” (“GB”), “Residential (Group C)6” and area shown as ‘Road’ to “Other Specified Use” annotated “Global Innovation Centre” (“OU(Global Innovation Centre)”);
- (b) Amendment Item B1 - rezoning of strips of land along Victoria Road from area shown as ‘Road’ to “GB”;
- (c) Amendment Item B2 - rezoning of strips of land along Victoria Road from “GB” to area shown as ‘Road’; and
- (d) Amendment Item C - rezoning of a strip of land at Waterfall Bay Road from “Open Space” to “Residential (Group A)”.

[Mr Franklin Yu, Mr Ricky W.Y. Yu and Professor Bernadette W.S. Tsui joined the meeting during PlanD’s presentation.]

9. With the aid of a PowerPoint presentation, Professor Xiang Zhang, Professor Richard Y.C. Wong, Professor Vivian Yam, Professor Xiaobo Yin, Professor Anderson Shum and Mr Jeffrey Sy, HKU’s representatives, briefed Members on the following main points:

Background

- (a) as announced in the 2021 Policy Address, the Government agreed in principle to reserve a site at Pok Fu Lam for HKU to construct facilities for deep technology;
- (b) in the 2023-2024 Budget, the Government earmarked HK\$3 billion to

promote the development of facilities to enhance basic research in frontier technology, and such intention was re-emphasised in the recently announced 2024-2025 Budget;

- (c) deep technology was based on scientific discoveries of inventions and focused on production of knowledge with emphasis on interdisciplinary research and collaborations, aiming to addressing human grand challenges;
- (d) the proposed Centre would be an upstream deep technology research facility for Hong Kong's innovation and technology (I&T) ecosystem, acting as a hub for basic research and fountainhead for original discoveries, which aligned with the Government's policy intention in fostering further development in basic research;
- (e) the Central People's Government advocated that strengthening basic research was imperative for self-sufficiency in science and technology and the progress in basic research was the key to tackle technology bottleneck. In this regard, eight state-level laboratories were established in different Mainland cities;

Importance of Upstream Deep Technology Research

- (f) upstream deep technology research was transformative and the fountainhead for technology which could generate new industry sectors and inspire new area of study;
- (g) through interdisciplinary research and collaboration, upstream deep technology research would provide solutions to many global challenges, including cancer treatment, vaccine development, clean technology development as well as innovation for climate change;

Strategic Importance of the Proposed Centre

- (h) the proposed Centre would be a major driving force in developing Hong

Kong into an international I&T hub, and this was in line with the National 14th Five-Year Plan. It aligned with the Government's policy of attracting talents, as this facility would help nurture and host high calibre research talents, both locally and internationally, to station in Hong Kong. It would also enable research and innovation to work organically, creating a positive feedback loop where talents attracted talents;

- (i) Hong Kong had always been a successful cradle for world class scientists and the proposed Centre was essential to provide new infrastructure for research. With the most advanced facilities and laboratories, the proposed Centre would help diversify the type of research that Hong Kong could accommodate;
- (j) the proposed Centre would be the first ever deep technology research facility in Hong Kong. Unlike other I&T centres in Hong Kong, the proposed Centre would focus solely on upstream research which would generate innovative ideas, and would act as a bridge between upstream research and downstream applications in other I&T centres in Hong Kong, such as the Loop. The proposed Centre would also help connect Mainland Research & Development (R&D) institutes with the international counterparts;
- (k) on one hand, the proposed Centre would provide existing industries with more efficient and cost effective solutions, such as better manufacturing process and more advanced automation, and on the other hand, it would enable the development of new industry which in turn would create new job opportunities;
- (l) by developing a technological ecosystem that enabled start-ups to thrive, the proposed Centre would act as a springboard for local gross domestic product;
- (m) the proposed Centre would connect with the Medical Campus of HKU (HKUMed campus) and Queen Mary Hospital on one end and Cyberport on the other, creating an innovation corridor for deep technology which had the

potential to become the central innovation hub of Hong Kong. It would further uplift the economic and demographic landscapes of the Southern District as evidenced from the experience of similar developments in other countries, such as the Silicon Valley. Leveraging on the close proximity to the HKUMed campus and its expansion, the proposed Centre would also provide venue for comprehensive training and advanced research facilities for future healthcare professionals;

- (n) the proposed Centre would become a hub for secondary school students to cultivate their interests in scientific research and provide a head start in local STEM education;

The Proposal

- (o) the proposed Centre with a site area of about 4.7ha was sandwiched between Pok Fu Lam Road and Victoria Road. A total maximum gross floor area (GFA) of about 222,000m², including about 10,000m² domestic GFA for scholars' residence/staff quarters, and a maximum building height of 158mPD were proposed. Under the indicative scheme, a terraced building design with vertical greening and green roofs was proposed to enable the proposed Centre be better blending in with the surrounding areas. The proposed Centre would be developed in cluster form in order to optimise building gaps and hence, maximising air ventilation and visual permeability;
- (p) regarding vehicular access arrangement, with the site spanning over 450m in length, it was proposed to have one access at Pok Fu Lam Road and two accesses at Victoria Road. The fourth access was proposed to connect the proposed Centre with the adjoining HKUMed campus expansion and the existing Sassoon Road campus;
- (q) for pedestrian connectivity, a barrier free and traffic free pedestrian network with escalators and lifts connecting between Pok Fu Lam Road and Victoria Road, and with the adjoining HKUMed campus and the existing Sassoon Road campus was proposed;

- (r) on landscape design aspect, trees would be planted in clusters to create natural habitats and new trees of fruit bearing species would be selected to enhance biodiversity. Landscape courtyard would be incorporated along the main walkways for passive recreational activities. Communal open spaces would be provided within the proposed Centre for enjoyment of the students, staff and the general public. Taking into account the comments from the Southern District Council (SDC) during the consultation in January 2024, HKU would explore the possibility to incorporate pet-friendly facilities in the communal open spaces;
- (s) various technical assessments were conducted to ascertain the feasibility of the proposed Centre and it was concluded that with the implementation of appropriate enhancement measures and infrastructural works, the proposed Centre was technically feasible. HKU would continue to work with the relevant authorities to implement the measures/works;
- (t) although the proposed Centre might bring about inconvenience to the local community during the construction stage, modern construction methods would be adopted to minimise the potential impacts; and
- (u) in the long run, the proposed Centre would enhance the accessibility of the locality by providing barrier-free pedestrian connections and provide a wider range of public activity spaces to the local community.

[Ms Sandy H.Y. Wong joined the meeting during HKU's presentation.]

10. The Chairman remarked that there were three proposed amendment items to the OZP. HKU's representatives had made a detailed presentation on Amendment Item A, whereas Amendment Items B and C were to reflect the existing conditions of the respective sites. Should the Committee agree to the proposed amendments, the draft OZP would be gazetted for public inspection. The representations on the OZP amendments received would be submitted to the Board for consideration. The Chairman then invited questions from Members.

