**SCHEDULE OF AMENDMENTS TO  
THE DRAFT KENNEDY TOWN & MOUNT DAVIS  
OUTLINE ZONING PLAN NO. S/H1/19  
MADE BY THE TOWN PLANNING BOARD  
UNDER THE TOWN PLANNING ORDINANCE (Chapter 131)**

**I. Amendments to Matters shown on the Plan**

- Item A1 – Rezoning of a piece of land along the waterfront to the west of Cadogan Street from “Undetermined” (“U”) to “Open Space (1)” (“O(1)”), and incorporation of four piers into the planning scheme area and zoning them to “O(1)”.
- Item A2 – Rezoning of an area between Sai Ning Street and Victoria Road from “U” and an area shown as ‘Road’ to “O”.
- Item A3 – Rezoning of an area along the waterfront to the north of Sai Ning Street from “U” to “O”.
- Item A4 – Rezoning of an area within the existing public open space adjoining The Sail at Victoria from “Other Specified Uses” annotated “Uses Related to Underground Refuse Transfer Station” (“OU(Uses Related to Underground Refuse Transfer Station)”) to “O”.
- Item B – Rezoning of an area currently occupied by godown and wharf facilities to the north of Sai Ning Street from “Industrial” (“I”) and “OU” annotated “Pier” (“OU(Pier)”) to “OU” annotated “Commercial, Leisure and Tourism Related Uses” (“OU(Commercial, Leisure and Tourism Related Uses)”) with stipulation of building height restrictions.
- Item C1 – Rezoning of an area to the south of Victoria Road and to the west of Ka Wai Man Road from “U”, “OU” annotated “Petrol Filling Station” (“OU(PFS)”), “Government, Institution or Community” (“G/IC”) and “Green Belt” (“GB”) to “Residential (Group A) 5” (“R(A)5”) with stipulation of building height restrictions.
- Item C2 – Rezoning of an area at the junction of Victoria Road and Cadogan Street from “U” and “O” to “R(A)6” with stipulation of building height restrictions.
- Item C3 – Rezoning of an area at the junction of Sai Ning Street and Victoria Road from “U” to “R(A)” with stipulation of building height restriction.
- Item C4 – Rezoning of an area between Sai Ning Street and Victoria Road to the west of a “Residential (Group E)” (“R(E)”) zone from “U” to “R(A)” with stipulation of building height restriction.
- Item D1 – Rezoning of an area to the east of Sai Ning Street from “U” to “G/IC” with stipulation of building height restriction.

- Item D2 - Rezoning of an area along the waterfront at the western end of Sai Ning Street from "U" and "OU(Uses Related to Underground Refuse Transfer Station)" to "G/IC" with stipulation of building height restriction.
- Item E - Rezoning of two areas at the western end of Victoria Road from "Residential (Group C)3" ("R(C)3") to "OU" annotated "Public Mortuary" ("OU(Public Mortuary)") with stipulation of building height restriction and from "GB" to "GB(2)" respectively.
- Item F - Rezoning of five strips of land along Cadogan Street, Victoria Road, Sai Ning Street and Ka Wai Man Road from "U", "O", "OU(PFS)" and "G/IC" to areas shown as 'Road'.
- Item G - Excision of two sea areas at the waterfront to the further north of Sai Ning Street from the planning scheme area.
- Item H - Incorporation of an existing pier at New Praya, Kennedy Town into the planning scheme area, and zoning it to "OU(Pier)" with stipulation of building height restriction.
- Item J - Rezoning of four pieces of land between Victoria Road and the northern foothill of Mount Davis from "U" to "GB".
- Item K - Rezoning of an existing MTR ventilation building to the further southwest of Ka Wai Man Road from "U" to "OU" annotated "MTR Ventilation Building" with stipulation of building height restriction.
- Item L - Rezoning of an area within the existing Underground Island West Refuse Transfer Station at the western end of Sai Ning Street from "U" to "OU(Uses Related to Underground Refuse Transfer Station)" with stipulation of building height restriction.
- Item M - Rezoning of an area to the south of Victoria Road for the existing Underground Island West Refuse Transfer Station from "U" to "GB(1)".

## II. Amendments to the Notes of the Plan

- (a) Revision to the covering Notes to delete the provision for the "U" zone.
- (b) Revision to the Schedule of Uses to incorporate provisions related to the "R(A)5" and "R(A)6" sub-zones and stipulation of the gross floor area restriction and the requirements regarding the provision of facilities in the Remarks of the Notes for the "R(A)" zone.
- (c) Revision to the planning intention of the "R(C)1" zone.
- (d) Revisions to the development restrictions exemption clause to clarify the provision related to caretaker's quarters in the Remarks of the Notes for the "R(A)", "Residential (Group B)", "R(C)" and "R(C)1" zones.

- (e) Revision to the Schedule II of Uses for the "R(E)" zone to incorporate 'Art Studio (excluding those involving direct provision of services or goods)' as a Column 1 use and to correspondingly replace 'Place of Recreation, Sports or Culture' under Column 2 by 'Place of Recreation, Sports or Culture (not elsewhere specified)'.
- (f) Deletion of the Notes for the "I" zone.
- (g) Revisions to the Schedule of Uses to incorporate 'Pier (on land designated "O(1)" only)' as a Column 1 use and to correspondingly replace 'Pier' under Column 2 by 'Pier (not elsewhere specified)' and the planning intention for the "O" zone.
- (h) Incorporation of a new set of Notes for the "OU(Commercial, Leisure and Tourism Related Uses)" zone.
- (i) Revisions to the Schedule of Uses and the Remarks of the Notes for the "OU(Pier)" zone.
- (j) Incorporation of a new set of Notes for the "OU(Public Mortuary)" zone.
- (k) Revisions to the Schedule of Uses to incorporate "Underground Public Mortuary (on land designated "GB(2)" only)" and "Underground Refuse Transfer Station (on land designated "GB(1)" only)" as Column 1 uses and to correspondingly delete the Remarks of the Notes for the "GB" zone.
- (l) Other minor textual amendments.

11 March 2016

Town Planning Board

**DRAFT KENNEDY TOWN & MOUNT DAVIS  
OUTLINE ZONING PLAN NO. S/H1/20  
CONSIDERATION OF REPRESENTATIONS NO. TPB/R/S/H1/20-1 TO 7614  
AND COMMENTS NO. TPB/R/S/H1/20-C1 TO C306**

**Planning Principles Adopted for  
The Land Use Review on the Western Part of Kennedy Town**

The Land Use Review has taken into account the following planning principles:

*Harbourfront Planning*

- (a) to promote vibrancy, diversity and vitality by allowing variety of uses including waterfront promenade, open space, retail, dining, leisure, recreation, cultural and tourism-related uses at the harbourfront;
- (b) to improve accessibility of the waterfront area by providing continuous harbourfront promenade and linkage with the hinterland;
- (c) to create an interesting harbour image by encouraging diversity in building mass and varying BH to promote visual interest;
- (d) to maintain permeability to the harbour by providing wind/visual corridors;

*Meeting Housing Needs*

- (e) to meet housing needs by increasing housing land supply;

*Phase Out Incompatible Uses*

- (f) to phase out the existing incompatible industrial and godown uses at the harbourfront through providing redevelopment incentives;
- (g) to relocate incompatible Victoria Public Mortuary (VPM) and salt water pumping station to open up the harbourfront area for public enjoyment;

*Provision of Open Space and Government, Institution and Community (GIC) Facilities*

- (h) to increase the provision of open space and GIC facilities to meet local needs whenever possible;

*Preservation*

- (i) to preserve/ reprovise structure with historic interest at suitable location; and
- (j) to preserve Old and Valuable Trees (OVTs).

(Extracted from MPC Paper No. 1/16)  
**Chronology of Events on Consultations on the  
Land Use Review on the Western Part of Kennedy Town**

Draft Kennedy Town & Mount Davis OZP No. S/H1/20

Ground Decontamination Work at the Sites of Ex-Kennedy Town Incineration  
Plant/Abattoir and Adjoining Area

**Background**

The Government needs to carry out ground decontamination works at the ex-Kennedy Town Incineration Plant (KTIP) and ex-Kennedy Town Abattoir (KTA) and adjoining area (the Site), with a total area of 3.2 hectares, before it is developed for other uses.

2. The scope of the ground decontamination works comprises:-
  - (a) removal of remaining disused structures within the ex-KTIP and ex-KTA sites as well as other structures at the temporary refuse collection point (RCP), the temporary public car park, the Cadogan Street Temporary Garden (CSTG) and Sai See Street within the Site;
  - (b) carrying out ground decontamination works; and
  - (c) in-situ reprovisioning of a temporary public car park and a temporary RCP within the Site<sup>1</sup>.
3. A site plan showing the boundary of the proposed works and the locations of the reprovisioned facilities are at **Enclosures 1 and 2** respectively.
4. The KTIP ceased to operate in 1993 and the KTA was closed in 1999. The Government decided in 1999 to re-develop the Site and the Civil Engineering and Development Department (CEDD) was commissioned to undertake the decommissioning of these facilities and the associated ground decontamination works. The project is a designated project under Schedule 2 to the Environmental Impact Assessment (EIA) Ordinance (Cap. 499) and an Environmental Permit (EP) is required for the project. The EIA report on the project and the supplementary EIA on the ground decontamination works were approved by the Director of Environmental Protection (DEP) in April 2002 and April 2015 respectively.

---

<sup>1</sup> If on-site reprovisioning of the CSTG together with RCP and public car park is required before their demolition or removal, the decontamination works will take at least 13 years to complete. In view of the substantially longer construction period which will increase the nuisance to the public, on-site reprovisioning of CSTG during decontamination was not recommended. The recommended 7-year implementation option with on-site reprovisioning of the RCP and public car park was supported by the Central & Western District Council in March 2015.

**Information Note - TPB Hearing for Representations and Comments on the  
Draft Kennedy Town & Mount Davis OZP No. S/H1/20**

**Ground Decontamination Work at the Sites of Ex-Kennedy Town Incineration  
Plant/Abattoir and Adjoining Area**

5. The EIA reports and the site investigation indicate that the underground soil within the Site, which includes the CSTG, has been contaminated with heavy metals and hydrocarbons which have exceeded the relevant standards. Decontamination works for the underground soil at the Site are therefore required. The aforementioned two EIA reports<sup>2</sup> concluded that the environmental impact of the decontamination project can be controlled to within the criteria under the EIA Ordinance and the Technical Memorandum on EIA Process.
6. The Government originally planned to commence the ground decontamination works immediately after completion of the demolition works within the ex-KTIP and ex-KTA sites. However, it was subsequently decided in December 2006 that the ex-KTIP and ex-KTA sites would be used as a temporary works area for the construction of the West Island Line (WIL) after completion of the demolition works in 2009. The demolition works were completed in 2009 and the ex-KTIP and ex-KTA sites were then handed over to MTR Corporation Limited and Highways Department (HyD) for the provision of WIL works area and a maintenance depot respectively. As a result, the ground decontamination works (the remaining part of the decommissioning project under the EIA Ordinance) have not commenced yet. The MTRC subsequently returned the WIL works area to the Government in January 2016. HyD has also removed the maintenance depot and temporarily retained the site as its storage area before commencement of the proposed works. Therefore, the Government plans to commence the proposed works as early as practicable.
7. To eliminate the health risks posed by contaminated soil and prepare the Site for future development for optimal land utilization, the Government's decontamination works will cover all areas of the Site as a whole, including the CSTG given the proximity of the Site within a dense urban area. According to the findings of the approved EIA reports, the underground soil within the Site (including CSTG) contains contaminants which have exceeded the relevant standards. Hence, it is imperative to eliminate any potential risk caused by the contamination, improve the

---

Draft Kennedy Town & Mount Davis OZP No. S/H1/20**

**Ground Decontamination Work at the Sites of Ex-Kennedy Town Incineration  
Plant/Abattoir and Adjoining Area**

local environment and pave way for long term development in the area.

**Public Consultation**

8. During the process, the Government has consulted the Central & Western District Council (C&WDC) on the proposed decontamination works several times. In July 2006, the Food, Environment, Hygiene and Works Committee (FEHWC) of the Central and Western District Council (C&WDC) passed a motion strongly demanding the Government to carry out both the demolition works and the ground decontamination works in one-go. The decontamination works was also supported in the C&WDC meeting in March 2015. Recently, a few C&W DC Members expressed concern over the demolition of the existing CSTG for the proposed works and the planned private housing development thereat. In response to the above concern, the Government attended the meeting of FEHWC of C&W DC in October 2016 to explain in detail the need of the proposed works at the Site (including the CSTG) to remove any potential risk due to the contamination and prepare the Site for future development.

9. Apart from the C&WDC, the Government has also met, informed and consulted other relevant stakeholders on the ground decontamination works several times to understand their concern and explain the objective and need of the ground decontamination works. The details of such meetings/consultations are tabulated below:-

<b>Stakeholders</b>	<b>Dates</b>
SKH Lui Ming Choi Memorial Primary School	January 2017
Public forums organised by members of C&WDC and/or the public	November 2016 June 2015 April 2015
Harbourfront Commission	February 2016
District Affair Forums organised by the Merton Owners' Committee	January 2016 May 2015 December 2014 November 2013
Case Conference in December 2015 with LegCo members arranged by the Legislative Council Secretariat, and meeting in November 2015 with LegCo member and members of the public	December 2015 November 2015
LegCo Public Works Sub-Committee	June 2015

**Information Note - TPB Hearing for Representations and Comments on the  
Draft Kennedy Town & Mount Davis OZP No. S/H1/20**

**Ground Decontamination Work at the Sites of Ex-Kennedy Town Incineration  
Plant/Abattoir and Adjoining Area**

Stakeholders	Dates
LegCo Panel on Development	April 2015

**Environmental Impact Assessment**

**Site Investigation**

10. To assess the condition of the ground contamination, a total of 189 site investigation (SI) boreholes (including 18 SI boreholes at CSTG) were carried out at the Site by CEDD in 2000 and 2003 as sampling points to identify the type, extent and concentration of contaminants in the underground soil. The number of the sampling points has exceeded the minimum requirement specified in "Practice Guide for Investigation and Remediation of Contaminated Land" published by the Environmental Protection Department (EPD) and is adequate to ascertain the overall condition of the contaminants in the underground soil.

11. Subsequently, 4 additional SI boreholes were carried out by CEDD within the bus depot area in 2013 in order to assess the potential additional contamination caused by the continued operation of the ex-bus depot of New World First Bus after 2003. The results of these 4 boreholes indicated the presence of heavy metals and hydrocarbons with concentrations in exceedance of the threshold values. The additional SI carried out in 2013 did not show that the contaminants within the Site have reduced in amount. Rather, these results confirmed the existence of the contaminants exceeding the relevant standards and ground decontamination works are required.

**Key Findings**

12. The results of the EIA and the site investigation indicated that the underground soil within the Site (including CSTG) has been contaminated by heavy metals (including lead, arsenic, mercury, etc.) and hydrocarbons (including Benzo(a)pyrene, Benzo(b)fluoranthene, etc.) which have exceeded the standards specified in the "Guidance Manual for Use of Risk-Based Remediation Goals for Contaminated Land Management"<sup>3</sup> issued by EPD. The total volume of

---

<sup>3</sup> Risk-based remediation goals have been developed as threshold contaminant concentrations, below which hazards or risks to human health arising from exposure to soil are considered minimal. (Source: EPD's "Guidance Manual for Use of Risk-Based Remediation Goals for Contaminated Land Management")

**Information Note - TPB Hearing for Representations and Comments on the  
Draft Kennedy Town & Mount Davis OZP No. S/H1/20**

**Ground Decontamination Work at the Sites of Ex-Kennedy Town Incineration  
Plant/Abattoir and Adjoining Area**

contaminated soil is about 110,000 cubic metres (including about 20,000 cubic metres at CSTG) and the contaminants are located at various depths down to maximum 12 metres at the Site (maximum 9 metres at CSTG).

**Decontamination Methods**

13. CEDD's Consultants have considered the feasibility of various decontamination methods previously adopted in Hong Kong and overseas. Taking into account various factors such as the types of contaminants, the volume of soil to be treated, the impact of works to the nearby environment, cost and whether the technique adopted in the decontamination methods is well established, it is concluded that the proposed decontamination methods (i.e. cement solidification and biopiling) are practical and viable. The method of cement solidification involves the addition of cement and water to limit the mobility of the heavy metals, whereas the method of biopiling involves heaping contaminated soil into piles (or biopiles) and stimulating aerobic microbial activity within the soil to break down the hydrocarbons by biodegradation through aeration. The proposed decontamination methods have been adopted in Hong Kong and overseas for many years and are considered effective for implementation.

14. During the decontamination works, the contractor will dig up, sort and treat the soil on-site, and then use the treated soil after testing to backfill the excavations.

15. To maintain the services of the temporary public car park and RCP to the public throughout the decontamination period, the sites will be cleaned up in sequence to allow their in-situ reprovisioning during the decontamination.

16. As for the alternative decontamination method by plants/trees as suggested by some members of public, the Consultants suggested that the roots with absorption ability of the contaminants in general could only reach shallow depths (less than 1 m). As the contaminated soil is scattered over the Site with a maximum depth of 12 m (9 m at CSTG) below ground and the volume of contaminated soil is about 110,000 m<sup>3</sup> (about 20,000 m<sup>3</sup> at CSTG), the above technique is unsuitable for this ground decontamination works project. The Consultants also advised that this method has not been used locally and most of the overseas cases are still at a continuing trial stage; thus the effectiveness of this method has yet to be verified.

**Information Note - TPB Hearing for Representations and Comments on the  
Draft Kennedy Town & Mount Davis OZP No. S/H1/20**

**Ground Decontamination Work at the Sites of Ex-Kennedy Town Incineration  
Plant/Abattoir and Adjoining Area**

**Impact on Trees**

17. The Consultants arranged a tree expert to carry out several inspections of the trees within the Site in order to identify the number of trees affected by the decontamination works as well as their species and conditions. None of the affected trees is listed in the Register of Old and Valuable Trees. Based on the results of the inspections, the Consultants completed the impact assessment of the project works on the trees and formulated a compensation proposal.

18. During the assessment of impact on the trees arising from the project, the Consultants also considered the feasibility of retaining or transplanting the trees in the first instance. However, on-site tree preservation is considered impracticable because it necessitates on-site retention of contaminated soil around the tree roots (which contains heavy metals and hydrocarbons), hinders the decontamination works and also defeats the purpose of the decontamination works. As for the feasibility of tree transplantation, the Consultants consider that this arrangement would transfer the contaminated soil within the tree rootball to the soil at the recipient locations, thereby contaminating the recipient site. Thus, it is impracticable as well. Decontamination of the tree rootball by “washing off” the contaminated soil before transplanting the trees to their recipient locations is also considered impracticable as such operation will damage the roots and lower the survival rate of the trees substantially.

19. Based on the above assessment and recommendation, the 195 trees within the Site are proposed to be removed, including three individuals of *Aquilaria sinensis* and two individuals of *Ailanthus fordii*, which are of precious or rare species. Since these two concerned species are commonly cultivated in Hong Kong, the use of these two species for compensatory tree planting is therefore practicable and will be duly considered when formulating the detailed compensatory tree planting plan (planting of about 195 trees).

**Impact on Ecology**

20. According to the EIA report, CSTG does not have a high ecological value as it is a wholly artificial habitat which is not supporting any significant population of wild fauna or species of conservation importance. Despite the above, precautionary measures will be implemented during the decontamination works. Site inspection to identify whether there are any active bird nests and bat roosts will be carried out prior

**Information Note - TPB Hearing for Representations and Comments on the  
Draft Kennedy Town & Mount Davis OZP No. S/H1/20**

**Ground Decontamination Work at the Sites of Ex-Kennedy Town Incineration  
Plant/Abattoir and Adjoining Area**

to site clearance works. If any bird nest or bat roost is observed, appropriate measures, e.g. setting up a suitably sized buffer area around the tree to minimize human or machinery disturbance until the nest has been abandoned or the bat has left, will be implemented.

**Environmental Mitigation Measures**

21. The EIA reports have assessed the impact of the decontamination project on air quality, health, noise and water quality. Based on the results of the assessment, CEDD will implement the required environmental mitigation measures in accordance with the approved EIA reports and the respective Environmental Permit conditions granted under the EIA Ordinance to ensure that the environmental impact of the project can be controlled to within the relevant criteria.

22. The key measures during the ground decontamination works include: control on total active excavation area to about 10% of the area of the Site at any one time in order to minimize dust generation and release of contaminants during excavation; installation of activated carbon filters in the outlet of biopile for removing volatile organic compound emissions during biopile operation; adoption of quieter equipment, movable noise barriers and noise insulating fabric to minimise construction noise impact; control of site surface water run-off from the project site; adoption of good site practices for construction dust control. To further minimize the potential environmental impact, we will also adopt additional mitigation measures including installation of temporary movable barriers and temporary movable canopies at excavation areas and temporary soil stockpiling areas respectively to shield dust and noise and enhance visual impact.

**Environmental Monitoring and Audit Programme**

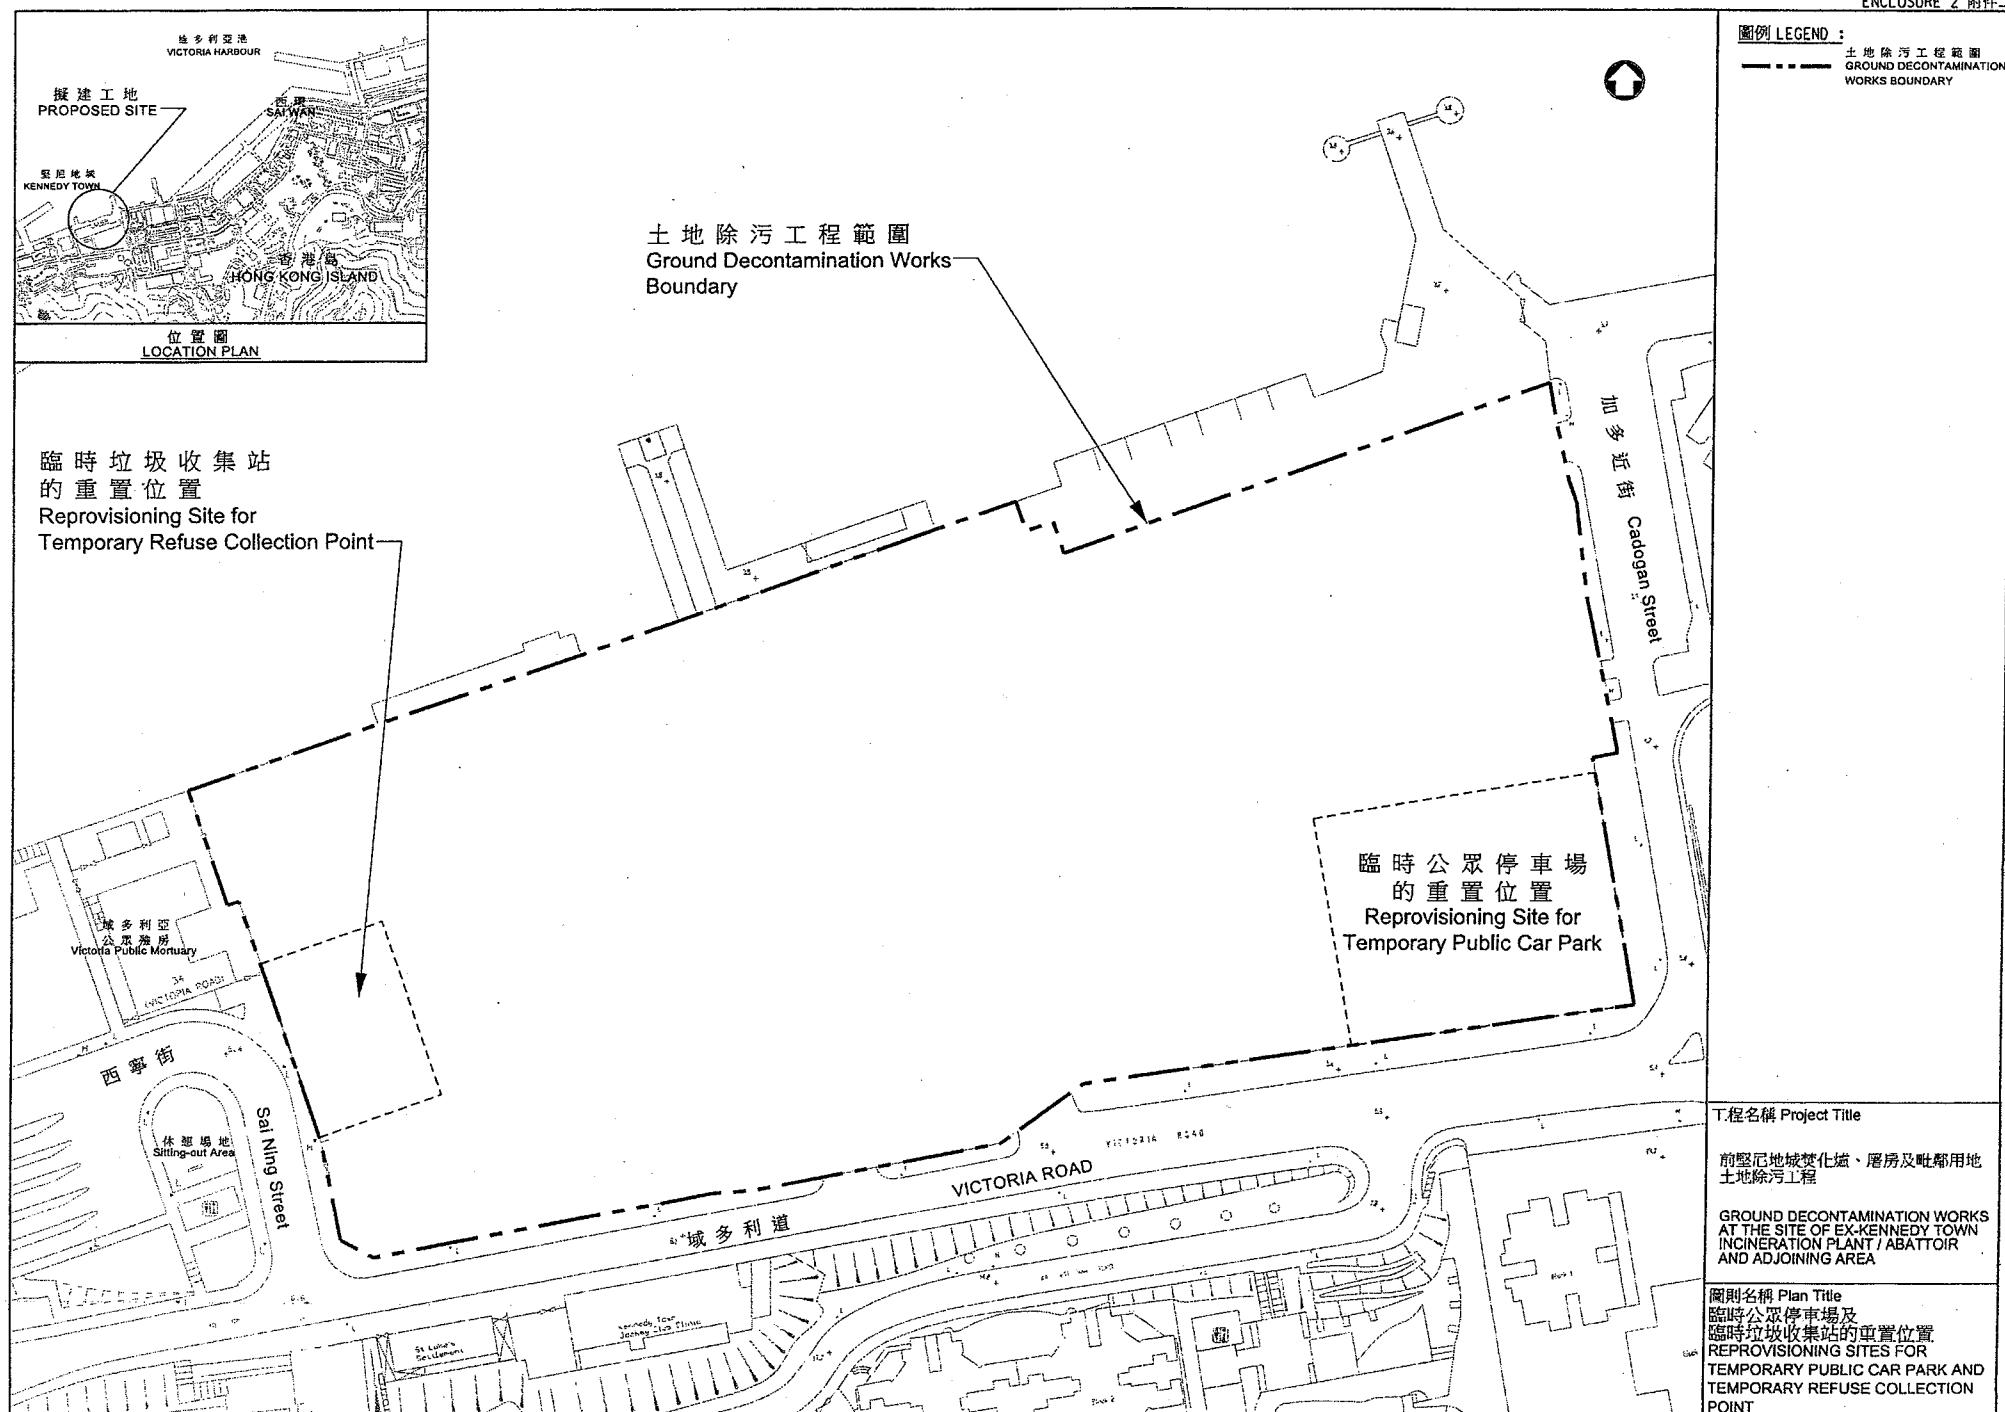

23. CEDD will carry out an environmental monitoring and audit programme in accordance with the approved EIA report and relevant EP conditions granted under the EIA Ordinance. Among other things, CEDD will carry out air quality monitoring regularly to measure the concentration of the ambient total suspended particulates at nearby residential developments as well as the concentration of the ambient hydrocarbons at the site boundary and at the discharge vents of the biopiles during the decontamination works. The results of the environmental monitoring will be made available for public inspection. Works liaison group will also be set up by CEDD in the course of works to strengthen community liaison.

