2026年 6月 30日
此文件在_____收到。城市規劃委員會
只會在收到所有必要的資料及文件後才正式確認收到
申請的日期。

This document is received on 2026 -06- 30
The Town Planning Board will formally acknowledge
the date of receipt of the application only upon receipt
of all the required information and documents.

Form No. S16-I
表格第 S16-I 號

APPLICATION FOR PERMISSION
UNDER SECTION 16 OF
THE TOWN PLANNING ORDINANCE
(CAP. 131)

根據《城市規劃條例》(第131章)
第16條遞交的許可申請

Applicable to proposals not involving or not only involving:
適用於建議不涉及或不祇涉及:

(i) Construction of "New Territories Exempted House(s)";
興建「新界豁免管制屋宇」;

(ii) Temporary use/development of land and/or building not exceeding 3 years in rural areas or Regulated Areas; and
位於鄉郊地區或受規管地區土地上及/或建築物內進行為期不超過三年的臨時用途/發展;及

(iii) Renewal of permission for temporary use or development in rural areas or Regulated Areas
位於鄉郊地區或受規管地區的臨時用途或發展的許可續期

Applicant who would like to publish the notice of application in local newspapers to meet one of the Town Planning Board's requirements of taking reasonable steps to obtain consent of or give notification to the current land owner, please refer to the following link regarding publishing the notice in the designated newspapers:
https://www.tpb.gov.hk/en/plan_application/apply.html

申請人如欲在本地報章刊登申請通知,以採取城市規劃委員會就取得現行土地擁有人的同意或通知現行土地擁有人所指定的其中一項合理步驟,請瀏覽以下網址有關在指定的報章刊登通知:
https://www.tpb.gov.hk/tc/plan_application/apply.html

General Note and Annotation for the Form
填寫表格的一般指引及註解

\# "Current land owner" means any person whose name is registered in the Land Registry as that of an owner of the land to which the application relates, as at 6 weeks before the application is made
「現行土地擁有人」指在提出申請前六星期,其姓名或名稱已在土地註冊處註冊為該申請所關乎的土地的擁有人的人

& Please attach documentary proof 請夾附證明文件

^ Please insert number where appropriate 請在適當地方註明編號

Please fill "NA" for inapplicable item 請在不適用的項目填寫「不適用」

Please use separate sheets if the space provided is insufficient 如所提供的空間不足,請另頁說明

Please insert a「✔」at the appropriate box 請在適當的方格內上加上「✔」號

2601467 16/6 by hand

Form No. S16-I 表格第 S16-I 號

For Official Use Only 請勿填寫此欄	Application No. 申請編號	A/K10/281
	Date Received 收到日期	2026-06-30

1. The completed form and supporting documents (if any) should be sent to the Secretary, Town Planning Board (the Board), 15/F, North Point Government Offices, 333 Java Road, North Point, Hong Kong.
申請人須把填妥的申請表格及其他支持申請的文件 (倘有)，送交香港北角渣華道 333 號北角政府合署 15 樓城市規劃委員會(下稱「委員會」)秘書收。

2. Please read the "Guidance Notes" carefully before you fill in this form. The document can be downloaded from the Board's website at http://www.tpb.gov.hk/. It can also be obtained from the Secretariat of the Board at 15/F, North Point Government Offices, 333 Java Road, North Point, Hong Kong (Tel: 2231 4810 or 2231 4835), and the Planning Enquiry Counters of the Planning Department (Hotline: 2231 5000) (17/F, North Point Government Offices, 333 Java Road, North Point, Hong Kong and 14/F, Sha Tin Government Offices, 1 Sheung Wo Che Road, Sha Tin, New Territories).
請先細閱《申請須知》的資料單張，然後填寫此表格。該份文件可從委員會的網頁下載 (網址：http://www.tpb.gov.hk/)，亦可向委員會秘書處 (香港北角渣華道 333 號北角政府合署 15 樓 – 電話：2231 4810 或 2231 4835)及規劃署的規劃資料查詢處(熱線：2231 5000) (香港北角渣華道 333 號北角政府合署 17 樓及新界沙田上禾輋路 1 號沙田政府合署 14 樓)索取。

3. This form can be downloaded from the Board's website, and obtained from the Secretariat of the Board and the Planning Enquiry Counters of the Planning Department. The form should be typed or completed in block letters. The processing of the application may be refused if the required information or the required copies are incomplete.
此表格可從委員會的網頁下載，亦可向委員會秘書處及規劃署的規劃資料查詢處索取。申請人須以打印方式或以正楷填寫表格。如果申請人所提交的資料或文件副本不齊全，委員會可拒絕處理有關申請。

---

1. Name of Applicant 申請人姓名/名稱

(☐ Mr. 先生 / ☐ Mrs. 夫人 / ☐ Miss 小姐 / ☐ Ms. 女士 / ☐ Company 公司 / ☑ Organisation 機構)

Urban Renewal Authority

2. Name of Authorised Agent (if applicable) 獲授權代理人姓名/名稱（如適用）

(☐ Mr. 先生 / ☐ Mrs. 夫人 / ☐ Miss 小姐 / ☐ Ms. 女士 / ☐ Company 公司 / ☐ Organisation 機構)

N/A

3. Application Site 申請地點

(a)	Full address / location / demarcation district and lot number (if applicable) 詳細地址／地點／丈量約份及地段號碼（如適用）	New Kowloon Inland Lot No. 6658
(b)	Site area and/or gross floor area involved 涉及的地盤面積及／或總樓面面積	☑Site area 地盤面積 5,307 [Note1] sq.m 平方米 ☑About 約 ☑Gross floor area 總樓面面積 47,763 sq.m 平方米 ☑About 約
(c)	Area of Government land included (if any) 所包括的政府土地面積（倘有）	0 sq.m 平方米 ☐About 約

Note 1: As per area zoned 'R(A)' under the Approved DSP with minor adjustment of the area to reflect the net site area under land grant.

(d)	Name and number of the related statutory plan(s) 有關法定圖則的名稱及編號	Approved Urban Renewal Authority Kai Tak Road / Sa Po Road Development Scheme Plan No. S/K10/URA1/2
(e)	Land use zone(s) involved 涉及的土地用途地帶	"Residential (Group A)" zone
(f)	Current use(s) 現時用途	The Application Site is currently vacant with demolition works completed. (If there are any Government, institution or community facilities, please illustrate on plan and specify the use and gross floor area) (如有任何政府、機構或社區設施，請在圖則上顯示，並註明用途及總樓面面積)

4. "Current Land Owner" of Application Site 申請地點的「現行土地擁有人」

The applicant 申請人 –

☑ is the sole "current land owner"#& (please proceed to Part 6 and attach documentary proof of ownership).
是唯一的「現行土地擁有人」#&(請繼續填寫第 6 部分，並夾附業權證明文件)。

☐ is one of the "current land owners"#& (please attach documentary proof of ownership).
是其中一名「現行土地擁有人」#&(請夾附業權證明文件)。

☐ is not a "current land owner"#.
並不是「現行土地擁有人」#。

☐ The application site is entirely on Government land (please proceed to Part 6).
申請地點完全位於政府土地上（請繼續填寫第 6 部分）。

5. Statement on Owner's Consent/Notification 就土地擁有人的同意/通知土地擁有人的陳述

N/A

(a) According to the record(s) of the Land Registry as at ..... (DD/MM/YYYY), this application involves a total of ..... "current land owner(s)"#.
根據土地註冊處截至 ..... 年 ..... 月 ..... 日的記錄，這宗申請共牽涉 ..... 名「現行土地擁有人」#。

(b) The applicant 申請人 –

☐ has obtained consent(s) of ..... "current land owner(s)"#.
已取得 ..... 名「現行土地擁有人」#的同意。

Details of consent of "current land owner(s)"# obtained 取得「現行土地擁有人」#同意的詳情		
No. of 'Current Land Owner(s)' 「現行土地擁有人」數目	Lot number/address of premises as shown in the record of the Land Registry where consent(s) has/have been obtained 根據土地註冊處記錄已獲得同意的地段號碼／處所地址	Date of consent obtained (DD/MM/YYYY) 取得同意的日期 (日/月/年)

(Please use separate sheets if the space of any box above is insufficient. 如上列任何方格的空間不足，請另頁說明)

☐ has notified ..... "current land owner(s)"#
已通知 ..... 名「現行土地擁有人」#。

Details of the "current land owner(s)"# notified 已獲通知「現行土地擁有人」#的詳細資料		
No. of 'Current Land Owner(s)' 「現行土地擁有人」數目	Lot number/address of premises as shown in the record of the Land Registry where notification(s) has/have been given 根據土地註冊處記錄已發出通知的地段號碼／處所地址	Date of notification given (DD/MM/YYYY) 通知日期(日/月/年)

(Please use separate sheets if the space of any box above is insufficient. 如上列任何方格的空間不足，請另頁說明)

☐ has taken reasonable steps to obtain consent of or give notification to owner(s):
已採取合理步驟以取得土地擁有人的同意或向該人發給通知。詳情如下：

Reasonable Steps to Obtain Consent of Owner(s) 取得土地擁有人的同意所採取的合理步驟

☐ sent request for consent to the "current land owner(s)" on _____ (DD/MM/YYYY)#&
於_____(日/月/年)向每一名「現行土地擁有人」#郵遞要求同意書&

Reasonable Steps to Give Notification to Owner(s) 向土地擁有人發出通知所採取的合理步驟

☐ published notices in local newspapers on _____ (DD/MM/YYYY)&
於_____(日/月/年)在指定報章就申請刊登一次通知&

☐ posted notice in a prominent position on or near application site/premises on _____ (DD/MM/YYYY)&
於_____(日/月/年)在申請地點／申請處所或附近的顯明位置貼出關於該申請的通知&

☐ sent notice to relevant owners' corporation(s)/owners' committee(s)/mutual aid committee(s)/management office(s) or rural committee on _____ (DD/MM/YYYY)&
於_____(日/月/年)把通知寄往相關的業主立案法團/業主委員會/互助委員會或管理處，或有關的鄉事委員會&

Others 其他

☐ others (please specify)
其他（請指明）

_____
_____
_____
_____

Note: May insert more than one「✔」.
Information should be provided on the basis of each and every lot (if applicable) and premises (if any) in respect of the application.
註: 可在多於一個方格內加上「✔」號
申請人須就申請涉及的每一地段（倘適用）及處所（倘有）分別提供資料

6. Type(s) of Application 申請類別

☐ Type (i) 第(i)類 Change of use within existing building or part thereof 更改現有建築物或其部分內的用途

☐ Type (ii) 第(ii)類 Diversion of stream / excavation of land / filling of land / filling of pond as required under Notes of Statutory Plan(s) 根據法定圖則《註釋》內所要求的河道改道／挖土／填土／填塘工程

☐ Type (iii) 第(iii)類 Public utility installation / Utility installation for private project 公用事業設施裝置/私人發展計劃的公用設施裝置

☑ Type (iv) 第(iv)類 Minor relaxation of stated development restriction(s) as provided under Notes of Statutory Plan(s) 略為放寬於法定圖則《註釋》內列明的發展限制

☐ Type (v) 第(v)類 Use / development other than (i) to (iii) above 上述的(i)至(iii)項以外的用途／發展

Note 1: May insert more than one「✓」.
註 1： 可在多於一個方格內加上「✓」號
Note 2: For Development involving columbarium use, please complete the table in the Appendix.
註 2： 如發展涉及靈灰安置所用途，請填妥於附件的表格。

(i) For Type (i) application 供第(i)類申請 N/A

(a) Total floor area involved 涉及的總樓面面積	sq.m 平方米		
(b) Proposed use(s)/development 擬議用途/發展	(If there are any Government, institution or community facilities, please illustrate on plan and specify the use and gross floor area) (如有任何政府、機構或社區設施，請在圖則上顯示，並註明用途及總樓面面積)		
(c) Number of storeys involved 涉及層數		Number of units involved 涉及單位數目	
(d) Proposed floor area 擬議樓面面積	Domestic part 住用部分 ..... sq.m 平方米 ☐About 約		
	Non-domestic part 非住用部分..... sq.m 平方米 ☐About 約		
	Total 總計 ..... sq.m 平方米 ☐About 約		

(e) Proposed uses of different floors (if applicable) 不同樓層的擬議用途(如適用) (Please use separate sheets if the space provided is insufficient) (如所提供的空間不足，請另頁說明)	Floor(s) 樓層	Current use(s) 現時用途	Proposed use(s) 擬議用途

(ii) For Type (ii) application 供第(ii)類申請 N/A

(a) Operation involved 涉及工程	☐ Diversion of stream 河道改道 ☐ Filling of pond 填塘 Area of filling 填塘面積 ..... sq.m 平方米 ☐About 約 Depth of filling 填塘深度 ..... m 米 ☐About 約 ☐ Filling of land 填土 Area of filling 填土面積 ..... sq.m 平方米 ☐About 約 Depth of filling 填土厚度 ..... m 米 ☐About 約 ☐ Excavation of land 挖土 Area of excavation 挖土面積 ..... sq.m 平方米 ☐About 約 Depth of excavation 挖土深度 ..... m 米 ☐About 約 (Please indicate on site plan the boundary of concerned land/pond(s), and particulars of stream diversion, the extent of filling of land/pond(s) and/or excavation of land) (請用圖則顯示有關土地／池塘界線，以及河道改道、填塘、填土及／或挖土的細節及/或範圍))
(b) Intended use/development 有意進行的用途／發展	

(iii) For Type (iii) application 供第(iii)類申請

(a) Nature and scale
性質及規模

☐ Public utility installation 公用事業設施裝置

☐ Utility installation for private project 私人發展計劃的公用設施裝置

Please specify the type and number of utility to be provided as well as the dimensions of each building/structure, where appropriate
請註明有關裝置的性質及數量，包括每座建築物/構築物(倘有)的長度、高度和闊度

Name/type of installation 裝置名稱／種類	Number of provision 數量	Dimension of each installation /building/structure (m) (LxWxH) 每個裝置／建築物／構築物的尺寸 (米) (長 x 闊 x 高)

(Please illustrate on plan the layout of the installation 請用圖則顯示裝置的布局)

(iv) For Type (iv) application 供第(iv)類申請

(a) Please specify the proposed minor relaxation of stated development restriction(s) and **also fill in the proposed use/development and development particulars in part (v) below** –
請列明擬議略為放寬的發展限制**並填妥於第(v)部分的擬議用途/發展及發展細節** –

☑	Plot ratio restriction 地積比率限制	From 由 Max Domestic PR: 7.5 to 至 Max Domestic PR: 8
☐	Gross floor area restriction 總樓面面積限制	From 由 .....sq. m 平方米 to 至 .....sq. m 平方米
☐	Site coverage restriction 上蓋面積限制	From 由 .....% to 至 ..... %
☑	Building height restriction 建築物高度限制	From 由 .....m 米 to 至 ..... m 米 From 由 120 mPD 米 (主水平基準上) to 至 140 mPD 米 (主水平基準上) From 由 ..... storeys 層 to 至 ..... storeys 層
☐	Non-building area restriction 非建築用地限制	From 由 .....m to 至 ..... m
☐	Others (please specify) 其他（請註明）	.....