Strategic Positioning of the Proposed Centre and Site Selection

11. A Member asked whether the proposed Centre was the only one of its kind and whether there were other similar innovation centres managed by other universities in Hong Kong. In response, Ms Janet K.K. Cheung, DPO/HK, said that according to HKU's proposal, the proposed Centre was the first of its kind in Hong Kong.

12. Some Members raised the following questions:

- (a) how would the upstream research at the proposed Centre differ from other I&T developments in Hong Kong, including San Tin Technopole, Cyberport and Hong Kong Science and Technology Parks, and what would be the planning gain of having such innovation centre;
- (b) noting that healthcare was one of the research aspects at the proposed Centre in the future, whether the facility for such research aspect in the proposed Centre would be different from or related to those at the neighbouring HKUMed campus and its expansion;
- (c) the rationale for choosing Pok Fu Lam to locate the proposed Centre rather than other existing or planned I&T developments in Hong Kong; and
- (d) whether the current scale of the proposed Centre with an area of about 4.7ha was adequate for promoting upstream research and boosting I&T development of Hong Kong, and whether more similar facilities would be established, such as in the Northern Metropolis.

13. In response, Professor Xiang Zhang and Professor Richard Y.C. Wong, HKU's representatives, made the following main points:

- (a) the current and committed I&T initiatives in Hong Kong, including those at the Loop and San Tin areas, were mainly related to downstream applications. In order to enhance the I&T ecosystem of Hong Kong,

infrastructure and talents for both upstream research and downstream applications would be required. As evidenced from the experience in the Mainland and other countries, such as Israel and India, it was considered crucial to plan ahead for upstream research to facilitate the development of I&T industry and avoid bottleneck in the innovation process. The proposed Centre would be a facility for upstream research while those in the San Tin Technopole, for example, may focus more on transforming ideas to valuable products. These research facilities would complement each other and form a comprehensive I&T ecosystem;

- (b) the HKUMed campus expansion was developed in response to Government's policy of enhancing the training for more medical staff where there would be all sorts of teaching, training and researches on medical and healthcare conducted by the Faculty of Medicine of HKU. Yet, it could create synergy effect with the proposed Centre, which focused more on basic research with researchers from not only HKU but also other institutions in Hong Kong and from overseas;
- (c) as the proposed Centre would be managed by HKU, it would be beneficial in management and operation terms to locate the proposed Centre close to other HKU premises and the Main Campus of HKU. Also, as the proposed Centre was for basic research, being in proximity to downstream applications was not necessary as the two processes involved different parties; and
- (d) development of basic research was still in a very initial stage in Hong Kong and it might take decades for the establishment to mature. The scale of the proposed Centre was comparable to most of the state-level laboratories in the Mainland and was considered optimum at this stage. Hence, having another facility of similar nature in another location in Hong Kong was not conceivable in the foreseeable future.

Zoning and Land Use

14. A few Members raised the following questions:

- (a) the rationale for adopting the zoning of “OU(Global Innovation Centre)”, instead of “Government, Institution or Community” (“G/IC”), which was consistent with the zoning for universities campuses, noting that most of the permitted uses under Column 1 of the “OU(Global Innovation Centre)” zone resembled those commonly found in a university;
- (b) whether the concept of “deep technology” and “basic research” would be featured in the statutory planning documents to highlight the uniqueness of the proposed Centre;
- (c) whether there was any restriction on the total GFA dedicated for supporting facilities, such as ‘Shop and Services’, for the “OU(Global Innovation Centre)” zone;
- (d) in addition to building height control, whether other design-related restrictions, such as those under the Sustainable Building Design Guidelines, would be incorporated for the “OU(Global Innovation Centre)” zone; and
- (e) whether there was any assessment on the loss of “GB” zone due to the proposed Centre and whether there would be other planned development at “GB” zones in the area.

15. In response, with the aid of some PowerPoint slides, Ms Janet K.K. Cheung, DPO/HK, PlanD, made the following main points:

- (a) as stated clearly in the Notes of the “OU(Global Innovation Centre)” zone, the planning intention was specifically tailored for the provision of land for development of a Global Innovation Centre by HKU for deep technology research rather than other uses covered by “G/IC” zones. In

deriving the schedule of uses for this specific zoning, reference had been made to the technical assessments conducted for the proposed Centre which confirmed the feasibility of the land use mix, and the schedules of uses of I&T related zonings on other OZPs, such as those for the Hong Kong Science and Technology Parks, Cyberport, etc. Some of the uses might not be permitted under a “G/IC” zoning;

- (b) the concepts of deep technology and basic research of the proposed Centre were specified in paragraph 7.8.6 of the draft Explanatory Statement (ES) of the OZP;
- (c) to provide suitable flexibility at detailed design stage, supporting facilities such as ‘Eating Place’ and ‘Shop and Services’ for the proposed Centre were incorporated under Column 1 of the “OU(Global Innovation Centre)” zone and there would be no statutory planning control on the maximum GFA for such supporting facilities;
- (d) since various technical assessments had already been conducted and confirmed the technical feasibility of the proposed Centre, no further technical assessments were required to support the rezoning proposal at this stage. Specific building design concepts, such as terraced design, were incorporated in the draft ES of the OZP to guide the future development. Relevant government departments would closely monitor the implementation of the proposed Centre through various mechanisms, such as vetting of general building plan submission and imposition of relevant land lease conditions; and
- (e) the Item A Site occupied about 3% of the total area of “GB” zone on the OZP and there was currently no plan to further develop any “GB” site in the area. The Chief Town Planner/Urban Design and Landscape, PlanD, considered that the proposed Centre was not incompatible with the surrounding environment.

16. A Member considered that the zoning of “OU(Global Innovation Centre)” might

be too specific as the uses in the proposed Centre would be similar to those in a standard university and further asked that if there was another innovation centre proposed by a different university in the future, whether such facility would be zoned as “OU(Global Innovation Centre)”. In response, the Chairman stated that universities which usually came with a large campus would generally be zoned as “G/IC” to allow flexibility for different kinds of related uses. For the proposed Centre, a specific land use zoning was considered appropriate to reflect the unique purpose of this particular site as set out in the Policy Address. Besides, the project proponent had undertaken relevant technical assessments to substantiate the feasibility of this specific land use at this particular site. If there were similar facilities to be proposed by other universities in the future, each case would be considered on its own merit.

Ecological, Landscape and Visual Impacts

17. A Member enquired on the nature of the five affected watercourses within Item A Site and if there were any measures proposed to protect them. In response, Ms Janet K.K. Cheung, DPO/HK, said that according to the Ecological Impact Assessment submitted by HKU, the five watercourses found on site were channelised at different levels with low to moderate ecological value. Nonetheless, the watercourses would be preserved and 5m preservation zones offset from them had been proposed to serve as local habitats for existing flora and fauna. Building voids and skylights would be adopted in the design of the proposed Centre to allow sunlight penetrating to the preserved watercourses and nearby vegetation.