**A. Presentation from the Protect Cadogan Park Alliance**

- 7.1 **The Chair** welcomed representatives from the Protect Cadogan Park Alliance (the Alliance) to the meeting. **Mr Ben MOK** presented the Alliance's views on retaining the Cadogan Street Temporary Garden (the Park) with the aid of a PowerPoint.
- 7.2 **Mr Ken SO** requested CEDD to fully justify the need for carrying out decontamination works at the site concerned in the western part of Kennedy Town.
- 7.3 **Mr LEUNG Kong-yiu** commented that the Park was open to the public for 18 years. Even if there were contaminants underneath the Park, they had not posed any threat to the health of people. Besides, the Park could help enhance accessibility to the future waterfront. He said the Government could identify another site for residential development.
- 7.4 **Ir Raymond CHAN** echoed that the Government should identify other suitable sites for residential development and retain the Park. He added that land use planning should be examined holistically.
- 7.5 **Mr Anthony CHEUNG** commented that the Park, which could enhance connection between the hinterland and the waterfront, should be kept. The Government could review the land use proposal and identify other means such as increasing building height restriction over the territory to increase housing production.
- 7.6 **Mr Ivan HO** said relevant Government departments should consult the local community again and retain the Park as far as practicable.
- 7.7 **Mr Paul ZIMMERMAN** commented that the Alliance had presented some compelling arguments. According to the Alliance's investigation, the contamination was deep underground and had not affected public health in all these years. Users of the Park, including the elderly and the kids,

were allowed to gain access to the Park for years. He did not see sufficient justification to close the Park for carrying out decontamination works.

7.8 **The Chair** said the Task Force shared the view of the Alliance to retain the Park. The Task Force's view would be conveyed to the TPB as usual.

7.9 **Mr Louis KAU** made the following responses-

- (a) the content of the Alliance's presentation, was similar to that of their representation made under the Town Planning Ordinance, which would be considered by the TPB;
- (b) a hearing on representations and comments in respect of the amendments to the draft Kennedy Town and Mount Davis Outline Zoning Plan (OZP) would be held in Q1 of 2017 to further listen to oral submissions made by the representers and commenters; and
- (c) the amendments to the draft OZP were drawn up taking into account the need for the decontamination works as identified by relevant department and for the public to enjoy larger public open space at the waterfront.

7.10 **Mr Ben MOK** thanked the Task Force for their support for retaining the Park and asked PlanD to review the amendments to the OZP.

**Summary of Representations/Comments to Representations & Planning Department's Responses  
in respect of the Draft Kennedy Town & Mount Davis Outline Zoning Plan (OZP) No. S/H1/20**

**Representations**

**Table A: Waterfront Park and Open Space**

<b>Items</b>	<b>Subject of Representation</b>		<b>Responses to Representations</b>
<u>Providing Views</u>			
Amendment Item A1 (Proposed Waterfront Park)	A1.	Agree/no comment.	Noted.
Amendment Item A3 (Kennedy Town Temporary Recreation Ground)	A2.	Supported/agree/no comment.	Noted.
<u>Opposing Views</u>			
Amendment Item A1 (Proposed Waterfront Park)	A3.	Provision of commercial facilities at the waterfront is opposed as it would hinder the public's enjoyment of the waterfront.	The proposed waterfront park is zoned "O(1)", the planning intention of which is to provide leisure and recreation uses with ancillary commercial facilities for public enjoyment. While the detailed design of the proposed waterfront park is yet to be determined, its conceptual design, including tree planting areas, lawns, small scale commercial uses in the form of single storey structure for food and beverage, viewing deck and other park facilities, to add vibrancy to the waterfront, has been submitted to the Task Force on Harbourfront Developments on Hong Kong Island (TFHK) of the

Items	Subject of Representation	Responses to Representations
		<p>Harbourfront Commission in 2015. TFHK agreed that such conceptual design can serve as reference for the future detailed design of the park. Subject to the completion of the rezoning process, the Government would take forward the implementation of the waterfront park.</p>
	<p>A4. The accessibility and connectivity of the proposed waterfront park are not good.</p>	<p>To enhance accessibility to the waterfront and connectivity in the western part of Kennedy Town, new pedestrian footbridges and crossings have been proposed to improve the pedestrian network of the area, which has already taken into account the comments from Central and Western District Council (C&amp;WDC) and TFHK. Details of the pedestrian network of the area are provided in TD's Traffic Review. The relevant government departments will further consult C&amp;WDC and TFHK when details of the proposed facilities are available.</p>
	<p>A5. The setting and design of the proposed waterfront park would likely become a private garden for the proposed residential development at the site under Amendment Item C2.</p>	<p>The "O" zone is intended primarily for the provision of outdoor open-air public space for active and/or passive recreational uses serving the needs of local residents as well as the general public. For the "O(1)" zone, leisure and recreation uses with ancillary commercial facilities for public enjoyment may be provided.</p>

Items	Subject of Representation	Responses to Representations
		<p>The proposed waterfront park and the private residential site under <b>Amendment Item C2</b> are separated by a new public road.</p> <p>Response to Ground A3 above is also relevant.</p>
	<p>A6. The implementation mechanism for Amendment Item A1 is unclear.</p>	<p>Subject to the completion of the rezoning process, the Government would take forward the implementation of the waterfront park. The Government would consider the implementation agent and timetable of the waterfront park having regard to factors such as site and resource availability, scope of works to be covered, facilities to be provided and local aspirations. The implementation agent would be encouraged to consult the Harbourfront Commission at the early stage of implementation.</p>
<u>Representers' Proposals</u>		
<p>Amendment Item A1 (Proposed Waterfront Park)</p>	<p>A7. To provide a continuous waterfront promenade for the public free of charge. Commercial facilities of one-storey should be located further away from the waterfront.</p>	<p>It is the Government's vision to provide a continuous waterfront promenade along both sides of Victoria Harbour. As for the western part of Kennedy Town, a continuous waterfront promenade comprising the proposed waterfront park, the 12m wide waterfront promenade as required under <b>Amendment Item B</b> and</p>

Items	Subject of Representation	Responses to Representations
		<p>the Kennedy Town Temporary Recreation Ground will be provided for public enjoyment.</p> <p>Response to Ground A3 above is also relevant.</p>
	<p>A8. No (except refreshment kiosks if required)/Limited commercial facilities should be provided at the proposed waterfront park so as to create a genuine recreational space for the public.</p>	<p>Response to Ground A3 above is relevant.</p>
	<p>A9. To relocate the Arch and Foundation Stone of Tung Wah Smallpox Hospital and the City of Victoria Boundary Stone to the proposed waterfront park and adopt cultural heritage as the main theme of the park.</p>	<p>The Arch and Foundation Stone at the rest area next to Sai Ning Street Bus Terminus, which was relocated from its former hospital site at Ka Wai Man Road, is a Government Historic Site identified by the Antiquities and Monuments Office (AMO) of LCSD. It is proposed to be relocated to the future waterfront park for non-in-situ preservation. The future proponent of the waterfront park would need to seek AMO's comment in advance on any relocation proposal in accordance with the DEVB Technical Circular (Works) No. 6/2009.</p> <p>Response to Ground A3 above is also relevant.</p> <p>There is no relocation proposal of the City of Victoria</p>

Items	Subject of Representation		Responses to Representations
			Boundary Stone, which is located at the Kennedy Town Temporary Recreation Ground at Sai Ning Street.
	A10.	To allow pets in the proposed waterfront park.	The Government will keep an open mind on the provision of pet garden and other facilities in the proposed waterfront park.
	A11.	To plant more trees at the proposed waterfront park so as to compensate for the loss of trees in Cadogan Street Temporary Garden (CSTG) due to ground decontamination works.	Tree planting, including those to compensate those trees affected by the removal of CSTG, would be provided at the waterfront park as far as practicable.  Response to Ground A3 above is also relevant.

**Table B: Commercial, Leisure and Tourism Related Uses**

Items	Subject of Representation		Responses to Representations
<u>Providing Views</u>			
Amendment Item B (Proposed Commercial, Leisure and Tourism Related Uses)	B1.	The proposed commercial, leisure and tourism-related uses at the waterfront should be elaborated.	The rezoning of the site from “I” to “OU(Commercial, Leisure and Tourism Related Uses)” is to provide an incentive to facilitate the phasing out of the existing incompatible godown use. More stringent planning control through the imposition of development restrictions on GFA and BH is due to its prominent waterfront location (i.e. at the western entrance to the Victoria Harbour).

Items	Subject of Representation	Responses to Representations
		<p>Apart from the 'Pier' use under Column 1, appropriate commercial, leisure and tourism related uses such as 'Hotel', 'Marina', 'Office', 'Private Club', 'Exhibition or Convention Hall', 'Shop and Services', 'Eating Place', 'Place of Entertainment' and 'Place of Recreation, Sports or Culture' are all Column 2 uses so as to ensure the future development/ redevelopment of the site would be compatible at this prominent harbourfront location through the planning application mechanism.</p>
	<p>B2. The change of land use of China Merchants Group (CMG)'s site for hotel development has been suggested. However it is also suggested that Victoria Road and Sai Ning Street could not accommodate additional patronage and traffic arising from the hotel development. The hotel development would not be compatible with the surrounding and would have adverse traffic impact and air and light pollution, which would affect the health of the local residents.</p>	<p>Technical assessments on traffic, air ventilation and visual aspects, together with an initial tree survey have been conducted to ascertain the technical feasibility of the land use proposals and a summary of these assessments was attached to MPC Paper No. 1/16 for the proposed OZP amendments. As advised by the relevant government departments, including the Transport Department (TD), the Environmental Protection Department (EPD), the Agriculture, Fisheries and Conservation Department (AFCD), the Architectural Services Department (ArchSD), Civil Engineering and Development Department (CEDD), the Drainage Services Department (DSD), the Water Supplies</p>

Items	Subject of Representation	Responses to Representations
		<p>Department (WSD), the Leisure and Cultural Services Department (LCSD) and the Chief Town Planner/Urban Design &amp; Landscape (CTP/UD&amp;L) of PlanD, no insurmountable technical problem arising from the amendments to the OZP, including Amendment Item B, is anticipated.</p>
	<p>B3. The residents should be consulted on any development of the site, including traffic and environmental impacts.</p>	<p>As all uses except piers would require planning application, public consultation on planning application under the provision of the Town Planning Ordinance (the Ordinance) will be followed. The project proponent is also encouraged to consult C&amp;WDC and the Harbourfront Commission on the development/redevelopment proposal.</p>
	<p>B4. The building height (BH) of the proposed development at the CMG's site should be lowered considerably due to the possible adverse impacts. This would reduce development intensity, and improve the aesthetic value of the Victoria Harbour, connectivity of buildings, community harmony, traffic and transport, and urban sustainability of the district.</p>	<p>A stepped height profile, consisting of height bands from 70mPD at the waterfront area progressively increasing to 160mPD towards the hillside in the south, is proposed having regard to the waterfront setting and the general topography of the area.</p> <p>According to the Notes of the OZP, the site is subject to maximum GFA of 46,446m<sup>2</sup> and the maximum BHs, in terms of mPD and number of storeys, as stipulated on the OZP (i.e. 70mPD for the land portion and 2 storeys for</p>

Items	Subject of Representation		Responses to Representations
			<p>the pier portion) or the GFA and height of the existing building, whichever is the greater. This is to avoid out-of-context and incompatible developments while respecting the existing private treaty grant (PTG).</p> <p>Technical assessments on traffic, air ventilation and visual aspects have been conducted to ascertain the technical feasibility of the land use proposals. As advised by the relevant government departments, no insurmountable technical problems arising from the amendments to the OZP is anticipated.</p>
<u>Opposing Views</u>			
Amendment Item B (Proposed Commercial, Leisure and Tourism Related Uses)	B5.	The Schedule of Uses of the proposed “Other Specified Uses” (“OU”) annotated “Commercial, Leisure and Tourism Related Use” (“OU(Commercial, Leisure and Tourism Related Use)”) zone, which all uses are under Column 2 (except pier) and no ‘Warehouse (excluding Dangerous Goods Godown)’ use, fails to provide incentive for regeneration of the waterfront to become a wine-themed commercial, leisure and tourism destination, and would obstruct Hong Kong to develop into an Asia’s leading wine hub	<p>Response to Ground B1 above is relevant.</p> <p>According the Occupation Permits of the two existing buildings on site, most of the floors are permitted for storage use with some ancillary facilities. The existing use of the buildings will not be affected by the OZP amendments until the buildings are redeveloped or converted to other uses. As the planning intention for this “OU” zone is to phase out the existing industrial uses, ‘Warehouse (excluding Dangerous Goods Godown)’ use is not included in Column 1 or 2 under the</p>

Items	Subject of Representation	Responses to Representations
	<p>and curtail the flexibility for adjustment with market volatility.</p> <p>‘Warehouse (excluding Dangerous Goods Godown)’ use to be included in Schedule of Uses to provide flexibility to adjust its cellar business.</p>	<p>Notes for the “OU” zone. Subject to the scale and nature of the proposed wine cellar for the wholesale of wine, which may be regarded as ‘Wholesale Trade’, the use may be permitted through planning application.</p>
	<p>B6. There is a lack of sound justification for the GFA restriction. The proposed GFA restriction discourages the efficient use of the existing buildings, and deters the vibrancy of the waterfront.</p>	<p>The GFA restriction for commercial, leisure and tourism related uses of the site is determined after taking account of the GFA of the existing buildings on site, the development right under PTG, the findings of the Traffic Review, Visual Appraisal (VA) and Expert Evaluation on Air Ventilation Assessment (AVA EE) conducted for the Land Use Review on the Western Part of Kennedy Town, as well as the advice of relevant government departments. As there is still residual GFA under the PTG, i.e. about 122.58m<sup>2</sup>, small scale additional structures could be proposed to be located on the pier portion of the site.</p> <p>Response to Ground B4 above is also relevant.</p> <p>Design flexibility has been allowed through minor relaxation clause on GFA restriction.</p>
	<p>B7. There is a lack of sound justification for the width</p>	<p>The 12m wide waterfront promenade is a requirement</p>

Items	Subject of Representation	Responses to Representations
	<p>of the proposed waterfront promenade. The requirements of the proposed waterfront promenade stipulated in the Notes of the OZP hinder the flexible and creative design (i.e. elevated design) of the proposed waterfront park for better pedestrian experience. The 12m wide waterfront promenade is excessive and is incompatible with the existing design of the Kennedy Town Temporary Recreation Ground. It is uncertain whether commercial uses could be considered as “public use” and be permitted within the waterfront promenade.</p>	<p>under the Remarks of the Notes for this “OU” zone. Such statutory requirement is imposed with a view to providing a continuous pedestrian linkage connecting the future waterfront park under <b>Amendment Item A1</b> and the existing recreation ground under <b>Amendment Item A3</b>. The width of the pedestrian linkage of 12m is determined having regard to the width between the existing buildings and the coastline and the need to maintain a smooth transition between the two open spaces. In order to encourage innovative design of the waterfront promenade, except the total width, no other specific restriction on the design of the linkage, such as the form, level or uses, is imposed. The project proponent may also apply for minor relaxation of this requirement through planning application.</p>
	<p>B8. The building height restriction (BHR) of 70 metres above Principal Datum (mPD) as shown on the Plan causes misunderstanding on the actual permitted BH.</p>	<p>Taking account of the BH of the two existing buildings, i.e. 84mPD (Block B in the east) and 64mPD (Block A in the west), their existing building bulk and the overall BH concept of the Land Use Review area, the BH restrictions of 70mPD for the land portion and 2 storeys for low-rise buildings/restructures on the pier are considered appropriate at this prominent waterfront location and compatible with the BHs of the surrounding</p>

Items	Subject of Representation	Responses to Representations
		developments. It should be noted that the 2-storey restriction for the pier portion has also taken into consideration the views of the TFHK's Members during the consultation on the Land Use Review.
	B9. The proposed non-building area (NBA) encroaches on the existing building which would hinder the wholesale conversion of the existing building. It has not been specified clearly in either the covering Notes or the Remarks of the Notes of the OZP that in case of wholesale conversion, the NBA as well as the quantitative air ventilation assessment (AVA) can be exempted. It would also disconnect the pier and land portion of the subject site. The definition of minor structures allowed within the NBA is not clear.	According to AVA EE conducted for the Land Use Review, it was confirmed that the Recommended Land Use Proposal (RLUP) will have no major air ventilation impact, except some localised effects, on the existing developments in the neighbourhood. It has recommended that the use of linear green spaces, open spaces, building gaps and NBA to increase the overall permeability for wind movement. The recommendations of AVA EE, including two building gaps and a NBA (each 15m wide) at the public housing site under <b>Amendment Item C1</b> , a building gap (15m wide) at the private residential site under <b>Amendment Item C2</b> and a NBA at the CMG's site under <b>Amendment Item B</b> , have been incorporated in the Explanatory Statement (ES) of the OZP. In view of the sensitive location of the CMG's site at the waterfront and its proximity to the proposed waterfront park/promenade, a wider NBA of 30m (instead of 15m as recommended in AVA EE) has been adopted in the ES to provide a linear
	B10. There is a lack of sound justification for the imposition of the NBA from the air ventilation perspective. The alignment of the NBA is arbitrary and there is inconsistent treatment for private and public development.	

Items	Subject of Representation	Responses to Representations
		<p>space connecting the harbour in the north and Mount Davis in the south for wind penetration and visual permeability so as to avoid wall-like development on the elongated waterfront site. CTP/UD&amp;L of PlanD is of the view that a 30m-wide NBA will provide higher permeability and further enhance the wind performance along Sai Ning Street. Given the large site area for the two aforesaid public and private housing sites, AVA EE also recommended further quantitative AVA be carried out at the design stage to devising sensitive layout and building design to maintain/enhance the air ventilation performance. The requirements for building gaps, NBAs, and quantitative AVA as appropriate, would be stipulated in the lease condition for private development or planning brief for public housing development.</p> <p>The current NBA requirement for the site is specified in the ES. The requirement is based on the AVA EE for the Land Use Review. Apart from the air ventilation consideration, in order to improve the visual permeability and avoid wall-like development on the elongated waterfront site, a 30m-wide NBA is required which takes into account the current 30m separation of the two</p>

Items	Subject of Representation	Responses to Representations
		<p>existing buildings and to align with the eastern boundary of the planned open space. Should there be any proposed changes to the NBA requirement, a quantitative AVA is required to demonstrate that no unacceptable impact on air ventilation at pedestrian level in the vicinity would be resulted. It should be noted that although no above ground structures are allowed within the NBA, minor structures with high air porosity, such as covered walkway and elevated footbridge are generally acceptable. Hence, the technical feasibility of providing connection between the pier and land portion of the site would not be affected. The current NBA requirement for the site is specified in the ES. The requirement is based on the AVA EE for the Land Use Review. Apart from the air ventilation consideration, in order to improve the visual permeability and avoid wall-like development on the elongated waterfront site, a 30m-wide NBA is required which takes into account the current 30m separation of the two existing buildings and to align with the eastern boundary of the planned open space. 		<p>ventilation at pedestrian level in the vicinity would be resulted. It should be noted that although no above ground structures are allowed within the NBA, minor structures with high air porosity, such as covered walkway and elevated footbridge are generally acceptable. Hence, the technical feasibility of providing connection between the pier and land portion of the site would not be affected.</p> <p>Given that the pier portion of the site is proposed for low-rise developments subject to a maximum BH of 2 storeys, significant adverse impact on air/visual permeability is not expected. As such, no NBA is required for that portion of the site.</p> <p>It should be noted that one NBA and two building gaps above podium level are imposed in the ES for the public housing site. In addition, the site and the public housing site are with different site context. Due to its sloping terrain, a podium structure is necessary on structural grounds for the public housing site and designation of NBAs in the north-northwest and south-southeast alignment following the air path through</p>

Items	Subject of Representation	Responses to Representations
		the two sites is not practicable. The representer should also note that for the future development at the public housing site, a quantitative AVA will be required at the detailed design stage. Such requirement has been specified in the ES and will be incorporated in the planning brief for the public housing development.
<u>Representers' Proposals</u>		
Amendment Item B (Proposed Commercial, Leisure and Tourism Related Uses)	B11. <b><u>R144's Proposals</u></b> A proposed commercial, leisure and tourism indicative scheme, including wine cellar use, with total GFA of 65,100m <sup>2</sup> , plot ratio (PR) of 5, BHs of 70mPD and 84mPD in the land portion and 18mPD/2storeys in the pier portion is proposed. The scheme also includes a green roof/elevated walkway area of 6,500m <sup>2</sup> , a waterfront promenade of 1,500m <sup>2</sup> and parking and loading/unloading facilities (123 private car parking spaces, 7 motorcycle parking spaces, 17 light goods vehicle parking spaces, 9 heavy goods vehicle parking spaces, 3 taxi/private car lay-by and 1 single deck tour bus lay-by. Traffic Impact Assessment (TIA) and Sewerage Impact Assessment (SIA) are submitted. It is claimed that the proposed	(a) The indicative scheme submitted by <b>R144</b> is generally in line with the planning intention of the "OU" zone. However, TD, EPD, ArchSD, DSD, WSD and CTP/UD&L of PlanD are of the view that there is insufficient information to demonstrate that the indicative scheme is acceptable from the traffic, architectural, air ventilation, urban design, visual, environmental, sewerage and water supplies point of view. Hence, its technical feasibility has not yet been demonstrated satisfactorily;  <i>Changes to the Schedule of Uses</i> (b) <b>R144's</b> proposal to convert some Column 2 uses to Column 1 uses is considered not acceptable as it would undermine the planning control on this

Items	Subject of Representation	Responses to Representations
	<p>scheme is technically feasible and will not bring adverse impacts to the surrounding environments.</p> <p>The following amendments are proposed by the representer:</p> <p>(i) To amend the BHR of the eastern section of the land portion of the subject site to 84mPD.</p> <p>(ii) To amend the Schedule of Uses for the subject zone by incorporating Schedule I (for open-air development or for building other than industrial or industrial-office building) and Schedule II (for industrial or industrial-office building), by adopting similar approach of “OU” annotated “Business” (“OU(B)”) zone:</p> <p>Schedule I – To include commercial, leisure and tourism related uses under Column 1 and ‘Warehouse (excluding Dangerous Goods Godown)’ use under Column 2 of the Notes of the OZP. Those commercial, leisure and tourism related uses are in line with the planning</p>	<p>prominent site. EPD has also reservation on such proposal without the support of the required technical assessment;</p> <p>(c) given that the planning intention of the “OU” zone is to phase out existing industrial uses, it is considered not appropriate to incorporate ‘Warehouse (excluding Dangerous Goods Godown)’ use in the Schedule of Uses of the zone, or to provide a separate Schedule of Uses for industrial or industrial-office building;</p> <p><i>Increase of maximum GFA and BH restrictions</i></p> <p>(d) there is no strong justification under <b>R144</b>’s submission for further increase in the maximum GFA and BH restrictions in the Notes of the OZP. In any case, there is provision under the OZP for minor relaxation of GFA and BH restrictions;</p> <p><i>Reduction of the width requirement of waterfront promenade</i></p> <p>(e) as for the proposal of reducing the width from 12m to 6m, both ArchSD and CTP/UD&amp;L, PlanD have</p>

Items	Subject of Representation	Responses to Representations
	<p>intention of the “OU(Commercial, Leisure and Tourism Related Uses)” zone and should be added in Column 1 of the Notes of the OZP, similar to other precedent cases.</p> <p>Schedule II – To retain commercial, leisure and tourism related uses under Column 2 and to include ‘Warehouse (excluding Dangerous Goods Godown)’ under Column 1 of the Notes of the OZP.</p> <p>(iii) To amend the Remarks of the Notes of the subject zone by revising the GFA restriction to 65,100m<sup>2</sup>.</p> <p>(iv) To amend the Remarks of the Notes of the subject zone by revising the provision of a 12m wide waterfront promenade to an elevated or at grade or multi-level waterfront promenade with a total width of 6m for public use.</p> <p>(v) To incorporate a requirement to provide a 15m wide building gap above 20mPD</p>	<p>reservation on the reduced width which seems to be narrow after discounting the space for maintenance purpose and provision of landscaping and street furniture. The reduced width of the promenade will not be conducive to creating a sense of entry to the pier portion or enhancing the visual connectivity towards the waterfront; and</p> <p><i>Change of 30m wide NBA requirement under ES to 15m wide building gap restriction under the Notes</i></p> <p>(f) the NBA requirement is not stipulated under the Notes or on the OZP. The reduction of the width of the NBA is not supported for the reasons given in Responses to Grounds B9 and B10 above. The proponent may conduct a quantitative AVA at the detailed design stage to justify any change to the NBA requirement as specified in the ES.</p>

Items	Subject of Representation	Responses to Representations
	<p>between the two existing buildings into the Remarks of the Notes of the subject zone.</p> <p>(vi) To incorporate a clause to allow minor relaxation of the said building gap on application to the Town Planning Board into the Remarks of the Notes of the subject zone.</p> <p>(vii) To amend the Explanatory Statement of the OZP accordingly.</p>	
	<p>B12. The land for the China Merchants Godowns should be resumed by the Government.</p>	<p>The private property right should be respected in general. The intention of the zoning is to encourage phasing out of the existing industrial operation through redevelopment or wholesale conversion.</p>
	<p>B13. To release the land near the sea in order to enhance the connectivity of the proposed waterfront park.</p>	<p>Responses to Grounds B7 and B12 above are relevant.</p>
	<p>B14. Two to three storeys facilities should be allowed at the pier portion with ground level for industrial operations and upper levels for commercial, retail and recreational uses.</p>	<p>It is considered inappropriate as the proposal is not in line with the planning intention of the “OU” zone and a BH restriction of 2 storeys is already imposed at the pier portion of the site.</p> <p>Response to Ground B8 above is also relevant.</p>

**Table C: Residential Developments**

Item	Subject of Representation		Responses to Representations
<u>Supporting Views</u>			
Amendment Item C1 (Proposed Public Housing Development)	C1.	Support public housing development. It would alleviate the housing problem of grassroot level and provide a home for every person. People in need could be taken care of.	Noted.
	C2.	The development of 2,340 public rental housing (PRH) units is supported as it can fully utilise the land resources to address the shortage of PRH and provide opportunities for the elderly to resettle in the same district should their home be redeveloped in the future.	Noted.
	C3.	There is demand for public housing/ There is inadequate public housing. There is a serious shortage of PRH in the Western District as there are only 638 public housing units in Sai Wan Estate.	Noted.
	C4.	The new PRH development of 2,340 units at the ex-Hong Kong Academy site, ex-Mount Davis Cottage Area and ex-Police Married Officers Quarters would shorten the waiting time for PRH and address housing problem.	Noted.
	C5.	Old buildings in the district have been	Noted.