Note: This S16 Planning Application is a "non-scheme-based" submission, the notional design and indicative development parameters provided are solely for illustration purpose and for conducting necessary technical assessments. Except for any planning condition(s) to be imposed, the design of future development will not be bounded by the notional design / indicative development parameters submitted in the S16 Planning Application.

(v) For Type (v) application 供第(v)類申請

(a) Proposed use(s)/development 擬議用途/發展	Proposed Minor Relaxation of Domestic Plot Ratio and Building Height Restrictions for Permitted Residential Development with Government, Institution or Community facilities, Commercial / Retail uses and Public Vehicle Park of the URA Kai Tak Road / Sa Po Road Development Scheme (KC-015) (Please illustrate the details of the proposal on a layout plan 請用平面圖說明建議詳情)

(b) Development Schedule 發展細節表

Proposed gross floor area (GFA) 擬議總樓面面積	47,763 [Note 2] sq.m 平方米	☑About 約
Proposed plot ratio 擬議地積比率	Total PR: 9.0 (Max. Domestic PR: 8)	☐About 約
Proposed site coverage 擬議上蓋面積	Domestic: Not more than 40%; Non-domestic below 15m: 100% [Note 3] Non-domestic above 15m: Not more than 65% %	☐About 約
Proposed no. of blocks 擬議座數	2	
Proposed no. of storeys of each block 每座建築物的擬議層數	37 [Note 4] storeys 層	
	☐ include 包括 ____ storeys of basements 層地庫	
	☑ exclude 不包括 2 storeys of basements 層地庫	
Proposed building height of each block 每座建築物的擬議高度	Not more than 140 mPD 米(主水平基準上)	☐About 約
	143 [Note 5] m 米	☑About 約

Note 2: Excluding 10% of MiC floor area which could be disregarded from calculation of GFA and plot ratio as per Joint Practice Note No. 8.
Note 3: Assumed in accordance with the First Schedule of Building (Planning) Regulation that for a Class C site with building height over 61m, the site coverage shall not exceed 40% for a domestic building or for the domestic part of a composite building, and shall not exceed 65% for a non-domestic building, or for the non-domestic part of a composite building. If the non-domestic podium does not exceed 15m in height, a site coverage of not more than 100% shall be permitted. The actual site coverage for the development at the Application Site will be determined at detailed design stage.
Note 4: Including 31 residential storeys, 1 storey for clubhouse and 5 storeys of podium.
Note 5: Including building height of 134m above ground measured from the site formation level and basement levels with 9m.

Note: This S16 Planning Application is a "non-scheme-based" submission, the notional design and indicative development parameters provided are solely for illustration purpose and for conducting necessary technical assessments. Except for any planning condition(s) to be imposed, the design of future development will not be bounded by the notional design / indicative development parameters submitted in the S16 Planning Application.

Form No. S16-I表格第S16-I號

☑ Domestic part 住用部分

GFA 總樓面面積	42,456 [Note2 & Note 6] sq. m 平方米	☑About 約
number of Units 單位數目	About 992	
average unit size 單位平均面積	42.8 sq. m 平方米	☑About 約
estimated number of residents 估計住客數目	About 2480 [Note 7]	

☑ Non-domestic part 非住用部分

	GFA 總樓面面積	
☐ eating place 食肆	..... sq. m 平方米	☐About 約
☐ hotel 酒店	..... sq. m 平方米	☐About 約
	(please specify the number of rooms 請註明房間數目)	
☐ office 辦公室	..... sq. m 平方米	☐About 約
☐ shop and services 商店及服務行業	..... sq. m 平方米	☐About 約

☑ Government, institution or community facilities 政府、機構或社區設施

(please specify the use(s) and concerned land area(s)/GFA(s) 請註明用途及有關的地面面積／總樓面面積)

- GIC Facilities: About 800 sq.m.

☑ other(s) 其他

(please specify the use(s) and concerned land area(s)/GFA(s) 請註明用途及有關的地面面積／總樓面面積)

- Split-level Sunken Plaza: About 1,000 sq.m.
- Commercial/ Retail uses [Note 6]
- Car Parking Facilitites
- Clubhouse, E&M and other ancillary facilities

☐ Open space 休憩用地

(please specify land area(s) 請註明地面面積)

☐ private open space 私人休憩用地	..... sq. m 平方米	☐ Not less than 不少於
☐ public open space 公眾休憩用地	..... sq. m 平方米	☐ Not less than 不少於

(c) Use(s) of different floors (if applicable) 各樓層的用途 (如適用)

[Block number] [座數]	[Floor(s)] [層數]	[Proposed use(s)] [擬議用途]
N/A	B1-B2/F	Public Vehicle Park (PVP)
	G/F	Retail / L/UL Facilities
	Podium:	
	1/F	PVP
	2/F	PVP / GIC uses
	3/F	Ancillary Carpark/ PVP
	4/F	Ancillary Carpark
Residential Tower 1 & 2	Clubhouse Floor 1-31/F	Clubhouse Residential Flats

(d) Proposed use(s) of uncovered area (if any) 露天地方（倘有）的擬議用途

Split-Level Sunken Plaza: A venue for multiple activities with covered/ uncovered areas, hard/soft landscape, commercial/ retail components, event space and place making elements.

Note 6: The domestic and non-domestic PR/GFA are for illustrative purpose only. To allow flexibility and optimum use of development potential, development at the Application Site is subject to a maximum domestic PR of 8 and total PR of 9. The actual domestic and non-domestic PRs and GFAs would be worked out at detailed design stage.

Note 7: Based on Population Census 2021, the average domestic household size in Lung Shing District Council Constituency Area is 2.5 persons.

[Note 8]

7. Anticipated Completion Time of the Development Proposal
擬議發展計劃的預計完成時間

Anticipated completion time (in month and year) of the development proposal (by phase (if any)) (e.g. June 2023)
擬議發展計劃預期完成的年份及月份 (分期 (倘有)) (例：2023 年 6 月)
(Separate anticipated completion times (in month and year) should be provided for the proposed public open space and Government, institution or community facilities (if any))
(申請人須就擬議的公眾休憩用地及政府、機構或社區設施 (倘有) 提供個別擬議完成的年份及月份)

2030 / 31

8. Vehicular Access Arrangement of the Development Proposal
擬議發展計劃的行車通道安排

Any vehicular access to the site/subject building? 是否有車路通往地盤／有關建築物？	Yes 是	☑ There is an existing access. (please indicate the street name, where appropriate) 有一條現有車路。(請註明車路名稱(如適用)) Sa Po Road, Carpenter Road, Kai Tak Road, Prince Edward Road East ☐ There is a proposed access. (please illustrate on plan and specify the width) 有一條擬議車路。（請在圖則顯示，並註明車路的闊度）
	No 否	☐
Any provision of parking space for the proposed use(s)? 是否有為擬議用途提供停車位？	Yes 是	☑ (Please specify type(s) and number(s) and illustrate on plan) 請註明種類及數目並於圖則上顯示) Private Car Parking Spaces 私家車車位: 106 Motorcycle Parking Spaces 電單車車位: 13 Light Goods Vehicle Parking Spaces 輕型貨車泊車位: Medium Goods Vehicle Parking Spaces 中型貨車泊車位: Heavy Goods Vehicle Parking Spaces 重型貨車泊車位: Others (Please Specify) 其他 (請列明) Public Vehicle Park (PVP): 217 nos. of PVP for private cars
	No 否	☐
Any provision of loading/unloading space for the proposed use(s)? 是否有為擬議用途提供上落客貨車位？	Yes 是	☑ (Please specify type(s) and number(s) and illustrate on plan) 請註明種類及數目並於圖則上顯示) Taxi Spaces 的士車位: Coach Spaces 旅遊巴車位: Light Goods Vehicle Spaces 輕型貨車車位: 5 Medium Goods Vehicle Spaces 中型貨車車位: Heavy Goods Vehicle Spaces 重型貨車車位: 4 Others (Please Specify) 其他 (請列明):
	No 否	☐

9. Impacts of Development Proposal 擬議發展計劃的影響

If necessary, please use separate sheets to indicate the proposed measures to minimise possible adverse impacts or give justifications/reasons for not providing such measures.
如需要的話，請另頁註明可盡量減少可能出現不良影響的措施，否則請提供理據/理由。

Does the development proposal involve alteration of existing building? 擬議發展計劃是否包括現有建築物的改動?	Yes 是	☐ Please provide details 請提供詳情 ....
	No 否	☑
Does the development proposal involve the operation on the right? 擬議發展是否涉及右列的工程? (Note: where Type (ii) application is the subject of application, please skip this section. 註：如申請涉及第(ii)類申請，請跳至下一條問題。)	Yes 是	☑ (Please indicate on site plan the boundary of concerned land/pond(s), and particulars of stream diversion, the extent of filling of land/pond(s) and/or excavation of land) (請用地盤平面圖顯示有關土地／池塘界線，以及河道改道、填塘、填土及／或挖土的細節及/或範圍) ☐ Diversion of stream 河道改道 ☐ Filling of pond 填塘 Area of filling 填塘面積 ..... sq.m 平方米 ☐About 約 Depth of filling 填塘深度 ..... m 米 ☐About 約 ☐ Filling of land 填土 Area of filling 填土面積 ..... sq.m 平方米 ☐About 約 Depth of filling 填土厚度 ..... m 米 ☐About 約 ☑ Excavation of land 挖土 Area of excavation 挖土面積 [Note 8 refers] sq.m 平方米 ☐About 約 Depth of excavation 挖土深度 [Note 8 refers] m 米 ☐About 約
	No 否	☐

Would the development proposal cause any adverse impacts? 擬議發展計劃會否造成不良影響？			
	On environment 對環境 (On air quality, noise, water quality, land contamination and waste management)	Yes 會 ☐	No 不會 ☑
	On traffic 對交通	Yes 會 ☐	No 不會 ☑
	On water supply 對供水	Yes 會 ☐	No 不會 ☑
	On drainage 對排水	Yes 會 ☐	No 不會 ☑
	On slopes 對斜坡	Yes 會 ☐	No 不會 ☑
	Affected by slopes 受斜坡影響	Yes 會 ☐	No 不會 ☑
	Landscape Impact 構成景觀影響	Yes 會 ☐	No 不會 ☑
	Tree Felling 砍伐樹木	Yes 會 ☐	No 不會 ☑
	Visual Impact 構成視覺影響	Yes 會 ☐	No 不會 ☑
	Others (Please Specify) 其他 (請列明)	Yes 會 ☐	No 不會 ☑
	_____		
	_____		

Please state measure(s) to minimise the impact(s). For tree felling, please state the number, diameter at breast height and species of the affected trees (if possible)
請註明盡量減少影響的措施。如涉及砍伐樹木，請說明受影響樹木的數目、及胸高度的樹幹直徑及品種(倘可)

Please refer to Appendices A - E of the Planning Statement for details.
.....
.....
.....
.....
.....

Note 8: The existing site levels of the Application Site is about 6.10mPD. Please refer to the Notional Block Plan and Section Plan in Figure 3.1 and Figure 3.2 of the Planning Statement for reference. Please note that the area and depth of excavation shall be determined at detailed design stage.

10. Justifications 理由

The applicant is invited to provide justifications in support of the application. Use separate sheets if necessary.
現請申請人提供申請理由及支持其申請的資料。如有需要，請另頁說明。

Please refer to the attached Planning Statement.

11. Declaration 聲明

I hereby declare that the particulars given in this application are correct and true to the best of my knowledge and belief.
本人謹此聲明，本人就這宗申請提交的資料，據本人所知及所信，均屬真實無誤。

I hereby grant a permission to the Board to copy all the materials submitted in this application and/or to upload such materials to the Board's website for browsing and downloading by the public free-of-charge at the Board's discretion. 本人現准許委員會酌情將本人就此申請所提交的所有資料複製及/或上載至委員會網站，供公眾免費瀏覽或下載。

Date 日期 16/06/2026 (DD/MM/YYYY 日/月/年)

Remark 備註

The materials submitted in this application and the Board's decision on the application would be disclosed to the public. Such materials would also be uploaded to the Board's website for browsing and free downloading by the public where the Board considers appropriate.
委員會會向公眾披露申請人所遞交的申請資料和委員會對申請所作的決定。在委員會認為合適的情況下，有關申請資料亦會上載至委員會網頁供公眾免費瀏覽及下載。

Warning 警告

Any person who knowingly or wilfully makes any statement or furnish any information in connection with this application, which is false in any material particular, shall be liable to an offence under the Crimes Ordinance.
任何人在明知或故意的情況下，就這宗申請提出在任何要項上是虛假的陳述或資料，即屬違反《刑事罪行條例》。

Statement on Personal Data 個人資料的聲明

1. The personal data submitted to the Board in this application will be used by the Secretary of the Board and Government departments for the following purposes:
委員會就這宗申請所收到的個人資料會交給委員會秘書及政府部門，以根據《城市規劃條例》及相關的城市規劃委員會規劃指引的規定作以下用途：
   (a) the processing of this application which includes making available the name of the applicant for public inspection when making available this application for public inspection; and
   處理這宗申請，包括公布這宗申請供公眾查閱，同時公布申請人的姓名供公眾查閱；以及
   (b) facilitating communication between the applicant and the Secretary of the Board/Government departments.
   方便申請人與委員會秘書及政府部門之間進行聯絡。

2. The personal data provided by the applicant in this application may also be disclosed to other persons for the purposes mentioned in paragraph 1 above.
申請人就這宗申請提供的個人資料，或亦會向其他人士披露，以作上述第 1 段提及的用途。

3. An applicant has a right of access and correction with respect to his/her personal data as provided under the Personal Data (Privacy) Ordinance (Cap. 486). Request for personal data access and correction should be addressed to the Secretary of the Board at 15/F, North Point Government Offices, 333 Java Road, North Point, Hong Kong.
根據《個人資料(私隱)條例》(第 486 章)的規定，申請人有權查閱及更正其個人資料。如欲查閱及更正個人資料，應向委員會秘書提出有關要求，其地址為香港北角渣華道 333 號北角政府合署 15 樓。

For Developments involving Columbarium Use, please also complete the following:
如發展涉及靈灰安置所用途，請另外填妥以下資料:

N/A

Ash interment capacity 骨灰安放容量@

Maximum number of sets of ashes that may be interred in the niches
在龕位內最多可安放骨灰的數量 _____

Maximum number of sets of ashes that may be interred other than in niches
在非龕位的範圍內最多可安放骨灰的數量 _____

Total number of niches 龕位總數 _____

Total number of single niches
單人龕位總數 _____

Number of single niches (sold and occupied)
單人龕位數目 (已售並佔用) _____

Number of single niches (sold but unoccupied)
單人龕位數目 (已售但未佔用) _____

Number of single niches (residual for sale)
單人龕位數目 (待售) _____

Total number of double niches
雙人龕位總數 _____

Number of double niches (sold and fully occupied)
雙人龕位數目 (已售並全部佔用) _____

Number of double niches (sold and partially occupied)
雙人龕位數目 (已售並部分佔用) _____

Number of double niches (sold but unoccupied)
雙人龕位數目 (已售但未佔用) _____

Number of double niches (residual for sale)
雙人龕位數目 (待售) _____

Total no. of niches other than single or double niches (please specify type)
除單人及雙人龕位外的其他龕位總數 (請列明類別) _____

Dear Sir/ Madam,

Section 16 Planning Application for
Proposed Minor Relaxation of Domestic Plot Ratio and Building Height Restrictions for the URA Kai Tak Road / Sa Po Road Development Scheme (KC-015)
Planning Submission

Pursuant to Section 16 of the Town Planning Ordinance (CAP. 131), we submit herewith the captioned planning application for the consideration of the Town Planning Board. The following documents are enclosed for your onward processing:

1. A signed original copy of the application form (including the land registry record as documentary proof of land ownership); and

2. 4 hard copies of the Planning Statement.