18. Noting that some 2,000 trees within Item A Site would be affected and the proposed compensation ratio was less than 1:0.5, a Member asked if the tree compensation ratio could be further increased. In response, Mr Jeffrey Sy, HKU’s representative, stated that the tree compensation ratio was derived after taking into account various factors, such as the footprint of the facilities to be accommodated within the site as well as the vehicular and pedestrian network arrangement. In addition to tree planting, various forms of landscaping such as vertical greening and green roof were proposed. HKU would endeavour to maximise the greening provision as far as practicable.

19. A Member noted that the residential block of the proposed Centre would be close

to Baguio Villa, an existing residential development to the immediate south of Item A Site, and asked whether there would be design/mitigation measures to minimise the possible overlooking effect. In response, Mr Jeffrey Sy, HKU's representative, said that the orientation of the proposed scholars' residence block was designed with a view to minimising the possible overlooking effect on the neighbouring residential developments. HKU would continue to have close dialogues with the local residents during the implementation stage and would further refine the layout design if necessary.

Communal Open Space and Pedestrian Connectivity

20. Some Members raised the following questions:

- (a) whether the café, shops and restaurants and communal open space as proposed in the indicative scheme would be opened to public at all hours;
- (b) measures undertaken to create a weather proof internal connection to facilitate movement of people and goods; and
- (c) whether footbridge would be provided to connect the proposed Centre and the communal open space with the other side of Pok Fu Lam Road to enhance the accessibility.

21. In response, Professor Xiang Zhang and Mr Jeffrey Sy, HKU's representatives, made the following main points:

- (a) as the project was still at an initial stage, the specific management and operation details such as the opening hours and access arrangement of the facilities and open space, were yet to be determined. HKU would determine such management and operation details as the project proceeded and after consulting the relevant stakeholders including the local community; and
- (b) with reference to the design of the HKU Main Campus, it was planned to create a traffic-free and barrier-free pedestrian network throughout

the proposed Centre with connections to the adjoining existing and planned HKU premises and campus with a view to achieving a safe pedestrian environment for the future users as well as the visiting general public.

22. Ms Janet K.K. Cheung, DPO/HK, supplemented that the proposed Centre would be connected with the neighbouring HKUMed campus expansion, which could lead to an existing footbridge across Pok Fu Lam Road and Queen Mary Hospital, as well as other existing HKU premises along Sassoon Road.

Traffic Impacts

23. Some Members raised the following questions:

- (a) whether Victoria Road could accommodate the anticipated traffic flow of the proposed Centre, especially during peak hours;
- (b) the rationale for adopting a design year of 2032 in the preliminary Traffic Impact Assessment (TIA); and
- (c) whether a district-wide comprehensive review on the medium/long term cumulative traffic impact of the proposed Centre had been undertaken in view that there were various other upcoming development initiatives, such as the Wah Fu Estate Redevelopment, proposed in the Pok Fu Lam area.

24. In response, Ms Janet K.K. Cheung, DPO/HK made the following main points:

- (a) a preliminary TIA had been conducted for the proposed Centre to ascertain the technical feasibility of the development from traffic engineering perspective, taking into account the planned and committed traffic improvement schemes in the vicinity. It was concluded that major road links and junctions (except few junctions) would operate satisfactorily within their capacities. Road works/traffic improvement measures were

proposed under the TIA, and the project proponent was required to submit an updated TIA upon confirmation of the design parameters at the detailed design stage and assess the construction traffic impact. Also, in view that the development programme of the project would span across a long timeframe, the project proponent would also be required to submit a traffic review before the commissioning of the proposed Centre;

- (b) under the general practice, the design year adopted in a TIA for assessing the performance of major road links and junctions was usually set at three years after project completion. In this case, given that phase 1 of the proposed Centre would be completed in 2029, hence a design year of 2032 was adopted; and
- (c) the TIA conducted for the proposed Centre had already taken into account the planned and committed developments in the Pok Fu Lam area and it was anticipated that even without taking into account the proposed MTR South Island Line (West) (SIL(W)), the proposed Centre would not cause significant traffic impact onto the local road network.

25. A Member further enquired should the subsequent traffic review revealed that the roads and junctions had exceeded their capacities, and improvement measures were warranted, which party would be responsible for the implementation as well as works expenses. In response, Mr Chow Bing Kay, AC/Urban, Transport Department said that the project proponent would need to implement the traffic improvement measures as identified in the submitted TIA. If additional traffic improvement measures were required in the traffic review before the commissioning of the development, the project proponent should implement the relevant traffic improvement measures for mitigating the associated traffic impact induced from the proposed development at their own cost.

Risk Management

26. A Member enquired whether there was any risk management plan, in particular environmental and chemical aspect, to ensure safety given there would be laboratories in the proposed Centre. In response, Professor Richard Y.C. Wong, HKU's representative, said

that the proposed Centre would be managed by HKU and made available to local and international researchers engaged in upstream research. In this regard, international environmental and safety standards would be strictly adhered to. Also, majority of the proposed facility would be dry laboratories.

Local Consultation

27. A few Members enquired on the consultation with the local community and the neighbouring users, including Ebenezer School, undertaken by HKU and how HKU would continue to maintain communication with them. In response, Mr Jeffrey Sy, HKU's representative, stated that due regards had been paid to the surrounding developments in formulating the development intensity and design of the proposed Centre, such as that the proposed building height of 158mPD was only about 20m above Pok Fu Lam Road and was considered compatible with the surrounding developments. HKU had been in close liaison with SDC to solicit their support and views, and would continue to work with them throughout the implementation of the project. Consultation meetings and regular meetups with the local residents would be conducted. For Ebenezer School to its immediate north, HKU had maintained a close dialogue with them continually.

28. A Member further appealed to HKU that they should not limit their consultation to DC members but should expand further to strenuously engage the general local community. In response, Mr Jeffrey Sy, HKU's representative, assured that HKU would maintain close and regular liaison with the local community and neighbouring users.

Funding and Implementation Arrangement

29. Some Members enquired on the funding arrangement of the proposed Centre, in particular whether the Government would provide any funding to support the development. In response, Professor Xiang Zhang, HKU's representative, stated that funding would be raised from both private and public sectors, locally and from overseas. It would also be funded via the research grants brought along by the future users of the proposed Centre. HKU had recently secured HK\$200 million from a single donor and would continue to seek various funding sources.

30. A Member asked about the anticipated split of future users between HKU and other universities in Hong Kong and also between local and overseas researchers. In response, Professor Xiang Zhang and Professor Richard Y.C. Wong, HKU's representatives, stated that as the project was still at the very initial stage, it was difficult to anticipate the actual split. Given the size and scale of the proposed Centre and drawing experience from other similar facilities overseas, such as the Argonne National Laboratory in Chicago, it was anticipated that the vast majority of the facility would be used by HKU and international researchers. Hong Kong had the unique position to act as an international centre linking the research centres in the Mainland and those overseas. Besides, while not being the main development objective of the proposed Centre, activities like weekend seminars for the local community or the general public could be held for public outreach.