Item	Subject of Representation	Responses to Representations
	<p>redeveloped for luxurious private residential and hotel developments which do not cater for the need of the grassroot level. The rent for housing is unaffordable and the living space in Hong Kong is small. Public housing for the grassroot level is needed in the Western District for a balanced housing mix.</p>	
	<p>C6. Sai Wan Estate, with a history spanning 58 years, is in need of development. The development of PRH is supported for providing reception resources and local rehousing to facilitate the redevelopment of Sai Wan Estate.</p>	<p>Noted.</p> <p>As stated in the Long Term Housing Strategy announced in December 2014, while redevelopment may increase public rental housing supply over the long term, it will in the short term reduce public rental housing stock available for allocation. The Housing Authority (HA) would need to be very cautious in considering redevelopment of the existing estates on an estate-by-estate basis in accordance with its policies and criteria. Although there is currently no redevelopment plan of Sai Wan Estate, HA could take account of its future redevelopment in the planning and design of the proposed public housing development at Ka Wai Man Road, subject to a comprehensive assessment of the whole development.</p>

Item	Subject of Representation		Responses to Representations
	C7.	The new PRH development at the ex-Hong Kong Academy site, ex-Mount Davis Cottage Area and ex-Police Married Officers Quarters would provide better community facilities, which will benefit the local community.	Noted.
	C8.	Public housing development could narrow the gap between rich and poor in the district.	Noted.
<u>Providing Views</u>			
Amendment Item C1 (Proposed Public Housing Development)	C9.	A recreational complex of not more than 5 storey and 50mPD should be built at the ex-Mount Davis Cottage Area. It is suggested to provide children open space and outdoor recreation use at the roof of the recreation complex, and other recreation and community facilities in the recreation complex to address the inadequate provision of open space and recreational facilities in the district. The existing Mount Davis Trail opposite to The Sail at Victoria should also be enhanced.	<p>The overall BH profile of the Land Use review area has taken into account the topography, the current BH and The stepped BH profile with maximum BH restrictions descending from 140mPD in the east to 65mPD in the west has been adopted having regard to the development intensity of the site and the overall BH profile of the area. Hence, the BH restrictions for the site are considered appropriate and compatible with the surroundings in visual terms.</p> <p>In general, the overall provision of open space is assessed at a district council level with reference to the requirement under HKPSG. There are about 56ha of existing open space, including about 17ha local open space and 39ha district open space in the C&amp;W District,</p>

Item	Subject of Representation	Responses to Representations
		<p>rendering an overall 2.2m<sup>2</sup> of open space per person, which is higher than 2m<sup>2</sup> per person as required under HKPSG. In the future, there will be a total provision of about 60ha open space, including about 19ha local open space and 41ha district open space, maintaining an overall 2.2m<sup>2</sup> of open space per person (based on the planned population of the district).</p> <p>Suitable sites for open space and GIC facilities have been proposed under the land use proposals.</p> <p>Provision for a possible pedestrian connection to the existing Mount Davis Trail at the western end of the proposed public housing site would be explored at the detailed design stage.</p>
	<p>C10. To develop a community complex with a BH of not more than 50mPD at the ex-Mount Davis Cottage Area.</p>	<p>There is no shortfall of community facilities in the area. In addition, additional GIC facilities including community and social welfare facilities and a primary school have already been allowed at <b>Amendment Items C1, C2 and D1</b>. As such, without any further justification, it is premature to consider any change to the use of the site.</p>

Item	Subject of Representation	Responses to Representations
		Response to Ground C9 above regarding the BH aspect is also relevant.
	C11. Oppose the light goods vehicle parking at the proposed recreational complex at the site due to consideration of pedestrian safety, traffic congestion and risk of accident. The generated traffic would affect pedestrian safety, air quality and cause noise pollution.	<p>According to the Traffic Review, the overall traffic condition of the area would be acceptable (including the provision of 25 light goods vehicle (LGV) parking spaces at the proposed public housing development) with the implementation of the traffic improvement measures. These LGV parking spaces are requested by TD to address the district shortfall. In addition, the LGV carpark would only be accessible through Victoria Road according to the proposed run-in/out arrangement of the public housing development. For Ka Wai Man Road, traffic improvement measures including widening of a section near the run-in/out of the public housing site for the provision of a layby and diverting the eastbound traffic to the new access road by banning its right turn to Victoria Road have been proposed. Suitable warning signs and road humps will also be installed at proper locations to enhance pedestrian and road safety.</p> <p>EPD confirms that there is no insurmountable environmental impact. Further detailed technical assessments may be required at the detailed design stage</p>

Item	Subject of Representation	Responses to Representations
		<p>to ascertain the mitigation measures required in terms of air quality and noise for incorporation into the building design. In accordance with the established procedures, for public housing development, a planning brief setting out the required technical assessments, including an Environmental Assessment Study, will be prepared to guide the future development. For other government's projects, any technical assessments required will be specified under the technical feasibility study for the concerned project. As for private developments, any technical assessments required will be specified under the lease.</p>
	<p>C12. The air corridor should be widened and moved northward, near the waterfront in order to enhance the air ventilation and reduce the felling of trees on slope.</p>	<p>As for the concern on air ventilation, one 15m-wide NBA in northeast-southwest direction and two 15m-wide building gaps each in the respective north-southerly and northwest-southeasterly direction have been adopted as recommended under AVA EE to enhance the overall permeability of the site. Housing Department (HD) will undertake a quantitative AVA at the detailed design of the public housing development with a view to enhancing and optimizing the pedestrian wind environment.</p> <p>According to the initial tree survey conducted by the HD,</p>

Item	Subject of Representation	Responses to Representations
		<p>most of the trees within the subject site are common tree species. Nonetheless, there are two <i>Artocarpus hypargyrea</i> which are listed in AFCD's Rare and Precious Plants of Hong Kong are also identified in the subject site and are recommended to be retained.</p> <p>While a number of existing trees are proposed to be felled due to conflict with the proposed development, relevant departments will minimise the impact on existing trees and provide appropriate landscape measures and feasible tree preservation and compensatory planting proposals in accordance with DEVB's relevant Technical Circular and Lands Department's Land Administration Office Practice Note. AFCD has no adverse comment on the amendment items from tree preservation perspective. Hence, there is no insurmountable landscape impact.</p>
Amendment Item C3 (Proposed Private Residential Development at junction of Victoria Road/Sai Ning Street)	C13. Oppose the private residential development and any building higher than 1 storey at the Kennedy Town Bus Terminus. The development would affect pedestrian safety, the growth of trees and air ventilation. The population is already overcrowded and there is inadequate open space.	The Government has adopted a multi-pronged approach to increase and expedite housing land supply in the short and medium-term. There is a need to optimise the use of developed areas in the existing urban areas and new towns, as well as the nearby land where existing infrastructures are available. In this regard, concerned bureaux/government departments have been conducting

Item	Subject of Representation	Responses to Representations
		<p>various land use reviews, including reviews on the government land currently vacant, under Short Term Tenancy or other different short-term or other government uses, as well as “GB” sites, etc. so as to identify more suitable sites for residential use.</p> <p>The western part of Kennedy Town is one of the areas identified for land use review for developments. The Land Use Review covers a number of vacant government sites, including two larger ones, available in the urban area which could help address some of the development needs of the society, particularly the acute housing demand of the public. According to the RLUP, one public housing site (to be developed in two phases) and three private residential sites are proposed, providing about 2,340 public and 1,000 private housing units respectively (with 70:30 public to private housing ratio) to meet the pressing housing demand.</p> <p>The amendments to the draft Kennedy Town &amp; Mount Davis OZP No. S/H1/20 are mainly based on the RLUP of the Land Use Review, which were formulated having regard to relevant planning principles on harbourfront</p>

Item	Subject of Representation	Responses to Representations
		<p>planning, housing land supply, provision of open space and GIC facilities, preservation of structures with historic interest and OVTs, and public views received during the consultation on the Land Use Review. The RLUP has responded to different needs of the society, the local residents and the relevant stakeholders by providing public and private housing, primary school, open space and community facilities, relocating/phasing out facilities which are incompatible with the waterfront and improving pedestrian, transport and traffic facilities etc. It has struck a balance between various development needs of Hong Kong and the aspirations of the local community. Alteration of any proposed land use of the individual site may adversely affect the overall objectives of the RLUP as well as the housing land supply and/or the provision of transport and GIC facilities.</p> <p>Please refer to Responses to Grounds C9, C11 and C12 above.</p> <p>Response to Ground B4 regarding the BH is also relevant.</p>

Item	Subject of Representation		Responses to Representations
Amendment Item C4 (Proposed Private Residential Development between Victoria Road and Sai Ning Street)	C14.	Agree/no comment.	Noted.
<u>Opposing Views</u>			
Amendment Items C1 to C4 (Residential Developments)	C15.	Although the MTR West Island Line has been in operation for a period of time, residents living in Kennedy Town and along Victoria Road still rely heavily on road traffic, together with the traffic generated from the public cargo working area and refuse transfer station, traffic congestion is a common phenomenon in the district. Additional population and traffic arising from the proposed residential developments, without any road widening schemes in the district, will aggravate the traffic condition.	TD has undertaken a Traffic Review for the RLUP (Appendix II of Attachment V of MPC Paper No. 1/16). According to the Traffic Review, with the implementation of the proposed traffic improvement measures, the traffic impact of the land use proposals and the public transport services for the area upon their full development would be acceptable. TD has also provided supplementary information as per the request of some members of the public to clarify the assumptions and methodology of the Traffic Review, the rationale for determining the provision of public car parking and goods vehicle parking spaces and the planning of public transport services provision.
	C16.	There are considerable loading/unloading activities on Belcher's Street, leaving only one traffic lane for vehicular use and causing congestion. The proposed high-density residential developments would bring in additional population and worsen the traffic condition.	

Item	Subject of Representation	Responses to Representations
	<p>C17. There are inadequate public transport services after the inauguration of the MTR West Island Line, and also insufficient car parking spaces in Kennedy Town. Additional population would worsen the current situation.</p>	<p>For public transport services, besides the proposed PTT at the proposed private residential development (<b>Amendment Item C2</b>) and a new bus layby to be provided on Victoria Road next to the proposed public housing development, TD would closely monitor the provision of public transport services in the area, taking into account different factors including the changes in population and passenger demand, the existing public transport services, public views and result from service level investigation to ensure that the level of services is adequate.</p> <p>About 70 public parking spaces for private cars are proposed under <b>Amendment Item C2</b> in order to address the shortfall in Kennedy Town. To address the shortfall of goods vehicles, about 50 public parking spaces for goods vehicles are also proposed under <b>Amendment Item C2</b> and 25 public parking spaces for LGVs under <b>Amendment Item C1</b>. In addition, the feasibility of providing an underground public carpark underneath the proposed waterfront park would be subject to further study.</p>
	<p>C18. There is limited space in Kennedy Town MTR</p>	<p>Response to Ground A4 above is relevant.</p>

Item	Subject of Representation	Responses to Representations
	<p>Station and footpaths around the station are narrow, which would not be able to accommodate additional population.</p>	<p>The footpaths at northern kerbside of Forbes Street, Smithfield and Rock Hill Street are generally of 2m (minimum) wide. TD noted that the narrowest section of the footpath around Kennedy Town Station is at the southern kerbside of Forbes Street (around 0.9m). In consultation with the Highways Department (HyD), TD has proposed to widen the concerned section of the footpath to about 1.4m with a view to improving the walking environment.</p>
<p>Amendment Item C1 (Proposed Public Housing Development)</p>	<p>C19. Oppose public housing development at site under Amendment Item C1.</p>	<p>Response to Ground C13 above is relevant.</p>
	<p>C20. The proposed stepped BH profile at the subject site is opposed.</p>	<p>Response to Ground C9 above is relevant.</p>
	<p>C21. The proposed number of units is high.</p>	<p>Response to Ground C13 above is relevant.</p>
	<p>C22. The subject site is currently zoned as “Government, Institution or Community” (“G/IC”) and “Green Belt” (“GB”) which can serve as a buffer area for the district. Since there is a shortage of community facilities and green areas in the district, it is crucial to retain the much needed “G/IC” and “GB” zones for the community. The lush hillside at the south of</p>	<p>Responses to Grounds C12 and C13 above are relevant.</p> <p>Response to Ground C10 above on provision of GIC facilities is also relevant.</p>

Item	Subject of Representation	Responses to Representations
	Victoria Road should be kept to preserve the existing trees.	
	C23. Ka Wai Man Road is not suitable for public housing development. Residents in those public housing units could enjoy sea view at a low rental price. The Government has not taken into consideration of the interest of surrounding private property owners and would damage social cohesion of the society.	Response to Ground C13 above is relevant.  Further, according to the Traffic Review, the overall traffic condition of the area would be acceptable with the implementation of the traffic improvement measures. For Ka Wai Man Road, traffic improvement measures including widening of a section near the run-in/out of the public housing site for the provision of a layby and diverting the eastbound traffic to the new access road by banning its right turn to Victoria Road have been proposed.
	C24. There is no compelling reason to rezone the subject site for residential development as the district is already densely developed.	Response to Ground C13 above is relevant.
	C25. Oppose public housing development at site under Amendment Item C1. The existing traffic network (such as Ka Wai Man Road) is already overloaded and could not support additional population. The conflict between traffic and pedestrians would become more serious.	Responses to Grounds C13 and C23 above are relevant.
	C26. The increase in population would destroy the quiet	Response to Ground C13 above.

Item	Subject of Representation		Responses to Representations
		environment and natural ecology of the district.	<p>Technical assessments on traffic, air ventilation and visual aspects, together with an initial tree survey have been conducted to ascertain the technical feasibility of the land use proposals and a summary of these assessments was attached to MPC Paper No. 1/16 for the proposed OZP amendments. As advised by the relevant government departments, including TD, EPD, AFCD, ArchSD, CEDD, DSD, WSD, LCSD, CTP/UD&amp;L of PlanD, no insurmountable technical problems arising from the amendments to the OZP are anticipated.</p>
Amendment Item C2 (Proposed Private Residential Development at junction of Victoria Road/Cadogan Street)	<i>Ground Decontamination Works and Associated Impacts</i>		
	C27.	Oppose the demolition of CSTG/ Retain the CSTG.	<p>The underground soil of CSTG, as well as the land for the proposed waterfront park, school site and new access road, has been contaminated by pollutants comprising heavy metal and hydrocarbon. Decontamination works are required for the whole area as indicated on <b>Plan H-1</b>. The reasons, need and methodology for the ground decontamination works are detailed at <b>Annex V</b> of the TPB Paper.</p> <p>CSTG is a temporary garden with only minimal passive facilities and has been opened to the public since 1999.</p>
	C28.	The Government has been unable to explain the necessity and safety issues of the ground decontamination works. EPD confirms that the CSTG is currently not a hazard as the contaminated soil is buried deep underground. EPD also confirms that no decontamination works of this scale and locates close to residents has been done. The ground decontamination works (including the digging up of contaminated	

Item	Subject of Representation	Responses to Representations
	soils/carcinogenic/toxic substances) would pose health hazard to residents and arouse public concerns.	<p>According to the advice of CEDD and EPD, despite the existing soil contaminants at the aforesaid sites are in a stable condition underneath ground surface (as they are covered by top soil or concrete slab/paving), it is highly desirable for the decontamination work to cover all the sites, including CSTG in one-go given the proximity of those sites within a dense urban area. According to the findings of the approved EIA reports, the underground soil within those sites (including CSTG) contains contaminants which have exceeded the relevant standards. Hence, irrespective of the long term uses of the area, it is imperative to eliminate any potential risk caused by the contamination and improve the local environment.</p> <p>Extensive public consultation has been conducted for the ground decontamination works. Early in July 2006, the Food, Environment, Hygiene and Works Committee of C&amp;WDC passed a motion strongly demanding the Government to carry out both the demolition works of ex-KTIP and ex-KTA and the decontamination works in one-go. However, the latter was not proceed as the two sites were used as works area for the construction of the</p>
	C29. The CSTG has been in use for a long period of time. The Government has not been able to explain the potential risk of retaining the CSTG and has indirectly admitted that ground decontamination works is not necessary, should the site be retained as open space. The retention of CSTG would reduce the expenses and leave this large ‘green lung’ for public enjoyment. Therefore, ground decontamination works should only be carried out in the area adjoining the waterfront to reduce the impacts of toxic substances on the local residents. It seems that ground decontamination is the Government’s excuse of demolishing CSTG.	
	C30. Should the CSTG be retained, no decontamination works would be required and the residents would not need to bear the associated health risk during the works period.	
	C31. About 200 trees would be felled and not be transplanted due to possible contamination of tree	

Item	Subject of Representation	Responses to Representations
	<p>roots and demolition of CSTG. Full compensation of tree planting cannot be guaranteed. The demolition of CSTG will adversely affect the environment and vegetation.</p>	<p>West Island Line after the demolition works. CEDD further consulted the relevant stakeholders on the details of decontamination works several times between 2013 to 2016. The decontamination works with a 7-year implementation period was generally accepted by the stakeholders and was also supported in the C&amp;WDC meeting held in March 2015. Recently, a few C&amp;WDC Members expressed concern over the removal of CSTG.</p> <p>With regard to the validity of the EIA report, given that (i) the majority of the concerned areas were covered by concrete ground slab, the underground soil has not been disturbed or agitated, and there has not been large scale excavation activities after the site investigations (Sis); (ii) the contaminants are generally not degradable; and (iii) there is no on-going/ new polluting activity after the previous SIs, the EIA report approved in 2015 concluded that the SI data within the concerned areas remain valid. Furthermore, sampling and laboratory testing of soil will be conducted to confirm that all contaminated soil has been removed and properly treated to the required standards during project implementation.</p>
	<p>C32. There is no overriding need to fell about 200 trees which are in good condition. Rare tree species, such as <i>Rhodoleia</i>, <i>Ailanthus</i> and <i>Aquilaria sinensis</i> could be found within the decontamination works area/CSTG and they deserve conservation.</p>	
	<p>C33. The CTSG is a mature ecological habitat with vegetation and wildlife, such as birds, squirrels and bats, and should be preserved.</p>	
	<p>C34. The Planning Department (PlanD) considered that extensive tree felling would cause inevitable adverse landscape impact.</p>	
	<p>C35. Trees in the CSTG are healthy and area to the east and south of the garden has high development density. The CSTG should be preserved. The Government should set the improvement of quality of life and environmental protection as priority.</p>	
	<p>C36. The Government has ignored the residents' need</p>	

Item	Subject of Representation	Responses to Representations
	for the CSTG and has made no effort to preserve the garden.	<p>The approved EIA report had also examined the feasibility of different decontamination methods (including air sparging, soil vapour extraction, thermal desorption, biopiling and cement solidification, etc.). After consideration of relevant factors in terms of the nature of contaminants, the total quantity of contaminated soil, the project programme, etc., the approved EIA report recommended that biopile and cement solidification be the most appropriate decontamination methods for the project. The treated soil will be backfilled within the site.</p>
	C37. Demolition of the CSTG would lead to pollution.	
	C38. The CSTG should be retained as a breathing space/‘green lung’ while ground decontamination works are carried out in other areas. It would filter the toxic dusts from ground decontamination works.	
	C39. The subject site is contaminated which is not suitable for residential development.	
	C40. The Government spends a large amount of money on ground decontamination works and scarifies the health of local residents for the benefits of developers.	
	C41. The EIA for the ground decontamination works is mainly based on outdated data (such as soil analysis report in 2007) which does not reflect the current situation of the soil. The EIA report does not have adequate sampling and has not sufficiently analysed the background of CSTG. There is grave concern on the validity of the EIA report and decontamination scope, methods and procedures, which might put the health of the	<p>The concerned representers raised grave concerns on the technical issues of the ground decontamination works, including the adverse impacts on the air quality, health, noise and water quality and the environmental mitigation measures during the decontamination works. Those issues have already been examined under the EIA reports to ensure that the environmental impacts of the project can be controlled to within the criteria under the EIAO. The works would also comply with the requirements set out in the Environmental Permit issued by the Director of Environmental Protection in 2015. During the</p>

Item	Subject of Representation	Responses to Representations
	public at risk. The risk of the contaminants and scale of ground decontamination works might be overestimated.	consultation process, noting the grave concern of the public about the adequacy of environmental mitigation measures during the decontamination period, the Government has proposed extra environmental mitigation measures and agreed to establish a works liaison group to discuss regularly with C&WDC Members and local representatives on the related environmental issues and further improve the environmental mitigation measures if necessary.
	C42. For the benefit of the community, the Government should review the decontamination scope, method and procedures.	
	C43. The air monitoring measures in the EIA report is inadequate.	
	C44. According to EPD's Practice Guide for Investigation and Remediation of Contaminated Land, the possibility of carrying out in-situ remediation (without excavation) and recycling and reuse of remediated materials should be explored first. This option does not appear to have been considered, if required.	
	C45. Decontamination/development and demolition of CSTG is a lose-lose situation.	
	C46. Ground decontamination works is a waste of money.	Some representers have also raised their concerns on the adverse landscape impact due to the felling of a large number of trees at CSTG. According to the summary of the tree survey extracted from the EIA report approved in 2015 for the ground decontamination works at <b>Annex XVI</b> of the TPB Paper, there are currently 195 trees found at CSTG. The possibility of retaining or transplanting of trees has been considered but found not feasible. To compensate those trees affected by the removal of CSTG, compensatory tree planting would be provided at the waterfront park as far as practicable.  In addition, according to the EIA report, CSTG does not

Item	Subject of Representation	Responses to Representations
		<p>have a high ecological value as it is a wholly artificial habitat which is not supporting any significant population of wild fauna or species of conservation importance. Despite the above, precautionary measures will be implemented. Site inspection to identify whether there are any active bird nests and bat roosts will be carried out prior to site clearance works. If any bird nest or bat roost is observed, appropriate measures, e.g. setting up a suitably sized buffer area around the tree to minimize human or machinery disturbance until the nest has been abandoned or the bat has left, will be implemented.</p> <p>Regarding safety and health issues, quantitative health risks are highly dependent on the estimations of pollutants' concentrations of short- and long-term exposure in the identified assessment areas. With reference to the EIA report and the EP conditions, all contaminated underground soil at the ex-KTIP, ex-KTA, and the CSTG is required to be dug up, sorted and treated on-site. As dust generated from excavation and the associated decontamination processes are the primary concern during the ground decontamination works, cement solidification, in which cement and water are</p>

Item	Subject of Representation	Responses to Representations
		<p>mixed with the contaminated soil such that heavy metals are bonded together, and biopiling, a process that hydrocarbons are degraded by micro-organisms in the soil, shall be adopted for treating the soil contaminated with heavy metals and hydrocarbons respectively. At any one time, the contractor shall not open up more than 10% of the site area for excavation works. The treated soil, after testing, are to be used for backfilling the excavated areas. Key environmental mitigation measures, such as installation of activated carbon filter in the outlet of the biopile for removing volatile organic compound emissions; adoption of quiet equipment and noise barriers for minimising construction noise; control of site surface water run-off; adoption of good site practices for dust control, etc., shall be implemented throughout the whole decontamination process to avoid public risk. Temporary movable barriers and temporary movable canopies will be erected at excavation areas and temporary soil stockpiling areas respectively to shield dust and noise and enhance visual effect.</p> <p>As regards the possible dispersal of soil contaminants during decontamination works, CEDD's consultants had</p>

Item	Subject of Representation	Responses to Representations
		<p>carried out relevant air dispersion modeling and analysis to ascertain the associated health impacts. Health risks for toxic air pollutants (several polycyclic aromatic hydrocarbons (included benzo[a]pyrene), arsenic, lead, mercury, etc) had been assessed in respect of the identified air sensitive receivers (ASR). The EIA report revealed that under different modelling scenarios that represented different excavation rates, the predicted cumulative maximum concentrations for all non-criteria pollutants were lower than their corresponding adopted reference values and therefore the associated non-carcinogenic health risks were considered to be acceptable. The total incremental lifetime cancer risks associated with the said ground decontamination works were also estimated to be <math>3.14 \times 10^{-7}</math> to <math>3.99 \times 10^{-7}</math>. The incremental cancer risks due to the decontamination works were considered to be negligible. The accumulative maximum concentration of the contaminants including hydrocarbons and heavy metals in the air at surrounding ASRs could meet the relevant standards.</p> <p>Further, air quality monitoring will be carried out at the</p>

Item	Subject of Representation	Responses to Representations
		<p>site boundary and the nearby residential buildings during the decontamination works in accordance with the recommendations of the EIA report to ensure that the environmental impact will be controlled within the required standard. The results of monitoring will be uploaded to EPD's website for public inspection.</p> <p>Notwithstanding the above, it should be noted that with the completion of the proposed ground decontamination works, the site is suitable for any development including residential development and permanent open space development. Given there is a need for ground decontamination works of CSTG together with adjoining contaminated area, the entire area should be planned comprehensively as recommended under the RLUP, i.e. a sizeable waterfront park with a promenade connected to the Kennedy Town Temporary Recreation Ground, a primary school and the subject residential development being located away from the waterfront, and a new access road to improve the traffic conditions in the area.</p>
	<i>Open Space Provision/ Function</i>	
	C47. Open space provision per person in the Kennedy Town & Mount Davis area would be lower than	Details on the provision of open space have been provided in paragraph 6.2 of the MPC Paper No. 1/16.

Item	Subject of Representation	Responses to Representations
	the standard stated in the Hong Kong Planning Standards and Guidelines (HKPSG) i.e. at least 1m <sup>2</sup> of District Open Space and 1m <sup>2</sup> of Local Open Space. There is inadequate open space in Sai Wan/Western District and the increase in population would worsen the situation and lead to the imbalance of the living environment.	<p>In general, the overall provision of open space is assessed at a district council level with reference to the requirement under HKPSG. There are about 56ha of existing open space, including about 17ha local open space and 39ha district open space in the C&amp;W District, rendering an overall 2.2m<sup>2</sup> of open space per person, which is higher than 2m<sup>2</sup> per person as required under HKPSG. In the future, there will be a total provision of about 60ha open space, including about 19ha local open space and 41ha district open space, maintaining an overall 2.2m<sup>2</sup> of open space per person (based on the planned population of the district).</p> <p>The amendments to the OZP would involve the provision of two newly planned open spaces, including the waterfront park under <b>Amendment Item A1</b> and the open space at Sai Ning Street under <b>Amendment Item A2</b>, and conversion of the Kennedy Town Temporary Recreation Ground into a permanent open space under <b>Amendment Item A3</b>. There would be a net increase of about 1.7ha of open space in the area after deduction of the affected open space, including CSTG, which will be able to cater for the open space requirement for the additional</p>
	C48. The Kennedy Town & Mount Davis area is deprived of about 10ha of District and Local Open Space in total.	
	C49. PlanD indicated that there is no shortage of open space in the whole Central and Western District but avoids directly responding to the shortage of open space in the Kennedy Town & Mount Davis area.	
	C50. PlanD stated that the additional open space of 1.7ha could provide the additional population with 2m <sup>2</sup> of open space per residents. It is a manipulation of numbers and ignores the existing residents.	
	C51. The proposed waterfront park would only benefit those residents from the newly proposed private residential units as the Government claimed that	

Item	Subject of Representation	Responses to Representations
	the open space requirement of 2m <sup>2</sup> per person can be met for the additional population only.	population (i.e. about 8,500 persons) generated from the RLUP.
	C52. The demolition of the CSTG for high-rise development would lead to the loss of open space.	For the OZP per se, there will be a deficit of about 2.8ha local open space and 3.2ha district open spaces respectively. The overall provision of the open space per person is about 1.3m <sup>2</sup> . Nevertheless, opportunity will be taken to increase the open space provision where appropriate. At the request of C&WDC, the Government is actively pursuing the temporary use of part of the Western District Public Cargo Working Area (involving three berths with a site area of about 7,700m <sup>2</sup> ) as open space for public enjoyment ( <b>Plan H-1</b> of the TPB Paper).
	C53. The demolition of the CSTG would destroy the only quality, convenient and well-located open space. It will also lead to the loss of outdoor recreation area in the district and reduce the accessibility to the waterfront.	Responses to Grounds A4, C27-C46 and C47-C52 above are relevant.
	C54. Apart from the quantity of open space to be provided, the quality of open space is just as important, if not more. A quality park should be located within walking distance (i.e. 300m or 5-8	Responses to Grounds A3 and A4 above are relevant.  With reference to the current open space provision in the Kennedy Town & Mount Davis area, open spaces are

Item	Subject of Representation	Responses to Representations
	<p>minutes' walk). The existing Belcher Bay Park and CSTG meet such a criterion.</p>	<p>spread out within residential neighbourhoods. Majority of the residents in the Kennedy Town &amp; Mount Davis area can have access to these open spaces within walking distance.</p> <p>In the future, a waterfront park of about 1.66ha and an open space between Sai Ning Street and Victoria Road would be provided. They are also within walking distance of nearby residents and pedestrian connection will be enhanced to facilitate their accessibility.</p>
	<p>C55. Residents would need to go further away to the crowded Belcher Bay Park or Sun Yat Sen Memorial Park/Hong Kong Park upon the demolition of the CSTG.</p>	<p>There are other open spaces to serve the population upon the closure of CSTG, including the Belcher Bay Park which has a large grass field and Kennedy Town Temporary Recreation Ground, Ka Wai Man Road Garden and Forbes Street Temporary Playground which have various recreation facilities.</p>
	<p>C56. The CSTG is not replaceable by the proposed waterfront park/other open spaces in the district as it is of high quality, at a prominent location that is easily accessible by the public and with trees and flat grass lawn. It is a pleasant environment and is important for the elderly, children and people in rehabilitation/with disabilities. There is no</p>	<p>Responses to Grounds C27-C46, C47-C52 and C55 above are relevant.</p> <p>In addition, the ground decontamination works will last for 7 years because of the need to maintain the existing Sai See Street public car park and the refuse collection point before their reprovisioning. The C&amp;WDC in</p>

Item	Subject of Representation	Responses to Representations
	alternative park (including park with grass lawn) for the public. The proposed waterfront park would only be available for public use in a long time (e.g 8-10 years or more).	general had no objection to the proposal as there was no suitable site in the vicinity available for temporary reprovisioning. Given the above ground decontamination works schedule, the proposed waterfront park could not be made available for public use earlier.
C57.	The proposed waterfront park is not comparable with or replaceable by the CSTG in terms of accessibility, connectivity, nature, function. The proposed waterfront park would be primarily for commercial use with no/limited greenery and tree compensation. There would also be waves along the coastal area of Sai Wan. Compared with the CSTG, the proposed waterfront park would only be a public space and its function and effectiveness would be reduced. The proposed waterfront park would not have space for people to relax and could not meet the recreation needs of the community.	Responses to Grounds A3, A4, C27-C46, C47-C52 and C55 above are relevant.
C58.	The setting and commercial nature of the proposed waterfront park at site under Amendment Item A1 would exclude the use of the public and grassroots level. The usage of it is expected to be low due to its inconvenience and unwelcoming nature,	Responses to Grounds A3, A5 and A6 above are relevant.