Should you have any enquiry, please feel free to contact me at [redacted] or our Ms. Mable Kwan at [redacted] / Ms. Simone Tang at [redacted] Thank you.

Yours sincerely,

Town Planning Board

Section 16 Planning Application for Proposed Minor Relaxation of Domestic Plot Ratio and Building Height Restrictions for the URA Kai Tak Road / Sa Po Road Development Scheme (KC-015)

PLANNING STATEMENT

June 2026

Urban Renewal Authority

市區重建局
URBAN RENEWAL AUTHORITY

EXECUTIVE SUMMARY

This Planning Application is submitted by the Urban Renewal Authority (URA) to the Town Planning Board (TPB) pursuant to Section 16 of the Town Planning Ordinance (Cap. 131), for minor relaxation of maximum domestic plot ratio (DPR) and building height restriction (BHR) for URA Kai Tak Road / Sa Po Road Development Scheme (KC-015).

The Application Site is located in Kowloon City district and is zoned "Residential (Group A)" ("R(A)") on the approved URA Kai Tak Road / Sa Po Road Development Scheme Plan No. S/K10/URA1/2 (the Approved DSP). It is subject to a maximum DPR of 7.5 and total plot ratio (PR) of 9.0, with BHR of 120mPD.

With an aim to enhance development flexibility, facilitate the adoption of the Modular Integrated Construction (MiC) method, and accommodate an above-ground carpark design, this S16 Planning Application seeks TPB's approval for a minor relaxation of DPR from 7.5 to 8.0 (with total permissible PR remains the same as 9.0) and BHR from 120mPD to 140mPD.

The proposed increase in BHR is primarily driven by two factors:
(i) an increase of about 11m for MiC; and
(ii) an increase of about 9m for above-ground carpark subject to detailed design.

Should MiC not be adopted by practisers in the implementation of the future development, the minor relaxation of BHR to 129mPD (i.e. increase of 9m) would still be adopted for the above-ground carpark design.

This S16 Planning Application is a "non-scheme-based" submission. The current indicative proposal in the S16 Planning Application does not form part of the application. The notional design and indicative development parameters provided are solely for illustration purpose and for conducting necessary technical assessments. Except for any planning condition(s) to be imposed, the design of the future development will not be bounded by the notional design submitted in the S16 Planning Application.

The main justification in support of the S16 Planning Application are listed as follows:

- In line with the Government's directives to promote wider use of MiC in development projects;
- In line with the Government's initiatives of facilitating above-ground carpark design;
- In response to market needs and to enhance project financial viability ;
- Enhance development flexibility and project's market attractiveness ;
- Opportunity has been taken to increase housing supply by slight adjustment of permissible domestic plot ratio ;
- Compatible with existing and planned surrounding context;
- Retain previously committed planning gains; and
- No Insurmountable technical impacts anticipated.

In light of the justifications presented in this planning statement, the TPB is respectfully requested to give favourable consideration to the application.

行政摘要

(聲明：此中文譯本僅供參考，如中文譯本和英文原文有歧異時，應以英文原文為準。)

是項規劃申請由市區重建局（市建局）向城市規劃委員會（城規會）提交，旨在根據《城市規劃條例》（第 131 章）第 16 條就市建局啟德道/沙浦道發展計劃（KC-015 / 申請地點）申請略為放寬最高住用地積比率及建築物高度限制(本規劃申請)。

申請地點位於九龍城區，在已核准的《市建局啟德道／沙埔道發展計劃圖則編號 S/K10/URA1/2》（「已核准發展計劃圖」）上劃為「住宅（甲類）」地帶。該地點現時受最高住用地積比率 7.5 倍及總地積比率 9.0 倍的限制，而建築物高度限制則為主水平基準上 120 米。

為增加發展彈性以應對市場需求，並採納「組裝合成」建築法（MiC）及地面停車場的設計，本規劃申請向城規會申請規劃許可，將最高住用地積比率 7.5 倍略為放寬至 8.0 倍（最高總地積比率維持在 9.0 倍），並將建築物高度限制由主水平基準以上 120 米略為放寬至 140 米。

擬議略為放寬建築物高度限制主要基於兩個因素：
(i) 為採用「組裝合成」建築法而增加約 11 米；及
(ii) 因應地面停車場設計而增加約 9 米（需視乎詳細設計而定）。
即使發展項目最終不採用「組裝合成」建築法，為容納地面停車場設計，建築物高度限制仍放寬至主水平基準上 129 米（即增加地面停車場所需高度）。

本規劃申請屬「非方案主導」(“non-scheme-based”) 性質，所載的初步概念方案並不構成本規劃申請的一部分。本申請所提供的初步概念設計及發展參數僅供參考及用於進行必要的技術評估。除任何施加於規劃許可的相關附帶條件外，未來項目的發展設計將不受本申請所提交的初步概念設計所限制。

以下為支持本規劃申請的主要理據：

- 配合政府推動在發展項目中更廣泛使用「組裝合成」建築法；
- 配合政府推動及便利設置的地面停車場；
- 回應市場需求並提升項目財務可行性；
- 增加發展的靈活性及項目的市場吸引力；
- 輕微調整最高住用地積比率以增加房屋供應；
- 與周邊現有及已規劃的環境互相協調；
- 保留已承諾的規劃裨益；及
- 不會產生無法克服的技術問題。

基於以上的發展理據，現懇請城規會對本規劃申請予以贊同。

1. INTRODUCTION

1.1 This planning application is submitted by the Urban Renewal Authority (URA) to the Town Planning Board (TPB) pursuant to Section 16 of the Town Planning Ordinance (Cap. 131) (S16 Planning Application), for minor relaxation of maximum domestic plot ratio (DPR) and building height restriction (BHR) for the URA Kai Tak Road / Sa Po Road Development Scheme (KC-015/the Scheme). The application site of the subject S16 Planning Application comprises only the area zoned "Residential (Group A)" ("R(A)") within the Scheme boundary, excluding the adjoining area shown as "Road" on approved URA Kai Tak Road / Sa Po Road Development Scheme Plan No. S/K10/URA1/2 (the Application Site) (**Figure 1.1** refers). The subject S16 Planning Application is a "non-scheme-based" submission, the design of the future development will not be bounded by the notional design submitted herein.

1.2 The Scheme was commenced on 22 February 2019 by way of a development scheme under Section 25 of the Urban Renewal Authority Ordinance (URAO). On the same day, the URA submitted the draft Kai Tak Road / Sa Po Road Development Scheme Plan (DSP) to the TPB, which was subsequently approved by the Chief Executive in Council (CE in C) on 29 September 2020. The approved URA Kai Tak Road / Sa Po Road Development Scheme Plan No. S/K10/URA1/2 (the Approved DSP) was published on 9 October 2020.

1.3 With an aim to enhance development flexibility to meet market needs, adopt Modular Integrated Construction (MiC) method and above-ground (AG) carpark design, the URA intends to seek Town Planning Board (TPB)'s approval on **minor relaxation of domestic plot ratio (DPR) restriction from 7.5 to 8.0 while keeping total plot ratio (PR) of 9.0 unchanged, and minor relaxation of building height restrictions (BHR) from 120mPD to 140mPD** for the Application Site in accordance to Section 16 of the Town Planning Ordinance (S16 Planning Application).

1.4 The current indicative proposal of the subject S16 Planning Application does not form part of the application. It is a **"non-scheme-based"** submission. The notional design and indicative development parameters provided are solely for illustration purpose and for conducting necessary technical assessments. Except for any planning condition(s) to be imposed, the design of the future development will not be bounded by the notional design submitted in the S16 Planning Application.

2. SITE AND PLANNING CONTEXT

2.1 Site Context

2.1.1 The Application Site is located in Kowloon City district and is bounded by Sa Po Road to the east, Prince Edward Road East to the south, Kai Tak Road to the west and Carpenter Road to the north. It is well served by a variety of public transport options, with Sung Wong Toi MTR Station Exit B located about 5-minute walking distance from the Application Site (**Figure 2.1** refers). It is also served by numerous bus routes operating along Prince Edward Road East providing convenient access throughout the city. The Application Site is currently vacant, as the demolition works were completed in 2024 (**Figure 1.1** refers).

2.1.2 The Application Site covers the area zoned "R(A)" under the Approved DSP. It includes the land at 31 – 49 Sa Po Road (odd nos.) and 55 – 73 Sa Po Road (odd nos.) and 24 – 82 Kai Tak Road (even nos.), a back lane and a portion of Sa Po Road (**Figure 1.1** refers). The Application Site has a net site area of about 5,307sq.m. for PR calculation.

2.2 Planning Context

2.2.1 The Application Site falls within the Nga Tsin Wai Road Area defined in the Urban Renewal Plan (URP) under the Kowloon City District Urban Renewal Forum (KC DURF) study in 2014 for mixed development with commercial, community and residential uses to facilitate the transformation of the area to a gateway leading to Kai Tak Development Area (KTDA) with seamless integration with its underground shopping street (USS). The URP also suggested that an entrance plaza connecting with the subway to the USS should be provided to serve as a gateway to create a sense of arrival, and commercial/community facilities and public vehicle park (PVP) should be provided in the future development to meet the local demand.

2.2.2 To materialize KC DURF's proposed, the URA has commenced the Kai Tak Road / Sa Po Road Development Scheme (KC-015) on 22 February 2019 in accordance to Section 25 of the URAO. The draft Development Scheme Plan (DSP) was then approved by CE in C on 29 September 2020. The approved URA Kai Tak Road / Sa Po Road DSP No. S/K10/URA1/2 (the Approved DSP) was published on 9 October 2020.

2.2.3 The Application Site falls within an area zoned "R(A)" on the Approved DSP (**Figure 1.1** refers), which is intended primarily for high-density residential developments with the provision of a sunken plaza and underground PVP. Commercial uses are always permitted on the lowest three floors of a building or in the purpose-designed non-domestic portion of a building connecting to the sunken plaza. The Application

Site is subject to a maximum DPR of 7.5[1] and total PR of 9.0, with BHR of 120mPD. To provide design flexibility, minor relaxation of PR and BHR may be considered by the TPB on application under Section 16 of the Town Planning Ordinance (TPO) based on individual merits of the development proposal.

2.3 Surrounding Context

2.3.1 The surrounding areas of the Application Site are predominately characterized by a mix of existing low-to-medium rise tenements buildings with ground-floor shops and recent high-rise residential developments. **Figure 2.2** shows the site and surrounding context.

2.3.2 Immediately adjoins the Application Site in the same street block have two relatively new high-rise buildings, namely, the High Place which is a private residential development adjoin the northeastern corner of the Application Site and the Carlson Court at Sa Po Road which is an off-campus student residence managed by the Hong Kong Baptist University.

2.3.3 The zonings of the surroundings areas of the Application Site are mainly "R(A)", "O" and "C" sites (**Figure 2.3** refers). Adjoining part of the south western boundary of the Application Site is the Site C1 of URA Nga Tsin Wai Road / Carpenter Road Development Scheme (KC-017). KC-017 was implemented by way of a development scheme in accordance with Section 25 of the URAO and has been approved by CE in C in September 2023. Site C1 of KC-017 is planned with a low-rise commercial/ retail block at its north and the at-grade gateway square at its south, which will connect with the existing Tak Ku Ling Road Rest Garden and the sunken plaza at the Application Site, forming a scalable gateway between the Nga Tsin Wai Road area of Kowloon City area and the Kat Tak Development Area (KTDA).

2.3.4 In addition to KC-017's Site C1, the area to the west of the Application Site across Kai Tak Road comprises a mix of low-to-medium rise tenement buildings with ground floor shops, together with a recent high-rise residential development known as AVA 55. To the north and northeast of the Application Site across Carpenter Road are two recent high-rise residential developments known as Billionaire Royale and Le Billionaire, with building heights of about 170 mPD and 145 mPD respectively. To the east of the Application Site across Sa Po Road are the mid-rise residential building named Po Shing Court and the Regal Oriental Hotel (**Figure 2.2** refers).

[1] According to the Schedule of Use of the subject "R(A)" zone, no development shall exceed PR of 7.5 for a domestic building, or PR of 9.0 for a building that is partly domestic and partly non-domestic in which the domestic part of the building shall not exceed plot ratio of 7.5, or the plot ratio of the existing building, whichever is the greater.

2.3.5 To the further south of the Application Site across Prince Edward Road East is the KTDA, which features a mix of community, housing, business, tourism and infrastructural uses. The KTDA is under active construction, with major developments including the Kai Tak Sports Park, shopping malls such as Airside and the Twins and various public and private residential developments completed and have been actively in use.

2.4 Policy Context

Modular Integrated Construction (MiC) & Joint Practice Note No. 8 (JPN No.8)

2.4.1 MiC is a construction method where integrated modules are prefabricated in a factory and then transported to the site for installation. This approach enhances quality control, minimizes disruption to the surrounding community, simplifies the construction process, and reduces waste.

2.4.2 The "Enhanced Facilitation Measures for Buildings Adopting MiC" under JPN No. 8 was promulgated by the Government in 2022 with an aim to to promote wider adoption of MiC in new private buildings by providing incentives. According to JPN No. 8, MiC involves thickened double slabs between MiC modules under current technology, resulting in an increase in storey height of MiC floor and hence in the overall BH of the building. To promote the adoption of MiC, 10% of the MiC floor area of a new building may be disregarded from GFA calculation, and favourable consideration may be given by the TPB for an increase of BH up to 4% of the total storey height of MiC floors. The reasons for applying a BH relaxation exceeding 4% of the total storey height of MiC floors under the subject S16 Planning Application will be explained in **Paragraph 4.1.2 and 4.1.3**.