31. A Member further enquired about the Government's role in taking forward the implementation of the proposed Centre. Ms Janet K.K. Cheung, DPO/HK, explained that government bureaux/departments would continue to take part in the implementation of the project and offer professional advice under the existing mechanisms. For example, the relevant departments would review the general building plans submitted by the project proponent and ensure that the committed building design concepts and enhancement/mitigation measures were duly reflected in the development scheme and implemented as proposed.

32. In response to a Member's question about the roadmap for development of basic research in Hong Kong, Miss Fung Long Yin, Betty, AS/IT&I, ITIB, stated that the Government promulgated the Hong Kong Innovation and Technology Development Blueprint in 2022 which emphasised the importance of having upstream, midstream and downstream sectors to enhance the I&T ecosystem and promote interactive development. While the San Tin Technopole, the InnoPark and the Hong Kong Science and Technology Parks covered different sectors in the I&T ecosystem, the proposed Centre focused on the upstream basic research. To facilitate the development of such research facility in Hong Kong, the Government would continue to render support to the project proponent on planning and land administration aspects.

33. Members had no question on Amendment Items B and C and generally considered that all the proposed amendments to the OZP were acceptable.

34. The Chairman remarked that Members had expressed different views and suggestions on the proposed Centre and consultations with the local community, and HKU was invited to take them into account in refining the development proposal of the proposed Centre, as appropriate, in order to maximise its public benefit.

35. After deliberation, the Committee decided to :

- “(a) agree to the proposed amendments to the approved Pok Fu Lam Outline Zoning Plan (OZP) and that the draft Pok Fu Lam OZP No. S/H10/21A at Attachment II of the Paper (to be renumbered to S/H10/22 upon exhibition) and its Notes at Attachment III are suitable for exhibition under section 5 of the Ordinance; and
- (b) adopt the revised Explanatory Statement (ES) for the draft Pok Fu Lam OZP No. S/H10/21A at Attachment IV of the Paper (to be renumbered to S/H10/22 upon exhibition) as an expression of the planning intentions and objectives of the Board for the various land use zonings of the OZP and the revised ES will be published together with the OZP.”

36. Members noted that, as a general practice, the Secretariat of the Board would undertake detailed checking and refinement of the draft OZP including the Notes and ES, if appropriate, before their publication under the Ordinance. Any major revision would be submitted for the Board’s consideration.

[The Chairman thanked the representatives from ITIB, PlanD and HKU for attending the meeting. They left the meeting at this point.]

[The meeting adjourned for a 5-minute break.]

Agenda Item 1: Global Innovation Centre
(Item raised by The University of Hong Kong)
(DPC Paper No. 1/2024)

3. The Chairman welcomed the representatives of The University of Hong Kong (HKU) to the meeting:

- (i) Professor WONG Yue-chim, Richard, SBS, JP, Provost and Deputy Vice-Chancellor;
- (ii) Professor SHUM Ho-cheung, Anderson, Associate Vice-President (Research and Innovation);
- (iii) Mr SY Wai-yin, Jeffery, Director of Estates;
- (iv) Ms Bella FAN, Assistant Director of Estates; and
- (v) Mr TSUI Cheuk-fung, Syrus, Assistant Registrar.

4. The HKU representatives, with the aid of a PowerPoint presentation, briefly introduced the agenda item.

5. DPC members raised the following comments and enquiries:

- (i) They enthusiastically supported the development of innovation and technology (I&T). They opined that the proposed project was crucial to the overall development of our Country and Hong Kong, especially because I&T had become a new trend in the development of a modern society, and the project also echoed our Country's policies. Though HKU would lead the daily operations of the Global Innovation Centre (GIC), DPC members believed that other universities and tertiary institutions would be happy to exchange information with each other through GIC. DPC members would like to know how HKU would foster the collaboration between institutions to promote I&T development. Much credit went to the teaching and research teams at HKU, who committed themselves to promoting I&T development and nurturing basic research talents;
- (ii) Noting that HKU planned to promote Science, Technology, Engineering and Mathematics (STEM) education by collaborating with other institutions through GIC, DPC members asked if HKU would exchange information with the schools in the Southern District and introduce the GIC project to them. In addition, there had been a

shortage of STEM teachers at primary and secondary schools, resulting in the teaching being outsourced to other organisations for support. It was hoped that GIC could provide assistance to the schools in the Southern District;

- (iii) The proposed project was extremely meaningful and more efforts should be made to promote it. As GIC was associated with deep technology, HKU should provide more information to the public when implementing the project. It was hoped that HKU could work closely with SDC by reporting the progress of the proposed project to DPC on a regular basis so as to maintain the transparency and openness of information;
- (iv) The surrounding environment was likely to be affected by this large-scale project. DPC members enquired if HKU would take any measures to mitigate the impact on the environment and the nearby residents;
- (v) According to the introduction, HKU still had not made detailed planning for the project, including the impact on the environment, traffic and the residents during the construction, as well as the anticipated completion date and whether the living environment of the nearby residents and ancillary facilities would be enhanced upon completion of the project. It was hoped that HKU could submit supplementary information to DPC;
- (vi) SDC and members of the public had been urging for implementation of the MTR South Island Line (West) project, including the construction of a station at Queen Mary Hospital. The capacity of Pok Fu Lam Road and Victoria Road alone could barely address the traffic problem. It was hoped that HKU could collaborate with SDC and members of the public through the proposed project to press the Government to implement the MTR South Island Line (West) as soon as possible, particularly the construction of Queen Mary Hospital Station;
- (vii) The introduction stated that the construction was expected to commence in 2027. However, by then, other large-scale projects, including the redevelopment projects of Wah Fu Estate, Yue Kwong Chuen and Queen Mary Hospital, would also take place in the northwest area of the Southern District at the same time. The residents were very concerned about the traffic impact of concurrent construction activities, in particular the large construction vehicles in the area. Since Pok Fu Lam Road was one of the main roads in the Southern District, it was hoped that relevant Government Departments could thoroughly study and review the traffic impact assessment reports submitted by HKU before approving the commencement of the proposed project;
- (viii) In view of the close proximity of the construction site to Baguio Villa, it was hoped that HKU would liaise with the residents during the construction and introduce additional mitigation measures to minimise the impact on local residents; and
- (ix) According to the information from HKU, the building height of GIC would not exceed the lowest level of the residential buildings in Pok Fu Lam. It was believed that the view from these residential buildings would not be much affected. Although the piling works

would adopt a quieter method as shown in the PowerPoint presentation, HKU should pay special attention to the noise problems as residents were complaining from time to time about the noise arising from the piling works of the redevelopment project of Wah Fu Estate, which also adopted the same noise mitigation measures.