Item	Subject of Representation	Responses to Representations
	which would cause security problem and the privatisation of the park for the new residents at the private residential site under Amendment Item C2.	
	C59. Should ground decontamination works be required, the Government should reprovise a larger open space in the vicinity as compensation. The CSTG should not be demolished prior to reprovise. The Government should advise the public on the associated implementation schedule.	Responses to Grounds A6 and C56 above are relevant.  If reprovise of the CSTG together with the public facilities, i.e. refuse collection point and public car park is carried out before their demolition or removal, the decontamination works would take at least 13 years to complete. In view of the substantially longer construction period which would increase the nuisance to the public, this implementation option was not recommended.
	C60. The grass lawn in the CSTG is rare in Hong Kong and it is commonly used by the public.	Responses to Grounds A3 and C27 to C46 above are relevant.  The CSTG would be reprovise at the proposed waterfront park under Amendment Item A1.
	C61. The CSTG is a pleasant environment with wildlife and sunlight that should be preserved.	Responses to Grounds C27 to C46 above are relevant.
	C62. There is no compensation from the Government for the demolition of CSTG. The Government	Responses to Grounds A5 and C60 above are relevant.

Item	Subject of Representation	Responses to Representations
		should not allow the subject site be privatised.
	C63.	The CSTG be retained as open space for public use, recreation purpose and the provision of a grass lawn. It would provide a better quality of living and living environment for the public.
	C64.	Responses to Grounds A3, A4 and C27 to C46 above are relevant.
	C65.	Responses to Grounds C27 to C46 above are relevant.
	C66.	Responses to Grounds C27 to C46 above are relevant.
	C67.	Responses to Grounds C27 to C46 above are relevant.
	C68.	Responses to Grounds C27 to C46 above are relevant.  The Government has endeavoured to preserve open space for public enjoyment as far as practicable. For instance, the Kennedy Town Temporary Recreation Ground has been rezoned from “Undetermined” to “Open Space” (“O”) for active recreational purpose.

Item	Subject of Representation	Responses to Representations
	C69. More green space instead of commercially-oriented space is needed. Greenery within the city is precious. There is insufficient green space in Kennedy Town. Open space in the form of a promenade falls short of the public's aspiration for a green and natural environment.	Responses to Grounds A3 and C47 to C52 above are relevant.  According to the HKPSG, at least 20% of the land in active open space should be for soft landscaping, half of which should be for planting trees. For passive open space, 70% of the land should be used for soft landscaping, out of which 60% should be used for planting trees. There will be appropriate landscaping and greening to be provided in the planned open spaces.
	C70. Should CSTG be retained, it would attract more businesses for Kennedy Town.	Responses to Grounds C27 to C46 above are relevant.
	C71. Public open spaces should not be privatised.	Response to Ground A5 above is relevant.
	<i>Community Facilities</i>	
	C72. Additional population will put pressure on community facilities in the district.	Response to Ground C10 above is relevant.
	C73. No Government, institution or community (GIC) table has been provided in the Metro Planning Committee (MPC) Paper No. 1/16 and no strong justification has been provided for a new primary school and its prime location.	According to the planned population in the Kennedy Town & Mount Davis area, which is about 90,600 (including the population of the proposed residential developments under <b>Amendment Items C1 to C4</b> ), the overall provision of GIC facilities, including district police station, divisional police station, clinic/health centre, magistracy, integrated children and youth services

Item	Subject of Representation	Responses to Representations
		<p>centre, integrated family services centre, library, sports centre, sports ground/sports complex and swimming pool, is adequate. The above information was provided in paragraph 6.1 of the MPC Paper No. 1/16. Within the C&amp;W District, however, the Education Bureau (EDB) advises that an additional 30-classroom primary school is required to meet the educational needs. Hence, a school site is reserved under <b>Amendment Item D1</b>. The proposed location is determined after considering all relevant factors including public views received during the consultation of the Land Use Review. The proposed school, together with the proposed waterfront park and other GIC sites on the other side of Victoria Road, would form a low-rise cluster which helps maintain the visual openness amongst the adjoining high-rise residential developments. This is also in line with urban design/harbour planning principles. There is also no other suitable site available for school development in the district.</p>
	<i>Housing/ Development</i>	
	C74. Oppose to the demolition of CSTG for (luxurious) residential development/construction.	Responses to Grounds C13 and C27 to C46 above are relevant.

Item	Subject of Representation	Responses to Representations
	C75. The site is contaminated and is not suitable for residential development.	Responses to Grounds C27 to C46 above are relevant.
	C76. The demolition of CTSG for decontamination of 7 years for residential development would only provide 600 (luxurious) flats with exclusive sea view for a few privileged people, which is not cost- and time-efficient and would not help resolving the housing shortage problem. It would also benefit the private developers. The adjacent proposed waterfront park under Amendment Item A1 would also be privatised by those residents.	Responses to Grounds A5, C13 and C27 to C46 above are relevant.
	C77. Private residential development which is unaffordable by ordinary citizens is not needed. Private residential development would worsen inequalities in Hong Kong.	Response to Ground C13 above is relevant.
	C78. There is concern on the use of hazardous building materials for development as it would affect public health.	The construction of any developments has to comply with relevant ordinances and government's requirements.
	<i>Traffic Considerations</i>	
	C79. No TIA is provided and thus, the traffic impact cannot be verified. The existing roads (such as Belcher's Street and Victoria Road as the main	Responses to Grounds C15 to C17 above are relevant.  Furthermore, TD's Traffic Review has concluded that

Item	Subject of Representation	Responses to Representations
	<p>accesses) in the local area are already congested. There are insufficient transport infrastructure and capacity to support the proposed developments. No traffic improvement is proposed at the downstream areas. The district cannot accommodate more traffic generated by the new housing units/population and the existing traffic conditions would be worsened.</p>	<p>with the implementation of traffic improvement measures, the proposed developments will not worsen the existing problems. With due regard of the existing situation of illegal parking during mid-night at the nearby areas, TD advised that about 70 parking spaces for private cars are to be provided at the underground car park at the site for public use to address the shortfall in Kennedy Town. Nonetheless, the relevant government departments, including TD and the Police, will deal with the illegal parking problem in the Kennedy Town area under their respective purviews in their daily operation.</p> <p>Regarding the provision of a PTT at the private residential development under <b>Amendment Item C2</b>, it will replace the two existing open-air bus termini at Sai Ning Street and Shing Sai Road, thus releasing the two sites for residential development and open space respectively. Reprovisioning of the existing bus termini is required to maintain the existing level of bus services and to cater for the demand in the vicinity. In addition, it would also provide a better environment for passengers waiting for buses.</p>
	<p>C80. The provision of a public car park at the subject site is opposed as more traffic would be generated and it would worsen traffic condition and cause traffic congestion on roads (such as Victoria Road and Belcher's Street). The traffic problem would become a cross-district traffic problem. Detailed TIA should be disclosed to demonstrate the need for public car parks. Otherwise, the public consultation is unfair and incomplete and the public is unable to verify the traffic impact.</p>	
	<p>C81. Combining and relocating the two current bus termini from Shing Sai Road and Sai Ning Street to the site under Amendment Item C2 would worsen the traffic condition. The proposed public housing development at site under</p>	

Item	Subject of Representation	Responses to Representations
	<p>Amendment Item C1 is poorly connected to public transport, including the future public transport terminus. If additional shuttle bus services are required, it would further worsen the traffic condition.</p>	<p>Regarding the validity of TD's traffic data and methodology for re-organisation of bus routes, as an ongoing task, TD monitors the operation of franchised bus services through different channels, including examining the operation records provided by bus companies, engaging consultants in conducting different types of surveys and deploying staff to perform site inspections, etc. To monitor the performance of consultants in conducting surveys, TD will also deploy staff to perform surprise site inspections to check whether the number of staff conducting the surveys and the time and locations of the surveys are in compliance with TD's requirements, etc.</p>
	<p>C82. The proposed public housing development at site under Amendment Item C1 is poorly connected to MTR. If additional feeder services and more frequent public transport services are required, it would further worsen the traffic condition. There may be more private cars on the road.</p>	
	<p>C83. Oppose the proposed public transport terminus.</p>	
	<p>C84. The need for the proposed public transport terminus is doubted as MTR has become the main public transport for local residents and there is reduction in the number of bus routes. The data and method for Transport Department (TD)'s re-organisation of bus routes are doubted.</p>	
	<p>C85. A number of redevelopment projects for taller buildings along Belcher's Street would cause severe traffic congestion.</p>	
	<p>C86. Illegal parking on streets has become more serious and worsened traffic condition.</p>	

Item	Subject of Representation	Responses to Representations
	<i>Air/Visual/Environmental Considerations</i>	
	<p>C87. There is already high population density and insufficient open space in the district. The demolition of the CSTG for high-rise development would cause wall effect and worsen the air quality, heat island effect and the environment/ecology. It would affect the health of the residents. The Government should strike a balance between residential developments and provision of green space.</p>	<p>Responses to Grounds B9 to B10, C13 and C27 to C52 above are relevant.</p> <p>EPD confirms that there is no insurmountable environmental impact. Further detailed technical assessments may be required at the detailed design stage to ascertain the mitigation measures required in terms of air quality and noise for incorporation into the building design. In accordance with the established procedures, for public housing development, a planning brief setting out the required technical assessments, including an Environmental Assessment Study, will be prepared to guide the future development. For other government's projects, any technical assessments required will be specified under the technical feasibility study for the concerned project. As for private developments, any technical assessments required will be specified under the lease.</p> <p>In response to climate change and heat island effect, the Sustainability Building Design Guidelines (i.e. the Practice Note for Authorised Persons, Registered</p>

Item	Subject of Representation	Responses to Representations
		<p>Structural Engineers and Registered Geotechnical Engineers APP-152) has been promulgated to achieve better air ventilation, enhance the environmental quality of living space, provide more greenery, particularly at pedestrian level and to mitigate the heat island effect. Furthermore, NBA and building gap requirements for some sites as specified in the ES would facilitate air ventilation, which would also help alleviate the urban heat island effect.</p>
	<p>C88. The AVA and visual impact assessment are not accurate and cannot reflect the feasibility of the land use proposals.</p>	<p>VA has been conducted for the proposed developments in the western part of Kennedy Town. Although the existing visual context and composition of the concerned area will inevitably be changed, the proposed developments would not induce insurmountable visual impact. NBAs and building gaps which also serve as visual corridors have been imposed to provide visual connectivity to the waterfront and enhance the permeability.</p> <p>The VA was undertaken in accordance with the methodology set out in the TPB Guidelines No. 41 on Submission of Visual Impact Assessment for Planning Applications to the TPB. Major public viewing points,</p>

Item	Subject of Representation	Responses to Representations
		<p>including the proposed waterfront park under <b>Amendment Item A1</b>, which will be a popular local destination, have been selected to illustrate the visual impact of the proposed developments.</p> <p>In addition, the selection of viewpoints used in the appraisal has taken account of a range of factors including accessibility to the public, potential number and sensitivity of viewers, viewing distance, and nature of viewing experience. The selected viewing points at the pier at the existing wharf and godown facilities and the ferry route on Sulphur Channel off the western part of Kennedy Town can assist assessing the overall potential visual impact of the proposed developments on its surrounding context and are thus deemed appropriate for use in the VA.</p> <p>Response to Grounds B9 to B10 regarding the AVA EE is relevant.</p> <p>Furthermore, regarding the validity of AVA EE, it should be noted that the analysis in AVA EE is generic and is applicable to any development with a bulky and extensive</p>

Item	Subject of Representation	Responses to Representations
		podium and closely packed tower blocks, including the proposed development with the revised BH restrictions. The building gap of the site as recommended under AVA EE has remained unchanged. There should not be any major effect arising from the increase in BH. However, the requirement for a quantitative AVA for the site would be stipulated in the lease condition.
	C89. The proposed residential blocks would create wall effect which would adversely affect air ventilation of nearby buildings and streets.	Response to Grounds B9 to B10 above is relevant.
	C90. The CSTG is the key for the intake of fresh current into the overcrowded built-up area in Kennedy Town.	Response to Grounds B9 to B10 above is relevant.
	C91. No visual assessment for Cadogan Street is provided.	Response to Ground C88 above is relevant.
	C92. The reduction of BH to 40mPD but maintaining the GFA would imply that the development bulk would not be changed and thus it would create wall effect and worsen air ventilation and air quality in the local area.	Response to Ground C88 above is relevant.  Moreover, to allow a gradation in BH, a stepped building height profile stepping down from 120mPD to 40mPD east to west is adopted. As specified in the ES, the future developer is also encouraged to add one more building step in-between for a more gradual transition under the height restriction of lease. The western part of

Item	Subject of Representation	Responses to Representations
		the site being capped at 40mPD, together with the proposed school at BH restriction of 8 storeys and the existing low-rise GIC facilities along Victoria Road, would provide spatial relief and help safeguard the visual openness of the local area. The NBA at the central part of the site will also improve the visual permeability.
C93.	The retention of CSTG would avoid the development of the proposed public car park and thus reduce the emission of greenhouse gases.	Responses to Ground C17 regarding the proposed public car parking space provision and Grounds C27 to C46 on the need for ground decontamination works of CSTG are relevant.
C94.	It is important to preserve public open space as the Western District/city has become more crowded with high development density and completion of new developments.	Responses to Grounds B2 and C13 above are relevant.
C95.	CSTG is widely used by the local community. No social impact assessment has been carried out for the demolition of the CSTG.	Responses to Grounds C27 to C46 above are relevant.
C96.	The area is poorly planned and the OZP amendment fails to improve the quality of living of local residents and ignores the need of the community.	Response to Ground C13 above is relevant.
C97.	The public needs a breathing space/park, not luxury housing/developments.	Response to Ground C13 above is relevant.

Item	Subject of Representation	Responses to Representations
	C98. CSTG should be retained for the well-being of local community (e.g. provision of fresh air and public area for local people).	Response to Grounds C27 to C46 above are relevant.
	C99. The loss of trees, grass lawn and recreation space, and the lack of supply of fresh air would make residents prone to illness. As a result, the medical expenses of the Government would increase.	Response to Ground B2 above is relevant.
	C100. The Government should not ignore the public's objection on the demolition of the CSTG.	<p>The amendments to the OZP were derived from the recommendations of the Land Use Review, with two rounds of extensive consultation carried out from 2013 to 2016. The RLUP for the area had taken into account a host of considerations including the harbour planning principles, the societal needs for housing, community facilities and open space, land use compatibility, housing policy and technical feasibility and had balanced the aspirations of different parties. In fact, the RLUP had been revised to address the public views received.</p> <p>The draft Kennedy Town &amp; Mount Davis OZP No. S/H1/20 was published in accordance with the provision of the Ordinance. All representations received by Town Planning Board (the Board) during the plan exhibition</p>

Item	Subject of Representation		Responses to Representations
			<p>period were published for comments. All representations and comments received will be duly considered by the Board in accordance with the provision of the Ordinance.</p> <p>Response to Grounds C27 to C46 above regarding the consultation on the ground decontamination works is also relevant.</p>
	<i>Cultural/Heritage Considerations</i>		
	C101.	Demolishing the CSTG will erase the last memory of the Glass Works Hospital used to house plague victims in 1894.	AMO has no record about the Glass Works Hospital.
	<i>Development Intensity/Population</i>		
	C102.	The CSTG should be retained to ease the development density of the district.	Response to Grounds C27 to C46 above are relevant.
	<i>Public Consultation</i>		
	C103.	The Government must answer and address all concerns of the public before proceeding with the rezoning, and promote and accept the proposals formulated by the public.	Response to Ground C100 above is relevant.
	C104.	There is inadequate consultation.	Response to Ground C100 above is relevant.
	<i>Others</i>		
	C105.	The Government's action of blindly usurping site,	Responses to Grounds C13 and C27 to C46 above are

Item	Subject of Representation	Responses to Representations
	using the people's money and demolishing CSTG to pave way for the developers to build luxurious houses are objected. Instead of addressing the concerns of the public, the Plan creates benefits to the corporations.	relevant.
Amendment Item C3 (Proposed Private Residential Development at junction of Victoria Road/Sai Ning Street)	C106. The relocation of the Arch and Foundation Stone of the Tung Wah Smallpox Hospital to the proposed waterfront park is not appropriate.	Response to Ground A9 above is relevant.
	C107. There are ongoing redevelopments in the district causing increase in population. The Government has also not taken into consideration the redevelopment of Sai Wan Estate which would increase population in the district.	Responses to Grounds B2 and C6 above are relevant.
	C108. The development density of the district is extremely high and cannot accommodate additional residential developments.	The amendments to the OZP are based on the RLUP of the Land Use Review, which has taken various factors into account. A maximum PR of 6 is proposed for the public housing site under <b>Amendment Item C1</b> while a maximum PR of 6.5 is proposed for the relatively sizeable private residential site under <b>Amendment Item C2</b> . Their PRs have been kept low in order to keep the traffic condition of the area to an acceptable level.  Response to Ground B2 above is also relevant.

Item	Subject of Representation	Responses to Representations
	C109. The Government has underestimated the development scale of the proposal. There are only about 1,200 existing units on Ka Wai Man Road, but the proposal would bring about 3,300 units to Victoria Road and Ka Wai Man Road.	Response to Ground B2 above is relevant.
	C110. Existing transport infrastructure/capacity and community facilities are already insufficient. It is doubted that the district could further accommodate an influx of a large amount of residents.	Responses to Grounds C15 to C17 above are relevant.
	C111. There is high population density and insufficient open space in the district. The rezoning of the public open space for private residential use would further deteriorate the environment.	Responses to Grounds C13, C47 to C52 and C108 above are relevant.
Amendment Item C4 (Proposed Private Residential Development between Victoria Road and Sai Ning Street)	C112. The development density of the district is extremely high and cannot accommodate additional residential developments.	Response to Ground C87 above is relevant.
<u>Representers' Proposals</u>		
Amendment Items C1 to C4	C113. To remove any rezoning proposals for "Residential (Group A)" ("R(A)") zone.	Given the current shortfall in housing land supply, the proposal of not rezoning the sites to "R(A)" for residential developments is not supported.

Item	Subject of Representation	Responses to Representations
Amendment Item C1 (Proposed Public Housing Development)	C114. To develop not more than 1,000 public housing units at the ex-Mount Davis Cottage Area, ex-Police Married Officers Quarters and ex-Hong Kong Academy sites. The residents of Sai Wan Estate would be given the first priority to rehouse in the new public housing development.	Substantial reduction of public housing flat production as proposed by some representers would significantly affect the overall provision of public housing land supply in the urban area, in particular on the Hong Kong Island. In fact, the public housing production has already been reduced by 400 flats in response to the public views received during the consultation in the Land Use Review. Given the current shortfall in housing land supply, there is no strong justification for further reduction of flat production nor rezoning of the site to other uses.  Response to Ground C6 above is also relevant.
	C115. To provide community facilities such as community hall, public library and public elderly home at the ex-Hong Kong Academy and ex-Police Married Officers Quarters site and serve as a buffer area.	Response to Ground C10 above is relevant.
	C116. To redevelop Sai Wan Estate and increase the number of housing units from 600 to 1,000. The proposed public housing at Victoria Road could be used for local rehousing for the residents of Sai Wan Estate.	Response to Ground C6 above is relevant. .
	C117. To reduce the number of housing units at the	Response to Ground C114 above is relevant.

Item	Subject of Representation	Responses to Representations
	<p>subject site from 2,340 to 1,900 to minimize the building bulk and reduce development intensity. The remaining 440 units can be compensated by redeveloping Sai Wan Estate so that the housing developments could be evenly spread out between the two sites.</p>	
	<p>C118. To reduce the number of proposed units and limit them to units for small households.</p>	<p>Response to Ground C114 above is also relevant.</p>
	<p>C119. To rezone the western portion of the subject site to “GB” and its eastern portion near Ka Wai Man Road to “R(A)”.</p>	<p>Response to Ground C113 above is also relevant.</p>
	<p>C120. To alter the stepped BH profile so as to allow better air ventilation and avoid blockage of view.</p>	<p>The overall BH profile of the Land Use review area has taken into account the topography, the current BH and BH restrictions of the surrounding existing and planned developments, and the possible visual impacts. The stepped BH profile with maximum BH restrictions descending from 140mPD in the east to 65mPD in the west has been adopted having regard to the development intensity of the site and the overall BH profile of the area. Hence, the BH restrictions for the site are considered appropriate and compatible with the surroundings in visual terms.</p>

Item	Subject of Representation	Responses to Representations
	<p>C121. To restrict vehicles going in/out the proposed light goods vehicles parking spaces from using Ka Wai Man Road due to its limited capacity. Additional traffic on that road would affect road safety. It is suggested that the goods vehicles could gain access to the site via Victoria Road only.</p>	<p>One 15m-wide NBA in northeast-southwest direction and two 15m-wide building gaps each in the respective north-southerly and northwest-southeasterly direction have been adopted as recommended under AVA EE to enhance the overall permeability of the site. HD will undertake a quantitative AVA at the detailed design of the public housing development with a view to enhancing and optimising the pedestrian wind environment.</p> <p>According to the Traffic Review, the overall traffic condition of the area would be acceptable (including the provision of 25 LGV parking spaces at the proposed public housing development) with the implementation of the traffic improvement measures. These LGV parking spaces are requested by TD to address the district shortfall. In addition, the LGV carpark would only be accessible through Victoria Road according to the proposed run-in/out arrangement of the public housing development. For Ka Wai Man Road, traffic improvement measures including widening of a section near the run-in/out of the public housing site for the provision of a layby and diverting the eastbound traffic to the new access road by banning its right turn to Victoria Road have been proposed. Suitable warning signs and</p>

Item	Subject of Representation	Responses to Representations
		road humps will also be installed at proper locations to enhance pedestrian and road safety.
	C122. To restrict the access of long vehicles and additional green minibus routes to Ka Wai Man Road.	<p>Responses to Ground C17 regarding the public transport services and Ground C121 above are relevant.</p> <p>In addition, in view of the traffic demand, especially the school buses, imposing prohibition of long vehicles to Ka Wai Man Road is not desirable. TD is reviewing the road improvement measures in order to enhance the maneuvering of long vehicles at the junction of Ka Wai Man Road/Victoria Road but the feasibility would be subject to the influence on the existing sitting-out area and local consultation.</p>
	C123. To provide MTR entrance/exit at the ex-Police Married Officers Quarters on Ka Wai Man Road.	<p>In planning the station entrance locations, different factors including accessibility, local geography, compatibility with other transport modes and public views were considered.</p> <p>The western extension of the Island Line includes Sai Ying Pun, HKU and Kennedy Town stations with a total of 15 station entrances. More than 90% of residents in the Western District can access any one of the three stations on foot. Overall, the new extension has been</p>

Item	Subject of Representation	Responses to Representations
		operating smoothly and serving the passengers and residents well since its opening in December 2014. Currently, there is no plan to open additional entrances for the three stations.
Amendment Item C2 (Proposed Private Residential Development at junction of Victoria Road/Cadogan Street)	C124. The site under Amendment Item C2 should be developed as a park.	Response to Ground C13 above is relevant.
	C125. To turn CSTG into a permanent garden and/or connect it to the proposed waterfront park, and extend it together with the existing pet park to Sai See Street. This would lead the residents to the waterfront and provide more green space.	Responses to Grounds C27 to C52 above are relevant.
	C126. The CSTG should be retained and linked up with the future waterfront park (e.g. like a small-scale Tamar Park) to provide a ventilation and green corridor to enhance the district.	Responses to Grounds B9 and C27 to C52 above are relevant.
	C127. To provide green grass, 181 trees, a children's playground, a Tai Chi garden, an outdoor performance space with permanent seating, fountains, ponds, benches, and designate areas for fishing, smoking and pets in areas adjoining to the CSTG.	Responses to Grounds C27 to C52 above are relevant.
	C128. School is proposed at the site to reduce development density.	Substantial reduction of housing flat production would significantly affect the overall provision of housing land

Item	Subject of Representation	Responses to Representations
		supply in the urban area, in particular on the Hong Kong Island. Given the current shortfall in housing land supply, there is no strong justification for reduction of flat production nor rezoning of the site to other uses.
	C129. Ka Wai Man Road Garden should be visually linked to the waterfront. Hence the central part of the site should not be rezoned to “R(A)” with excessive maximum BH of 120mPD.	Response to Grounds C92 above is relevant.
	C130. The maximum BH of the site should be reduced to at least 100mPD.	Response to Grounds C92 above is relevant.
	C131. To improve the facilities and install Wi-Fi at CSTG.	It is not a land use related issue.
Amendment Item C3 (Proposed Private Residential Development at junction of Victoria Road/Sai Ning Street)	C132. The existing Kennedy Town Bus Terminus should be maintained and enhanced, and the trees near it should be retained in-situ. Compared to the proposed PTT at the site under Amendment Item C2, the existing bus terminus is well located to provide major transport services and is convenient to the public. It would be closer to the proposed public housing development at site under Amendment Item C1. There are two Old and Valuable Trees (OVTs) adjacent to the bus terminus. It is also proposed to expand the bus	Responses to Grounds C79 to C86 regarding the need for the proposed PTT and A9 regarding the Arch and Foundation Stone of Tung Wah Smallpox Hospital are relevant.  Furthermore, according to the RLUP, both Sai Ning Street and Shing Sai Road Bus Termini would be replaced by the proposed PTT under <b>Amendment Item C2</b> , which is located just opposite to the Sai Ning Street Bus Terminus across Sai Ning Street. The new PTT would provide a better waiting environment for the passengers and its

Item	Subject of Representation		Responses to Representations
		terminus and enhance the Arch and Foundation Stone of Tung Wah Smallpox Hospital.	connectivity to the surrounding area would be improved after the implementation of pedestrian network. Retaining the open-air Sai Ning Street Bus Terminus would undermine the development potential of the site, which is planned for private residential development.

**Table D: Government, Institution and Community Facilities**

Item	Subject of Representation		Responses to Representations
<u>Supporting Views</u>			
Amendment Item D1 (Proposed Primary School Development)	D1.	The proposed primary school should be maintained.	Noted.
	D2.	The stipulated maximum BH of 8-storey is supported as any tall buildings would not be compatible with the adjacent CSTG.	Noted.
<u>Providing Views</u>			
Amendment Item D1 (Proposed Primary School Development)	D3.	Supported/agree/no comment.	Noted.
Amendment Item D2 (Proposed Salt Water Pumping Station)	D4.	Supported/agree/no comment.	Noted.