Enhanced GFA Exemption Arrangements for Above-ground Carparks

2.4.3 As announced in the Policy Address 2025, the Government has committed to sustain efforts to improve the efficiency of land production and lower construction costs through initiating the enhanced GFA exemption arrangements for carparks in developments projects. In this connection, the new Practice Note for Authorized Persons, Registered Structural Engineers and Registered Geotechnical Engineers (PNAP) APP-2 was published in November 2025, which allows for full GFA exemption for up to two levels of above-ground carparks for both private and public car parks.

3. THE INDICATIVE DEVELOPMENT PROPOSAL

3.1 Proposed minor relaxation of Domestic Plot Ratio (DPR) and Building Height Restrictions (BHR)

3.1.1 The S16 Planning Application seeks TPB permission for **(i) minor relaxation of maximum permissible DPR from 7.5 to 8.0, while keeping the total PR of 9.0 unchanged** to enhance development flexibility to meet market needs and **(ii) minor relaxation of BHR from 120mPD to 140mPD** to facilitate the adoption of MiC and above-ground carpark design to respond to the recent Government initiatives.

3.1.2 The proposed minor relaxation of DPR from 7.5 to 8.0, while keeping the maximum total PR at 9.0, could allow for construction of more domestic areas to meet the market needs. The relaxation also allows more flexibility on the PR interchangeability between domestic PR and non-domestic PR for the future development. It will not propose any restriction on the non-domestic PR, which allows flexibility in adjusting the final GFA mix and the provision of non-domestic PR at detailed design stage, subject to the maximum DPR of 8.0 and a total PR of 9.0 of the Application Site.

3.1.3 The proposed minor relaxation of BHR from 120mPD to 140mPD is as a result of two factors:

(i) An increase of about 11m for MiC; and

(ii) An increase of about 9m for above-ground carpark subject to detailed design.

Should MiC not be adopted by practisers in the implementation of the future development, the minor relaxation of BHR to 129mPD (i.e. increase of 9m) would still be adopted for the above-ground carpark design.

3.1.4 A comparison of indicative development parameters between the notional design of the Approved DSP Proposal and the current S16 Planning Proposal is provided in **Table 3.1** below.

3.1.5 While the subject S16 Planning Application is a non-scheme-based submission, the notional block plan and section plan are provided in **Figure 3.1 and Figure 3.2** for illustration purpose and for conducting necessary technical assessments only. Except for any planning condition(s) to be imposed, the design of the future development will not be bounded by the notional design submitted in the S16 Planning Application.

Table 3.1 Comparison of Indicative Development Parameters of the Approved DSP and the Current S16 Planning Proposal

Development Parameters	Approved DSP Proposal [A]	Current S16 Planning Proposal [B]	Difference [B]-[A] (% change)
Site Area - Application Site Area (for PR Calculation) (m^2)	About 5,352	About 5,307 (1)	-45 (-0.8%)
Maximum PR (3) - Total PR - Domestic PR	 9.0 7.5	 9.0 8.0(2)	 No Change +0.5 (+6.7%)
Max GFA (3) Total GFA (m^2) Domestic GFA (m^2)	 About 48,168 About 40,140	 About 47,763(1)(2) About 42,456(1)(2)(3)	 -405 (-0.8%) +2,316 (+5.8%)
Max. BH (mPD)	120	140	+20 (+16.7%)
GIC Facilities(4) (m^2)	About 800	About 800	No Change
Sunken Plaza (m^2)	About 1000	About 1000	No Change
Under Notional Design			
No. of Residential Towers	3 towers	2 towers	-1 (-33.3%)
No. of Storeys - Domestic - Clubhouse - Podium - Basement	 29 storeys 1 storey 3 storeys 5 storeys	 31 storeys 1 storey 5 storeys 2 storeys	 +2 (+6.9%) No Change +2 (+66.7%) -3 (-60.0%)
Average Flat Size (m^2)	About 42.8(5)	About 42.8	No Change(5)
No. of Flats	About 938(5)(6)	About 992(6)	+54 (+5.8%)(5)
Anticipated Population	About 2251(5)(7)	About 2480(8)	+229 (+10.2%)(5)
Site Coverage (9)	Domestic portion: Not more than 40% Non-domestic portion below 15m: Not more than 100% Non-domestic portion above 15m: Not more than 65%	Domestic portion: Not more than 40% Non-domestic portion below 15m: Not more than 100% Non-domestic portion above 15m: Not more than 65%	No change

Remarks:

(1) As per area zoned "R(A)" under the Approved DSP with minor adjustment of area to reflect the net site area under land grant, resulting to corresponding adjustment in GFA.

(2) Excluding 10% of MiC floor area which could be disregarded from calculation of GFA and plot ratio as per Joint Practice Note No. 8.

(3) The domestic and non-domestic PR/GFA are for illustrative purpose only. To allow flexibility and optimum use of development potential, development at the Application Site is subject to a maximum domestic PR and total PR. The actual domestic and non-domestic PRs and GFAs would be worked out at detailed design stage.

(4) GIC to be exempted from GFA calculation under the Approved DSP.

(5) For a like-to-like analysis, an average flat size of about 42.8 sq.m. under the Current S16 Planning Proposal has been applied to both the approved DSP and current S16 scenarios in the comparison table to show the net increase in the number of flats and population. For reference, the notional

design for the Approved DSP for KC-015 approved by CE in C in Sep 2020 had adopted an average flat size of about 49.6 sq.m. with about 938 no. of flats and an estimated population of about 1940.

(6) The actual no. of flats would be worked out at detailed design stage.

(7) In lined with the notional design adopted for the Approved DSP, the estimated population is based on the average domestic household size of 2.4 persons in Lung Shing District Council Constituency Area under the Population By-census 2016.

(8) Based on Population Census 2021, the average domestic household size in Lung Shing District Council Constituency Area is 2.5 persons.

(9) Assumed in accordance with the First Schedule of Building (Planning) Regulation that for a Class C site with building height over 61m, the site coverage shall not exceed 40% for a domestic building or for the domestic part of a composite building, and shall not exceed 65% for a non-domestic building, or for the non-domestic part of a composite building. If the non-domestic podium does not exceed 15m in height, a site coverage of not more than 100% shall be permitted. The actual site coverage for the development at the Application Site will be determined at detailed design stage.

3.2 Retention of All Key Planning Gains of the Approved DSP Proposal

3.2.1 The current S16 Planning Proposal will retain all the following key planning gains of the Approved DSP Proposal, including:.

- Provision of a split-level sunken plaza of about 1,000sq.m., which connects with the future subway (to be constructed by CEDD) linking KTDA and its Underground Shopping Street (USS), to create a nodal point to connect this part of Kowloon City District with KTDA for enhancing the area's connectivity and walkability. The sunken plaza will be opened for public use and will incorporate retail components, sitting area and event space for place-making opportunities to enrich users' experience, as well as providing a 50m setback of towers from Prince Edward Road East to enhance wind flow penetration;

- Replanning and converting the existing portion of Sa Po Road within the Scheme to optimize the configuration of the sunken plaza, provide solution space for bus queuing at the pavement of Prince Edward Road East and enhanced pedestrian circulation;

- Provide not less than 800 sq.m. of GFA for GIC uses to meet the community needs; and

- Provide PVP to address local parking demand. The URA has submitted a Technical Note on Public Vehicle Park for KC-015 dated April 2025 to Transport Department (TD) to review the local parking demand in the area. The Technical Note proposed minor reduction of PVP provision from 300 nos. under the Approved DSP to 217 nos . to reflect an updated estimate of local parking demand. The Note has obtained no in-principle objection from TD (refer to Section 2.4 and Appendix B of the Traffic Impact Assessment (TIA) report provide in **Appendix A** for details) and no in-principle objection from Kowloon City District Council (KCDC) after consultation. As such, the current S16 Planning Proposal adopts the reduced numbers of PVP provision (i.e. 217 nos. of PVP for private cars).

3.3 Access, Parking and Servicing Facilities

3.3.1 While the proposed vehicular access points located at Sa Po Road and Kai Tak Road is the same as that proposed under the Approved DSP, the access arrangement under the subject S16 Planning Proposal has been refined to provide one ingress at Sa Po Road and one egress at Kai Tak Road for all types of vehicles to enhance the overall efficiency and smooth operation of the car park.

3.3.2 The proposed car parking and internal transport provision for the Current S16 Planning Proposal is summarised in **Table 3.2**. For details, please refer to the Traffic Impact Assessment (TIA) report provided in **Appendix A**.

Table 3.2 Proposed Car Parking and Internal Transport Provision

Facilities	Proposed Total Provision [(1)(2)]
Private Car Parking Spaces	106 (Including 2 accessible parking spaces)
Motorcycle Parking Spaces	13
L/UL Bays	HGV: 4 LGV: 5[(3)]

Remarks:

(1) For the detailed breakdown of the provisions for the residential, retail and GIC uses, please refer to the TIA report provided in Appendix A.

(2) Benchmarking 2019 HKPSG high-end requirement

(3) 1 no. of LGV L/UL space will be shared with the proposed GIC uses.

3.4 Above-ground Carpark Provision

3.4.1 The latest notional design of the S16 Planning Proposal has made reference to the PNAP APP-2 published in November 2025 to provide above-ground carpark. The PNAP APP-2 permits full GFA exemption for up to two levels of above-ground public and private carparks. Compared with the notional design for the Approved DSP of which all car parking spaces are located within a 5-storey basement carpark, the subject S16 Planning Proposal proposes to reduce the basement car park from 5 storeys to 2 storeys; with the remaining portion of car parking spaces (including public and ancillary carparks) to be located in 4 storeys of above-ground levels. Retail provision, L/UL bay provision and ancillary carparking facilities are located at ground floor, resulting in a 5-storey podium.

3.4.2 The design has obtained no in-principle objection from Buildings Department (BD) for full exemption of the above-ground carpark in view of the site constraints. An approved GBP with the 5-storey podium was obtained in February 2026 (**Attachment 1** refers). Details of the carparking provision and layout will be worked out at detailed design stage.

3.5 Implementation Programme

3.5.1 Subsequent to the approval of the DSP, the URA has completed land acquisition and is actively processing with the land grant application. Site clearance and demolition works were completed in 2023 and 2024 respectively and the land grant for the Approved DSP was executed in March 2026. An application to modify the land grant to reflect the proposals in this S16 Planning Application will be submitted upon obtaining approval from TPB.

3.5.2 The URA will continue with the detailed design and go through the required submission/ procedures for implementation of Scheme. The tentative completion year is anticipated by 2030/31.

4. PLANNING MERITS AND JUSTIFICATIONS

4.1 In line with the Government's directives to promote wider use of MiC in development projects

4.1.1 In response to the Government's directives to promote wider use of MiC in Hong Kong to enhance productivity of the construction industry, initiatives have been taken to review the planning and design of the Scheme for adopting MiC construction method, which enables better quality control, shortens construction period, reduces disturbance to the neighbourhood, simplifies the construction process and reduces construction wastes.

4.1.2 Under current technology, double slabs between MiC modules are required and typically adopted by current market practice. The floor to floor height will need to be increased for about 0.15m structural slab thickness to accommodate the double slabs design. Besides, with the 10% GFA exemption for MiC under JPN No. 8, additional residential floors will be required to accommodate the extra residential floor areas. Given the Project aims to bring community planning gains through redevelopment, including the provision of a 1,000sq.m. sunken plaza and a 50m tower setback from Prince Edward Road East to enhance wind penetration to the area, the incorporation of these planning gains will at the same time limit the design of building mass and layout.

4.1.3 By taking into account of the above considerations, the residential towers will need to increase for 11m (2 residential floors under the notional design) to accommodate the MIC design while fulfilling the provision of all these planning gains committed in the Project.

4.2 In line with the Government's initiatives of facilitating above-ground carpark design

4.2.1 With an aim to shorten construction time, lower construction costs and lessen site disruption and impacts to the surrounding environment, the subject S16 Planning Application proposed to reduce the basement car park to two storeys and to relocate a portion of the car parking spaces (including public and ancillary carparks) to above-ground levels. Such design refinement is also a response to the Government's initiative to facilitate the provision of above-ground carpark in development projects as promulgated in PNAP APP-2 published in November 2025, which allows full GFA exemption for up to two levels of aboveground carparks for both private and public car parks.

4.2.2 Since the relocation of underground carparks to above-ground levels will inevitably be constrained by the podium footprint and other uses that have already been planned for above-ground provision (e.g. retail, GIC, E&M, internal driveway area etc.), 5 levels of above-ground storey is required to accommodate the required public and ancillary carparking

spaces, L/UL bays and other internal transport provisions, resulting in a building height increase of about 9m. The proposed increase in BHR from 120mPD to 140mPD is necessary to allow sufficient vertical "headroom" to accommodate the above-ground carparks.

4.3 In Response to Market Needs and to Enhance Project Financial Viability

4.3.1 In view of the high vacancy rates and ample supply of commercial properties in recent years, the Financial Secretary (FS) in his 2025-2026 Budget Speech set out the Government's strategies to consider to rezone some of the commercial sites into residential use and allowing greater flexibility of land use. The further postponement of commercial land sales is also reflected in the recent 2026-27 Budget Speech.

4.3.2 In light of the unoptimistic commercial market sentiment, the subject S16 Planning Application proposes to increase maximum permissible DPR from 7.5 to 8.0, while keeping the maximum total PR at 9.0 could enhance flexibility on the mix of domestic and non-domestic GFAs, allowing for the construction of more domestic areas in response to the changing market conditions.

4.4 Enhance development flexibility and project's market attractiveness

4.4.1 The Development Facilitation Services (DFS) for the Scheme was organised by URA to enhance transparency of project information and obtain market feedback. During the DFS, developers generally indicated a preference for less retail space provision.

4.4.2 To optimise marketability and attractiveness of the Scheme, the current S16 Planning Proposal has slightly reduced the retail space provision to meet the market needs as per DFS's comments, if required. The reduction of non-domestic GFA will only reduce upper-floor retail shop area in the future development, given the demand on upper-level retail shops are less appealing to shoppers due to changing shopping habits in recent years. The resultant reduction of non-domestic GFA will not affect the provision of ground floor retail shops in the Application Site to maintain street vibrancy of the area. The corresponding impact on reduction in non-domestic PR will also be minimal, as the area is served with various existing retail facilities within walking distance.

4.5 Opportunity has been taken to increase housing supply by slight adjustment of permissible domestic plot ratio

4.5.1 The subject S16 Planning Application with minor relaxation of maximum permissible DPR from 7.5 to 8, is in line with the strategic housing policy of increasing housing supply in Hong Kong. Based on the notional design for the subject S16 Planning Application, it is anticipated that the Scheme could provide about 992 nos. of residential units, which

contributes to the housing supply for alleviating the problem of housing shortage in Hong Kong.

4.6 Compatible with existing and planned surrounding context

4.6.1 The proposed minor relaxation of BHR from 120mPD to 140mPD is comparable with the existing and planned surrounding context. The proposed BHR of 140mPD shall fit harmoniously with the stepped building height profile of the area, which gradually descends from inland area where buildings across Carpenter Road, i.e. Billionaire Royale and Le Billionaire with building height of 170mPD & 145mPD respectively, down to the Kai Tak area where buildings step down from 135mPD to 55mPD to the waterfront.

