- ① About 7.5m setback from the centre line of Lee Chung Street including about 1.1m full-height setback of the building at G/F to improve the public realm along Lee Chung Street
- ② A weather canopy of about 19m long along the building frontage facing Lee Chung Streets to provide better comfort for the pedestrians
- ③ A Podium Garden on 3/F with roof planters to provide breathing space and serves as a visual relief of the users of the surrounding buildings
- ④ Vertical green and edge planting to enriches building envelope and soften edges of the building, improving landscape and visual amenity for the public
- ⑤ Stepped height profile stepping down from the southwest towards the northeast to break the visual monotony in the area and achieve visual interests and facilitate ventilation
- ⑥ An about 9m building separation from the adjoining site to break down the building bulk perceived by the public and increase sunlight penetration into the area

Application Site

Remark:

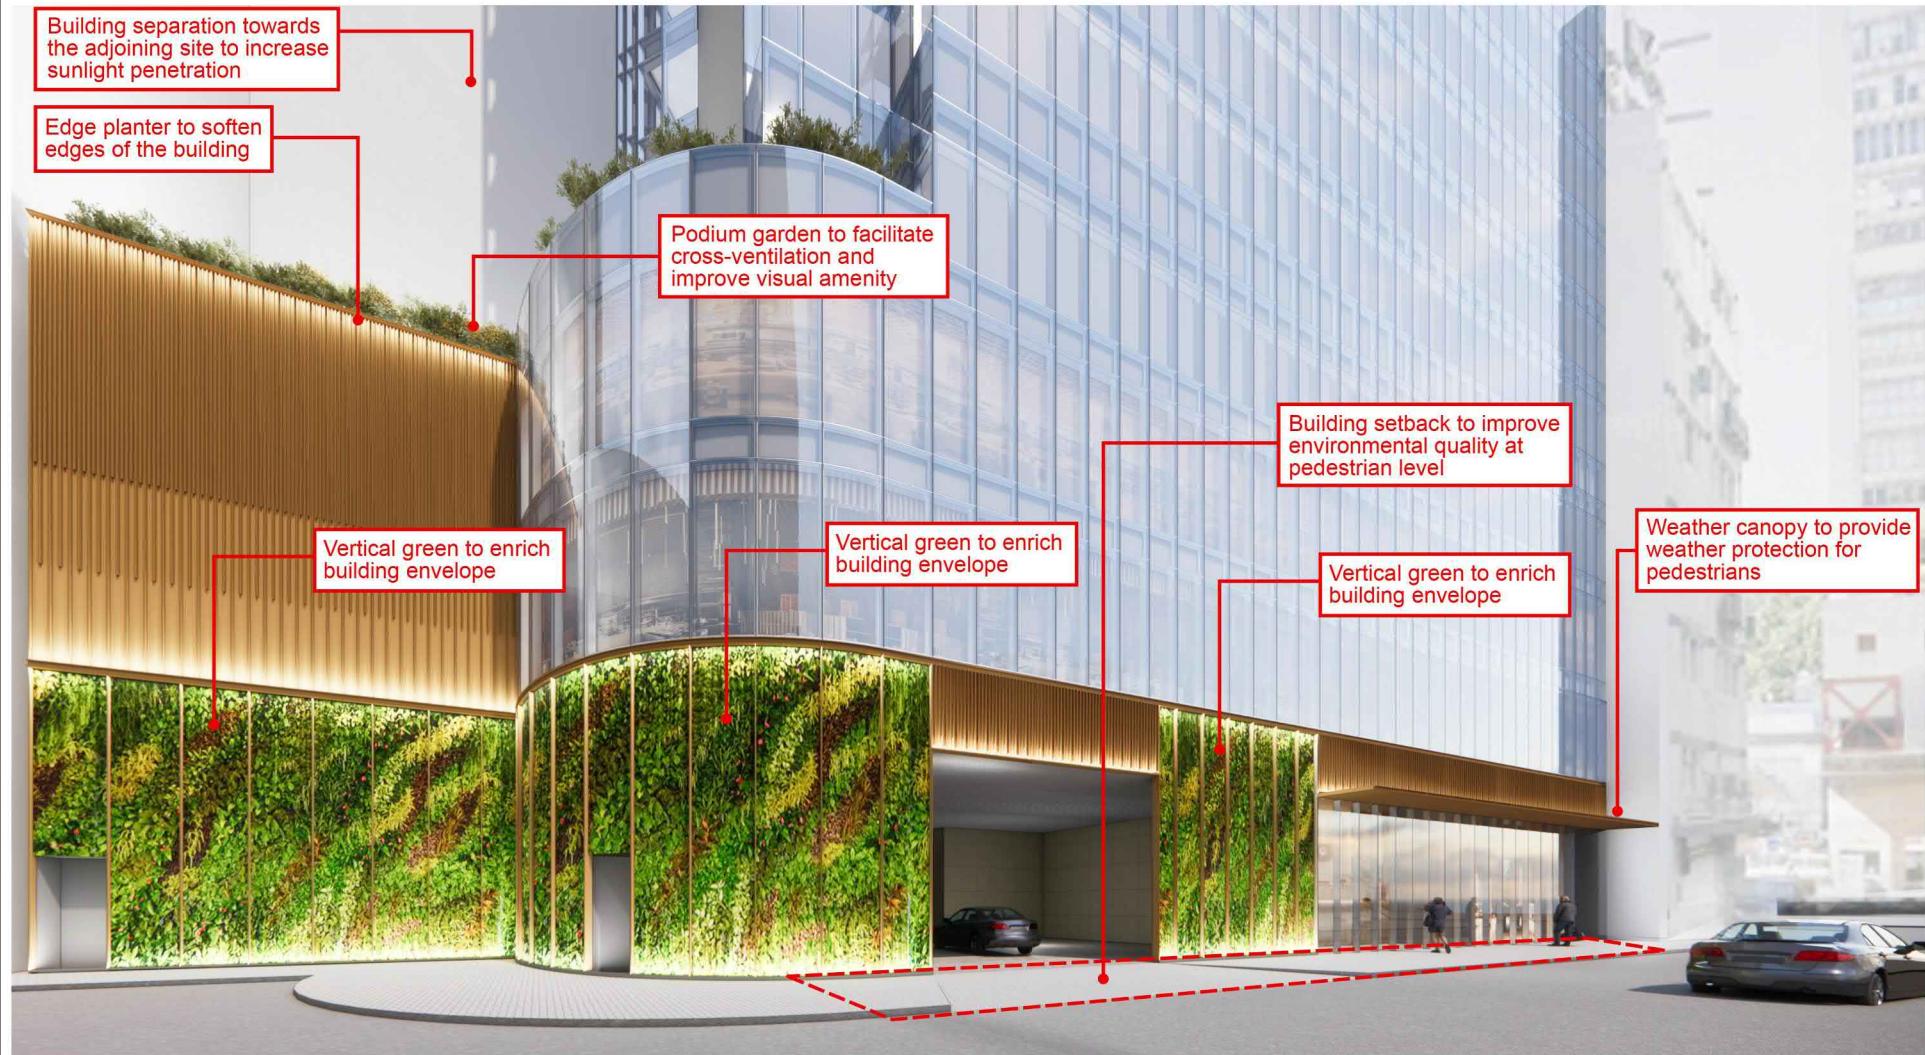

The extent, height and projection of the proposed weather canopy will be subject to further review taking into consideration the requirements as stipulated under Building (Planning) Regulations (B(P)R) at subsequent detailed design stage for approval of relevant Government departments