Item	Subject of Representation		Responses to Representations
<u>Opposing Views</u>			
Amendment Item D1 (Proposed Primary School Development)	D5.	The proposed school is located far away from the proposed public housing development at site under Amendment Item C1 and would lead to increase carbon footprint and traffic accidents/congestions.	Response to Ground A4 above is relevant.  Upon the completion of the proposed pedestrian network in the area, the proposed school will be well connected with the surrounding areas. Moreover, it is also in close proximity (i.e. about 500m) to the MTRC Kennedy Town Station.
Amendment Item E (Proposed Reprovisioning of Victoria Public Mortuary)	D6.	There is no justification for building a public mortuary.	The proposed mortuary is to reprovision the existing VPM at Sai Ning Street so as to enable a continuous promenade along the waterfront of Kennedy Town for public enjoyment. The reprovisioning site is located to the further west of Victoria Road away from the existing residential neighbourhood. It will utilize an existing cavern in a form of tunnel as well as the adjoining site for construction of a mortuary building. It should be noted that there was no strong view on the proposed relocation of VPM and the location of the reprovisioning site throughout the public consultation of the Land Use Review.
<u>Representers' Proposal</u>			
Amendment Item D1 (Proposed Primary School Development)	D7.	To relocate the proposed school near or within site under Amendment Item C1.	The proposal would result in a loss of public housing flat production. The traffic impact of such relocation in

Item	Subject of Representation		Responses to Representations
Development)			particular during the morning and afternoon peak hours has also not been assessed, as Ka Wai Man Road is the only access road and there is already an existing school along the road. Moreover, as the school site under <b>Amendment Item D1</b> is part of the low-rise cluster serving as a spatial relief for the surrounding developments, it is considered not desirable to swap the site for high-rise residential development.
	D8.	To utilize the site that is located at a prominent location for other value-added development or to sell it to developers for Government revenue.	<b>Amendment Item D1</b> is the only suitable site identified for the proposed primary school, it should be reserved for such use to meet the education need of the area.

**Table E: Road and Junction Improvements**

Item	Subject of Representation		Responses to Representations
<u>Providing Views</u>			
Amendment Item F (Proposed Road and Junction Improvements)	E1.	Oppose road widening of the Victoria Road. Road widening of Victoria Road would not be required if the light goods vehicle parking would be relocated from site under Amendment Item C1 to C2. It could retain the hill side vegetation, registered OVTs and wall trees.	Response to Ground C17 above regarding the provision of new public vehicle parking spaces is relevant.  According to TD's Traffic Review, widening of Victoria Road is one of the road improvement measures for the land use proposals.

Item	Subject of Representation		Responses to Representations
			<p>There are two OVTs located at the existing sitting-out area at the slope abutting Victoria Road. The adjoining “O” zone has been extended under <b>Amendment Item A2</b> to cover the two OVTs for better protection. They will also be preserved according to the Environment, Transport and Works Bureau Technical Circular (Works) No. 29/2004 on the registration of OVTs and the guidelines for their preservation.</p>
<u>Opposing Views</u>			
Amendment Item F (Proposed Road and Junction Improvements)	E2.	There is no justification for rezoning the “Undetermined” and “Open Space” zones for road use. It is crucial to retain open space in the densely built district.	<p>Responses to Grounds C15 and C16 above regarding the traffic improvement measures are relevant.</p> <p>Furthermore, the new access road is essential to relief the critical junction of Cadogan Street and Victoria Road.</p>
	E3.	The proposed road improvements i.e. the construction of a new access road to connect Victoria Road and Cadogan Street for diversion of Central-bound traffic; closing of the eastbound lane of Victoria Road at the junction of Victoria Road/Belcher’s Street/Cadogan Street junction to enhance the junction performance; and the prohibition of right turning movement from Ka Wai Man Road to Victoria Road, would only	Responses to Grounds C15 and C16 above are relevant.

Item	Subject of Representation		Responses to Representations
		provide vehicular access for the newly built private buildings but would not increase the road capacity to accommodate the additional traffic.	

**Table F: Other Miscellaneous Amendment Items**

Item	Subject of Representation		Responses to Representations
<u>Providing Views</u>			
Amendment Item J (Proposed “Green Belt”)	F1.	Mount Davis should be designated as a Country Park and the OVTs along Victoria Road should be preserved. It has rich cultural, heritage and ecological value and has been classified as a Grade II historic building. It is easily accessible and is a popular hiking destination.	Mount Davis is generally wooded and largely zoned as “GB” and its subzones on the OZP, including <b>Amendment Items E(part), J and M</b> . There is a general presumption against development within the “GB” zone. As a result, the natural environment and the historic buildings located within the area would be protected. AFCD considered that the current zoning is appropriate to reflect the existing natural setting.
Amendment Item L (Proposed “OU” annotated “Uses Related to Underground Refuse Transfer Station”)	F2.	Agree/no comment.	Noted.

**Table G: General Matters**

Items	Subject of Representation		Responses to Representations
<u>Providing Views</u>			
	G1.	The adding of a MTR entrance/exit at Victoria Road is supported to meet the needs of the residents.	Response to Ground C123 above is relevant.
	G2.	Permanent location in the western part of Kennedy Town for Mount Davis Kai-Fong Welfare Association is requested.	There is provision under the OZP for accommodating additional premises-based GIC facilities as such uses are always permitted in “R(A) and “G/IC” zones. A composite block is proposed in the public housing site under <b>Amendment Item C1</b> to accommodate some GIC facilities, including an elderly centre and a children and youth centre as required by the Social Welfare Department (SWD). In addition, further GIC facilities, e.g. residential care home for the elderly, are planned at the private residential site under <b>Amendment Item C2</b> . The actual requirement of the GIC facilities will be confirmed by relevant government departments and be specified under the planning brief of the proposed public housing development or in the lease of the proposed private residential development.
	G3.	Permanent location in the western part of Kennedy Town for the residential care home for the elderly of Chee Sing Kok Social Centre of The Humanity Love is requested.	
	G4.	To designate the Mount Davis region as a Country Park and preserve old registered trees along the Victoria Road.	Whether an area is suitable for designation as a country park is outside the purview of the Board. The current zoning would not preclude the designation of Mount

Items	Subject of Representation		Responses to Representations
			Davis as a Country Park by the relevant authority in future.  Response to Ground E1 above is also relevant.
	G5.	Mount Davis should be completely preserved as there are Grade II historic buildings, historic military relics and monument of the Tung Wah Smallpox Hospital.	Responses to Grounds A9 and F1 above are relevant.
	G6.	Mount Davis is a popular and reachable hiking destination, one of the top five bird watching locations in Hong Kong, and habitat with rich ecological value for a variety of birds, such as the Magpie Robin, Emerald Dove, White-bellied Sea Eagle, Grey-faced Buzzard and butterflies. It is a ‘green lung’ for the Central and Western District.	Response to Ground F1 above is relevant.
<u>Opposing Views</u>	<i>Overall</i>		
	G7.	The subject amendment items could not solve the existing problems such as issues relating to traffic, visual, development density, open space and community facilities and environment.	Responses to Grounds B2 and C13 are relevant.
	G8.	Existing open space and transport infrastructure etc. are inadequate and could not support the additional population/development. Since the	Responses to Grounds B2 and C13 are relevant.

Items	Subject of Representation		Responses to Representations
		affected area is extensive, it would create a lasting effect to the community.	
	G9.	The Plan is premature for decision-making. Protection of the nature and bio-diversity, enhancement of economic development and improvement of the living environment are equally important.	Responses to Grounds B2 and C13 are relevant
	G10.	The Government should provide a long-term detailed proposal on environmental, infrastructure, traffic, planning and etc. prior to development.	Responses to Grounds B2 and C13 are relevant
	G11.	Judicial Review of the OZP amendment should be submitted to stop all associated works.	Noted.
	<i>Land Use</i>		
	G12.	Oppose tourism development in a primarily residential area as it would bring adverse impact.	Responses to Grounds B1 and B2 above are relevant.
	<i>Ground Decontamination Works</i>		
	G13.	Oppose ground decontamination works in general. It would lead to health risk and environmental degradation.	Responses to Grounds C27 to C46 above are relevant.
	G14.	Ground decontamination works may not be necessary if some areas would be covered by concrete. An updated soil contamination survey and redefinition of the scale of the	Responses to Grounds C27 to C46 above are relevant.

Items	Subject of Representation		Responses to Representations
		decontamination project should be provided.	
	<i>Open Space/Greening</i>		
	G15.	Parks and green areas should be preserved as they are important for local residents and are attractions in the local area.	Response to Ground C13 above is relevant.
	G16.	The existing open space and recreational facilities in the district are inadequate and it is difficult to find seats in park.	Response to Grounds C47 to C52 above for provision of open space and recreation facilities is relevant.  The design and provision of the facilities will be determined by the implementation agent at the detailed design stage.
	G17.	The proposed green areas are located only along the waterfront and there is insufficient green space to improve the living environment in Kennedy Town.	Provision of more green areas will be considered when opportunity arises.  Response to Ground C69 above is also relevant.
	G18.	There is inadequate open space in Sai Wan. Green space and open space are much needed in Hong Kong.	.
	G19.	Public open spaces belong to the public. They are not Government's property.	Response to Ground A5 above is relevant.
	G20.	A green community would help increasing the property price of Kennedy Town.	Property price is not a relevant consideration in land use planning.
	G21.	Cats/dogs should be prohibited from running.	It is not a land use related issue.

Items	Subject of Representation		Responses to Representations
		Otherwise, those owners of cat/dog should be punished. There should be stricter control and enforcement of the Dogs and Cats Ordinance and punishment for law-breaker.	
	<i>Provision of Open Space and GIC Facilities</i>		
	G22.	The proposed amendments to the OZP does not take into account the needs of the community, i.e. to provide public facilities for the elderly including a public elderly home, better medical services and an easily accessible and green open space, and would worsen the existing living environment.	Responses to Grounds A3 to A5 and C73 above are relevant.
	G23.	The adequacy of public infrastructure should be fully analysed prior to building new residential developments.	Response Ground B2 above is relevant.
	G24.	The existing retail, community facilities and public open space are inadequate. The Government should take priority to improve the living environment of existing residents instead of rezoning land for residential developments.	Responses to Grounds A3 to A5 and C73 above are relevant.  There is provision under the OZP for providing retail shops. However, the provision of such facilities is market-led.
	G25.	Residents in Kennedy Town were told that they could use other community facilities within the	Responses to Grounds C73 and G2 above are relevant.

Items	Subject of Representation	Responses to Representations
	G26. The provision of open space and recreational facilities including athletic track and football pitch in the district does not meet the requirements of HKPSG.	Response to Ground C9 above is relevant.  For the concerns on the provision of recreation facilities, including athletic track and football pitch, these facilities in general could be incorporated into LCSD's venues as appropriate. The local residents can make use of the C&W District Promenade for jogging activities and the Sun Yat Sen Memorial Park Artificial Turf Pitch as well as the two 7-a-side soccer pitches in the Kennedy Town Playground and the Kennedy Town Temporary Recreation Ground for football activities.
	G27. In preparation of the Plan, apart from reserving land for residential development, the Government should also give priority to recreation and leisure uses and explore the feasibility of other land use options, such as track and field sports centre.	Response to Ground C13 above is relevant.
	G28. Kennedy Town is being gentrified and goods and services provided are unaffordable.	It is not a land use related matter
	G29. It is unreasonable for the Government to spend money to undertake ground decontamination works for the private developers to build houses	Responses to Grounds C27 to C46 are relevant.

Items	Subject of Representation	Responses to Representations
	G30. There are carcinogenic substances under CSTG. Ground decontamination works of the site are required for the proposed residential development, which will pose serious health hazards to nearby residents. The provision of a track and field sports centre can better utilise the land and does not necessitate ground decontamination works (with reference to example in Germany), thereby preventing health hazards to residents.	Responses to Grounds C27 to C46 are relevant.
	G31. No social impact assessment is provided, in particular the impact of demolishing CSTG without any compensation has not been assessed. No consultation with the local community has been conducted for the Plan. The Government should consult the public on their suggestions before rezoning, as well as take into consideration of the livelihood of the residents in Kennedy Town.	Responses to Grounds C27 to C46 and C100 are relevant.
	G32. The Government should consider the public's suggestions and further extend the consultation period.	Response to Ground C100 above is relevant.

Items	Subject of Representation	Responses to Representations
	<i>Traffic Considerations and Pedestrian Connections</i>	
	G33. There is concern on traffic impact. The subject amendment items would largely increase the population and traffic load in the district.	Responses to Grounds C15 to C16 above are relevant.
	G34. The existing traffic network (such as Belcher's Street and Victoria Road) is already congested/overloaded. There are ongoing redevelopments in the district causing an increase in population and worsening of traffic congestion. The district could not support additional traffic generated by the new population/developments and the traffic problem would become more serious.	
	G35. No TIA is provided. The residents in the district generally considered that the proposed traffic improvement measures cannot cater for the additional traffic brought by the proposed developments.	
	G36. The flow and speed of traffic at Catchick Street near to The Merton is high, and it would significantly affect safety of pedestrians. TD should review the traffic direction of Catchick Street.	

Items	Subject of Representation	Responses to Representations
	G37. Belcher Street is already congested with frequent traffic accidents.	
	G38. The usefulness of retaining piers in the Shek Tong Tsui region is questioned.	The piers are proposed to be retained for revitalisation for marine access and other uses as part of the waterfront park. The existing pier under <b>Amendment Item H</b> is retained as a land reserve for pier use in case of future need and relevant statutory planning control is imposed to guide its future development/ redevelopment.
	G39. The turning of tram from Belcher's Street to Catchick Street hinders traffic and creates noise to the nearby residents.	To minimise the sound level generated by trams, Hong Kong Tramways Limited (HKTL) would regularly conduct inspections along tram tracks, and carry out routine maintenance and welding work without affecting daily tram service. At the same time, HKTL has installed intermittent water spraying system as a noise mitigation measure at Kennedy Town Terminus (near Belcher's Street and Cadogan Street).  Responses to Grounds C15 and C16 are also relevant.
	G40. The existing tram terminus and the proposed public transport terminus at site under Amendment Item C2 would cause noise nuisance to the residents at The Merton.	Response to Ground G39 above is relevant.
	G41. The land use proposals would increase the risk of	According to TD's Traffic Review, traffic improvement

Items	Subject of Representation		Responses to Representations
		traffic accidents.	measures and pedestrian facilities are proposed. Facilities such as signalised crossings and footbridges will enhance road safety for pedestrians.
	<i>Air/Visual/Environmental/Development Intensity Considerations</i>		
	G42.	The AVA is not updated according to the change of the BH at the site under Amendment Item C2, and hence cannot reflect the feasibility of the Plan.	Response to Ground C88 above is relevant.
	G43.	The high-rise high-density proposal is incompatible with the tranquil and green environment of this part of Kennedy Town.	Response to Ground C87 above is relevant.
	G44.	Open spaces should be retained to provide relief from wall effect, poor air ventilation and noise nuisance.	Responses to Grounds B2, B9, C27 to C46 and C88 above are relevant.
	G45.	The land use proposals would lead to wall effect and it is not sustainable.	Responses to Grounds B2, B9 and C27 to C46 and C88 above are relevant.
	G46.	The environment should be protected. The Plan has not provided any measures to tackle or cope with climate change and alleviate air pollution and heat island effect. Instead it proposes to demolish the CSTG.	Responses to Grounds B2, C27 to C46 and C87 above are relevant.
	G47.	Traffic associated air pollution would be worsened with additional residential developments in the	Response to Ground B2 above is relevant.

Items	Subject of Representation	Responses to Representations
	district.	
	G48. The Government should focus on reducing population density and traffic congestion in order to reduce cancer risk of the elderly due to air pollution.	Responses to Grounds B2 and C13 above are relevant.
	<i>Development Intensity/Population</i>	
	G49. The high-density development proposal in the western part of Kennedy Town is opposed, but the development of a primary school at the bus depot and temporary car park (Amendment Item D1), and the recreational use and building of a salt water pumping station at the Kennedy Town Temporary Recreation Ground (Amendment Items A3 and D2) are supported.	The supporting views are noted.  Response to Ground C108 above is relevant.
	G50. The Government has underestimated the development scale of the proposal. There are only about 1,200 existing units on Ka Wai Man Road, but the proposal would bring about 3,300 units to Victoria Road and Ka Wai Man Road.	Responses to Grounds B2 and C13 above are relevant.
	G51. No further development is needed as there are many new residential developments and people in the district already. There are inadequate transport facilities, facilities to improve air quality	Responses to Grounds B2 and C13 above are relevant.

Items	Subject of Representation		Responses to Representations
		and etc. to cater for the significant increase of population.	
	G52.	Over development of Kennedy Town is opposed. There is inadequate infrastructure and open spaces to support the development.	Responses to Grounds B2 and C13 above are relevant.
	G53.	In order to retain the uniqueness of Kennedy Town, no further development is needed.	Response to Ground C13 above is relevant.
	G54.	There are ongoing redevelopments in the district causing increase in population. The Government has also not taken into consideration the redevelopment of Sai Wan Estate which would increase population in the district. Existing transport infrastructure/capacity and community facilities are already insufficient. It is doubted that the district could further accommodate an influx of a large amount of residents.	Responses to Grounds B2, C6 and C13 above are relevant.
	G55.	The Government should consider reclamation as a means to increase land supply.	Response to Grounds C13 above is relevant.
	<i>Public Consultation</i>		
	G56.	The residents in the district should be able to formulate their own land use plan.	Response to Ground C100 above is relevant.
	G57.	The Government should respect the concerns of the local people.	

Items	Subject of Representation	Responses to Representations
	G58. The Government panders to interests of private developers in the expense of the local residents.	
	<i>Land Use</i>	
	G59. The need to achieve housing target in every district at the expense of local objections and unjustified technical feasibility is not agreed. There are also other brownfield sites and old buildings available for redevelopment in Hong Kong. Ka Wai Man Road Garden, the existing “G/IC” site along Victoria Road, Sai Wan Estate, the slope on Rock Hill Street and the ex-Police Married Officers Quarters could be considered as alternative sites for compensating the number of private residential units proposed at the site under Amendment Item C2.	<p>From the land use planning point of view, these sites are considered not appropriate for residential development since (i) the Ka Wai Man Road Garden (zoned “O”) forms an integral part of an air path between the waterfront and the hillside; (ii) the “G/IC” sites (including a Grade 3 historic building) along Victoria Road are currently providing GIC facilities to serve the local community (such as public clinic) and they falls within a low-rise development area serving as a spatial relief; (iii) Sai Wan Estate (zoned “R(A)”) is currently a public housing site and there is no redevelopment plan (Response to Ground C6 above is relevant); and (iv) the sloping site at Rock Hill Street is zoned “GB”, which is not for development in general, and the technical feasibility is uncertain due to the steep topography.</p> <p>Responses to Grounds B2 and C13 above are relevant.</p>
	G60. There are alternative locations for the proposed residential, public transport terminus and parking uses under Amendment Item C2.	Response to Ground C13 is relevant.

Items	Subject of Representation	Responses to Representations
	G61. The light goods vehicle parking facilities should be moved from the site under Amendment Item C1 to C2 in order to shorten the driving distance and reduce traffic load at Victoria Road and the chance of accidents.	Responses to Grounds C15 and C16 are relevant.
	G62. To relocate the proposed primary school under Amendment Item D1 to the site under Amendment Item C1. Site under Amendment Item D1 could then be used to accommodate a community hall, and the proposed PTT and underground car park at site under Amendment Item C2. Alternatively, the proposed PTT and underground carpark could be relocated to the site under Amendment C3. If sites under Amendment Items D1 and C3 could not accommodate both PTT and underground carpark, it is suggested to place them separately in those sites assuming the site under Amendment Item D1 would be used as community hall and the proposed primary school would be relocated to Amendment Item C1.	Responses to Grounds D7 and D8 above are relevant.  Furthermore, the area of Amendment Item C3 (i.e. 0.23ha) is too small to accommodate the proposed PTT of 7,000m <sup>2</sup> as well as the proposed 50 public car parking spaces and 70 goods vehicle parking spaces.
	G63. To relocate the proposed school at the site under Amendment Item D1 to the active recreational amenities on Sai Ning Street, while those	It is uncertain what ‘active recreational amenities on Sai Ning Street’ that the representer is referring to. Presumably, it is the Kennedy Town Temporary

Items	Subject of Representation		Responses to Representations
		amenities can be relocated next to the CSTG.	<p>Recreation Ground.</p> <p>This open space site has direct frontage of the waterfront and would form part of the proposed continuous promenade along the coast of Kennedy Town for public enjoyment. To use the site for accommodating the proposed school is not in line with the harbourfront planning principles. Moreover, the area and width of the site are only about 5,700m<sup>2</sup> and 41m respectively and could not meet the HKPSG requirements for a 30-classroom primary school, i.e 6,200m<sup>2</sup> and 65m. In view of the above, the representer's proposal is not supported.</p>
	<i>Housing</i>		
	G64.	More public housing developments are needed.	<p>C&amp;WDC has all along supported public housing development in the district. Two motions were passed by C&amp;WDC on 6.1.2011 and 10.1.2013 to request the Government to identify appropriate sites in the district for the construction of public housing to cater for the need of the grassroots suffering from high rent in the private property market in the C&amp;W District. Taking into account the view of C&amp;WDC and the pressing housing needs of the grassroots, a higher provision of public</p>

Items	Subject of Representation		Responses to Representations
			housing units has been adopted as compared with the 60:40 split for public and private housing as set out in the Long Term Housing Strategy.
	<i>Ground Decontamination Works</i>		
	G65.	It is suggested to postpone the ground decontamination works (until the older generation has passed away) for better air quality.	Responses to Grounds C27 to C46 above are relevant.
	<i>Open Space/Greening/Community Facilities</i>		
	G66.	To provide sufficient open space, i.e. 2m <sup>2</sup> per person, for both existing and additional residents in the district.	Responses to Grounds C47 to C52 above are relevant.
	G67.	To provide an open space bigger than the CSTG and a pet garden area.	The CSTG would be reprovisioned at the site under Amendment Item A1, i.e. the proposed waterfront park for public enjoyment.  Response to Ground A3 above is also relevant.
	G68.	The CSTG could be relocated to the waterfront and be part of the proposed waterfront park for residents' enjoyment.	
	G69.	To provide a pet park/garden as there are a lot of pets living in the area.	
	G70.	To increase the provision of quality green space and community facilities.	Responses to Grounds A3 and C69 above are relevant.
	G71.	Greenery/green area should be retained/increased.	Responses to Grounds A3 and C69 above are relevant.
	G72.	More greening is needed in Hong Kong to reduce air pollution instead of luxurious private	Response to Ground C13 above is relevant.

Items	Subject of Representation	Responses to Representations
	residential developments.	
	G73. To build additional large-scale recreation facilities, seating and shades in parks. The area to the east of Sai Ning Street should be reserved for open space/recreational use (including playground).	The site under Amendment Item A1 is zoned “O(1)” and proposed for the development of a waterfront park. However, given the current shortfall in housing land supply, the proposal of not rezoning Amendment Item C2 to “R(A)” for residential developments is not supported. As <b>Amendment Item D1</b> is the only suitable site identified for the proposed primary school, it should be reserved for such use to meet the education need of the area.
	G74. To build further down the road in order to preserve the CSTG.	Responses to Grounds C27 and C46 above are relevant.
	G75. To develop a 60mPD community complex and waterfront promenade at the existing MTR works area, salt water pumping station, Victoria Public Mortuary and CSTG to address the inadequacy of social facilities and recreation area in the district.	Response to Ground G73 above is relevant.
	G76. New leisure and recreational facilities such as community centre, food market, shopping centre, sports hall, garden, should be provided in Kennedy Town.	Responses to Grounds C10, C13 and C73 are relevant. There is provision under the OZP for providing retail shops. However, the provision of such facilities is market-led.
	G77. Improve sports facilities.	LCSD will review the usage of the sports facilities from time to time and explore the possible improvement

Items	Subject of Representation	Responses to Representations
		measures when the existing facilities are due to be replaced.
	G78. Tennis court should be provided as there is no such facility in the district.	LCSD is open to the proposed provision of tennis courts in the C&W District, but finds it necessary to balance the demands for space to be used for tennis and other activities. LCSD will explore the possibility of providing tennis courts in the future development of LCSD facilities in the C&W District.
	G79. A large-scale shopping mall is needed in Sai Wan with increasing population.	There is provision under the OZP for providing shopping mall. However, the provision of such facilities is market-led.
	G80. To rezone Mount Davis to “OU” annotated “Nature Park” to permit uses such as camping sites, war game area, zip lines, mountain biking trails, rock climbing area which are appropriate for an active park.	Mount Davis is generally wooded and largely zoned as “GB” on the OZP. ‘Nature Trail’, ‘Picnic Area’ and ‘Tent Camping Ground’ are uses always permitted in the “GB” zone under the OZP. For other recreational activities, planning application may be required, which will be considered by the Board on its own merits. There is no strong justification for rezoning Mount Davis to “OU(Nature Park)”.
	<i>Environment</i>	
	G81. To rezone the Fanling Golf Club and stay away from the open spaces in urban areas and the countryside in Lantau Island for public housing	Government has adopted multi-pronged approach to increase land supply. According to HK2030+, the Fanling Golf Course held under the Private Recreational

Items	Subject of Representation		Responses to Representations
		development. The natural environment in Hong Kong should be preserved.	Lease (PRL) falls within the New Territories North study area and is subject to the Review of Policy on PRL currently undertaken by the Home Affairs Bureau.
	<i>Traffic Considerations</i>		
	G82.	To introduce an automatic underground car park system at other alternative sites within the district with smaller site area to replace the proposed car park at site under Amendment Item C2. This would reduce the land area to be occupied by the proposed car park and address the issue of insufficient car parking spaces in the district.	As advised by TD, provision of parking spaces should be compatible with Government's overall transport policy. As a general principle, parking should be provided at a level which will not unduly attract potential passengers to use private vehicles in preference to public transport.  Notwithstanding the above, the feasibility of providing an underground public carpark underneath the proposed waterfront park under <b>Amendment Item A1</b> would be subject to further study.
	G83.	To introduce traffic improvement measures on Victoria Road, Cadogan Street, Belcher's Street, and New Praya, Kennedy Town.	Responses to Grounds C79 and C80 above are relevant.
	G84.	To provide MTR exits to the west of The Merton to ease the existing crowd on the road.	Response to Ground C123 above is relevant.
	G85.	To increase the number of car parks in order to alleviate the blockage of vehicles on roads (such as Belcher's Street) due to illegal parking.	Responses to Grounds C17, C79 and C80 above are relevant.
	G86.	It is suggested to provide transport services	Response to Ground C17 above is relevant.

Items	Subject of Representation	Responses to Representations
	to/from (a) Causeway Bay and North Point; (b) Mid-levels and North Point; and (c) Kennedy Town and Kowloon.	
G87.	To provide a new lift connecting Forbes Street and Ka Wai Man Road to facilitate access and relieve traffic pressure and pedestrian flow brought by the additional population.	<p>There is currently no redevelopment plan of Sai Wan Estate. Response to Ground C6 above is relevant.</p> <p>The proposed addition of lift connecting Forbes Street and Ka Wai Man Road would be hindered by the existing Sai Wan Estate. Lifts (or in other forms) would be provided to access between the proposed public housing development under <b>Amendment Item C2</b> and Victoria Road.</p>
G88.	It is suggested to enhance/extend tram route and tram terminus. The following proposals have been suggested (a) to enhance and extend tram route and the tram terminus to the development area to avoid traffic congestion, provide more public transport options and reduce the need for private cars; (b) to extend the tramway route to Sai Ning Street by rezoning part of Amendment Item D to an area shown as 'Road'; (c) to relocate the existing tram terminus at Catchick Street to the site under Amendment Item C2 or other	<p>Since a new PTT has already been proposed under Amendment Item C2, there would not be adequate space to incorporate another tram terminus thereat. There is also no other site subject to amendment available for the relocation of tram terminus.</p> <p>As for the enhancement/extension of tram route to the western part of Kennedy Town, including Sai Ning Street, via Victoria Road and the new access road, the proposed alignment will occupy part of the school site under <b>Amendment Item D1</b>, and adversely affect the traffic</p>

Items	Subject of Representation		Responses to Representations
		appropriate locations; and (d) to relocate the existing tram terminus to the G/F of the site under Amendment Item C2 and incorporate this proposal as a land sale condition.	flow on concerned roads and undermine the effectiveness of the proposed road improvement works.
	<i>Development Intensity</i>		
	G89.	To lower the development intensity and BHRs to tally with the waterfront setting, and to adopt the stepped BH profile. BHs of “R(A)” zones to north of Victoria Road (i.e. Amendment Items C3 and C4) to be lowered to 40 to 60mPD or less. Some features such as ferris wheel/boat anchoring to be provided to create an interesting destination.	<p>Response to Ground C9 above is relevant.</p> <p>Given the overall stepped BH profile of the area is appropriate, the proposals to further reduce the BH of the sites are not supported.</p> <p>Facilities to be provided are subject to the detailed design by the project proponent.</p>
	G90.	It is suggested that total proposed housing units should be reduced, i.e. (a) 1,500 to 1,800 units; and (b) 2,700 units (reduction of private housing only).	<p>Response to Grounds C13 and G64 above are relevant.</p> <p>Given the current shortfall in housing land supply, there is no strong justification for further reduction of flat production.</p>
	G91.	New developments around the CSTG should be not more than 30m.	The overall stepped BH profile of the area is appropriate, hence, this proposal to lower the BH of new developments is not supported.
	<i>Others</i>		
	G92.	To provide assistance to small shops and businesses.	It is not a land use related issue.