4.6.2 The Visual Impact Assessment (VIA) is included in **Appendix B** demonstrating that the proposed BHR of 140mPD is compatible with the surrounding developments and is far from reaching the 20% Building Free Zone for preserving views to ridgelines as recommended in the HKPSG.

4.7 Retain previously committed planning gains

4.7.1 The key planning gains and urban design features as proposed under the Approved DSP as mentioned in **Section 3.2** will be retained.

4.8 No Insurmountable technical impacts anticipated

4.8.1 Technical assessments have been conducted based on the notional design for the Application Site, the findings concluded that the Current Indicative Proposal would not induce any insurmountable technical impact in all aspects, including traffic, visual, air quality, noise, waste management, land contamination, drainage, sewerage, and water supply aspects. Relevant mitigation measures have been recommended where necessary.

<u>No Adverse Traffic Impact</u>

4.8.2 A Traffic Impact Assessment (TIA) (**Appendix A** refers) has been conducted and the findings shows that the current S16 Planning Proposal will not induce any adverse traffic impact. Traffic improvements measures previously proposed for the Approved DSP could cater for the traffic flow arising from this S16 Planning Application. All identified junctions will continue to operate with ample capacity in design year 2033 (i.e. 3 years after the tentative completion year of 2030).

<u>No Adverse Visual Impact</u>

4.8.3 A Visual Impact Assessment (VIA) (**Appendix B** refers) has been conducted for the Current Indicative Proposal. Comparing with the OZP Compliant Proposal, the anticipated changes in building mass will be limited, as the total PR remains unchanged at 9.0. The proposed minor

increase in building height from 120mPD to 140mPD will only result in minor magnitude of visual change and no adverse visual impact is anticipated.

No Adverse Air Quality Impact

4.8.4 An Air Quality Impact Assessment (AQIA) has been included in the Environmental Assessment (**Appendix C** refers) and the findings concluded no insurmountable air quality impact are anticipated from the Current S16 Proposal.

No Adverse Noise Impact

4.8.5 A Noise Impact Assessment (NIA) to assess the potential noise impact and identify any necessary noise mitigation measures will be submitted to the EPD for approval in accordance with the Special Condition (S.C.) stipulated in the Land Grant executed in March 2026. No adverse noise impacts are anticipated from the Current S16 Proposal.

No Adverse Waste Management Impact

4.8.6 Assessment on the potential waste management impact has been included in the EA report (**Appendix C** refers) and the findings shows that with good site management and mitigation measures, no adverse waste management impact is anticipated.

No Adverse Land Contamination Impact

4.8.7 The land contamination works, as identified in the Remediation Report of Land Contamination Assessment dated June 2025, have been completed. Consequently, the S.C. related to Land Contamination Assessment was removed from the executed land grant in Mar 2026. No adverse land contamination impact is anticipated. For details, please refer to Land Contamination section provided in the EA report (**Appendix C** refers).

No Adverse Water Quality Impact

4.8.8 Assessment on the potential water quality impact has been included in the EA report (**Appendix C** refers) and the findings concluded that with good site management and mitigation measures, no adverse water quality impact is anticipated during both construction and operational phases.

No Adverse Water Supply Impact

4.8.9 Assessment on the potential water supply impact has been included in the Water Supply Impact Assessment (WSIA) report (**Appendix D** refers) and the findings concluded that the planned / existing fresh and salt water supply systems in the vicinity are adequate to meet the demand arise from this S16 Planning Application.

No Adverse Drainage Impact

4.8.10 Assessment on the potential drainage impact has been included in the Drainage Impact Assessment (DIA) report (**Appendix E** refers) and the findings concluded that with the proposed drainage upgrades, no adverse impact to the drainage impact is anticipated.

No Adverse Sewerage Impact

4.8.11 A Sewerage Impact Assessment (SIA) to assess the potential sewerage impact and identify any necessary mitigation measures will be submitted to the EPD for approval in accordance with the Special Condition (S.C.) stipulated in the Land Grant executed in March 2026. No adverse sewerage impacts are anticipated from the Current S16 Proposal.

5. CONCLUSION

5.1 The Application Site of the subject S16 Planning Application comprises only the area zoned "Residential (Group A)" ("R(A)") within the URA Kai Tak Road / Sa Po Road Development Scheme (KC-015) and is subject to a maximum DPR of 7.5 and total PR of 9.0, with BHR of 120mPD.

5.2 With an aim to enhance development flexibility, facilitate the adoption of the MiC construction method, and accommodate above-ground carpark design, this S16 Planning Application seeks TPB's approval for a minor relaxation of DPR from 7.5 to 8.0 and BHR from 120mPD to 140mPD.

5.3 The proposed increase in BHR is primarily driven by two factors:

(i) an increase of about 11m for MiC; and

(ii) an increase of about 9m for above-ground carpark subject to detailed design.

Should MiC not be adopted by practisers in the implementation of the future development, the minor relaxation of BHR to 129mPD would still be needed for the above-ground carpark design.

5.4 The subject S16 Planning Application is a "non-scheme-based" submission. The notional design and indicative development parameters provided are solely for illustration purpose and for conducting necessary technical assessments. Except for any planning condition(s) to be imposed, the design of the future development will not be bounded by the notional design submitted in the S16 Planning Application.

5.5 Relevant technical assessments have been conducted and the findings concluded that the current S16 Planning Proposal is technically feasible and no insurmountable problem is anticipated.

5.6 The subject S16 planning application is supported by the following development planning merits and justifications:

- In line with the Government's directives to promote wider use of MiC in development projects;
- In line with the Government's initiatives of facilitating aboveground carpark design;
- In response to market needs and to enhance project financial viability;
- Enhance development flexibility and project's market attractiveness;
- Opportunity has been taken to increase housing supply by slight adjustment of permissible domestic plot ratio;
- Compatible with existing and planned surrounding context;
- Retain previously committed planning gains; and
- No Insurmountable technical impacts anticipated.

5.7 In light of the merits and justifications of S16 Planning Application of the Application Site presented in this planning statement, the TPB is

respectfully requested to give favourable consideration to the application.

25 February 2026

CHAN Wan Ming
[Issued to ESH Account]

Dear Sir/Madam,

Sa Po Road, Carpenter Road, Kai Tak Road, Prince Edward Road East, Kowloon
(Kai Tak Road / Sa Po Road Development Scheme KC-015)

I refer to your application received on 10 December 2025 for approval of proposals in respect of Building (Major Revision) .

2. Your submission of general building plans (GBP) has been subject to Stage I curtailed check under the curtailed check system announced in Practice Note for Authorized Persons, Registered Structural Engineers and Registered Geotechnical Engineers (PNAP) ADM-19. On this basis, I am satisfied that your submission is fundamentally acceptable and may be approved. Please note that the information and details that are deferred items for Stages II and III as listed in Appendix A1 of PNAP ADV-33 have not been checked irrespective such items are shown in the above GBP.

3. You are reminded that the curtailed check system covers only the fundamental issues of a building proposal. Although non-fundamental issues will not be raised as reasons for disapproving a submission, I expect that all contraventions of the Buildings Ordinance (BO) and its subsidiary legislation are rectified as and when they are discovered and in any event, before completion of the works is certified. In this connection, I ask you to note that the Building Authority (BA) attaches great importance to the proper assumption of duties and responsibilities by authorized persons, registered structural engineers and registered geotechnical engineers.

4. In accordance with the provisions of regulation 30(1) of the Building (Administration) Regulations (B(A)R), this is to notify that the above-mentioned plans submitted with your application received on 10 December 2025 are hereby approved. One set of the said plans, on which I have signified my approval, is enclosed. Your client has been sent a copy of this letter but I would request that you ensure that the contents are understood by him/her.

5. This approval should **NOT** be deemed to confer any title to land; to act as a waiver of any term in any lease or licence; or to grant any exemption from or to permit any contravention of any of the provisions of the BO or any other enactment. This approval does **NOT** authorize the commencement or the carrying out of any works shown in the approved plans. Section 14(2) of the BO refers.

6. Under regulation 10 of the B(A)R, you are required to submit a full set of GBP incorporating all plans and details required for Stage I and II as detailed in Appendix A1 of PNAP ADV-33 and to have obtained my approval of such GBP prior to applying for consent for the commencement of the superstructure works. You may seek the BA's approval of GBP (Stage II) in any amendment submission by indicating at the lower right-hand corner of each plan that **"This set of plans is submitted for Stage II Curtailed Check"**. Your attention is drawn to section 16(3)(a) of the BO.

屋宇署拓展部: 香港太古城太古灣道14號7樓
New Buildings Divisions, Buildings Department: 7/F, 14 Taikoo Wan Road, Taikoo Shing, Hong Kong

7. Your plans have been referred to the District Lands Officer/Kowloon East (DLO/KE) (contact person: Mr. Lam Yuen, Johnny at tel. 3842 7612) for comments. DLO/KE replied you direct on 13 February 2026. Your attention is drawn to section 14(2) of the BO.

8. The District Planning Officer/Kowloon (has no statutory objection to the submitted plans. Detailed comments were already conveyed to you on 22 January 2026.

9. The Chief Geotechnical Engineer/Mainland East (CGE/ME), GEO has no geotechnical objection in principle to the plan with conditions and requirements at **Appendix I**. You are required to resolve with CGE/ME directly.

10. The Engineer/Kowloon City, Traffic Engineering (Kln.) Division, Transport Department (TD) has comments and conveyed to you on 14 January 2026. You are required to resolve with C for T directly.

11. The Chief Highway Engineer/Kowloon (CHE/K) has comments at **Appendix II**. You are required to resolve with CHE/K directly.

12. The Director of Food and Environmental Hygiene (D of FEH) has comments at **Appendix III**. Your attention is drawn to section 4(3) of the BO in case any amendments are required.

13. The Director of Social Welfare has comment and conveyed to you on 20 January 2026. You are required to resolve with Social Welfare Department directly.

14. The Chief Engineer/Mainland South (CE/MS), Drainage Services Department has comments at **Appendix IV**. You are required to resolve the comments with CE/MS directly.

15. The Chief Engineer/Kowloon (CE/K), Water Supplies Department has comments at **Appendix V**. You are required to resolve with CE/K directly.

16. Your plans have been referred to East Development Office (EDO), Civil Engineering and Development Department for comments. His/her comments will be conveyed to you when available.

17. The Director-General of Communications, Office of the Communication Authority (OFCA) has comments at **Appendix VI**. You are required to resolve with OFCA directly.

18. The Director of Environmental Protection has no objection with comments conveyed to you on 16 January 2026.

19. Regarding paragraphs 8 to 18 above, your attention is drawn to section 4(3) of the BO in case any amendments are required.

/20……

20. It is noted that certain essential information on General Building Plans as detailed in Appendix A1 of PNAP ADV-33 will be submitted for approval in subsequent amendment plans at later stages. You are reminded that if the Building Authority's approval of the required plan with such essential information is not obtained at the later stages, the Building Authority may refuse to grant consent to the commencement of superstructure works under section 16(3)(a) of the Buildings Ordinance (BO) or refuse to issue occupation permit / temporary occupation permit under section 21(6)(a) of the BO. Your attention is drawn to regulation 10 of the Building (Administration) Regulations (B(A)R).

21. Pursuant to the paragraph 20 above, you are reminded to submit amendment building plans incorporating the following details for approval prior to the application for consent to the commencement of superstructure works:

(i) Diagrams and associated calculations of usable floor areas, usable floor spaces and fire compartments;
(ii) Diagrams with detailed calculations of gross floor area (GFA), particularly the area of access facilities for telecommunications and broadcasting services, refuse storage and material recovery chambers, amenity features, residents' recreational facilities and combined balconies, utility platforms with A/C platform to be exempted from GFA calculations; and
(iii) Area calculations for prescribed windows for critical situations.

22. Under regulation 10 of the B(A)R, you are required to submit amendment building plans incorporating the summary of GFA concessions for approval prior to the application for occupation permit.

23. A Form BD106 is enclosed herewith.

Yours faithfully,

(Digitally signed by)
(**KO Kiu-kin**)

1 INTRODUCTION

1.1 Background

1.1.1 The Kai Tak Road / Sa Po Road Development Scheme (KC-015) (the Scheme), is located in Kowloon City and is bounded by Kai Tak Road, Prince Edward Road East, Sa Po Road, and Carpenter Road. The Development Scheme Plan was approved by Chief Executive in Council (CE in C) on 29 September 2020 (the Approved DSP).

1.1.2 With an aim to enhance development flexibility to meet market needs, adopt Modular Integrated Construction (MiC) method and aboveground carpark design in response to the recent Government initiatives, the URA intends to seek Town Planning Board (TPB)'s approval on **minor relaxation of domestic plot ratio (DPR) restriction from 7.5 to 8.0 and building height restrictions (BHR) from 120mPD to 140mPD for the Application Site** (i.e. the area zoned 'R(A)" of the Approved DSP) in accordance to Section 16 of the Town Planning Ordinance (S16 Planning Application).

1.1.3 This S16 Planning Application is a non-scheme-based submission. The notional design and indicative development parameters provided in the application are solely for illustration purpose and for conducting necessary technical assessments. Except for any planning condition(s) to be imposed, the design of the future development will not be bounded by the notional design submitted in the S16 Planning Application.

1.1.4 Aurecon Hong Kong Limited was commissioned as a sub-consultant to prepare the Traffic Impact Assessment (TIA) in support of the S16 Planning Application for the Project. The purpose of this TIA is to propose (i) the potential internal traffic arrangements for and (ii) to access the potential traffic impact arising from the S16 Planning Application.

1.1.5 This TIA report has taken into account the latest TIA reports for the Project dated February 2019 for the Approved DSP (TIA for the Approved DSP), which the Transport Department (TD) had no in-principle objection on the assessments and the proposals provided in these reports.

1.2 Structure of the Report

1.2.1 Following this introduction, the report is structured as below:

- Section 2 describes the indicative development proposal for the Project, including the access arrangements and internal transports provisions;
- Section 3 overviews the existing traffic context in the vicinity of the Project;
- Section 4 presents the traffic forecasting methodology and results;
- Section 5 assess the potential traffic and transport impacts arise from the Project and provides mitigation measures, if necessary; and
- Section 6 summarises the findings.

2 PROPOSED REDEVELOPMENT

2.1 Proposed Redevelopment

2.1.1 The Application Site, with an area of about 5,307 m^2, is broadly bounded by Carpenter Road to the north, Kai Tak Road to the west and Sa Po Road to the east. Please refer to **Figure 2.1** for the location of the Application Site.