6. The HKU representatives gave a consolidated response as follows:

- (i) HKU appreciated the concern expressed by the DPC members and their feedback on the impact of the proposed project on the residents. HKU was also grateful that the DPC members supported the implementation of GIC project in the Southern District;
- (ii) HKU expected that GIC, upon completion of the construction, would attract over a thousand scientists to conduct a variety of research projects. Currently, HKU only had around 300 to 400 professors participating in scientific research. It was impossible for HKU to advance GIC or maintain the operation of GIC on its own. GIC, a facility constructed for Hong Kong as a whole, would welcome the participation of all scholars and researchers from both local and overseas universities. Currently, HKU was responsible for the construction, management and planning of GIC. The works-related processes were not initiated yet given that there was still time before completion of the construction. Nevertheless, HKU would designate a team to initiate the planning work, with dedication to protecting the environment and minimising the nuisance to the public during the construction. HKU had conducted a preliminary feasibility study on different aspects such as air quality, visitor flow as well as traffic. Before commencing the construction, HKU would also make sure that the impact could comply with the requirements;
- (iii) HKU had been attaching great importance to the planning of GIC and I&T projects in Hong Kong, as well as how to foster public participation and better connect GIC with the community, etc. If Hong Kong aimed to become an international I&T hub with greater public participation in science and technology, it would be crucial to promote popular science. In this regard, HKU organised various activities for primary and secondary school students, undergraduates and postgraduates from different regions/districts from time to time. Upon completion of the construction, GIC would work to Hong Kong's advantage in terms of conducting upstream research and top-class research. It would also attract more world-renowned professors, enterprises, organisations and other partners for collaboration. The participation of these parties would foster public participation and promote popular science;
- (iv) GIC would focus on conducting scientific research in areas of pioneering and innovative deep technology, hence enabling increased participation of stakeholders, institutions and researchers. In terms of the nature of deep technology, its research and development

were usually interdisciplinary, cross-faculty and cross-regional. In this connection, the development of GIC would require collaboration with other researchers and stakeholders. After the upstream development had come to fruition, it would benefit the stakeholders at the midstream and downstream, paving the way for the whole scientific research ecosystem to flourish;

- (v) HKU provided considerable assistance to schools across the Southern District. In terms of nature, secondary schools passed on knowledge to students, while universities created knowledge and impart it to students. This contributed to the difference between secondary schools and universities. Therefore, in relation to public participation, GIC would enable students from primary and secondary schools in the Southern District to witness how the top researchers created knowledge in the course of their work. It was believed that GIC would enhance Hong Kong students' understanding on scientific research;
- (vi) Though the proposed project was in the early stage of development, HKU had already conducted preliminary technical assessments of different aspects such as the environment, air quality and traffic, and ensured that it was feasible to implement the project. When the project launched, HKU would, as always, maintain close liaison with other stakeholders in the District, attend to their views and take public concern into account;
- (vii) Regarding the construction itself, HKU had been supportively and actively adopting the construction methods recommended by the Government, including prefabrication and Modular Integrated Construction (commonly known as MiC). Having adopted the relevant construction methods in a number of its previous projects, HKU was confident that the measures would minimise the impact of the construction works on the District; and
- (viii) HKU understood that members of the public were very concerned about the traffic in the Southern District, particularly the proposed construction of MTR to address the traffic problems in the Southern District. HKU, as one of the stakeholders in the Southern District, shared the same stance with SDC in putting forward the construction of the MTR South Island Line (West). In this connection, HKU hoped to collaborate with all the DPC members to urge for the construction of the MTR South Island Line (West), which was expected to benefit the community and facilitate the future development of GIC.

7. DPC members raised the following comments and enquiries:

- (i) The proposed project followed the future development directions of our Country. It could be regarded as “the pride of Pok Fu Lam” and even “the pride of the Southern District”;

- (ii) DPC members complimented HKU on choosing a perfect site for GIC. To be built on the hillside that could effectively block the sound waves from the traffic on Pok Fu Lam Road and other roads, GIC was unlikely to be affected by such noise. Nevertheless, the proposed project might considerably affect Baguio Villa Blocks 19 and 20, especially the units facing Pok Fu Lam Road, given that the view would be inevitably obstructed. In addition, the construction works would affect the neighbourhood. DPC members asked whether HKU would consider providing facilities such as green belt areas and open space in the planning process to mitigate the impact on the residents;
- (iii) Many residents were pet owners and they often complained about a lack of pet facilities. It was hoped that HKU could provide pet-friendly facilities in the green belt areas and this would help HKU to gain public support for the proposed project;
- (iv) According to the plans in the “Pok Fu Lam Outline Zoning Plan No. S/H10/21”, adjacent to the proposed project was a site zoned for R(C)6 purpose with a plot ratio of 2.1. If the proposed project could gain support from our Country and the Government, the Government should incorporate the R(C)6 site into the GIC site to facilitate the planning of construction as well as the works process. This would also facilitate better use of our land resources, while expanding the area of green belts and improving the building disposition and the view from nearby buildings at the same time;
- (v) During the construction of the proposed project, HKU should pay attention to the traffic flow in Upper Baguio Villa to see if there would be bottleneck effect near Woodbury Court. As for Pok Fu Lam Road near Ebenezer School, some reports stated that the developer intended to construct residential buildings at the aforesaid location by way of land exchange, which might result in increased traffic flow at the road section. Therefore, incorporating the R(C)6 site into the proposed project could benefit the development and all other aspects;
- (vi) Students of Ebenezer School were visually impaired, and part of the school’s training was to enhance their sense of hearing to offset the effects of their sight loss. However, the school did not install any acoustic panels / materials in the classrooms and thus the noise arising from construction works might affect the students. Located on Pok Fu Lam Road with a slope at the back of the school premises, Ebenezer School was barely affected by road traffic noise. On the contrary, given the close proximity of the proposed project to the school, the construction works would directly affect them. HKU should also note that Ebenezer School provided accommodation services. Lifting the modules at night would emit noise and affect the residents. It was hoped that HKU could take note of the above issue; and
- (vii) DPC members were pleased to learn that the project would adopt prefabrication. Nevertheless, HKU should plan ahead in the early stage of the design process, provided that the lifting of modules required the use of respective cranes (also known as jibs) based

on the spans allowed. Otherwise, the contractors might need to transport large cranes to the construction site at night to minimise the impact on the local traffic. Meanwhile, in light of the dust, air particulates and other problems arising from construction works, DPC members suggested spraying water in the site area as a dust control measure. Furthermore, during the redevelopment of Wah Fu Estate, many residents reported that the construction works commenced too early in the morning and caused noise nuisance. It was hoped that HKU could regulate the working hours of the construction works for the proposed project in a sensible way.