**Comments**

Item	Gist of Comment	Responses to Comments
Support R111 to R142, R146 to R4095, R4097 to R4111 and R4113 to 7612	(1a) There are over 7,000 objecting representations regarding the demolition of CSTG. It demonstrates the importance and necessity of a quality open space in the area.	Responses to C27 to C46 above on the need of ground decontamination works are relevant.  According to our record, among the total 7,593 representations, about 4,000 representers object <b>Amendment Item C2</b> /the demolition of CSTG.
	(1b) The proposed waterfront park at site under Amendment Item A1 would take about 8-10 years to complete and could not meet the public need in that period.	Responses to Ground C55 and C56 above are relevant.
	(1c) The Government and the Board should not ignore the public opinion.	Response to Ground C100 above is relevant.
	(1d) CSTG should be rezoned to “O” as a permanent garden. There is no overriding need to fell about 200 trees, which most of them are in good condition. In addition, there are rare tree species, such as <i>Rhodoleia</i> , <i>Ailanthus</i> , in CSTG.	Responses to Grounds C27 to C46 above are relevant.
	(1e) There are alternative sites available for development.	Responses to Ground C13 and G59 above are relevant.
Support R142	(2a) Support that a quality park should be located within walking distance (i.e. 300m or 5-8	Responses to Grounds C27 to C46 and C54 above are relevant.

Item	Gist of Comment	Responses to Comments
	minutes' walk). The existing Belcher Bay Park and CSTG meet such a criterion and are serving the public in different catchment area. Should CSTG be demolished, it would affect a group of public. The Belcher Bay Park is not a substitute of CSTG in terms of its location and function.	
Support R150	(3a) CSTG should become a permanent garden for public enjoyment.	Responses to Grounds C27 to C46 above are relevant.
	(3b) Same as (2a)	Refer to the response to (2a) above.
	(3c) DEVB has ignored the public and C&WDC's objection and submitted the OZP for public consultation. The Finance Committee (FC) has also put the ground decontamination works project and demolition of the CSTG on hold. LegCo Members and the residents are disappointed at DEVB's decision.	Response to Ground C100 above is relevant.
	(3d) The OZP amendment is controversial. Given the FC has not approved the funding for ground decontamination works, there is no urgency to rezone the site.	Response to Ground C100 above is relevant.
	(3e) Request the Government to withdraw the rezoning of the CSTG. This suggestion would not hinder the development proposals of other	CSTG and its adjoining area have been rezoned "R(A)6" on the OZP, which is gazetted on 11.3.2016 and exhibited for public inspection under section 7 of the Ordinance.

Item	Gist of Comment	Responses to Comments
	<p>sites. The Government should liaise with the residents to formulate a win-win proposal which could meet housing demand, address public concerns on ground decontamination works and preserve the CSTG.</p>	<p>The draft OZP is under statutory plan-making process. The representations and comments on representations received will be considered by the Board and that the representers and comments have been invited to attend the hearing. After the hearing, the Board will decide whether to propose amendments to the draft OZP to meet the representations. There is no provision under the Ordinance to 'withdraw' the land use proposal of CSTG as requested by the commenters.</p>
Object to R143	<p>(4a) Object to the reservation of the site under Amendment Item C2 for recreation and leisure use, including track and field sports centre, as it would demolish CSTG and remove all trees and such facilities would not be open for public at all times. The suggestion would affect public who uses the garden, in particular the elderly. Sports centre and recreational facilities should be built elsewhere.</p>	<p>Responses to Grounds C27 to C46 above are relevant.</p>
Object to R144	<p>(5a) Object to the proposed hotel development at site under Amendment Item B. The proposed development is incompatible with the surrounding. It would commercialise the neighbourhood and lead to higher living costs.</p>	<p>Responses to Grounds B1 and B2 above are relevant.</p>

Item	Gist of Comment	Responses to Comments
	The proposed hotel development would increase traffic load of Belcher's Street and Victoria Road.	
Object to R4096	(6a) Object to the proposed relocation of the proposed LGV parking spaces from Amendment Item C1 to C2 as demolition of CSTG is required.	Goods vehicle parking is proposed at both public and private housing sites at <b>Amendment Items C1 and C2</b> respectively according to the Traffic Review.
Object to R4113	(7a) Object to the proposed 60mPD community (7b) Complex under Amendment Item C2 is just a repetition of Government's plan. The "R(A)6" zone has already allowed community facilities to be built on the lowest three floors of a building. Community facilities should be built elsewhere.	Refer to response to Ground G75 above.
Object to R4114 (and those identical to that representation submitted by individuals)	(8a) Object to the relevant representers' proposal to develop value-added facilities at the site under Amendment Item D1 or sell the site to developers for increasing Government income is objected. It is likely that the said site would be used for high-density residential development. It would add serious traffic congestion to Victoria Road and adversely affect the lives of nearby residents.	Response to Ground D8 above is relevant.
	(8b) Community need is the first priority in formulating land use proposal.	Response to Ground C13 above is relevant.
Oppose the Plan and in relation to R4120	(9a) The Plan would destroy all vestiges of the old neighbourhood/community and should be	Responses to Grounds B2 and C13 above are relevant.

Item	Gist of Comment	Responses to Comments
	opposed. The Board is reminded that development in Kennedy Town should be of human scale that could retain the atmosphere and cohesion of the district. There is strong sentiment on the radical change of the district.	
Oppose the Plan and in relation to R4121	(10a) The Plan is not satisfactory and should be revised.	Responses to Grounds B2 and C13 above are relevant.
	(10b) The Government has announced implementing measures to lower emission of greenhouse gases, but the Plan has no indication of such measures.	
	(10c) Sustainable measures to balance economic development and conservation of biodiversity as well as protection/improvement of environmental qualities are deficient in the Plan.	
Oppose Amendment Item C2 (related representation not specified)	(11a) Object to the demolition of CSTG for residential use.	Responses to Grounds C27 to C46 above are relevant.
	(11b) CSTG should be preserved for public enjoyment.	
	(11c) CSTG is a place for public to do sports and relax. It is a focal point of the district and could not be replaced by commercial uses. The preservation of CSTG would benefit the public and would not lead to addition traffic load.	
	(11d) Object to the demolition of CSTG as the garden has about 200 valuable trees and it is an important	

Item	Gist of Comment	Responses to Comments
	open space for the nearby residents.	
	(11e) The ground decontamination works and the pollutants would destruct the environment and seriously impact the health and living of the public.	
	(11f) The soil underneath the site has been contaminated by pollutants including heavy metal. Some of which are carcinogenic. The duration of ground decontamination works is long. The wind would blow away the pollutants and be inhaled by the residents. It would pose health hazard to residents and deteriorate air quality. The construction noise would also impact residents.	
	(11g) EIA report for the ground decontamination works is not comprehensive and not up-to-date.	
	(11h) Buildings that would create wall effect are not needed.	Response to Ground C88 above is relevant.
	(11i) The commenter No. C13 expressed that over 7,000 objecting representations and 27 LegCo Members objecting the demolition of CSTG were received. A petition letter from the 27 LegCo Members were provided and its content is similar	Response to (1a) above is relevant.

Item	Gist of Comment	Responses to Comments
	to those comments provided by C1-C9.	
In relation to R3970 (Oppose Amendment Items C1 and C2)	(12a) CSTG is a leisure area for the local residents and home for biodiversity. It would lower the heat island effect and remove greenhouse gases to alleviate climate change. CSTG is worthy of preservation.	Responses to Grounds C27 to C46 and C87 above are relevant.
	(12b) The Plan does not accommodate the expected population in a harmonious manner. School and community facilities could be better relocated to areas for new residents at public housing site.	Responses to Grounds C13, D7 and D8 above are relevant.
	(12c) The Plan would worsen traffic congestion and air quality. (Amendment Item C1)	Response to Ground C11 above is relevant.
	(12d) The old residential areas are within 5-10 minutes' walking distance to the mass transit system. (Amendment Item C1)	Response to Ground C82 above is relevant.
Others	(13a) Green recreational areas must be easily accessible. The accessibility of the CSTG is great and should be preserved.	Responses to Grounds A4 and C27 to C46 above are relevant.
	(13b) Support the preservation of CSTG to conserve the collective memory and 'green lung' of the city.	Responses to Grounds C27 to C46 above are relevant.

Item	Gist of Comment	Responses to Comments
	(13c) Agree that development/redevelopment in old district is necessary but the Government and private developer have always ignored community need. Every residential district should be supported by affordable public transport and different transportation modes, affordable large-scale market, unique individual stores, green area and park, other community and recreation facilities, and job opportunities. The Government has made a mistake by demolishing the CSTG.	Responses to Grounds C13 and C27 to C46 above are relevant.
	(13d) Greenery should be kept.	Responses to Grounds C69 and C27 to C46 above are relevant.
	(13e) It is illogical to demolish the CSTG as vegetation benefits people at all ages and the living environment in Hong Kong is not satisfactory.	Responses to Grounds C27 to C46 above are relevant.
	(13f) The Government should take into account the concerns of the public instead of prioritising interests of developers and businessmen. Hong Kong would become a ‘concrete jungle’ should the Government continue to remove green spaces.	Response to Ground C13 above is relevant.
	(13g) Kennedy Town needs a green park.	CSTG will be reprovisioned at the proposed waterfront park under Amendment Item A1 and appropriate greenery

Item	Gist of Comment	Responses to Comments
		would be provided.
	(13h) The trend of global cities is to provide more greening. The OZP amendment is a retrograde step for the environment, planning and land administration.	Response to Ground C69 above is relevant.
	(13i) CSTG should become a permanent open space for public enjoyment.	Responses to Grounds C27 to C46 above are relevant.

 Amendment Proposed

#### Building Gaps

- 7.12 According to the AVA EE 2013, ~~three~~ **four** building gaps are recommended. A north-west to south-easterly building gap of 15m wide above podium of the “R(A)6” zone is required. In addition, two north-west to south-easterly building gaps of 15m wide above podium of the “R(A)5” zone are required **and a building gap of 15m wide above 20mPD (about 15m above ground level) is imposed on the land portion of the “OU” annotated “Commercial, Leisure and Tourism Related Uses” zone to the north of Sai Ning Street.** They are to mitigate the wind wake due to the proposed developments and to facilitate katabatic air movement from the vegetated hill slope to the waterfront and sea breezes from the north.

#### Non-building Areas

- 7.13 According to the AVA EE 2013, ~~two NBAs are an NBA is recommended. In order to allow higher permeability at the waterfront and along the major north-south ventilation corridor, and to take forward the recommendation of the AVA, a 30m wide north-west to south-easterly NBA is designated at the land portion of the “OU” annotated “Commercial, Leisure and Tourism Related Uses” zone to the north of Sai Ning Street to facilitate katabatic air movement to the waterfront and sea breezes from the north.~~ In order to facilitate south-westerly wind on ground level, a north-east to south-westerly NBA of 15m wide on ground level is designated to the west of Ka Wai Man Road. Within the NBAs, no above ground structure is allowed except for minor structures with high air porosity, such as covered walkway and elevated footbridge. Below ground structure is allowed within the NBAs.

- 8.8 Other Specified Uses (“OU”): Total Area 8.91 hectares

8.8.3 A site at Sai Ning Street and its associated pier are zoned “OU” annotated “Commercial, Leisure and Tourism Related Uses” to facilitate the long-term development of a vibrant waterfront area. Development/redevelopment within this zone is restricted to a maximum GFA of ~~46,446m<sup>2</sup>~~ **65,146m<sup>2</sup>** and a maximum building height of 70mPD for the land portion and 2 storeys for the pier portion. ~~A 12-metre wide waterfront promenade~~ **An elevated or at grade or multi-level waterfront promenade with a total width of 6m** linking up the open spaces on both ends shall be provided to allow promenade continuity and public enjoyment. In addition, a ~~NBA~~ **building gap** is proposed as detailed in paragraph ~~7.13~~ **7.12** above to facilitate air ventilation. The waterfront promenade and ~~NBA~~ **building gap** should be incorporated in the lease condition to effect implementation.

 Amendment Proposed

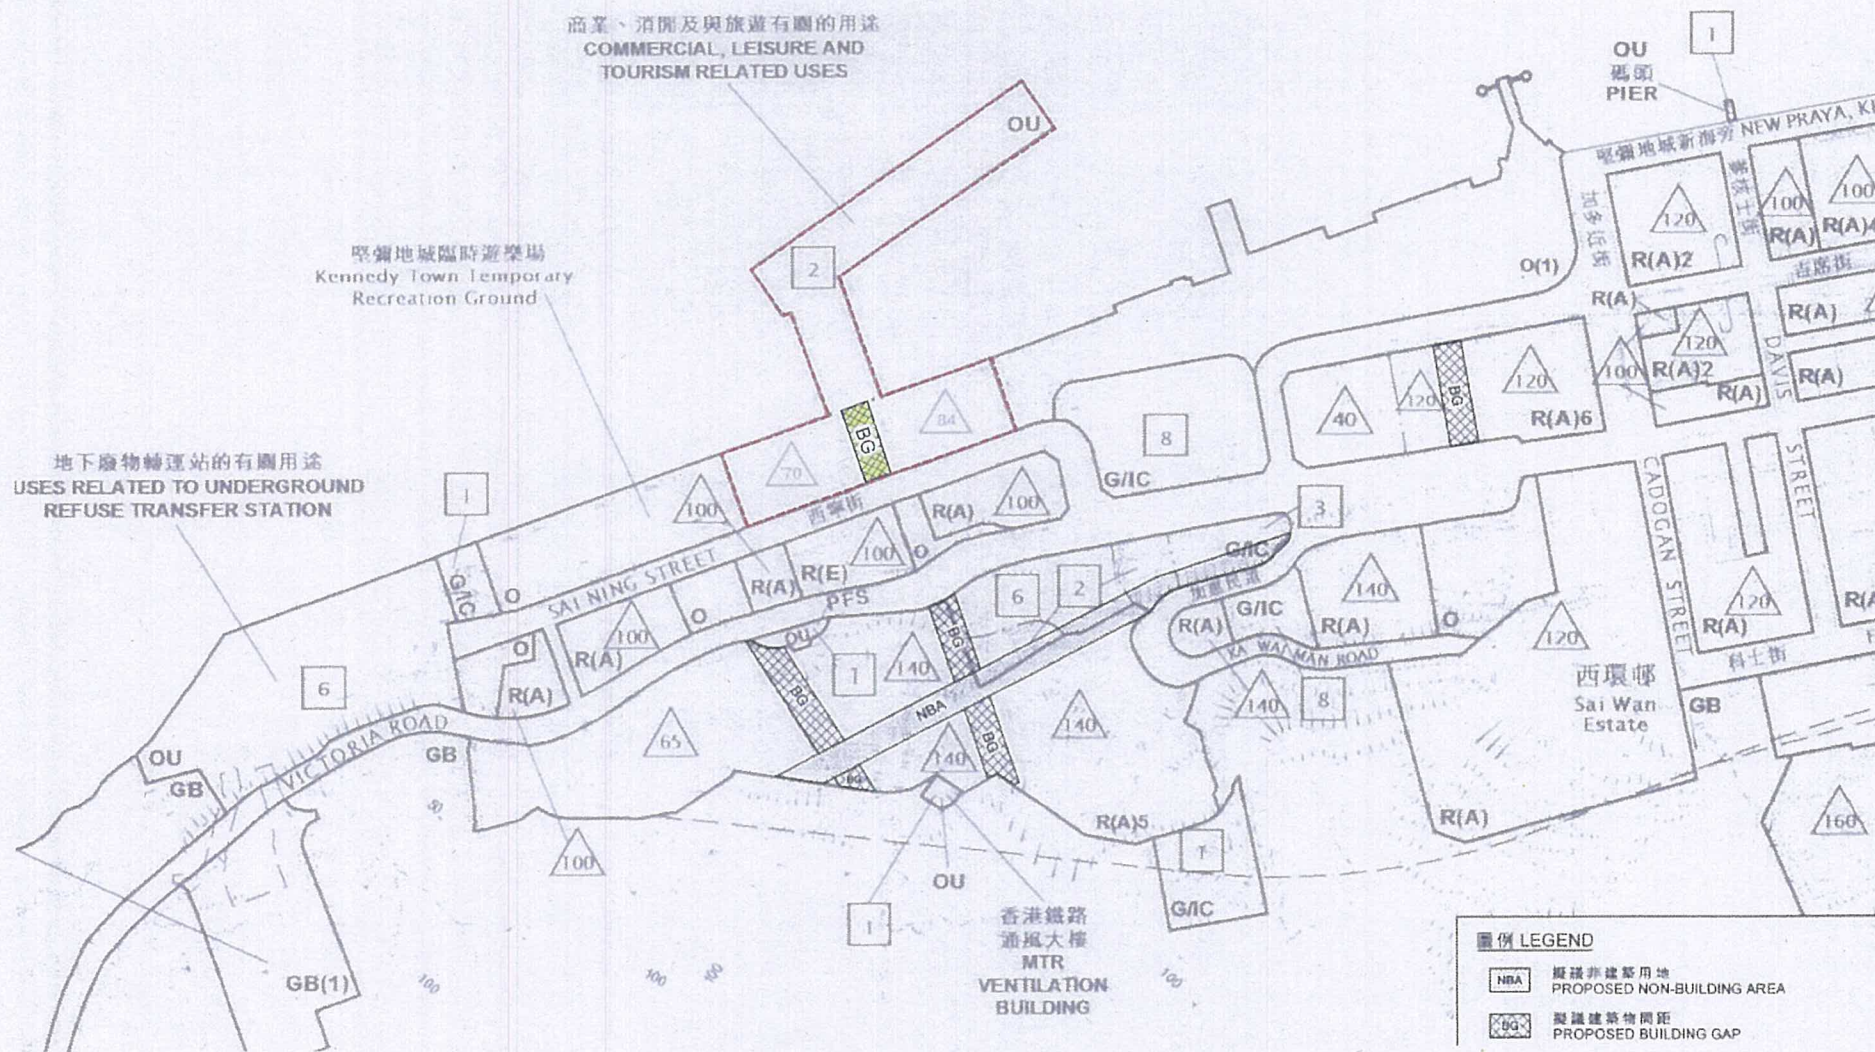

Remarks

- (1) No new development, or addition, alteration and/or modification to or redevelopment of an existing building shall result in a total development and/or redevelopment in excess of a maximum GFA of ~~46,146~~ **65,100m<sup>2</sup>**, and the maximum building heights, in terms of metres above Principal Datum and number of storeys, as stipulated on the Plan, or the GFA and height of the existing building, whichever is the greater. ~~A 12 metre wide waterfront promenade~~ **An elevated or at grade or multi-level waterfront promenade with a total width of 6m** linking up the open spaces on both sides should be provided for public use. **A 15-metre wide building gap from 20 metres above Principal Datum should be provided and the disposition of the building gap should be similar to the gap between the two existing buildings.**
- (2) Based on the individual merits of a development or redevelopment proposal, minor relaxation of the building height ~~and~~, GFA **and building gap** restrictions, and the width of the waterfront promenade stated in paragraph (1) above may be considered by the Town Planning Board on application under section 16 of the Town Planning Ordinance.

**R150's Proposed Possible Alternative Sites for  
Private Residential Development  
(Extracted from Represanter's Submission)**

**Figure 18: Possible Alternative Sites in the Area for Private Residential Flat  
Production**

**Alternative Site 1: Ka Wai Man Road (KWMR) Garden**

- **Area:** 3,796sqm
- **PR:** R(A) Zone - B(P)R: Class A Site - PR8, GFA - 30,368sqm
- **Approx. Flat No.:** 353
- **Merits of Site 1:**
  - Comprising of Government Land, can be used for development immediately without the need for decontamination.
  - The KWMR Garden is currently underutilized and causing safety problems at night

- The KWMR Garden is poorly design (connected by ramps and staircases, inadequate facilities, hard-paved, much less trees compared to CSTG)
- The KWMR Garden is surrounded by high-rise residential development, e.g. Cayman Rise & Centenary Mansions, compatibility for residential development is not an issue
- Future development still also have unobstructed sea view, will not affect the land value comparing to the CSTG site.
- **Demerits of Site 1:**
  - Land Area not adequate to compensate all 680 flats (Need to provide flats with other Alternative sites)
  - Site level difference (similar case for Centenary Mansions and Cayman Rise, therefore should be technically okay)
  - Junction of Ka Wai Man Road and Victoria Road might need further improvement
  - Not enough space, and location not suitable for re-provisioning of bus terminus and car parking spaces

---

**Alternative Site 2: Existing G/IC Sites along Victoria Road**

- **Area:** 5,900sqm
- **PR:** G/IC Zone - B(P)R: Class A Site - PR8, GFA - 47,200sqm
- **Approx. Flat No.:** 549
- **Merits of Site 2:**
  - Comprising of Government Land, can be used for development immediately without the need for decontamination.
  - Existing facilities in the site, e.g. clinic, church, Bayanihan Kennedy Town Centre and Buddhish To Chi Fat She can be reprovisioned and co-located within the future development or other development sites such as the public housing site on the hills.
  - Future development still also have unobstructed sea view, will not affect the land value comparing to the CSTG site.
- **Demerits of Site 2:**
  - Land Area not adequate to compensate all 680 flats (Need to provide flats with other Alternative sites)
  - Site level difference (similar case for Centenary Mansions and Cayman Rise, therefore should be technically okay)
  - Careful arrangement is needed for timely reprovision of the existing GIC facilities to ensure their services can be continued to serve the locals
  - This Part of Victoria Road might need further improvement
  - The Site is elongated and not enough space for re-provisioning of bus terminus and car parking spaces

Alternative Site 3: Sai Wan Estate

- **Area:** 15,409sqm
- **PR:** R(A) Zone - B(P)R: Class A Site - PR8, GFA - 123,272sqm
- **Approx. Flat No.:** 1433 (- existing 600 flats in Sai Wan Estate, i.e. 833 new flat production)
- **Merits of Site 3:**
  - Comprising of Government Land, can be used for development immediately without the need for decontamination.
  - Existing public housing units (total 600) can be rehoused to the public housing site on the hills, while making this space available for new development with higher PR to optimize use of land.
  - The net production of flats at this Site (i.e.  $1433 - 600 = 833$ ) will be able to compensate the provision proposed in the CSTG.
- **Demerits of Site 3:**
  - Careful arrangement is needed for timely re-location of the existing residents and availability of site might be hinged by the programme of public housing proposed on the hills.

### Alternative Site 4: Slope on Road Hill Street

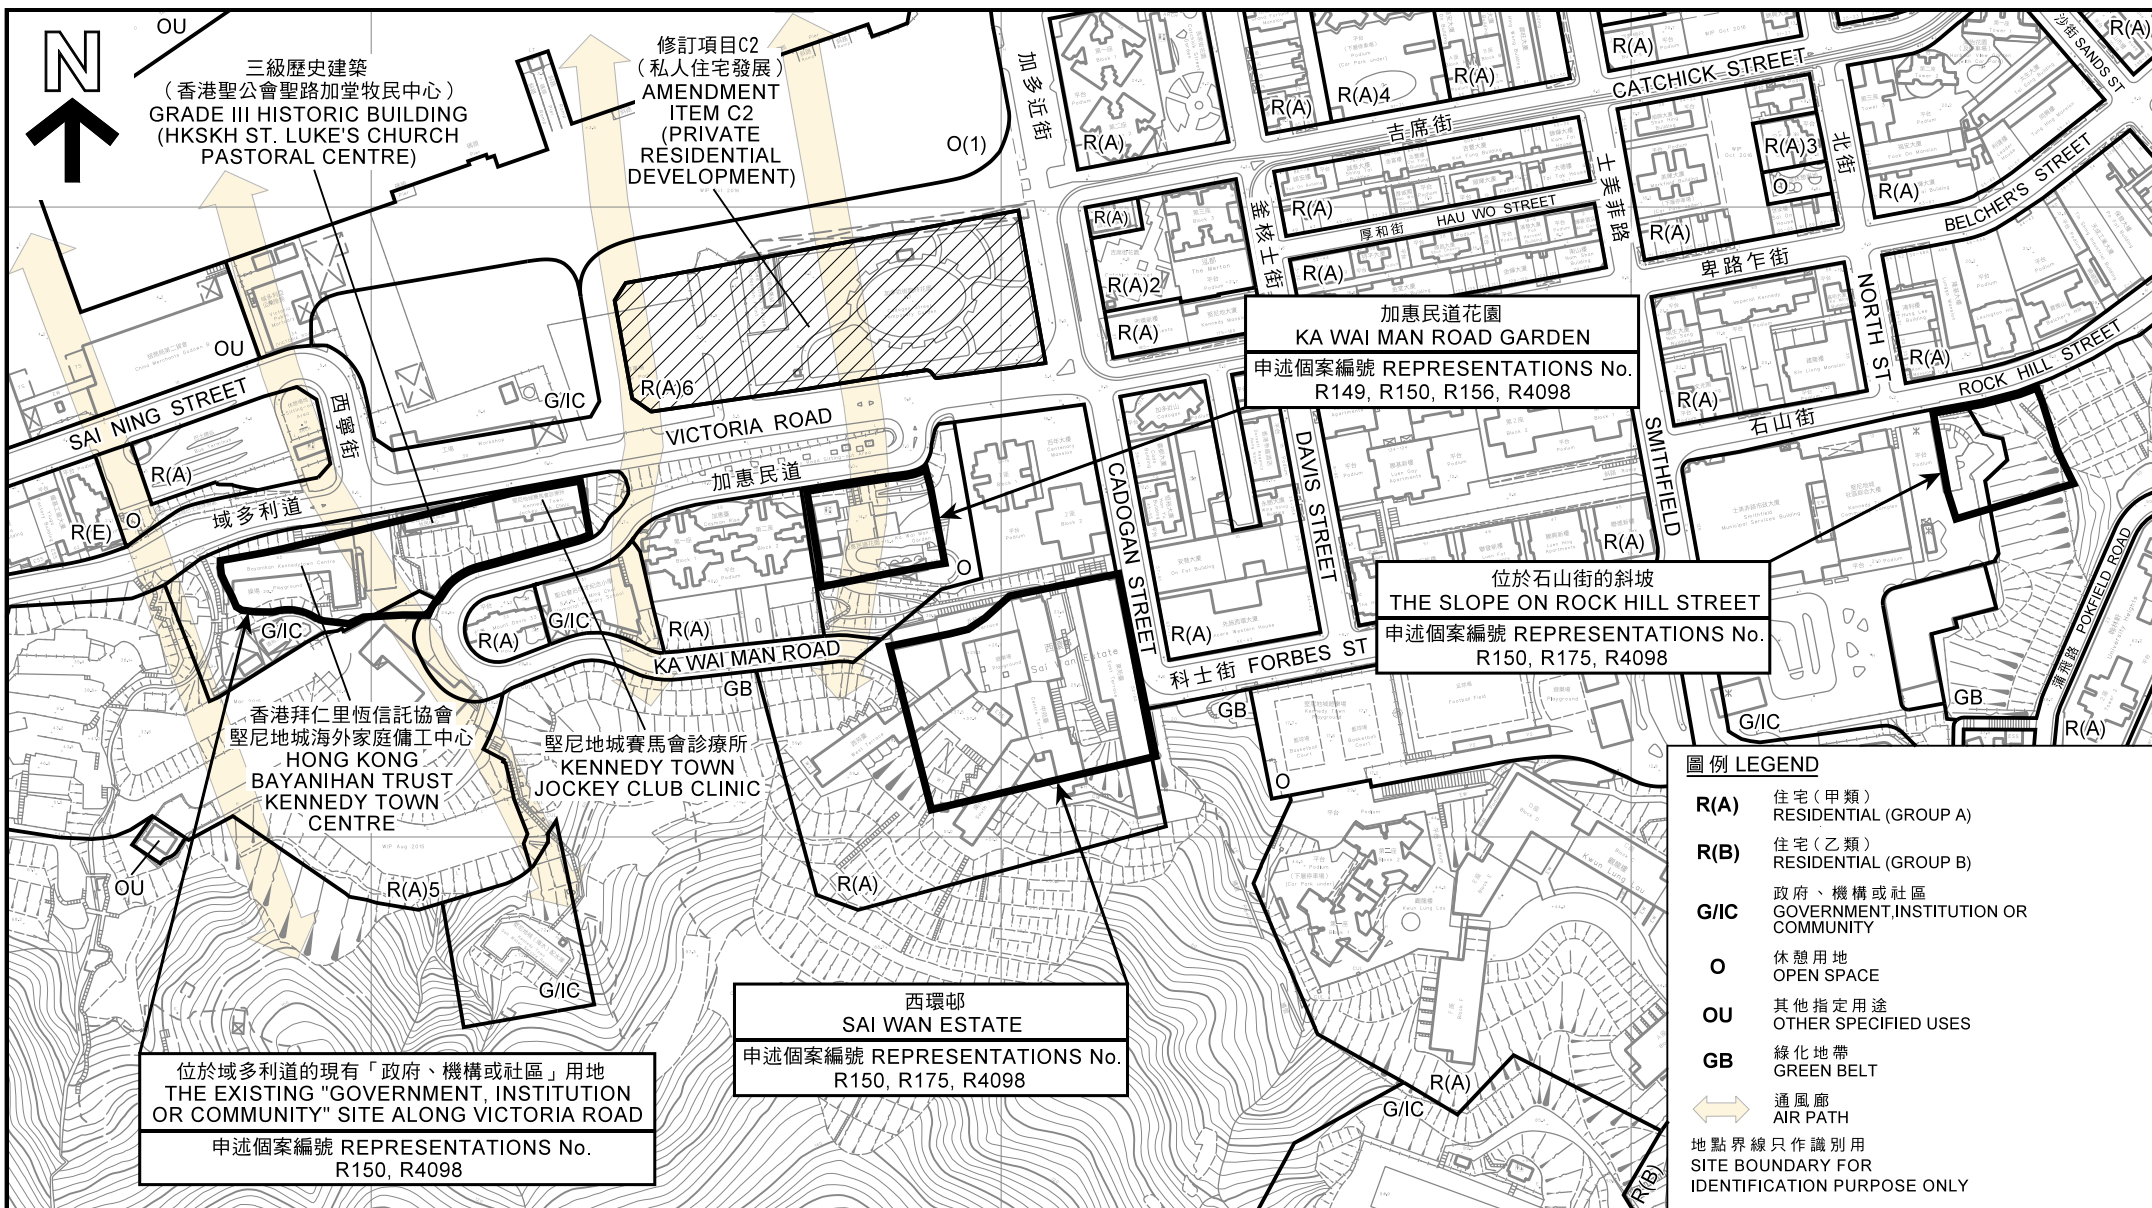

- **Area:** 5,500sqm
- **PR:** GB Zone - B(P)R: Class A Site - PR8, GFA - 4,400sqm
- **Approx. Flat No.:** 512
- **Merits of Site 2:**
  - Comprising of Government Land, can be used for development immediately without the need for decontamination.
  - No existing facilities on the Site.
- **Demerits of Site 2:**

- Land Area not adequate to compensate all 680 flats (Need to provide flats with other Alternative sites)
- High site level difference and the existence of steep retaining wall at the site, might have high site formation cost compared to the CSTG site.
- This Part of Shek Shan Road might need further improvement
- The Site have inadequate space and is not suitable for re-provisioning of bus terminus and car parking spaces

OUTLINE ZONING PLAN NO. S/H1/20  
CONSIDERATION OF REPRESENTATIONS NO. TPB/R/S/H1/20-1 TO 7614  
AND COMMENTS NO. TPB/R/S/H1/20-C1 TO C306**

**The Representation Sites and Their Respective Surrounding Areas**

(Plans, aerial photos and site photos at Plans H-5 to H-62)

A brief account of the representation sites is as follows:

***Waterfront Park and Open Space***

**1. Amendment Item A1 – Proposed Waterfront Park**

1.1 The site is a large stretch of government land (about 1.66ha) fronting the harbour and located to the west of Cadogan Street. It is currently occupied by the salt water pumping station, the Victoria Public Mortuary (VPM) and the temporary maintenance depot of Highways Department (HyD) which have rendered the waterfront inaccessible to the public. The site also falls within the project boundary of the ground decontamination works to be conducted by the Civil Engineering and Development Department (CEDD) (the temporary works site is temporary granted to CEDD until 31.1.2023).