2.1.2 The S16 Planning Application seeks TPB permission for (i) **minor relaxation of maximum permissible DPR from 7.5 to 8.0** and (ii) **minor relaxation of BHR from 120mPD to 140mPD** to enhance development flexibility to meet market needs and at the same time facilitate design flexibility for adopting MiC and aboveground carpark design to the Scheme in response to the recent Government initiatives.

2.1.3 A comparison between the Approved DSP and the S16 Planning Application is summarized below:

- **Reduced proposed residential towers** to 2.
- **Increased proposed number of flat** by 54 nos.

2.1.4 A comparison table for the indicative parameters based on the notional design of the Approved DSP and the current S16 planning proposal is provided in **Table 2.1** below.

Table 2.1 Comparison of Development Parameters of the Approved DSP and the Current S16 Planning Proposal

Development / Facilities [1]	Approved DSP (a)	S16 Planning Application (b)	Difference (b) –(a)
Net Site Area (m^2)	About 5,352	About 5,307[1]	-45
Total Plot Ratio (PR)	9.0	9.0	0
Domestic Plot Ratio (PR)	7.5	8.0[3]	+0.5
Non-Domestic Plot Ratio (PR)	1.5	1.0[3]	-0.5
Total GFA (m^2)	About 48,168	About 47,763[1][2]	-405
Domestic GFA (m^2)	About 40,140	About 42,456[1][3]	+2316
Non-Domestic GFA (m^2)	About 8,028	About 5,307[1][3]	-2721
GIC (m^2)	About 800	About 800[4]	0
Max. Building Height (mPD)	120	140	+20
No. of Residential Towers	3	2	-1
Average Flat Size (m^2) [5]	About 42.8	About 42.8	0
No. of Flats	About 938	992	+54

Note:
(1) As per the net site area under land grant resulting to corresponding adjustment in GFA.
(2) Excluding 10% of MiC floor area which could be disregarded from calculation of GFA and plot ratio as per Joint Practice Note No. 8.
(3) For illustrative purpose only, the Scheme is subject to maximum domestic PR and total PR, the actual domestic and non-domestic PRs and GFAs will be worked out at detailed design stage.
(4) The actual GIC GFA is subject to further liaison and confirmation with relevant Government bureaux/ departments.
(5) For a like-to-like analysis, an average flat size of about 42.8 sq.m. under the Current S16 Planning Proposal has been applied to both the approved DSP and current S16 scenarios in the comparison table to show the net increase in the number of flats and population.

2.1.5 While the subject S16 Planning Application is a **non-scheme-based submission**, this TIA is prepared based on the indicative development parameters for S16 Planning Application (i.e. Column (b)) in **Table 2.1** above and the notional design provided in **Appendix A**, for the purpose of conducting technical assessments. The tentative completion year for the Scheme will be 2030.

2.2 Vehicular Access

2.2.1 The Application Site is bounded by Carpenter Road, Kai Tak Road, and Sa Po Road. Under the Approved DSP, two vehicular accesses were proposed, i.e. one at Kai Tak Road and one at Sa Po Road. The vehicular access at Sa Po Road would allow ingress for the private car park only, while the access at Kai Tak Road would accommodate ingress for PVP and goods vehicles, as well as egress for all vehicles. The locations of the vehicular accesses are illustrated in **Figure 2.2**.

2.2.2 In the current design, the locations of the vehicular accesses remain the same as in the previous proposal, with access points provided at Sa Po Road and Kai Tak Road. Considering that the previous design involved multiple internal intersections which could affect the car park operation within the site, the vehicular accesses have been rearranged to provide one ingress at Sa Po Road and one egress at Kai Tak Road for all vehicles, thereby enhancing the overall efficiency and smooth operation of the car park. The locations of the vehicular accesses are illustrated in **Figure 2.3**.

2.3 Internal Transport Facilities

2.3.1 With reference to the lease of the subject lot and the TIA for the Approved DSP which TD had no in-principle objection on the assessments and proposals provided therein, the parking and internal transport provision for the Scheme under the subject S16 Planning Application are proposed in accordance with the requirements as stipulated in approved Land Grant and presented in **Table 2.2** below.

Table 2.2 Proposed Provision of Internal Transport Facilities

Facilities	Parking Space Dimension	Parking Ratio from Land Grant	Required Parking Provision	Proposed Parking Provision
Private Housing (with 992 flats) (1)				
Private Car Parking	5m(L) x 2.5m(W) x 2.4m(H)	1 space for every 22.2 residential units or part thereof for 310 units of flat size less than 40 m^2	14	14
		1 space for every 12.6 residential units or part thereof for 682 units of flat size not less than 40 m^2 but less than 70 m^2	55	55
	Sub-total		69 (Include 2 Accessible Car Parking Space)	69 (Include 2 Accessible Car Parking Space)
Visitor Car Parking	5m(L) x 2.5m(W) x 2.4m(H)	5 spaces per block with more than 75 units	10	10
Motorcycle Parking	2.4m(L) x 1m(W) x 2.4m(H)	1 motorcycle parking space per 100 flats	10	10
Loading/unloading for Goods Vehicle	HGV 12m(L) x 3.5m(W) x 4.7m(H)	Minimum of 1 loading / unloading bay for goods vehicles within the site for every 800 flats or subject to a minimum of 1 bay for each housing block	2	2
Retail (with 5,307m^2 GFA) (1)				
Private Car Parking	5m(L) x 2.5m(W) x 2.4m(H)	1 space per 200 m^2 GFA	27 (Include 1 Accessible Car Parking Space)	27 (Include 1 Accessible Car Parking Space)
Loading/unloading for Goods Vehicle	HGV 12m(L) x 3.5m(W) x 4.7m(H)	1 space per 800 m^2 GFA (35%)	2	2
	LGV 7m(L) x 3.5m(W) x 4.7m(H)	1 space per 800 m^2 GFA (65%)	5	5(2)
Motorcycle Parking	2.4m(L) x 1m(W) x 2.4m(H)	10% of the total provision for private cars	3	3

Note:
(1) The parameters of the proposed development parameters are based on the indicative development parameters for the subject S16 Planning Application
(2) 1 no. of LGV L/UL space will be shared with the proposed GIC use.

2.3.2 As shown in **Table 2.2**, the parking provision aligns with the Land Grant requirements. Under the current design, the loading/unloading (L/UL) area is proposed on the G/F, while car parking spaces (including public and ancillary car parking spaces) will be provided in B1/F to B2/F of the basement levels and on 1/F to 4/F of the podium.

2.4 Public Vehicle Park

2.4.1 With reference to the previously approved TIA report in February 2019, 24 nos. of the metered car parking spaces at Sa Po Road and Kai Tak Road were proposed to be removed to accommodate the ingress or egress for the Application Site and enhance the pedestrian safety, it is illustrated in **Figure 2.4.** As a result, a total of 300 PVP parking spaces, including 83 surplus spaces, was proposed to be provided under the Approved DSP.

2.4.2 According to the parking demand and supply assessments submitted to TD on 11 April 2025 (which received no in-principle objection on 15 April 2025; refer to **Appendix B**), it was confirmed that only 195 car parking spaces would be required to cater for the future unmet demand. To adopt a conservative approach, a total of 217 parking spaces (including 22 surplus spaces) is proposed under the subject S16 Planning Application.

2.5 Previous Traffic Proposals

2.5.1 All traffic-related arrangements and mitigation measures previously proposed under the Approved DSP have been fully retained and incorporated into the current submission without modification. No new traffic proposals have been introduced under the subject S16 Planning Application.

Realignment of Sa Po Road

2.5.2 According to the previously approved TIA report from February 2019, it was proposed that Sa Po Road be realigned to form a perpendicular intersection with Kai Tak Road as illustrated in **Figure 2.5.** This realignment aims to improve pedestrian safety, enhance walkability and comfort, and promote smoother and safer traffic flow.

2.5.3 Sa Po Road will be reconfigured as a 24-hour, with both grade-separated link and at-grade accessible paths at the redeveloped KC-015 site, in line with Kowloon City District Council “Housing and Infrastructure Committee” Paper No. 20/18 submitted by CEDD (refer to the **Appendix C**) on the provision of USS entrance at Sa Po Road in future.

Enhanced Pedestrian Connectivity between Kowloon City and Kai Tak Development Area via the Sunken Plaza and USS

2.5.4 The realignment will improve connectivity between this part of Kowloon City area and Kai Tak Development Area (KTDA) via the proposed sunken plaza in the Project and the pedestrian tunnel by CEDD towards the future Underground Shopping Street (USS) at KTDA. It will also facilitate to create more at-grade space for walking and queue area along the Prince Edward Road East bus stops. Furthermore, the redesigned sidewalks will feature new paving, landscaping, and enhanced safety measures, such as traffic calming features and pedestrian crossings, to create a safer and more attractive environment for pedestrians.

3 EXISTING TRANSPORT CONTEXT

3.1 Adjacent Road Network

3.1.1 Sa Po Road is a north-south Local Distributor. The section between Kai Tak Road and Carpenter Road is a single carriageway of approx. 12 m in width, operating under one-way traffic flow. Metered parking spaces are provided along eastern sides of the road.

3.1.2 Kai Tak Road is a north-south Local Distributor. The section between Sa Po Road and Carpenter Road is a single carriageway of approx. 12 m in width, operating under one-way traffic flow. Metered parking spaces are provided along both sides of the road.

3.1.3 The section of Carpenter Road between Junction Road and Lok Sin Road is a single carriageway 2-lane 2-way road running in east-west direction. Public metered car parking spaces and motorcycle parking spaces are provided along the northern kerbside of Carpenter Road between Hau Wong Road and Lung Kong Road.

3.2 Traffic Surveys

3.2.1 Vehicular count surveys were conducted at the identified critical junctions in the immediate vicinity of the proposed redevelopment on Friday, 26 September 2025, and on Saturday, 27 September 2025, in order to capture the one-hour peak periods.

3.2.2 A comparison between the latest surveyed traffic data and the observed data from the previously approved TIA report shows that the latest surveyed traffic data is approximately 15% to 20% lower than the data from the previously approved TIA report. To ensure a conservative approach, the traffic data from the previously approved TIA report will be adopted for further analysis in this study.

3.2.3 Pedestrian count surveys were conducted at the identified critical footpath in the immediate vicinity of the proposed redevelopment on Wednesday, 12 November 2025, and on Saturday, 08 November 2025, in order to capture the one-hour peak periods.

3.3 Existing Traffic Conditions

Vehicular Traffic

3.3.1 A total of seventeen key local junctions within Kowloon City District have been identified for traffic survey and assessment in this TIA. These junctions are considered susceptible to potential traffic impacts arising from the Proposed Redevelopment. Their locations are illustrated in **Figure 3.1** and listed in **Table 3.1**.

Table 3.1 Identified Key Junctions

J17	Olympic Garden Roundabout	Roundabout

3.3.2 The observed vehicular traffic flows in weekday and weekend from the previously approved TIA report are presented in **Figure 3.2 and 3.3** respectively. A junction capacity assessment for the identified critical junctions was conducted based on the observed traffic flows. The results are summarised in **Table 3.2.** The junction calculation sheets are attached in **Appendix D**. **Table 3.2** demonstrated that all identified junctions are currently operating with ample capacity during both normal weekday and weekend morning and evening peak hours.

Table 3.2 Junction Operational Performance (Existing 2019)

Pedestrian Traffic

3.3.3 The identified critical pedestrian walkways are illustrated in **Figure 3.4**, and the surveyed hourly pedestrian demand in weekday and weekend are illustrated in **Figure 3.5 and 3.6 respectively**.

3.3.4 The Level of Service (LOS) assessment for the key pedestrian walkways based on the most critical hourly flows in the year of 2025, is presented in **Table 3.3**.

Table 3.3 Pedestrian Walkways LOS (Existing 2025)

Note:
(1) Refer to **Appendix E** for interpretation of LOS

3.3.5 From **Table 3.3**, all the identified key pedestrian walkways would operate satisfactorily with LOS of A.

3.4 Existing Public Transport Services

3.4.1 The area surrounding the Proposed Redevelopment is well-served by public transport network and services comprising railway, franchised buses, green mini-buses and taxis. This multi-model connectivity facilitates seamless access to key destinations across the district and beyond.

3.4.2 Rail-based: The Proposed Redevelopment benefits from direct proximity to the Sung Wong Toi MTR Station of Tuen Ma Line, with two nearby exits - Exit B2 & B3 located on Nam Kok Road. These close accesses to rail infrastructure offer strong connectivity for both residents and visitors of the Proposed Redevelopment.

3.4.3 Road-based: Over 80 franchised bus routes and 14 minibus routes operating in close vicinity of the Proposed Redevelopment. These services provide extensive connectivity to other districts over the territory. The full list of available bus and minibus service routes is summarized in **Table 3.4**.

3.5 Existing Pedestrian Facilities

3.5.1 The area surrounding KC-015 is well equipped with pedestrian facilities, including continuous footpaths and at-grade pedestrian crossings at major road junctions, providing convenient pedestrian circulation within the district.

3.5.2 In addition, several pedestrian subways are located in the vicinity of KC-015. These include:

- A pedestrian subway across Prince Edward Road West near Lion Rock Road, providing access to Boundary Street and St. Teresa's Hospital;
- A pedestrian subway across Prince Edward Road East near Tak Ku Ling Road, facilitating access to the future Kai Tak Development; and
- A subway system at Olympic Garden Roundabout, linking Prince Edward Road East, Prince Edward Road West, Argyle Street, and Ma Tau Chung Road, thereby enhancing pedestrian connectivity across major corridors.

4 TRAFFIC FORECAST

4.1 Design Year

4.1.1 The Proposed Redevelopment is scheduled for completion by 2030, with the design year set as 2033, three years following completion.

4.2 Traffic Forecasting Approach

Junction Capacity Assessment

4.2.1 As mentioned in **Section 3.2.2**, the surveyed traffic data is approx. 15% - 20% lower than that in the previously approved TIA report for both weekday and weekend conditions. In a conservative approach, the traffic data from the previously approved TIA report will be adopted in this study.

4.2.2 Based on the above, the year 2033 reference flow and year 2033 design flows are produced according to the following.

Year 2033 Reference Case = traffic data is extracted from Year 2033 Reference Scenario of the Previously approved TIA report + Development Traffic of Approved DSP

Year 2033 Design Case = 2033 Reference Case + Difference in Trip Generation due to Changing of Development Parameters

Pedestrian Walkway Assessment

4.2.3 Based on the above, the year 2033 reference and design pedestrian flows are produced according to the following.

Year 2033 Reference Case = Observed Pedestrian Flow x Adopted Growth Factor (i.e. 0.56%)
+ Approved DSP Pedestrian Trip Generation
+ Other Planned / Committed Development Pedestrian Trip Generation

Year 2033 Design Case = 2033 Reference Case + Difference in Pedestrian Trip Generation due to Changing of Development Parameters

4.3 Annual Growth Factor

4.3.1 To establish a suitable traffic growth factor for forecasting purposes, reference will be made to the Annual Average Daily Traffic as well as the HK Population Projections from publicised sources.