8. The HKU representatives gave a consolidated response as follows:

- (i) They thanked everyone for their valuable comments. In different stages of the project, HKU would maintain comprehensive and in-depth communication with stakeholders in respect of the progress;
- (ii) HKU attached great importance to the synergy effect between GIC and other parties such as Queen Mary Hospital, Cyberport and HKU. Although the scientific research by GIC belonged to the upstream sector, HKU was also concerned about the midstream and downstream development. In addition, GIC would offer various opportunities to the schools and students in the District to participate in the development of its scientific research;
- (iii) HKU was well aware that Ebenezer School was close to the location of the project. When HKU commenced the Sassoon Road project earlier on, Ebenezer School expressed their concern over the noise as well as the vibration, etc. HKU would continue to maintain communication and good relations with stakeholders, including Ebenezer School; and
- (iv) Having put forward a number of developments in Pok Fu Lam, HKU had a clear idea of the expectations of the community. During the construction, HKU would try its best to minimise the impact on the public by dust and noise control and regulation of other aspects. In light of the large scale of the project, construction would be carried out in stages, with respective measures implemented in different stages to mitigate the impact on traffic and other aspects.

9. In closing, the Chairman said that most of the DPC members supported the proposed project. He opined that DPC members agreed that the proposed project would align with Hong Kong's policies on scientific research as well as our Country's development directions. However, during the construction of the proposed project, many large-scale works projects, including the redevelopment of Wah Fu Estate, Cyberport Expansion Project, Queen Mary Hospital Redevelopment Project and HKU Medical Complex Extension, would also take place

in the Southern District at the same time. This would inevitably affect the daily lives of the residents. He hoped that HKU could strengthen the communication with local stakeholders, including Baguio Villa, Woodbury Court and Ebenezer School, and pay attention to issues such as noise and environmental impact during the construction. Lastly, according to the paper, the site concerned was originally a village in the 1930s. Therefore, HKU should examine whether a heritage impact assessment was required. In conclusion, DPC supported the proposed project and hoped that HKU would strengthen the communication with DPC.

Provision of Major Government, Institution and Community Facilities and Open Space
in Pok Fu Lam (H10)

Type of Facilities	Hong Kong Planning Standards and Guidelines (HKPSG) Requirements	Requirement based on OZP planned population	OZP Provision		Surplus/ Shortfall against OZP planned provision
			Existing Provision	Planned Provision (including Existing Provision)	
District Open Space	10 ha per 100,000 persons [#]	10ha	9.25ha	14.44ha	+4.44ha
Local Open Space	10 ha per 100,000 persons [#]	10ha	14.85ha	18.76ha	+8.76ha
Sports Centre	1 per 50,000 to 65,000 persons [#] (assessed on a district basis)	2	0	0	-2 ^{&} (Sufficient on a district basis as confirmed with Leisure and Cultural Services Department ^{&})
Sports Ground/ Sport Complex	1 per 200,000 to 250,000 persons [#] (assessed on a district basis)	0	0	0	0
Swimming Pool Complex – standard	1 complex per 287,000 persons [#] (assessed on a district basis)	0	0	0	0
District Police Station	1 per 200,000 to 500,000 persons (assessed on a regional basis)	0	0	0	0
Divisional Police Station	1 per 100,000 to 200,000 persons (assessed on a regional basis)	0	0	0	0
Magistracy (with 8 courtrooms)	1 per 660,000 persons (assessed on a regional basis)	0	0	0	0

Type of Facilities	Hong Kong Planning Standards and Guidelines (HKPSG) Requirements	Requirement based on OZP planned population	OZP Provision		Surplus/ Shortfall against OZP planned provision
			Existing Provision	Planned Provision (including Existing Provision)	
Community Hall	No set standard	N.A	1	1	N.A.
Library	1 district library for every 200,000 persons (assessed on a district basis)	0	1	1	0
Kindergarten/ Nursery	34 classrooms for 1,000 children aged 3 to under 6 [#]	51 classrooms	16 classrooms	34 classrooms	-17 classrooms
Primary School	1 whole-day classroom for 25.5 persons aged 6-11 [#] (assessed by EDB on a district/school network basis)	113 classrooms	149 classrooms	155 classrooms	+42 classrooms
Secondary School	1 whole-day classroom for 40 persons aged 12-17 [#] (assessed by EDB on a territorial-wide basis)	96 classrooms	200 classrooms	175 classrooms	+79 classrooms
Hospital	5.5 beds per 1,000 persons (assessed by Hospital Authority on a regional/cluster basis)	567 beds	2,157 beds	2,157 beds	+1,590 beds
Clinic/Health Centre	1 per 100,000 persons (assessed on a district basis)	1	0	0	-1 [@] (Sufficient on a district basis [@])

Type of Facilities	Hong Kong Planning Standards and Guidelines (HKPSG) Requirements	Requirement based on OZP planned population	OZP Provision		Surplus/ Shortfall against OZP planned provision
			Existing Provision	Planned Provision (including Existing Provision)	
Child Care Centre	100 aided places per 25,000 persons [#] (assessed by SWD on a local basis)	400 places	80 places	180 places	-220 places* (A long-term target assessed on a wider spatial context by SWD*)
Integrated Children and Youth Services Centre	1 for 12,000 persons aged 6-24 [#] (assessed by SWD on a local basis)	1	1	1	0
Integrated Family Services Centre	1 for 100,000 to 150,000 persons [#] (assessed by SWD on a service boundary basis)	1	0	0	-1* (A long-term target assessed on a wider spatial context by SWD*)
District Elderly Community Centres	One in each new development area with a population of around 170,000 or above [#] (assessed by SWD)	N.A.	0	2	N.A.
Neighbourhood Elderly Centres	One in a cluster of new and redeveloped housing areas with a population of 15,000 to 20,000 persons, including both public and private housing [#] (assessed by SWD)	N.A.	2	2	N.A.
Community Care Services (CCS) Facilities	17.2 subsidised places per 1,000 elderly persons aged 65 or above [#] (assessed by SWD on a district basis)	524 places	174 places	423 places	-101 places* (A long-term target assessed on a wider spatial context by SWD*)

Type of Facilities	Hong Kong Planning Standards and Guidelines (HKPSG) Requirements	Requirement based on OZP planned population	OZP Provision		Surplus/ Shortfall against OZP planned provision
			Existing Provision	Planned Provision (including Existing Provision)	
Residential Care Homes for the Elderly	21.3 subsidised beds per 1,000 elderly persons aged 65 or above [#] (assessed by SWD on a cluster basis)	649 beds	464 beds	890 beds	+241 beds
Pre-school Rehabilitation Services	23 subvented places per 1,000 children aged 0 – 6 [#] (assessed by SWD on a district basis)	79 places	340 places	400 places	+321 places
Day Rehabilitation Services	23 subvented places per 10,000 persons aged 15 or above [#] (assessed by SWD on a district basis)	188 places	175 places	383 places	+195 places
Residential Care Services	36 subvented places per 10,000 persons aged 15 or above [#] (assessed by SWD on a cluster basis)	294 places	293 places	639 places	+345 places
Community Rehabilitation Day Centre	1 centre per 420,000 persons [#] (assessed by SWD on a district basis)	0	0	0	0
District Support Centre for Persons with Disabilities	1 centre per 280,000 persons [#] (assessed by SWD on a district basis)	0	0	0	0

Type of Facilities	Hong Kong Planning Standards and Guidelines (HKPSG) Requirements	Requirement based on OZP planned population	OZP Provision		Surplus/ Shortfall against OZP planned provision
			Existing Provision	Planned Provision (including Existing Provision)	
Integrated Community Centre for Mental Wellness	1 standard scale centre per 310,000 persons [#] (assessed by SWD on a district basis)	0	0	0	0

Note:

The planned resident population is about 100,000. If including transients, the overall planned population is about 103,100. All population figures have been adjusted to the nearest hundred.