1.2 There are also four unused piers within the site. Two of the piers to the west were used to serve Kennedy Town Incinerator and Abattoir in the past. The remaining two were for loading/unloading activities in the area.

**2. Amendment Item A2 – Proposed Open Space between Victoria Road and Sai Ning Street**

The site currently falls within a part of the existing bus terminus on Sai Ning Street and a part of the existing Kennedy Town Bus Terminus Sitting-out Area on government land (0.08ha). There are two Old and Valuable Trees (OVTs) in the

Kennedy Town Bus Terminus Sitting-out Area.

**3. Amendment Item A3 – Kennedy Town Temporary Recreation Ground**

The site occupies a major portion of the existing Kennedy Town Temporary Recreation Ground on government land (0.57ha) in the western end of Sai Ning Street and is now under the management of the Leisure and Cultural Services Department (LCSD).

***Commercial, Leisure and Tourism Related Uses at the Waterfront***

**4. Amendment Item B – Proposed Commercial, Leisure and Tourism Related Uses**

The China Merchants Group (CMG)'s godowns and wharf together with its pier at 18 Sai Ning Street (about 1.35ha) are held under Inland Lot (IL) No. 8623, which was granted by way of private treaty grant for godown and cargo handling pier for a term of 75 years from 21.5.1985. According to the lease condition, the land portion is subject to a maximum GFA not exceeding 46,445.42m<sup>2</sup>. It is now occupied by two existing godown buildings with a total GFA of about 46,323m<sup>2</sup>. The building heights (BHs) of the two existing godown buildings are about 64mPD (west) and 84mPD (east).

***Residential Developments***

**5. Amendment Item C1 – Proposed Public Housing Development**

The site at the hillside of Mount Davis to the south of Victoria Road, comprising the Ex-Temporary School Site for the Hong Kong Academy, the Ex-Police Married Officers Quarters at Ka Wai Man Road and the Ex-Mount Davis Cottage Area (about 2.88 ha), is entirely government land. The access to the site will be via Ka Wai Man Road and Victoria Road. The surrounding developments are primarily high-rise residential in nature (**Plan H-71**).

**6. Amendment Item C2 – Proposed Private Residential Development**

The site (0.91 ha) at junction of Victoria Road/Cadogan Street is a piece of government land and is currently occupied by the Cadogan Street Temporary Garden, a temporary car park and a refuse collection point (RCP). The site also falls with the project boundary of ground decontamination works to be conducted by CEDD (the temporary works site is temporary granted to CEDD until 31.1.2023). Its surrounding developments are primarily high-rise residential in nature (**Plan H-71**).

**7. Amendment Item C3 – Proposed Private Residential Development**

The site (0.23 ha) at junction of Victoria Road/Sai Ning Street is a piece of government land occupied mainly by the bus terminus at Sai Ning Street, a public toilet and part of the Kennedy Town Bus Terminus sitting-out area. The existing arch and foundation stone of the Tung Wah Smallpox Hospital are located within the site in the sitting-out area. Its surrounding developments are primarily high-rise residential in nature.

**8. Amendment Item C4 - Proposed Private Residential Development**

The site (0.05ha) between Victoria Road and Sai Ning Street is a piece of government land and is occupied by the Food and Environmental Hygiene Department (FEHD)'s temporary cleansing depot and HyD's works area under road maintenance contract.

***GIC Facilities***

**9. Amendment Item D1 – Proposed Primary School**

9.1 The site (0.62ha) is located at the junction of Sai Ning Street and Victoria Road. There are currently part of a temporary car park, part of the temporary maintenance depot for HyD and part of the VPM on this piece of government land. It also forms part of the temporary works site of CEDD for ground decontamination works (the temporary works site is temporary granted to CEDD

until 31.1.2023).

9.2 Being next to the proposed waterfront park, the site will form a cluster of low-rise facilities including Kennedy Town Jockey Club Clinic and HKSKH St Luke's Church Pastoral Centre on the other side of Victoria Road, thus retaining the visual openness and permeability of the local area.

#### **10. Amendment Item D2 – Proposed Salt Water Pumping Station**

The site on government land (0.09ha) is currently a sitting-out area at the western end of the Kennedy Town Temporary Recreation Ground and to the east of the Island West Refuse Transfer Station.

#### **11. Amendment Item E – Proposed Reprovisioning of VPM**

The site is located to the further west of Victoria Road away from the existing residential neighbourhood. It consists of two parcels of government land. The eastern portion (0.56 ha) is an existing cavern (in a form of tunnel) and was used by MTRC as a magazine site for the construction of West Island Line. The western portion (0.29 ha) is currently used by HyD as temporary works areas under Temporary Government Land Allocation.

#### ***Road and Junction Improvements***

#### **12. Amendment Item F – Road and Junction Improvements and Reflect Existing Road Alignment**

The site (0.7ha) for road and junction improvement works and reflecting existing road alignment falls mainly on government land with a minor portion falls within the Inland Lot 9029 for petrol filling station granted for a term up to 2032. The site locates along Victoria Road, Sai Ning Street, Ka Wai Man Road and Cadogan Street and a part of it will form a new road to connect Cadogan Street and Victoria Road.

**13. Amendment Item G – Excision of Planning Scheme Areas**

Two sea areas (with site areas of about 645m<sup>2</sup> and 353m<sup>2</sup> in the eastern and western portion respectively) fronting the waterfront in the western part of Kennedy Town are excised from the planning scheme area.

**14. Amendment Item H – Pier**

An existing pier (about 0.004ha) on government land is located at the junction of the New Praya, Kennedy Town and Davis Street and currently managed by the Government Property Agency. The pier is currently closed. It was mainly to provide facilities for loading/unloading activities along the coastal area of Kennedy Town.

**15. Amendment Item J – Green Belt**

The sites involved are all government land.

**16. Amendment Item K – Existing Vent Shaft**

An existing vent shaft for the WIL (about 0.02 ha) is located to the southwest of Ka Wai Man Road to the south of the proposed public housing site (Amendment Item C1). It falls within the Mass Transit Railway Lot No. MTRL 4 RLL..

**17. Amendment Item A4 – Area to Reflect Existing Open Space**

The site (about 0.01ha) is part of the public open space provided by the private residential development i.e. The Sail at Victoria. The said public open space, including the site, is a piece of government land.

**18. Amendment Item L – Area to Reflect Boundary of the Island West Refuse Transfer Station (Above Ground Portion)**

The site (about 0.02 ha) is located to the west of the Kennedy Town Temporary Recreation Ground and to the western end of Sai Ning Street. It falls within the

Island West Refuse Transfer Station of the Environmental Protection Department (EPD) and is allocated to EPD.

***19. Amendment Item M – Area to Reflect Boundary of the Island West Refuse Transfer Station (Underground Portion)***

The site (about 0.33 ha) is located to the south of the Island West Refuse Transfer Station of EPD and Victoria Road. It forms part of the existing underground Island West Refuse Transfer Station and is allocated to EPD.

(Extracted from MPC Paper No. 1/16)

**Traffic Review for the Land Use Proposal on the Western Part of Kennedy Town**

**1. Introduction**

- 1.1 In order to enhance the land uses in the Western District and to grasp the opportunity of the commissioning of the MTR West Island Line, the Planning Department (PlanD) has undertaken the Land Use Review on the Western Part of Kennedy Town (the Land Use Review). The review area is shown in **Plan 1 of Appendix A**.
- 1.2 A Preliminary Land Use Proposal (the Preliminary Proposal) for the Western Part of Kennedy Town was developed in 2013 by PlanD. A traffic review for the Preliminary Proposal was conducted and roads / junctions improvement schemes recommended. In mid-2013, PlanD consulted the Central and Western District Council (C&WDC) and the Harbourfront Commission, and attended two public forums organised by local District Council members to solicit views of the stakeholders on the Preliminary Proposal. After taking into account the views of different parties, PlanD revised the Preliminary Proposal and developed a Revised Land Use Proposal (the RLUP) (**Plan 2 of Appendix A**) in September 2014, which mainly involved reduction of the total number of public housing units and revision of the road layout.
- 1.3 The C&WDC was concerned about the shortage of parking spaces for cars and goods vehicles in the Western District. As some short term tenancy sites currently providing goods vehicles parking spaces in the Central & Western District will be terminated for other development in the coming years, shortage of goods vehicle parking spaces is anticipated. Besides, there is great demand for private car parking spaces in Kennedy Town. To cope with the parking demand, an underground carpark for private cars and goods vehicles dedicated for public use is included in the RLUP.
- 1.4 Because of the changes made under the RLUP, the roads and junctions improvement schemes identified in the traffic review are further assessed to ascertain their effectiveness.

**2. Proposed traffic improvement measures**

- 2.1 To cater for the RLUP, the following road improvement schemes are proposed and they are shown in **Appendix B**:
  - (i) Construction of a new access road to connect Victoria Road and Cadogan Street for diversion of Central-bound traffic;

- (ii) Following (i) above, closing the eastbound lane of Victoria Road at the junction of Victoria Road / Belcher's Street / Cadogan Street junction (J4) to enhance the junction performance;
- (iii) Following (ii) above, prohibition of right turning movement from Ka Wai Man Road to Victoria Road (J29);
- (iv) Widening of a section of Victoria Road between Cadogan Street and the access road to the Environmental Protection Department's Island West Refuse Transfer Station to cope with the anticipated traffic;
- (v) Signalization of the new access road / Catchick Street / Cadogan Street junction (J4A);
- (vi) Signalization of Victoria Road / Sai Ning Street junction (J28); and
- (vii) Signalization of Victoria Road / new access road junction (J32).

2.3 With the implementation of the above improvement works, the performance of the key junctions within the RLUP and in the vicinity as shown in **Appendix B** are acceptable in 2027 (3 years after the planned completion of the RLUP). The results of junction capacity assessment are summarized in **Table 1**.

**Table 1 Results of Junction Capacity Assessment**

Ref.	Junction	Reserved Capacity (RC) or Design Flow Capacity (DFC)	Performance							
			Existing (2015)		Interim – with public housing (2024)		Operational - without improvement (2027)		Operational – with improvement (2027)	
			AM Peak	PM Peak	AM Peak	PM Peak	AM Peak	PM Peak	AM Peak	PM Peak
J4	Victoria Road/ Belcher's Street/ Cadogan Street	RC	41%	81%	17%	54%	-1%	-6%	25%	27%
J4A	New Access Road/Catchick Street/Cadogan Street	RC	-	-	-	-	-	-	24%	42%
J28	Victoria Road/Sai Ning Street	DFC (2015, 2024, 2027 without improvement) RC (2027 with improvement)	0.49	0.35	0.58	0.40	0.97	0.86	32%	33%
J29	Victoria Road/ Ka Wai Man Road	DFC	0.29	0.17	0.84	0.40	1.35	0.93	0.27	0.17
J32	Victoria Road/ new access road	RC	-	-	-	-	-	-	57%	67%

Remarks: In general, the performance of the junction is considered satisfactory if the RC of signalized junction is greater than 15%, or DFC of priority junction is less than 0.85 during peak periods.

2.4 The assessment also indicates that the performance of the existing junctions J4, J28 and J29 will operate satisfactorily in 2024 after the population intake of the public housing development at Site 9. Nevertheless, interim traffic improvement measures including removing the western arm of pedestrian crossing at Belcher's Street/Sands Street junction, signaling adjustment at the junction of J4 and widening of a section of Ka Wai Man Road for provision of a new layby would be implemented to further enhance the road capacity before the population intake of the public housing development.

### 3. Pedestrian facilities assessment

3.1 The Level-of-Services (LOS) of the footpaths of Ka Wai Man Road were assessed and the results are summarized in Table 2. The footpaths F1 and F2 of Ka Wai Man Road as shown in **Appendix B** in 2027 will achieve at least LOS B, therefore the walking environment of Ka Wai Man Road after the population intake of the public housing development will remain satisfactory.

**Table 2 LOS of Ka Wai Man Road footpath**

Ref.			F1	F2
Clear width (m)			2.2	2.0
Dead width (m)			0.5	0.5
Effective width (m) = Clear width – Dead width			1.7	1.5
Existing (2015)	2-way ped/min	AM	10	29
		PM	10	26
		Evening	1	6
	LOS (ped/min/m)	AM	6 (A)	19 (B)
		PM	6 (A)	17 (B)
		Evening	1 (A)	4 (A)
Operational (2027)	2-way ped/min	AM	36	34
		PM	22	30
		Evening	26	6
	LOS (ped/min/m)	AM	21 (B)	23 (B)
		PM	13 (A)	20 (B)
		Evening	15 (A)	4 (A)

Remarks:

AM peak hour = 07:00 – 08:00; PM peak hour = 14:30 – 15:30; Evening peak hour = 17:30 – 18:30

LOS A = flow rate ≤ 16 ped/min/m

LOS B = 16-23 ped/min/m

LOS C = 23-33 ped/min/m

In general, LOS C or above is desirable for most design at streets with dominant pedestrian activities.

#### **4. Internal transport provision of the development sites**

- 4.1 The internal parking and loading / unloading facilities of the development sites should be self-contained and be provided within the site in accordance with the prevailing standards.
- 4.2 To address the public parking demand in the Central & Western District, about 50 goods vehicles and 70 private car parking spaces dedicated for public use will be provided at the underground carpark at Site 3a. The Housing Authority will also provide 25 public parking spaces for light goods vehicles within Phase 2 of the public housing development at Site 9.

#### **5. Pedestrian facilities**

- 5.1 To provide a safe, direct and comfort route for pedestrians walking between Victoria Road and the future waterfront promenade, the following pedestrian facilities which are shown in **Appendix C** will be provided:
- (i) The Victoria Road / Sai Ning Street junction and Victoria Road / new access road junction will be signalized and pedestrian crossings will be provided at these two junctions.
  - (ii) Two footbridges across Victoria Road and a new pedestrian crossing at Sai Ning Street will be provided to serve a safe and direct connection between the public housing site and the open space at the waterfront area and new bus terminus. These two tentative footbridges can also facilitate the private housing sites to gain access to the social welfare facilities located within the public housing site. The location of landing / connection points including the disabled lifts of the footbridges are subject to detailed design.
  - (iii) The western pavement of Cadogan Street between Victoria Road and new access road will be widened to 7m to improve the accessibility to / from the open space at the waterfront area from the inland side.
  - (iv) A footbridge between the private residential development cum new bus terminus and the waterfront promenade across the proposed new access road.
- 5.2 As shown in **Appendix C**, with the above pedestrian facilities, three major pedestrian corridors leading from the inland side to the open space at the waterfront area will be provided, i.e. along the western footpath of Cadogan Street; along the footpaths of

both sides of the new access road; and along the eastern pavement of Sai Ning Street.

**6. Public transport facilities**

- 6.1 A new bus terminus will be provided at the ground floor of Site 3a to accommodate the bus routes which are currently allocated in the existing Kennedy Town bus terminus at Sai Ning Street and the Belcher's Bay bus terminus.
- 6.2 In addition, a new bus layby will be provided on westbound Victoria Road for the public housing site, as shown in **Appendix B**.

**7. Conclusion**

- 7.1 The traffic improvement schemes previously proposed for the Preliminary Proposal remain valid in the RLUP.
- 7.2 With the implementation of the proposed traffic improvement measures, the traffic impact arising from the RLUP in 2027 will be acceptable.
- 7.3 The traffic situation in the vicinity will be satisfactory after the population intake of the public housing development in 2024, and road capacity will be further enhanced by the interim traffic improvement measures before the completion of the public housing development.
- 7.4 The walking environment of Ka Wai Man Road footpaths is acceptable in 2027.

TRAFFIC ENGINEERING  
(HK) DIV.

**Supplementary Information to the “Traffic Review for the Land Use Proposal on the Western Part of Kennedy Town” (the Traffic Review) (Appendix II of Attachment V of the MPC Paper No. 1/16 refers) provided in April to June 2016 upon the receipt of a request from a member of the public**

**1) Supplement to paragraphs 2.3 and 3.1 (Assumptions and methodology)**

- Traffic surveys were conducted in 2015 to collect existing vehicular and pedestrian flow data. As mentioned in Para. 2.3 of the Traffic Review, the design year adopted for the assessment was 2027. An interim year (2024) was also selected to review the need of any interim traffic improvement measures upon completion of the public housing site. To work out the traffic forecast for the design year and the interim year, a set of growth factors (+3.81% for years from 2015 to 2016, 0% for years from 2016 to 2021, +1.88% for years from 2021 to 2026, +0.34% for years from 2026 to 2031) was used with reference to the historical traffic data of Annual Traffic Census (from 2010 to 2014) published by the Transport Department and the planning data for the latest enhanced 2011-based Territorial Population and Employment Data Matrices published by the Planning Department.
- The vehicular and pedestrian trips induced by the new developments of the western part of Kennedy Town were also taken into account in the traffic forecast. The vehicular generation and attraction were estimated with reference to the trip generation and attraction rates in Tables 1 & 2 of the Appendix in Chapter 3 of Volume 1 of Transport Planning Design Manual published by the Transport Department. To estimate the pedestrian generation and attraction, two assumptions, i.e. 90% of the total population of the public housing development would make 2 trips per day, and the morning, afternoon and evening peak hours would account for 12%, 5% and 12% of the daily trip total respectively, were made based on the results of the Travel Characteristic Survey 2011.

**2) Supplement to paragraph 2.3 (Methodology of junction capacity assessment)**

**Methodology**

- Priority Junction - J28 (2015, 2024 and 2027 without improvement) and J29
  - The calculation is based on a set of empirical formulae/equations, which are shown in Annex A. In general, the parameters of junction geometry which have been found to exert the major influence on capacity of non priority movements are: major road width, width of central median, lane width available to waiting traffic streams and visibility distances for non priority

traffic streams. These parameters are employed in the equations.

- In evaluation, the design flow should be compared with the calculated capacity to produce a design flow/capacity ratio (DFC) for each non priority movement.
  - The methodology of traffic forecast was explained in 1) above.
  - In general, the performance of the junction is considered satisfactory if DFC of the priority junction is less than 0.85 during peak periods.
- Signalised Junction – J4, J4A, J28 (2027 with improvement) and J32
    - The concept and a set of equations for signal calculations are described and shown in Annex B.
    - The methodology of traffic forecast was explained in 1) above.
    - In general, the performance of the junction is considered satisfactory if Reserve Capacity of the signalized junction is greater than 15% during peak periods.

**Supplement to paragraph 3.1 (Methodology of pedestrian facilities assessment)**

- The methodology of estimation of pedestrian flow in 2027 was explained in 1) above.
- The Level-of-Services (LOS) is obtained by dividing the two-way pedestrian flow (i.e. 2-way ped/min) by the effective width of the footpath concerned.
- According to the Highway Capacity Manual (HCM-version 2000), the LOS is primarily based on the density of people in a given space. There are six levels. In general, LOS C is desirable for most design at streets with dominant “living” pedestrian activities. Extracted details of the HCM LOS are tabulated below.

**Description of Level-of-Service (LOS)**  
(Reference: HCM 2000)

LOS	Flow Rate (ped/min/m)	Description
A	≤ 16	Pedestrians basically move in desired paths without altering their movements in response to other pedestrians. Walking speeds are freely selected, and conflicts between pedestrians are unlikely.
B	16 - 23	Sufficient space is provided for pedestrians to freely select their walking speeds, to bypass other pedestrians and to avoid crossing conflicts with others. At this level, pedestrians begin to be aware of other pedestrians and to respond to their presence in the selection of walking paths.
C	23 - 33	Sufficient space is available to select normal walking speeds and to bypass other pedestrians primarily in unidirectional stream. Where reverse direction or crossing movement exist, minor conflicts will occur, and speed and volume will be somewhat lower.
D	33 - 49	Freedom to select individual walking speeds and bypass other pedestrians is restricted. Where crossing or reverse-flow movements exist, the probability of conflicts is high and its avoidance requires changes of speeds and position. The LOS provides reasonable fluid flow; however considerable friction and interactions between pedestrians are likely to occur.
E	49 - 75	Virtually, all pedestrians would have their normal walking speeds restricted. At the lower range of this LOS, forward movement is possible only by shuffling. Space is insufficient to pass over slower pedestrians. Cross- and reverse-movement are possible only with extreme difficulties. Design volumes approach the limit of walking capacity with resulting stoppages and interruptions to flow.
F	> 75	Walking speeds are severely restricted. Forward progress is made only by shuffling. There are frequent and unavoidable conflicts with other pedestrians. Cross- and reverse-movements are virtually impossible. Flow is sporadic and unstable. Space is more characteristics of queued pedestrians than of moving pedestrian streams.

- Ka Wai Man Road public housing development (Site 9) is the site with the largest population size of the Land Use Proposal on the western part of Kennedy Town. Pedestrians walking along the footpath of Ka Wai Man Road will be dispersed to the footpaths of adjacent roads, such as Victoria Road, which is similar to or even wider than that of Ka Wai Man Road. Due to the dispersion effect, the LOS of the footpath of Ka Wai Man Road is considered to be the most critical within the Land Use Proposal on the western part of Kennedy Town. As mentioned in Para. 3.1 of the Traffic Review, the walking environment of Ka Wai Man Road after the population intake of the public housing development would be acceptable.

**Supplement to paragraph 4.2 (Rationale for determining the provision of goods vehicle and private car parking spaces for public uses)**

- As mentioned in Para. 4.2 of the Traffic Review, about 50 goods vehicles and 70 private car parking spaces dedicated for public use will be provided at the

underground car park at Site 3a, and 25 light goods vehicles parking spaces will be provided at the Ka Wai Man Road public housing development at Site 9.

#### Good vehicles

- It is observed that the demand of goods vehicles parking spaces on Hong Kong Island will be decreasing in the long run<sup>1</sup>. Taking into account the latest goods vehicle parking spaces currently available around Kennedy Town area and the potential reduction due to the termination of some short term tenancy parking sites in the future<sup>2</sup>, we propose to provide about 50 parking spaces for goods vehicles at Site 3a and 25 parking spaces for light goods vehicles at Site 9.

#### Private cars

- Provision of parking spaces should be compatible with Government's overall transport policy. As a general principle, parking should be provided at a level which will not unduly attract potential passengers to use private vehicles in preference to public transport. The internal parking and loading/unloading facilities of new development sites should be self-contained and be provided within the site according to the requirements as stipulated in the Table 11 of Chapter 8 of Hong Kong Planning Standards and Guidelines (HKPSG). We constantly monitor the supply and demand situation of parking spaces of the territory. From time to time, we review the demand of parking spaces of various development types and update the parking standards in the HKPSG accordingly. Considering the above principle, and with due regard of the existing situation of illegal parking during mid-night at the Western District, about 70 parking spaces for private cars were suggested to be provided at Site 3a for public use in addition to the requirements stipulated in the HKPSG.

#### Supplement to section 6 (Public transport services for serving the new developments)

- The Transport Department will plan, at an appropriate time before the completion of the new developments, the use of public transport services including franchised bus and green minibuses (GMB) services for the new developments taking into account different factors including the changes of population and passenger demand, public views and result from service level

---

<sup>1</sup> Upon completion of the developments of the western part of Kennedy Town, it was estimated that the demand of parking spaces for goods vehicles in the Central and Western District would be less than 380.

<sup>2</sup> Upon completion of the developments of the western part of Kennedy Town, the parking spaces available in the Central & Western District would be about 310.

investigation in order to meet the public need. This is to ensure the coordination between these public transport services and to promote the effective use of the resources of the public transport, as well as to minimize traffic congestion and roadside air pollution.