4.3.2 **Annual Traffic Census (ATC):** Based on the ATC, traffic count stations located in the vicinity of the Application Site have been reviewed. The Annual Average Daily Traffic (AADT) have been extracted and the corresponding annual percentage change between year 2019 and 2023 has been established to determine the historical traffic growth trend and the results are summarized in **Table 4.1**. The historical traffic growth reveals an increasing growth trend, with an average annual reduction of 0.27% in traffic volumes.

4.3.3 **Hong Kong Population Projections**: Population figures for the years 2025 and 2033 have been extracted from the Hong Kong Population Projections (2022-2046), published by Census and Statistics Department and are summarised in **Table 4.2**. Hong Kong's territorial population is projected to have a positive growth trend, with an average annual increase of approx. 0.56% between 2025 to 2033.

Table 4.1 AADT between 2019 and 2023 (from ATC)

Road	ATC Station No.	Annual Average Daily Traffic (AADT)					Average Annual Growth
		2019	2020	2021	2022	2023	
Junction Rd	3016	16,700	15,060	15,220	14,160	15,140	-2.42%
Nga Tsin Wai Road & Kai Tak Road	3284	8,420	7,880	8,220	7,830	6,610	-5.87%
Junction Road	3458	15,070	15,350	16,000	15,250	16,090	1.65%
Lok Sin Road	3489	8,860	7,840	8,180	7,790	8,220	-1.86%
Tak Ku Ling Road	3494	7,130	8,140	8,490	8,090	8,540	4.61%
Nga Tsin Wai Road	4076	11,420	10,690	11,140	11,290	13,730	4.71%
						Total Average Annual Growth	**0.27%**

Table 4.2 Hong Kong Population Projections in 2025 and 2033

Year	Resident Population (thousands)	Annual Growth Rate (p.a.) Between 2025 & 2033
2025	7,559.8	**+0.56%**
2033	7903.6	

4.3.4 **Annual Growth Factor**: For a conservative assessment approach, a **+0.56%** annual growth rate has been adopted to generate background traffic flows. This rate has been applied to the observed pedestrian flow obtained from the 2025 pedestrian surveys.

4.4 Planned and Committed Developments

4.4.1 A number of planned/ committed developments located in proximity to the Application Site have been identified and reviewed as summarised in **Appendix F** and illustrated in **Figure 4.1**.

4.4.2 **Table 4.3** summarises the pedestrian traffic generation rates adopted for this TIA, which are sourced from the consultant's in-house database and supplemented by pedestrian traffic rate surveys conducted at comparable nearby developments. The resulting pedestrian traffic volumes generated by the adjacent planned/ committed developments are presented in **Table 4.4.**

Table 4.3 Pedestrian Traffic Generation Rates

Development Type	Unit	Pedestrian Traffic Generation Rates			
		AM Peak		PM Peak	
		Generation	Attraction	Generation	Attraction
Private Housing	ped/ hr/ flat	0.48	0.06	0.15	0.37
Retail	ped/ hr/ 100m^2 GFA	0.4	0.5	5.5	6.6
GIC	Ped/hr/100m^2 GFA	0.328	0.983	0.557	0.246

	Total:	**8113**	**1164**	**4330**	**8356**

4.5 Vehicular Traffic Generations

4.5.1 The vehicular traffic generation and attraction of the Proposed Redevelopment of Approved DSP and Current S16 Planning Proposal have been estimated based on the traffic rates in TPDM Volume 1 Chapter 3 Appendix, and the results are summarized in **Table 4.5 and Table 4.6**.

Table 4.5 Vehicular Traffic Generations of the Proposed Redevelopment (Approved DSP)

Land Use	Vehicular Traffic Generation (pcu/hr) (2)			
	AM Peak		PM Peak	
	Generation	Attraction	Generation	Attraction
Domestic units (about 810 units) (1)	58	34	23	30
Retails (GFA approx. 8,028m^2) (1)	18	20	25	29
GIC (GFA approx. 800m^2) (1)	1	2	1	1
PVP (300 parking spaces) (3)(4)	54	60	24	42
Total:	**131**	**116**	**73**	**102**

Note:
(1) The development parameters would be referred to approved DSP
(2) 5% increment would be adopted in the technical assessment for design flexibility allowance
(3) Refer to **section 2.4.1.**
(4) Trip Generation of PVP is based on the site observation of the Public Vehicle Parking at Tung Lei Road near Lee Kau Yan Memorial School

Table 4.6 Vehicular Traffic Generations of the Proposed Redevelopment (Current S16 Planning Proposal)

Land Use	Vehicular Traffic Generation (pcu/hr) (2)(4)			
	AM Peak		PM Peak	
	Generation	Attraction	Generation	Attraction
Domestic units (about 992 units) (1)	71	42	28	37
Retails (GFA approx. 5,307m^2) (3)	12	13	16	19
GIC (GFA approx. 800m^2) (1)	1	2	1	1
PVP (217 parking spaces) (5)(6)	39	43	17	30
Total:	**123**	**100**	**62**	**87**

Note:
(1) The parameters of the proposed development are indicative only and subject to detailed design
(2) 5% increment would be adopted in the technical assessment for design flexibility allowance
(3) The actual GIC GFA is not yet confirmed and subject to liaison with relevant Government Bureaux/ Departments
(4) Trip Generation is based on the TPDM Volume 1 Chapter 3 Appendix
(5) Refer to **section 2.4.2.**
(6) Trip Generation of PVP is based on the site observation of the Public Vehicle Parking at Tung Lei Road near Lee Kau Yan Memorial School

4.5.2 The net difference of the trip generation between the approved DSP and Current S16 Planning Proposal is summarised in **Table 4.7.** As shown in **Table 4.7**, the trip generation of the current proposed scheme would be larger in AM peak period and decrease in PM peak period, compared with the previous approved DSP.

Table 4.7 Net Difference of Trip Generations between Approved DSP and Current S16 Planning Proposal

Scheme	Vehicular Traffic Generation (pcu/hr)			
	AM Peak		PM Peak	
	Generation	Attraction	Generation	Attraction
Approved DSP	131	116	73	102
S16 Planning Application	123	100	62	87
Total:	**-8**	**-16**	**-11**	**-15**

4.6 Pedestrian Trip Generations

4.6.1 Pedestrian trips generated from the Approved DSP and the Current S16 Planning Proposal have been estimated with reference to the traffic rates outlined in **Table 4.3**. The resulting pedestrian traffic generations are summarised in **Table 4.8 and 4.9.**

Table 4.8 Pedestrian Traffic Generations of the Approved DSP

Land Use	Pedestrian Trip Generations (ped/hr) (2)			
	AM Peak		PM Peak	
	Generation	Attraction	Generation	Attraction
Domestic units (about 810 units) (1)	389	49	122	300
Retails (GFA approx. 8,028m^2) (1)	32	40	442	530
GIC (GFA approx. 800m^2) (1)	3	8	4	2
Total:	**424**	**97**	**568**	**832**

Note:
(1) The development parameters would be referred to approved DSP
(2) 5% increment would be adopted in the technical assessment for design flexibility allowance

Table 4.9 Pedestrian Traffic Generations of the Current S16 Planning Proposal

Land Use	Pedestrian Trip Generations (ped/hr) (2)			
	AM Peak		PM Peak	
	Generation	Attraction	Generation	Attraction
Domestic units (about 992 units) (1)	476	60	149	367
Retails (GFA approx. 5,307m^2) (1)	21	27	292	350
GIC (GFA approx. 800m^2) (1)(4)	3	8	4	2
Total:	**500**	**95**	**445**	**719**

Note:
(1) The parameters of the proposed development are indicative only and subject to detailed design
(2) 5% increment would be adopted in the technical assessment for design flexibility allowance
(3) The actual GIC GFA is not yet confirmed and subject to liaison with relevant Government Bureaux/ Departments
(4) Pedestrian Trip Generation is based on the in-house survey data

4.6.2 The net difference of the pedestrian trip generation between the Approved DSP and Current S16 Planning Proposal is summarised in **Table 4.10.** As shown in **Table 4.10**, the pedestrian trip generation of the Current S16 Planning Proposal would be larger in AM peak period and decrease in PM peak period, compared with the Approved DSP.

Table 4.10 Net Difference of Pedestrian Trip Generations between the Approved DSP and Current S16 Planning Proposal

Scheme	Pedestrian Traffic Generations (ped/hr)			
	AM Peak		PM Peak	
	Generation	Attraction	Generation	Attraction
Approved DSP	424	97	568	832
Current S16 Planning Proposal	500	95	445	719
Total:	**+76**	**-2**	**-123**	**-113**

4.6.3 The pedestrian trips estimated in **Table 4.8 – Table 4.10** have been manually assigned to the surrounding pedestrian network/ transport facilities based on modal split data. This assignment takes reference from the Kowloon City District modal split statistics obtained from the 2021 Population Census, as presented in **Table 4.11**.

Table 4.11 Pedestrian Trips by Transport Mode

Main Transport Mode	Modal Split (1)
Rail	41%
Bus/ Public Light Bus	32%
Walk	14%
Others (2)	13%

Note:
(1) Refer to 2021 Population Census Table C204 (Kowloon City District)
(2) Others include private vehicle, taxi, etc.

5 TRAFFIC IMPACT ASSESSMENT

5.1 Junction Capacity Analysis

5.1.1 The results of the junction capacity analyses for the 2033 Reference and Design Forecasts under both weekday and weekend conditions for the Proposed Redevelopment are presented in **Figures 5.1 to 5.4** and summarised in **Tables 5.1 and 5.2**. The detailed junction calculation results are provided in **Appendix D**.

Note:
(1) Refer to Figure 3.1
(2) RC = reserved capacity, DFC = design flow/capacity ratio

5.1.2 As shown in **Table 5.1 and Table 5.2**, the identified critical junctions are projected to operate satisfactorily during peak hours in design year 2033. No adverse vehicular traffic impact from the Proposed Redevelopment is anticipated on the surrounding road network.

5.2 Pedestrian Walkway Assessment

5.2.1 The LOS assessment for the 2033 Reference and Design scenarios of weekday and weekend for the key pedestrian walkways is illustrated in **Figure 5.5 – 5.8** and summarised in **Table 5.3 and 5.4.**

Table 5.3 Pedestrian Walkways LOS (Year 2033 Weekday)

Walkway		Walkway Width (m)	Effective Width (m)	Pedestrian Flow (ped/hr)		LOS (1)	
				AM Peak	PM Peak	AM Peak	PM Peak
	2033 Reference Scenario

P7	Footpath at the northern side of Prince Edward Road East adjacent to Tak Ku Ling Road Rest Garden	2.6	1.6	560	980	A	A
P8	Footpath at the southern side of Ma Tau Chung Road adjacent to Dakota Drive	2.5	1.5	600	1030	A	A

Note:
(1) Refer to **Appendix E** for interpretation of LOS

5.2.2 From **Table 5.3**, all the identified key pedestrian walkways would operate satisfactorily with LOS of B or above. No adverse pedestrian traffic impact from the current S16 Planning Proposal is anticipated on the surrounding network.

6 SUMMARY AND CONCLUSION

6.1 Summary

6.1.1 Aurecon Hong Kong Limited was commissioned as a sub-consultant to prepare the Traffic Impact Assessment (TIA) for the Section 16 submission for KC-015. This application will seek Town Planning Board (TPB) approval for a minor relaxation of the domestic plot ratio from 7.5 to 8.0 and the building height restriction from 120 mPD to 140 mPD for the Application Site (i.e. the area zoned "R(A)" on the Approved DSP).

6.1.2 This S16 Planning Application is a non-scheme-based submission. The notional design and indicative development parameters provided in the application are solely for illustration purpose and for conducting necessary technical assessments. Except for any planning condition(s) to be imposed, the design of the future development will not be bounded by the notional design submitted in the S16 Planning Application.

6.1.3 The Application Site is bounded by Carpenter Road, Kai Tak Road and Sa Po Road. The vehicular access was proposed at the same location with the previously approved TIA, one access is located at Sa Po Road, and one access is located at Kai Tak Road. To enhance the overall efficiency and smooth internal parking operation, the vehicular accesses have been rearranged to one ingress and one egress for all vehicles.

6.1.4 The parking provision aligns with the Land Grant requirements. Under the current design, the loading/unloading (L/UL) area is proposed on the G/F, while car parking spaces (including public and ancillary car parking spaces) will be provided in B1/F to B2/F of the basement levels and on 1/F to 4/F of the podium. The technical note regarding parking demand and supply assessment, submitted to the TD on 11 April 2025, indicated that 195 public vehicle parking spaces are sufficient to cater to future unmet demand. This note received no in-principle objection on 15 April 2025 (refer to Appendix B). In view of this, the provision of PVP spaces has been reduced from 300 to 217, which remains a conservative approach.

6.1.5 The previous traffic proposal (i.e. the Realignment of Sa Po Road and Enhanced Pedestrian Connectivity between Kowloon City and Kai Tak Development Area via the Sunken Plaza and USS) was approved in the previous TIA report to improve safety issues and enhance landscaping have been retained and incorporated in the current S16 Planning Proposal. No new traffic proposals have been introduced under the current S16 Planning Application.

6.1.6 Traffic surveys have been conducted to establish the current traffic conditions in the vicinity of the subject site. Despite the latest surveyed traffic data is approx. 15% - 20% lower than that in the previously approved TIA report, this TIA report has adopted the traffic data from the previously approved TIA report as a conservative approach. The junction capacity assessments revealed that all identified local junctions are currently operating with ample capacity.

6.1.7 The operational performance of the identified local junctions and footpath have been assessed based on the anticipated year 2033 traffic flows and the pedestrian flow. The anticipated trip generation of the currently proposed scheme (i.e., the current S16 Planning Application) is expected to be higher during the AM peak period and slightly lower during the PM peak period for better traffic and pedestrian flow, compared with the previously approved scheme (i.e., the Approved DSP). The impact of the development on traffic and pedestrian flow is expected to be insignificant, with no adverse effects anticipated.

6.2 Conclusion

6.2.1 The traffic impact assessment results indicate that any additional traffic caused by the S16 Planning Application can be adequately absorbed by the existing surrounding road network without causing significant congestion or delay. Therefore, from a traffic engineering perspective, the proposed development is acceptable and will not generate significant negative traffic impacts in the vicinity.

Dear Hugo,

I refer to the captioned Technical Note.

Considering the proposed provision of 195 nos. of PVP car parking spaces, which is determined using the principles set out in TD DC no. 4/2022 with the latest parking demand survey and would lead to a more conservative number compared with the approach adopted in the 2019 TIA, I have no objection in principle to your proposed 195 nos. of PVP car parking spaces under KC-015.

Regards,
Simon LI

---

Dear Simon,

We have been appointed by Urban Renewal Authority to carry out the Study on the Technical Note on Public Vehicle Park of Urban Renewal Authority Kai Tak Road / Sa Po Road Development Scheme. Please find the enclosed TN of the captioned study for your review and comment.