Remark:

The requirements exclude planned population of transients.

& There are existing six sports centres in the Southern District with four in Aberdeen, one in Ap Lei Chau and one in Stanley.

@ According to the Hospital Authority, there are existing three general out-patient clinics in the Southern District including Aberdeen, Ap Lei Chau and Stanley general out-patient clinics, and space for general out-patient services has also been reserved in the redevelopment of Grantham Hospital.

* The deficit in provision is based on OZP planned population while the Social Welfare Department (SWD) adopts a wider spatial context/cluster in the assessment of provision for such facility. In applying the population-based planning standards, the distribution of welfare facilities, supply in different districts, service demand as a result of the population growth and demographic changes as well as the provision of different welfare facilities have to be considered. As the HKPSG requirements for these facilities are a long-term goal, the actual provision will be subject to consideration of the SWD in the planning and development process as appropriate. The Government has been adopting a multi-pronged approach with long-, medium- and short-term strategies to identify suitable sites or premises for the provision of more welfare services which are in acute demand.

PLAN No. R/S/H10/22 - A1

- (7) The following uses or developments are always permitted on land falling within the boundaries of the Plan except where the uses or developments are specified in Column 2 of the Notes of individual zones:
- (a) provision, maintenance or repair of plant nursery, amenity planting, open space, rain shelter, refreshment kiosk, road, bus/public light bus stop or lay-by, cycle track, Mass Transit Railway station entrance, Mass Transit Railway structure below ground level, taxi rank, nullah, public utility pipeline, electricity mast, lamp pole, telephone booth, telecommunications radio base station, automatic teller machine and shrine;
 - (b) geotechnical works, local public works, road works, sewerage works, drainage works, environmental improvement works, marine related facilities, waterworks (excluding works on service reservoir) and such other public works co-ordinated or implemented by Government; and
 - (c) maintenance or repair of watercourse and grave.
- (8) In any area shown as ‘Road’, all uses or developments except those specified in paragraph (7) above and those specified below require permission from the Town Planning Board:
- on-street vehicle park and railway track.
- (9) ***In the “Undetermined” zone, all uses or developments except those specified in paragraph (7) above require planning permission from the Town Planning Board.***
- ~~(9)~~(10) Unless otherwise specified, all building, engineering and other operations incidental to and all uses directly related and ancillary to the permitted uses and developments within the same zone are always permitted and no separate permission is required.
- ~~(10)~~(11) In these Notes, “existing building” means a building, including a structure, which is physically existing and is in compliance with any relevant legislation and the conditions of the Government lease concerned.

OTHER SPECIFIED USES (cont'd)

Column 1 Uses always permitted	Column 2 Uses that may be permitted with or without conditions on application – to the Town Planning Board
<u>For “Global Innovation Centre” Only</u> Eating Place Educational Institution Exhibition or Convention Hall Flat (staff quarters only) Government Refuse Collection Point Government Use (not elsewhere specified) Information Technology and Telecommunications Industries Institutional Use (not elsewhere specified) Office Place of Recreation, Sports or Culture Private Club Public Clinic Public Transport Terminus or Station Public Utility Installation Public Vehicle Park (excluding container- vehicle) Research, Design and Development Centre Residential Institution Shop and Services Social Welfare Facility Training Centre Utility Installation for Private Project Flat (not elsewhere specified) Hotel Place of Entertainment Radar, Telecommunications Electronic- Microwave Repeater, Television and/or Radio Transmitter Installation	

Planning Intention

This zone is intended primarily to provide land for the development of a Global Innovation Centre by the University of Hong Kong for deep technology research.

(Please see next page)

OTHER SPECIFIED USES (cont'd)

For "Global Innovation Centre" Only (cont'd)

Remarks

- ~~(1) — No new development, or addition, alteration and/or modification to or redevelopment of an existing building shall result in a total development and/or redevelopment in excess of a maximum gross floor area of 222,720m² (including not more than 10,620m² domestic gross floor area), and a maximum building height of 158mPD, or the gross floor area and height of existing building, whichever is the greater.~~
- ~~(2) — In determining the relevant maximum gross floor areas for the purposes of paragraph (1) above, any floor space that is constructed or intended for use solely as car park, loading/unloading bay, plant room, caretaker's office and caretaker's quarters and utility installation for private project, or recreational facilities for the use and benefit of all the owners or occupiers of the domestic building or domestic part of the building, provided such uses and facilities are ancillary and directly related to the development or redevelopment, may be disregarded.~~
- ~~(3) — Based on the individual merits of a development or redevelopment proposal, minor relaxation of the building height and gross floor area restrictions as stated in paragraph (1) above may be considered by the Town Planning Board on application under section 16 of the Town Planning Ordinance.~~

7.6.4 A “G/IC(1)” site to the east of 3 Sassoon Road is reserved for expansion of the HKU’s Faculty of Medicine campus by a total gross floor area of not more than 43,000m². Development within this site is restricted to a maximum building height of 164mPD. Interlinked building blocks with stepped building heights descending from north-western portion of 164mPD to south-eastern portion of 123mPD would be adopted taking into account the local topography and characteristics. A setback area of not less than 32m in width from the adjacent “R(C)7” zone shall be provided. Multi-level pedestrian connections to Pok Fu Lam Road, Victoria Road and Northcote Close would be provided. Communal open space of not less than 4,000m² would also be provided and accessible by the public. Integrated design with the environment should be adopted for the greening and landscaping of the proposed development.

7.7 Open Space (“O”): Total Area 21.71 ha

7.7.1 This zone is intended primarily for the provision of outdoor open-air space for active and/or passive recreational uses serving the needs of local residents as well as the general public.

7.7.2 Existing open spaces include the sitting-out area at Sassoon Road opposite to the Queen Mary Hospital, the Waterfall Bay Park to the south of Wah Fu Estate, the Cyberport Waterfront Park, and the Kellett Bay Waterfront to the south of Wah Kwai Estate. A 15m wide waterfront promenade is proposed to link up the Cyberport Waterfront Park and the planned open space in between Cyberport and Sandy Bay. Opportunity may be given to explore whether a walking trail could be developed along this planned open space and other coastal areas to enhance pedestrian connectivity along the coast of Waterfall Bay, Telegraph Bay and Sandy Bay at Pok Fu Lam for public enjoyment.