**Calculation of Capacity at Priority Junctions**

The predictive equations discussed in paras. 4.3.6 are :

$$Q_{B-A} = D [627 + 14W_{CR} - Y (0.364q_{A-C} + 0.144q_{A-B} + 0.229q_{C-A} + 0.52q_{C-B})] \quad (1)$$

$$Q_{B-C} = E [745 - Y(0.364q_{A-C} + 0.144q_{A-B})] \quad (2)$$

$$Q_{C-B} = F [745 - 0.364Y(q_{A-C} + q_{A-B})] \quad (3)$$

(where  $Y = (1 - 0.0345W)$ )

In each of these equations the geometric parameters represented by D, E and F are stream-specific :

$$D = [1 + 0.094(w_{B-A} - 3.65)] [1 + 0.0009(V_{B-A} - 120)] [1 + 0.0006(V_{B-A} - 150)]$$

$$E = [1 + 0.094(w_{B-C} - 3.65)] [1 + 0.0009(V_{B-C} - 120)]$$

$$F = [1 + 0.094(w_{C-B} - 3.65)] [1 + 0.0009(V_{C-B} - 120)]$$

The symbols represent the following :-

$Q_{B-A}$  = the capacity of movement B-A ) See Drz. No. 4.3.A.1

$Q_{A-B}$  = the capacity of movement A-B and so on ) Capacities and flow are in pcu/hour (1 HGV = 2 pcu)

$W$  = major road width ) See Drz. No. 4.3.A.2

$W_{CR}$  = central reserve width (kerbed median only) )

$W_{B-A}$  = lane width available to vehicle waiting in stream = B-A, and so on ) See Drz. No. 4.3.A.3

$V_{B-A}$  = visibility to the right for vehicles waiting in stream = B-A ) Visibilities distances for minor road flow is measured

$V_{B-A}$  = visibility to the left for vehicles waiting in stream = B-A, and so on ) from a point 10m back from the give way line

All distances and widths are measured in metres and the ranges of parameters in the data base were as follows :-

$$w = 2.05 - 4.70$$

**DIAGRAM 4.3.A.1: FLOWS AND NOTATION**

The four parts of drawings show the main components of major road width. They are combined to give :

- (1) the 'nearside' width:  $W_n$   
 $W_n = \frac{1}{2} (W2 + W4)$
- (2) the 'farside' width:  $W_f$   
 $W_f = \frac{1}{2} (W1 + W3)$
- (3) the total carriageway width:  $W$   
 $W = (W_n + W_f)$
- (4) (at dual carriageway sites with kerbed central reserve)  
 the width of central reserve:  $W_{CR}$   
 $W_{CR} = \frac{1}{2} (W5 + W6)$

**DIAGRAM 4.3.A.2: MAJOR ROAD WIDTH W AND ITS COMPONENTS**

Lane width for non-priority streams, w (m)

Where there are clear lane markings the width is measured directly. The average of measurements taken at 5m intervals over a distance of 20m upstream from the give-way point is used. Any measurement exceeding 5m is reduced to 5m before the average is taken. Where lane markings are unclear (or absent), Diagram (a), (b), and (c) are used, and the lane width calculated according to :

**DIAGRAM 4.3.A.3 : LANE WIDTHS FOR NON PRIORITY STREAMS**

$$W = (a + b + c + d + e) / 5 \text{ metres}$$

**Diagram (a) Lane width measurements for the right-turning minor road stream**

a, b, c, d, e are equal to  $\frac{1}{2}$  (approach width to nearside of median line)  
Each  $\leq 5\text{m}$

**Diagram (b) Lane width measurements for the left-turning minor road stream**

a, b, c, d, e are equal to  $\frac{1}{2}$  (approach width to nearside of median line)  
Each  $\leq 5\text{m}$

**Diagram (c) Lane width measurements for the right-turning major road stream**

a, b, c, d, e are equal to the lane width where there is explicit provision for right-turners (each  $\leq 5\text{m}$ ), and equal 2.1m otherwise

## 2.4 Signal Calculations

---

### 2.4.1 Signal Calculation Concepts

- 2.4.1.1 The amount of traffic that can pass through a signal-controlled intersection from a given approach i.e. the capacity, will depend on the green time available to the traffic and the maximum flow of vehicles pass the stopline during the green period.
- 2.4.1.2 The discharge of vehicles from a queue may be illustrated by Diagram 2.4.1.1. When the green period commences, vehicles take some time to start and to accelerate to normal running speed, but after a few seconds, the queue discharges at a more or less constant rate which is termed the 'saturation flow'.
- 2.4.1.3 The saturation flow may be defined as the maximum flow which can be obtained if there is a continuous queue of vehicles and they were given 100 percent green time.
- 2.4.1.4 For the convenience of signal calculation, the green and amber periods are replaced by an 'effective green' period ( $g$ ), throughout which flow is assumed to take place at the saturation rate, and a 'lost' time ( $l$ ) during which no flow takes place.

If  $k$  = combined green and amber period  
 $g$  = effective green period  
 $G$  = actual green time  
 $l$  = lost time for a single phase  
 $S$  = Saturation flow  
 $C$  = Cycle time

Then capacity  $Q$  from an approach may be expressed as

$$Q = \frac{gS}{C}$$

Where  $g = k - l$

- 2.4.1.5 With amber period of 3 sec,  $l$  may be taken as 2 sec

Thus  $k = G + 3$   
 $g = G + 3 - 2$   
 $g = G + 1$

**DIAGRAM 2.4.1.1: VARIATION WITH TIME OF DISCHARGE RATE OF QUEUE IN A FULLY SATURATED GREEN PERIOD**

## 2.4.2 Estimation of Saturation Flow

### 2.4.2.1 Exclusive Straight-ahead Lanes

TRRL RR 67 (Ref. 20) suggested that :-

- (i) The saturation flow per lane (S) expressed in terms of passenger car units per hour (pcu/h), with no turning traffic may be given by  

$$S = 1940 + 100(W - 3.25)$$
 for nearside lane or single lane entries  

$$S = 2080 + 100(W - 3.25)$$
 for non-nearside lanes  
 Where W is the lane width at entry in metres.
- (ii) The total saturation flow may be taken as the sum of the individual lane values.
- (iii) Signal approaches are sometimes locally widened to provide an additional lane near the junction.

When the additional lane at the stopline is available for a distance back from the stopline at least sufficient to contain one full cycle capacity of traffic, the above methods of estimation of saturation flow apply. If the signal approach is only widened very close to the stopline, then the above formulae may be a considerable overestimate capacity. A more realistic approach capacity should be deduced from entry lanes before widening plus an allowance for extra vehicles stored every cycle in the additional lane provided near the intersection. In these circumstances, on sit estimation of saturation flow will be necessary.

Reference may be made to Table 2.2.3.2 in Section 2.2.3.5 for general guidance on marking of lanes at approaches.

#### 2.4.2.2 Effect of Gradients

- (i) For each 1 per cent of uphill gradient the saturation flow (S) should be decreased by 42 pcu/h. The gradient should be taken on the average slope between the stopline and a point on the approach 60m before it.
- (ii) Downhill gradients have no effect on the saturation flow.

#### 2.4.2.3 Effect of Composition

The effect of different types of vehicle on the saturation flow at traffic signals is given by the following p.c.u. equivalents :-

(Also in T.P.D.M. Vol. 2 Section 2.3)

Private Car, Taxi, Light Goods Vehicle	1.0
Motor Cycle and Motor Scooter	0.4
Medium or Heavy Goods Vehicles	1.75
Through Bus (see 2.4.2.6 (iii)) or coach	2.0
Pedal Cycle	0.2
Tram	3.5 – 5.0
Public Light Bus	1.5

#### 2.4.2.4 Exclusive Turning Lane

$$S_R = S/(1+1.5/r) \quad \text{for unopposing turning traffic}$$

$$S_R = (S-230)/(1+1.5/r) \quad \text{for opposed turning traffic}$$

where r = radius of curvature of vehicle paths (m)

#### 2.4.2.5 Lanes with Mixed Traffic

$$S_M = S/(1+1.5f/r) \quad \text{for unopposing turning traffic}$$

$$S_M = (S-230)/(1+1.5f/r) \quad \text{for opposed turning traffic}$$

where  $f$  = proportion of turning vehicles in a lane.

#### 2.4.2.6 Effect of Waiting Vehicles & Bus Stops

- (i) Reduction in saturation flow caused by parked vehicles in the vicinity of the approach is equivalent to a loss of carriageway width at the stopline as follows :-  
loss in c/w width =  $1.68 - \frac{0.9(z-7.62)}{G}$  (metres)  
where  $z$  ( $\geq 7.62$ ) is the clear distance of the nearest parked vehicle from the stopline in metres.  
 $G$  is green time in seconds.  
If the whole expression becomes negative the effective loss should be taken to be zero. The effective loss may be increased by 50 per cent for a parked medium or heavy goods vehicle.
- (ii) No stopping restriction before and beyond a junction may be considered where junction capacity is tight or where the parking/stopping activities are adversely affecting the effective operation of the junction signals.
- (iii) The actual effects of a stopping bus are complex and will vary considerably depending on bus stop location, bus dwell time, parking activity, lane configuration and traffic volume. Until further research is accomplished, it is recommended that a p.c.u. value of 5.0 may be taken for stopping buses that operate and stop within 200 m of the signals.

Designers should also refer to Section 2.4 of T.P.D.M. Vol. 9 for detailed guidelines on siting of bus stops.

#### 2.4.3 Measurement of Saturation Flows

- 2.4.3.1 It is not always practicable to conduct direct measurements of saturation flows e.g. because of resources constraints or when designing new intersections. Direct measurements are however definitely worthwhile for critical intersections working near saturation as the direct measurements will provide more accurate flows for detailed signal plan preparation or junction capacity analysis.
- 2.4.3.2 Formal measurements of saturation flow shall be conducted in accordance with U.K. Road Note No. 34.
- 2.4.3.3 Less formal measurements may be made for approaches where there are existing signals or where the junction is police controlled. It is usually satisfactory to carry out such counts commencing, say, 5 seconds after the traffic has started so as to eliminate starting delays and continuing the count until traffic begins to "tail off". A reasonably consistent value of saturation flow could usually be obtained after several counts.

#### 2.4.4 Total Lost Time per Cycle (L)

2.4.4.1 With 2 sec red/amber (starting amber)

3 sec amber (leaving amber)

$I = 5 + R$  (see diag. 2.3.2.1)

where  $R$  = all red period

$I$  = intergreen period

If lost time for a single phase in the green and  
amber period ( $Z$ ) = 2 sec

loss time per phase change =  $(I - 3) + z$

Total lost time per cycle

$L = (I - 1)$

or =  $(R + 4)$

2.4.4.2 For a full pedestrian stage during which all traffic is stopped, the pedestrian green and flashing green periods should be considered as additional all red periods (i.e. additional lost times) in signal calculations.

2.4.5 **Flow Factors**

2.4.5.1 Flow factor 'y' for each phase is given by

$$y = \frac{\text{design flow for an approach (q)}}{\text{saturation flow for an approach (S)}}$$

2.4.5.2 Where more than one approach is operating during a phase the maximum 'y' should be used. Where an early cut-off or late start is to be used in connection with a right turn the 'y' values for the right turn and for the approach with shortened time should be added together to represent one phase unless the straight on traffic on the same approach as the right turn has a higher value, when this latter figure should be taken.

2.4.5.3 The summation of these higher y values for the phases is the 'Y' value which is in fact a measure of the congestion and which will be used for calculating the optimum signal setting.

$$Y = \sum y$$

2.4.6 **Cycle Times ( $C_o$ ,  $C_m$  and  $C_p$ )**

- 2.4.6.1 For an isolated signal installation, where the mean traffic level is constant and where vehicle arrivals are at random, the U.K. Transport and Road Research Laboratory (TRRL) has shown that the optimum cycle time for minimum delay is given by :-

$$C_o = \frac{1.5L + 5}{1 - Y} \text{ secs}$$

- 2.4.6.2 Also and the cycle time which is just sufficient to pass the traffic is given by :-

$$C_m = \frac{L}{1 - Y}$$

- 2.4.6.3 This is the minimum possible cycle time which may be associated with excessively long delays. In designing linked signals a cycle time should be chosen which provides a margin over this minimum possible cycle time for the key intersection. In practice it will be generally appropriate to choose a practical cycle time, such that the installation is then loaded to 90 per cent of its capacity

$$C_p = \frac{0.9L}{0.9 - Y}$$

- 2.4.6.4 In locations where pedestrian crossing volumes are high it will be desirable to use as short a cycle time as practicable to minimize delays imposed on pedestrians. It will be of good practice to limit cycle times to below 90 seconds and where this is not intended due to capacity reasons, careful checking of site conditions should be made to ensure that pedestrians are not being endangered. In designing for new junctions the maximum operating cycle time should be limited to 90 seconds.

## 2.4.7 Green Times

- 2.4.7.1 Signal setting for the effective green periods(g) should be in proportion to the y values on each approach, with an allowance for lost time

$$\frac{g_1}{g_2} = \frac{y_1}{y_2} \text{ etc.} \quad \text{where } g = \text{effective green period}$$

y = flow facto

$$\text{and } g = \frac{y(c - L)}{Y} \quad G = \text{actual green period}$$

$$G = g - l \quad c = \text{cycle time}$$

$$\text{i.e. } g_1 = \frac{y_1(c - L)}{Y} \quad L = \text{total lost time}$$

Y = summation of flow factors

$$g_2 = \frac{y_2(c - L)}{Y} \text{ etc.}$$

c - L = total effective green time  
time

2.4.7.2 Care should be taken in performing the calculation if parallel pedestrian facilities are included in the junction method of control. If they are included, the minimum green times for the minor movements could well be dictated by parallel pedestrian crossing green times. This could well considerably distort the green split calculation.

#### 2.4.8 Degree of Saturation

2.4.8.1 Degree of saturation (X) for individual approaches may also be expressed as :-

$$X = \frac{q}{Q}$$

where q = design flow  
Q = capacity of approach  
c = cycle time  
S = saturation flow

2.4.8.2 The degree of saturation should be the same for all the predominant arms of an intersection when the signal timings are optimum and is given by

$$X_o = \frac{2Y}{1 + Y}$$

#### 2.4.9 Junction capacity Analysis

2.4.9.1 The ultimate capacity of an intersection may be defined as the maximum flow which can pass through the intersection with the same relative flows on the various approaches and with the existing proportions of turning traffic.

2.4.9.2 Generally capacity will increase as the cycle time increases, since the ratio of lost time to useful time decreases (the effect becomes negligible when the cycle is very long). In practice, for maximum reserve capacity assessment, a maximum cycle time of 120 seconds should be adopted. However it should be noted that for new installations, the maximum operating cycle time should be limited to 90 seconds (See 2.4.6)

2.4.9.3 If the capacity were taken as the flow which could just be accommodated by such a cycle the delays would normally be excessively high. A practical

capacity of 90 per cent of this maximum possible flow, which produces generally acceptable delays, is recommended.

#### 2.4.9.4 To calculate reserve capacity at 120 sec cycle time

The cycle time which is just long enough to pass all the traffic, is given by

$$C_m = \frac{L}{1 - Y}$$

Similarly the maximum Y which could be accommodated by a fixed cycle time c is given by

$$Y_{\max} = 1 - \frac{L}{c}$$

For  $c_m = 120$  sec

$$Y_{\max} = 1 - \frac{L}{120}$$

For practical purposes, the ultimate Y value,  $Y_{ult}$ , is taken as 90 per cent of  $Y_{\max}$ .

$$Y_{ult} = 0.9 - 0.0075 L$$

The percentage of ultimate reserve capacity is then given by

$$R.C.(ult) = \frac{(Y_{ult} - Y)}{Y} \times 100\%$$

#### 2.4.9.5 To calculate Reserve Capacity at any cycle time c, R.C.(c)

- (i) Sometimes it may be of interest to know the reserve capacity of a junction operating in the current cycle time i.e. R.C.(c) if c = current cycle time

$$Y_{\max} = 1 - \frac{L}{c}$$

and assuming a practical Y value of 0.9  $Y_{\max}$

$$R.C.(c) = \frac{0.9Y_{\max} - Y}{Y} \times 100\%$$

- (ii) Care should be taken in performing this calculation if parallel pedestrian facilities are included in the method of control. For minor movements particularly, the minimum green time for the approach can well be dictated by the parallel pedestrian crossing green times. This could well considerably distort the R.C. calculation.

**List of Commenters in respect of  
Draft Kennedy Town & Mount Davis Outline Zoning Plan No. S/H1/20**

Rep. No. (TPB/R/S/ H1/20-C)	Name of 'Commenter'

**Overall Landscape Consideration for the Land Use Review  
on the Western Part of Kennedy Town  
(Extracted from MPC Paper)**

---

(D) Landscape Considerations

- 6.15 There are approximately 820 existing trees within the review area. Approximately 200 existing trees are found in the Cadogan Street Temporary Garden (Site 3a) and approximately 520 existing trees are found in the natural and man-made slopes in Site 9. Other existing trees are scattered along the roadside and within existing sitting-out and open space areas. Most of the trees are common tree species such as *Broussonetia papyrifera*, *Celtis sinensis*, *Ficus microcarpa* and *Macaranga tanarius*. Those existing trees within existing open space areas are generally in fair to good condition, whereas those on natural and man-made slopes are generally in poor to fair condition. Two OVTs listed in the Register of Old and Valuable Trees are located within the Kennedy Town Bus Terminus Sitting-out Area along Victoria Road. Two *Artocarpus hypargyrea* which are listed in Agriculture, Fisheries and Conservation Department (AFCD)'s Rare and Precious Plants of Hong Kong are also identified in Site 9.

*Sites 1a, 1b and 2*

- (a) With reference to the aerial photo dated 1.1.2015, there are no significant resources within the sites and adverse landscape impact due to the proposed development is not anticipated. The future layout design for Sites 1a and 1b should allow for a continuous public access along the promenade.
- (b) Sites 1b and 2 predominately fall within the area subject to ground decontamination works. Landscape mitigation measures under the Environmental Impact Assessment (EIA) approved in April 2015 include landscape planting along screen hoarding during the decontamination works, and compensatory tree planting with a minimum ratio of 1:1 in terms of quantity upon completion of the works.

*Sites 3a and 3b*

- (c) While there are relatively fewer trees in Site 3b, the Cadogan Street Temporary Garden has an overall high amenity value. However it is subject to ground decontamination works. With reference to the

landscape assessment within the EIA for the ground decontamination works, all 196 existing trees within the sites, including many mature trees, are proposed to be felled as the soil and the tree roots of those trees are contaminated and will be removed in the future ground decontamination works. Major species includes common species such as *Ficus microcarpa*, *Livistona chinensis* and *Terminalia catappa*. Significant adverse landscape impact is anticipated due to ground decontamination works which necessitated the felling of trees. Landscape mitigation measures under the EIA include landscape planting along screen hoarding during the decontamination works, and compensatory tree planting with a minimum ratio of 1:1 in terms of quantity in the future waterfront upon completion of the works.

*Sites 4a and 4b*

- (d) The CMG's wharf and godowns are currently located within the sites. With reference to aerial photo dated 1.1.2015, there are no significant resources within the area and adverse landscape impact due to the proposed development is not anticipated.

*Site 5*

- (e) The site is currently used as an open space, therefore the proposal to retain its current use will result in no change in the landscape resources. Approximately 30 existing trees and palms of common species are found along the perimeter of the site. Major species includes *Garcinia subelliptica*, *Phoenix roebelenii* and *Crateva unilocularis* which are generally in good condition. Adverse landscape impact due to the proposed development is not anticipated.

*Site 6*

- (f) The site is currently used as a sitting-out area. Approximately 27 existing trees of common species are found. Major species includes *Wodyetia bifurcate* and *Hibiscus tiliaceus* which are generally in good condition. The design layout of the proposed salt water pumping station should take into account the existing trees and avoid disturbance to the existing trees as much as possible. Transplantation of existing trees in good condition should be considered where retention is not feasible.

*Site 7*

- (g) The site is currently occupied by the Kennedy Town Bus Terminus and the adjacent sitting-out area. Approximately 40 existing trees and palms of common species are found in the eastern and southern portion of the site. Major species includes *Delonix regia*, *Celtis sinensis*, and *Bombax ceiba* which are in fair to good condition. There are also two OVTs in the adjacent proposed open space (Site 7a) in which the canopy of the OVTs are extended into Site 7 and may have conflict with the proposed residential development. The layout design of the proposed residential area should take the tree protection zone of the OVTs as an absolute design constraint. A minimum space of 2m should be maintained between the tree canopy and future development to allow future tree growth and minimise impact from construction works. Details of the tree protection zone of the two OVTs are discussed below.

#### *Site 7a*

- (h) The site is currently used as vehicular and pedestrian access to the Kennedy Town Bus Terminus. Approximately five existing trees of common species including two OVTs are found within the site. Major species includes *Ficus microcarpa*, *Ficus variegata* and *Celtis sinensis* which are in good condition. There are two OVTs located at a higher level to the south of the existing bus terminus. Both OVTs are of the species *Ficus microcarpa* and have a DBH (i.e. Trunk diameter measured at 1.3m above ground level) of 1600mm or above. The OVTs, including the retaining structure which the trees are growing on, should be preserved and maintained. The layout design of the proposed open space and the adjacent proposed residential area should avoid disturbance to the tree protection zone of the OVTs. The tree protection zone of the each OVT encompasses the body of the tree and 2m above the tree crown as well as the vertical and horizontal surfaces of the retaining structure/wall/rock surface covered by the tree roots together with the space up to 2m behind those surfaces. Further, a minimum space of 2m should be maintained between the tree canopy and future development to allow future tree growth and minimise impact from construction works. The responsible tree maintenance department shall conduct regular inspections including tree risk assessment and monitor the condition of the OVTs. The Tree Management Office of the Greening, Landscape and Tree Management Section of DEVB shall also conduct regular audit inspections to appraise the conditions of the registered trees. Further, existing trees in good

condition should be preserved and incorporated into the design of the proposed open space.

*Site 8*

- (i) Site 8 is currently occupied by HyD's temporary works area and FEHD's temporary cleansing depot. There are two existing trees in the southern portion of the site. Conflict with the proposed residential development is anticipated. However, significant adverse landscape impact is not anticipated as the trees are of common species, *Macaranga tanarius*.

*Site 8a*

- (j) The site is currently occupied by two industrial buildings and a residential development. Approximately three trees of common species, *Ficus microcarpa*, are found in the southern edge of the site and generally in fair to good condition. There is no change proposed regarding the current zoning i.e. "R(E)". Significant adverse landscape impact is not anticipated. In future residential developments, existing trees in good condition should be preserved.

*Site 9*

- (k) The proposed development is separated into Phases 1 and 2. With reference to the preliminary tree survey conducted by HD, there are approximately 70 existing trees in Phase 1. The existing trees are generally in fair condition, and most of the tree species are common native and exotic species in Hong Kong such as *Celtis sinensis*, *Ficus spp* and *Macaranga tanarius*. Landscape impact in Phase 1 would be fully ascertained by the project proponent at detailed design stage. However, with reference to aerial photo dated 1.1.2015, it is observed that a large portion of the site under Phase 1 is formed and hard paved, and significant adverse landscape impact is not anticipated. In comparison, there is a larger area of dense tree cover in the site under Phase 2. With reference to the information provided by CEDD, most of the tree species in the Phase 2 area are common native and exotic species in Hong Kong such as *Broussonetia papyrifera*, *Ficus microcarpa* and *Macaranga tanarius*. There are also two *Artocarpus hypargyrea* which is a rare and precious species. 449 trees were recorded in the tree survey, and 333 trees were proposed to be felled. Approximately 45 relatively large trees with tree girth over 1m (320mm DBH), in which five have a DBH over 1m, are

identified within the site. Significant landscape impact is anticipated and it is recommended to retain existing trees and mature trees in good condition as many as possible, especially the two *Artocarpus hypargyrea*. Tree planting should be maximized to mitigate landscape impact, especially near the proposed “GB” zone.

*The Proposed “GB” Zone Near Site 9*

- (l) A large area originally zoned as “U” along Victoria Road, at the south and east sides of the proposed public housing site (Site 9), is proposed to be zoned as “GB”. The proposed “GB” zone is densely vegetated at present with approximately 400 existing trees and the proposed zoning can reinforce the protection of existing landscape resources.

*Reprovisioning Site of VPM*

- (m) With reference to the preliminary tree survey conducted by ArchSD, it is noted that approximately 90 existing trees out of approximately 100 existing trees are proposed to be felled at the reprovisioned site of the VPM due to conflict with the proposed building. All of the trees are common species such as *Ficus microcarpa*, *Macaranga tanarius*, and *Leuceana leucocephala*. Adverse landscape impact is anticipated at the reprovisioning site. Tree planting and greening should be maximized to mitigate landscape impact on the site.

- 6.16 AFCD has no adverse comment on the proposed developments in respect of tree aspect. In the detailed design stage, relevant departments will minimise the development impact on existing trees and provide appropriate landscape measures and feasible tree preservation and compensatory planting proposals in accordance with DEVB’s relevant Technical Circular and Lands Department’s Land Administration Office Practice Note. For private developments, relevant tree preservation clause and the requirement of Master Landscape Plan will be incorporated in the land sale conditions to minimise the impact arising from tree felling and to require necessary greening measures to mitigate the impact.

## Appendix 10.1 Summary of Findings of the Tree Survey

Table A10.1 Tree Assessment Schedule of Existing Trees within the Project Area

Tree No.	Botanical Name	Chinese Name	DBH* (mm)	Height (m)	Crown Spread (m)	Health Condition (P/F/G)	Tree Form (P/F/G)	Amenity Value (L/M/H)	Suitability for Transplant	Proposed Treatment	Justification**	Remarks

Note: \* DBH = Diameter at Breast Height

\*\*Justification for tree felling:

- The tree is in conflict with the proposed decontamination works.
- Transplantation is not advisable because the rootball may contain contaminated soil.
- The tree is rated low survival rate after transplantation or/and low amenity value.
- The tree is rated poor health or/and poor form which has a low chance of recovering to its normal form.
- The tree is in close proximity of hard structure/utilities making preparation of reasonable sized rootball impractical.
- The tree grows in shallow soil bed resulting in estimated low survival rate.

FIGURE A11.1b

(Extracted from MPC Paper No. 1/16)

**Summary of the Conceptual Layout and Themes for the Harbourfront for the Western Part of Kennedy Town**

1. The Land Use Review on the Western Part of Kennedy Town aims to provide a broad land use framework as a basis for proposing zoning amendments to the Kennedy Town and Mount Davis Outline Zoning Plan to the Town Planning Board for consideration. Regarding the waterfront area, taking into account the planning and design intention to create a vibrant, attractive and accessible waterfront for the enjoyment of the public, as well as the comments raised by the Task Force on the Harbourfront Developments on Hong Kong Island of the Harbourfront Commission, a design concept (**Plans 1 to 7**) is prepared to illustrate how the planning and design intent of that area could be realised. This could serve as an urban design framework to provide further guidance to the project proponents to develop their individual schemes upon implementation.

2. The waterfront area could be sub-divided into three main portions and their design concepts are specified below:

3. **Area A – Waterfront Promenade** (Sites 1a, 1b and 2)

- primarily intended for recreational and leisure purposes. Small-scale commercial uses in support of the planning intention would be permitted
- under government ownership
- sub-divided into the pier portion and the park portion

**Pier Portion (Plan 2)**

- pier function retained and revived for marine access of small boats
- small scale commercial uses in the form of low-rise (one storey) structure for food and beverage in the western end only in order to allow better access and visual permeability to the harbour in the east
- on top of the structure, a viewing deck could be provided for public enjoyment of harbour view

**Park Portion (Plan 3)**

- primarily for leisure activities in a park setting e.g. jogging, family outing, kids' play area, etc.
- sites for events/weekend markets to add vibrancy and diversity of the waterfront area with small scale commercial uses in the form of

- low-rise (one storey) structure for food and beverage
- landscaping and greening

- the waterfront promenade could be connected with the inland by a footbridge between the viewing deck and the private residential development cum public transport terminus, public toilet and other Government, institution or community facilities

4. **Area B – Leisure and Tourism** (Sites 4a and 4b)

- primarily for leisure and tourism-related uses. Commercial activities in support of the planning intention would be permitted
- under private ownership and currently occupied by two industrial buildings on the landward site
- Sub-divided into the pier portion and warehouse portion

**Pier Portion (Plan 4)**

- pier function retained for marine access, particularly for cruises and yachts
- small structures of two storeys for alfresco dining
- ad hoc events/celebrations could be held on pier

**Warehouse Portion (Plan 5)**

- in view of its marine access and waterfront location, opportunity may be taken to convert the area into leisure and tourism-related uses, e.g. boat club
- upon redevelopment, owner will be required to provide a waterfront promenade connecting Areas A and C

5. **Area C – Sports and Recreation** (Site 5)

- the existing Kennedy Town Temporary Recreation Ground (**Plan 6**)
- a piece of government land currently under the management of Leisure and Cultural Services Department for active recreational purposes
- to be retained as permanent open space for active recreational/sports use

6. Efforts are also made to enhance the connectivity and accessibility of the waterfront area through the following measures, subject to detailed design (**Plan 7**):

- at the eastern end of the Review area, the western pavement along Cadogan

Street leading to the waterfront to be widened and crossings on Cadogan Street to be improved to facilitate access of pedestrians from the developed areas to the east and enhance the pedestrian environment;

- a set of footbridges to connect the Ka Wai Man Road area to the south through the proposed private housing development (Site 3a) with the viewing deck and waterfront area direct;
- to the west of the footbridges, an at-grade pedestrian crossing at the junction of Victoria Road and Sai Ning Street to connect the waterfront area through the pavement along the western side of the proposed primary school;
- to the further west, a footbridge to connect the proposed public housing site (Site 9) in the hinterland where the major population in the western Kennedy Town is located and the proposed open space at Site 7a. An at-grade pedestrian crossing could be provided at Sai Ning Street to facilitate onward pedestrian accessibility to the waterfront;
- at the western end, an existing at-grade pedestrian connection via Victoria Road and staircases to connect the proposed public housing site (Site 9) to the waterfront;
- there are 2 existing and 1 proposed at-grade crossings connecting the waterfront area to the developed area to the east; and
- within the waterfront area, a continuous waterfront promenade is proposed from the eastern to western ends, i.e. from Cadogan Street all the way to the Kennedy Town Temporary Recreation Ground (Area C) to link up the new open space network for public enjoyment.