7.7.3 Local open spaces are also provided within the public and private housing developments and at convenient locations throughout the Area to serve the local residents.

7.8 Other Specified Uses (“OU”): Total Area ~~39.3~~ **34.58** ha

7.8.1 This zoning is intended primarily to provide/reserve land for specified purposes and uses. It covers the existing petrol filling stations at Baguio Villa and 100 Pok Fu Lam Road, the Chinese Christian Cemetery at the northern part of the Area, the Cyberport development and its expansion site, and the proposed Global Innovation Centre of HKU.

7.8.2 The Cyberport development is intended to establish a base for the clustering of creative information service business including software design, electronic commerce, information and electronic technology and related business. It aims to create an extensively landscaped

suitable block disposition, building setback, building gap and terraced building design should be adopted to alleviate the potential air ventilation impacts. A quantitative AVA shall be carried out by Cyberport at the detailed design stage to ascertain that the future scheme would perform no worse than the scheme in the AVA EE in ventilation performance. The requirement for submission of quantitative AVA will be incorporated into the land document.

~~7.8.6 On land designated as “OU” annotated “Global Innovation Centre”, it is intended primarily to provide land for development of the proposed Global Innovation Centre by HKU for deep technology research. To cater for the need of the Global Innovation Centre which would be the first deep technology basic research compound in Hong Kong as well as an interdisciplinary endeavour drawing on HKU’s strengths to address some of the most pressing challenges in the world through scientific discoveries and technological development, it provides development space for accommodating a variety of deep technology basic research and supporting facilities, including research, academic, exhibition and conferences, scholar residence/staff quarters, supporting catering, recreational and other facilities. Development within this zone is subject to a maximum gross floor area of 222,720m² (including not more than 10,620m² domestic gross floor area) and a maximum building height of 158mPD, or the gross floor area and height of the existing building, whichever is the greater.~~

~~7.8.7 The development of the Global Innovation Centre shall strike a balance between functional requirements and responsive building design. Good building designs shall include stepped terrace design, landscape treatment at building edges, building separations of appropriate widths and building voids at various levels to help break up the building mass and maintain visual access to vegetated backdrop and skyview. Specifically, in response to the level difference of the site between Pok Fu Lam Road and Victoria Road, the future podium shall adopt an undulating terraced design with podium levels descending from east to west. Building voids and skylights shall also be suitably placed above the five preserved watercourses with 5m preservation zones offset from the watercourses to maintain sunlight penetration for ecological preservation. Communal open space of not less than 12,000m² accessible to the public shall also be provided at approximately the level of Pok Fu Lam Road to preserve public views. Integrated design with the surrounding environment should be adopted for the greening and landscaping of the proposed development.~~

~~7.8.8 Traffic improvement measures are required for the proposed Global Innovation Centre to mitigate the associated traffic impact. The project proponent is required to submit updated traffic impact assessment upon confirmation of the design parameters at the detailed design stage, and assessment of the construction traffic impact and traffic review before commissioning of project. Mitigation measures~~

~~to address the traffic noise impact from Victoria Road and Pok Fu Lam Road, to cater for freshwater, flushing water demand, and sewer upgrading works for the proposed development will be required. The requirement for submission of traffic impact assessment, noise impact assessment, water supply impact assessment and sewerage impact assessment, and implementation of the mitigation measures identified therein will be suitably incorporated into the land document.~~

7.9 “Undetermined” (“U”): Total Area 4.72 ha

7.9.1 *To consolidate Hong Kong’s leading position in basic research, the 2021 Policy Address announced that the Government has accepted in principle the proposal from the University of Hong Kong (HKU) to reserve a site in Pok Fu Lam for HKU to construct facilities for deep technology research. Pursuance to this policy initiative, an area largely zoned “Green Belt” and “Residential (Group C)6” between Pok Fu Lam Road and Victoria Road was rezoned to “OU” annotated “Global Innovation Centre”, subject to a maximum gross floor area of 222,720m² (including not more than 10,620m² domestic gross floor area) and a maximum building height of 158mPD. The planning intention is primarily to provide land for development of the proposed Global Innovation Centre by HKU for deep technology research. It would provide development space for accommodating a variety of deep technology basic research and supporting facilities, including research, academic, exhibition and conferences, scholar residence/staff quarters, supporting catering, recreational and other facilities. The draft Pok Fu Lam OZP No. S/H10/22 incorporating the amendments was exhibited for public inspection under section 5 of the Ordinance on 22 March 2024.*

7.9.2 *Subsequently, in view of HKU’s decision to take some time to strategically amend the development plan of the Centre, e.g. reducing the density of the proposed development and bulk of the building(s), increasing the setback area from neighbouring buildings, designating more green spaces, etc., to address stakeholders’ opinions as much as practicable, and to step up engagement with the community through various channels so as to improve the development proposal, the land has been rezoned from “OU” annotated “Global Innovation Centre” to “U”. The “U” zone is intended to allow HKU to review its original plan and adjust it in response to stakeholders’ views. The long-term use and development parameters of the site would be determined after HKU’s submission of a revised proposal, which would go through public consultation and the Government’s examination, and would be subject to another round of statutory town planning procedures for proposed amendments to the OZP. As the development parameters are subject to changes pending HKU’s review, an interim zoning arrangement as a stop-gap measure to allow flexibility to take on board the outcome of the review is necessary.*

7.910 Green Belt (“GB”): Total Area 117.43 ha

- 7.910.1** The planning intention of this zone is primarily for the conservation of the existing natural environment amid the built-up areas/at the urban fringe, to safeguard it from encroachment by urban type development, and to provide additional outlets for passive recreational activities. There is a general presumption against development within this zone.
- 7.910.2** This zoning comprises about 28% of land in the Area and consists of mainly steep slopes not suitable for development such as the hillside of Mount Davis, the slopes to the east of Pok Fu Lam Village, the valley sides of Cyberport, the slopes to the south of Baguio Villa and the naturally vegetated hillslopes adjoining Chi Fu Fa Yuen. The difficult topography and geotechnical conditions render these areas unsuitable for development. Development within this zone is normally not permitted unless otherwise approved by the Board based on very strong planning grounds.
- 7.910.3** Although there is a general presumption against development in this zoning, passive recreational activities may be possible at suitable locations.

7.1011 Country Park (“CP”): Total Area 52.48 ha

Country Park means a country park or special area as designated under the Country Parks Ordinance (Cap. 208). This zoning covers the part of the Pok Fu Lam Country Park and the part of the Lung Fu Shan Country Park which fall within the boundary of the Plan. All uses and developments require consent from the Country and Marine Parks Authority and approval from the Board is not required.