Due to the tight programme of this project, your prompt response on or before 25 April 2025 would be very much appreciated.

Should you have any queries, please contact Mr. Hugo Li on [redacted] or via email: [redacted]

Best regards,
Hugo Li
Assistant Traffic Engineer, Aurecon

Technical Note on Public Vehicle Park of Urban Renewal Authority Kai Tak Road / Sa Po Road Development Scheme (KC-015)

Urban Renewal Authority

Reference: 523348

Revision: 0

2025-04-11

aurecon

Bringing ideas to life

1 BACKGROUND

1.1 Urban Renewal Authority (URA) appointed Aurecon Hong Kong Limited (Aurecon) in January 2023 to undertake Term Traffic Study and Assessment Consultancy Services for the Urban Renewal Authority Projects.

1.2 URA issued Service Order No. 017 to Aurecon in February 2025 to conduct a traffic study revisiting the proposed parking provision at the public vehicle park (PVP) of the proposed Urban Renewal Authority Kai Tak Road / Sa Po Road Development Scheme (KC-015).

1.3 This Technical Note aims to update the estimation of the unmet parking demand in the vicinity of KC-015 from two approaches: (i) same parking catchment area and same approach on projecting the future parking demand as in the KC-015 TIA approved by TD in 2019 (the 2019 Approved TIA) and (ii) Transport Department Departmental Circular No. 4/2022 (DC4/2022).

2 PUBLIC CAR PARKING DEMAND AND PROVISION AT KC-015

Development Site

2.1 KC-015 is bounded by Sa Po Road to the east, Prince Edward Road East to the south, Kai Tak Road to the west, and Carpenter Road to the north, as shown in **Figure 2.1**. The project is expected to be completed by 2030.

Approach 1 – the 2019 Approved TIA

2.2 In the 2019 Approved TIA, the parking demand surveys were conducted on weekdays and weekends for the eastern part of Kowloon City Action Area 3 (KC-AA3), which approximately covers the area of 300-meter from KC-015, as shaded blue in **Figure 2.2**.

2.3 The latest parking demand surveys were conducted on 21 February 2025 (Friday), 22 February 2025 (Saturday), and 23 February 2025 (Sunday), with the illegal parking and utilisation of the on-street metered parking within the parking catchment were recorded. The survey results are summarized in **Table 2.1** and **Table 2.2**, the peak period for parking demand occurred in weekend daytime, which would be adopted for the later analysis.

Table 2.1 Approach 1 – Surveyed Car Parking Demand (Weekday)

Road	No. of on-street metered parking space (1) (2)	Daytime Demand		Midnight Demand	
		No. of Illegal Parking	Total On-street Demand	No. of Illegal Parking	Total On-street Demand
Shek Ku Lung Road	9	1	10	0	9
Sa Po Road	2	10	12	9	11
Kai Tak Road	3	22	25	13	16
Tak Ku Ling Road	16	19	35	9	25
South Wall Road	32	26	58	0	24
Lung Kong Road	33	21	54	2	35
Nam Kok Road	47	11	58	0	31
Carpenter Road	18	11	29	0	13
Total	**160**	**121**	**281**	**33**	**164**

Note:
(1) The number of on-street metered parking spaces was determined based on on-site observations and HKeMeter data
(2) Includes accessible parking space
(3) Includes both metered and illegal parking

Table 2.2 Approach 1 – Surveyed Car Parking Demand (Weekend)

Road	No. of on-street metered parking space (1) (2	Daytime Demand		Midnight Demand	
		No. of Illegal Parking	Total On-street Demand	No. of Illegal Parking	Total On-street Demand

Weekend						
2025 Survey	**160**	**138**	**298**	**160**	**32**	**172**
2018 Survey	149	166	315	149	149	298

2.5 In projecting the parking demand for year 2033 (i.e., the completion year +3 years), a growth factor was derived from the traffic volumes at road links within the parking catchment, and the traffic volumes were extracted from the 2019-based Base District Traffic Models (BDTM) issued by Transport Department. The concerned road links are shown in **Figure 2.3** and the growth factor is derived in **Table 2.4**.

Table 2.4 2019 and 2031 Traffic Flows from 2019-based BDTM

Year	Summation of Traffic Volumes at Road Links in Figure 2.3 (pcu/hr)	Annual Growth Rate (p.a.) between year 2019 and 2031
2019	5,384.2	-0.71%
2031	4,941.5	

2.6 As shown in **Table 2.4**, the traffic forecasts from BDTM indicate a negative growth of -0.71% p.a. from 2019 to 2031. However, a nominal growth rate of +0.5% per annum is adopted for projecting the 2025 surveyed parking demand to 2033.

2.7 In **Table 2.5**, the projected 2033 car parking demand is estimated to be 310 nos., about 138 on-street metered parking spaces would be available within the parking catchment upon redevelopment of KC-015, hence the 2033 unmet parking demand estimated under Approach 1 is 172 nos.

Table 2.5 Approach 1 – 2033 Unmet Car Parking Demand

Parameters	Approach 1 Calculations	
Surveyed peak on-street car parking demand (weekend daytime)	A	298 nos.
Traffic growth factor (from 2019-based BDTM)	B	0.5% p.a.
2033 on-street car parking demand	C = A x (1 + B) [8]	310 nos.
Number of on-street metered parking spaces to be retained upon redevelopment of KC-015	D	138 parking spaces
2033 unmet car parking demand estimated under Approach 1	E = D – C	**172 nos.**

Approach 2 – TD's Departmental Circular No.4/2022

2.8 According to TD DC4/2022, an PVP generally serves an area within 500m from it. Given that the western portion of KC-AA3/ west of Nam Kok Road falls within KC-017's parking catchment and the area on south side of Prince Edward Road East is severed by this wide thoroughfare, these two areas are therefore excluded from the service catchment of the proposed PVP in KC-015. The 500m parking catchment of KC-015 is illustrated in **Figure 2.4**.

2.9 Parking surveys in the 500m parking catchment were conducted on 21–23 February 2025 (for roads within the 300m from KC-015) and on 29–31 March 2025 (for roads outside the 300m but within 500m from KC-015). The results are summarised in **Tables 2.6** and **2.7**.

2.10 **Tables 2.6 and 2.7** shown that there was a total of approximately 300 nos. of on-street parking demand recorded in daytime, and approximately 170 nos. in midnight. The peak period occurred in weekend daytime, which will be adopted in the later analysis.

2.11 The future unmet parking demand shall take into account the parking needs arising from those adjacent committed/ planned developments without ancillary parking facilities. Two redevelopment sites located within the catchment area, as shown in **Table 2.8** and **Figure 2.5**, are currently under construction and were identified having no ancillary parking facility. Their parking demand calculated according to the mid-range requirement of the current HKPSG is presented in **Table 2.9**.

2.12 While the residents' car parking requirement stipulated in HKPSG are ownership-related/ home-end demand corresponding to the maximum demand during night-time, some of these ownership-related demands would remain in the catchment area during day-time. Additionally, it is assumed that visitors' need for a parking space would primarily arise during day-time. A traffic survey at residential development "Upper East", which has similar transport characteristics as the two redevelopment sites mentioned above, was carried out to obtain data on the proportion of ownership-related parking demand that might remain during day-time. The parking demands of the two redevelopment sites are summarized in **Table 2.10.**

Table 2.6 Approach 2 – Surveyed Car Parking Demand (Weekday)

Road	No. of on-street metered parking space (1) (2)	Daytime Demand		Midnight Demand	
		No. of Illegal Parking	Total On-street Demand	No. of Illegal Parking	Total On-street Demand
Shek Ku Lung Road	9	1	10	0	9

Total	**164**	**143**	**307**	**13**	**177**

Note:
(1) The number of on-street metered parking spaces was determined based on on-site observations and HKeMeter data
(2) Includes accessible parking space
(3) Includes both metered and illegal parking

Table 2.8 Committed / Planned Development Without Ancillary Parking

Ref No.	Planned/ Committed Development	Proposed Use	No. of Units
1	456-464 Prince Edward Road West	Residential	200 Flats (1)
2	Eight Southpark	Residential	313 Flats (2)

Note:
(1) From BD's Monthly Digest, the total GFA for domestic use is 5,793 m², it is assumed that the average flat size is similar to that of Eight Southpark, and is about 29m², the estimated number of flats is therefore 200.
(2) Information from BD's Monthly Digest.

Table 2.9 Car Parking Demand of the Two Adjacent Redevelopment Sites

Ref No.	Planned/ Committed Development (1) (2)	Residents Parking (3)	Visitors Parking
1	456-464 Prince Edward Road West	14	5
2	Eight Southpark	21	5
Total		**35**	**10**

Note:
(1) Maximum domestic plot ratio under Ma Tau Kok OZP S/K10/30 is 7.5.
(2) Assumed no retails.
(3) Benchmarking 2021 HKPSG mid-range requirement.

Table 2.10 Unmet Car Parking Demand of the Two Adjacent Redevelopment Sites

Demand Type		Residents' Parking Demand	Visitors' Parking Demand	Total
		Ownership-related/ home-end	Usage-related/ destination-end	
Physical parking space required during peak period	Day-time	67% (1)	100%	**33**
		35(2) x 67% = 23	10(2) x 100% = 10	
	Night-time	100%	0%	35
		35(2) x 100% = 35	10(2) x 0 % = 0	

Note:
(1) Refer to para. 2.13, the proportion of ownership-related parking demand that might remain during day-time at "Upper East" was 67%.

	Upper East	456-464 PERW	Eight Southpark
Location	Sung On Street, To Kwa Wan	South Wall Street, Kowloon City	Nam Kok Road, Kowloon City
PT within 300m	Yes	Yes	Yes
Total GFA	30,210m^2	5,793m^2	9,135m^2
No. of residential units	1,008	200	313
Average flat size	30m^2	29m^2	29m^2

(2) Refer to **Table 2.9**

2.13 The 2033 unmet parking demand estimated from adopting DC4/2022 is 195 nos. and detailed in **Table 2.11**, below.

Table 2.11 Approach 2 – 2033 Unmet Parking Demand

Parameters	Approach 2 Calculations	
Surveyed peak on-street car parking demand (weekend daytime)	A	307 nos.
Parking demand of committed/ planned developments remain in KC-015 parking catchment during weekend daytime t (1)	B	33 nos.
2033 on-street car parking demand	C = A + B	340 nos.
Number of on-street metered parking spaces to be retained upon redevelopment of KC-015	D	145 parking spaces
2033 unmet car parking demand estimated under Approach 2	E = D – C	**195 nos.**

Note:
(1) Refer to **Table 2.10**

PVP parking spaces will be provided within KC-015

2.14 **Table 2.12** recapitulates the 2033 unmet parking demand derived from different approaches and survey data. It is suggested to adopt the results estimated from the approach stipulated in TD's Departmental Circular No. 4/2022. To conclude, a total of **195 nos**. of car parking spaces to cater for the future unmet parking demand will be provided in the proposed PVP in KC-015.

Table 2.12 2033 Unmet Parking Demand

Parameters	Approach 1 2019 Approved TIA		Approach 2 DC 4/2022

Appendix E

Level of Services

Table E-1 Description of Level-of-Service Definition (HCM 2000)

LOS	Flow Rate (ped/min/m)	Description
A	≤ 16	Pedestrians basically move in desired paths without altering their movements in response to other pedestrians. Walking speeds are freely selected, and conflicts between pedestrians are unlikely.
B	16 - 23	Sufficient space is provided for pedestrians to freely select their walking speeds, to bypass other pedestrians and to avoid crossing conflicts with others. At this level, pedestrians begin to be aware of other pedestrians and to respond to their presence in the selection of walking paths.
C	23 – 33	Sufficient space is available to select normal walking speeds and to bypass other pedestrians primarily in unidirectional stream. Where reverse direction or crossing movement exist, minor conflicts will occur, and speed and volume will be somewhat lower.
D	33 – 49	Freedom to select individual walking speeds and bypass other pedestrians is restricted. Where crossing or reverse-flow movements exist, the probability of conflicts is high and its avoidance requires changes of speeds and position. The LOS provides reasonable fluid flow; however considerable friction and interactions between pedestrians are likely to occur.
E	49 – 75	Virtually, all pedestrians would have their normal walking speeds restricted. At the lower range of this LOS, forward movement is possible only by shuffling. Space is insufficient to pass over slower pedestrians. Cross- and reverse-movement are possible only with extreme difficulties. Design volumes approach the limit of walking capacity with resulting stoppages and interruptions to flow.
F	> 75	Walking speeds are severely restricted. Forward progress is made only by shuffling. There are frequent and unavoidable conflicts with other pedestrians. Cross- and reverse-movements are virtually impossible. Flow is sporadic and unstable. Space is more characteristics of queued pedestrians than of moving pedestrian streams.

Appendix 1 Notional Design for the Approved DSP Proposal (Approved by the Chief Executive in Council (CE in C) on 29 September 2020.)

1. INTRODUCTION

1.1. This Visual Impact Assessment (VIA) was prepared in support of the planning application pursuant to Section 16 of the Town Planning Ordinance (Cap. 131) (S16 Planning Application), for minor relaxation of maximum domestic plot ratio (DPR) and building height restriction (BHR) for the URA Kai Tak Road / Sa Po Road Development Scheme (KC-015) (the Scheme).

1.2. The Scheme is located in Kowloon City and is bounded by Kai Tak Road, Prince Edward Road East, Sa Po Road and Carpenter Road. It adjoins Site C1 of URA Nga Tsin Wai Road / Carpenter Road Development Scheme (KC-017) at its southwestern boundary. It is currently vacant, as the demolition works were completed in 2024 (**Figure 1.1** and **Figure 1.2** refer).

1.3. The Application Site falls within the area zoned "Residential (Group A)" ("R(A)") on the approved URA Kai Tak Road / Sa Po Road Development Scheme Plan No. S/K10/URA1/2 (the Approved DSP) (**Figure 1.2** refers). It is subject to a maximum DPR of 7.5 and total plot ratio (PR) of 9.0, with BHR of 120mPD.

1.4. With an aim to enhance development flexibility to meet market needs, adopt Modular Integrated Construction (MiC) method and aboveground carpark design, this S16 Planning Application seeks Town Planning Board (TPB)'s permission for the Scheme on the following:

(i) minor relaxation of DPR from 7.5 to 8.0, with total permissible plot ratio remains the same as 9.0; and

(ii) minor relaxation of BHR from 120mPD to 140mPD.

1.5. The S16 Planning Application is a "non-scheme-based" submission. The notional design and indicative development parameters provided in the application are solely for illustration purpose and for conducting necessary technical assessments. Except for any planning condition(s) to be imposed, the design of the future development will not be bounded by the notional design submitted in the S16 Planning Application.

1.6. To support the S16 Planning Application, this Visual Impact Assessment (VIA) report is prepared to assess the potential visual impact arising by the S16 Planning Application in accordance with the TPB Guideline No. 41 – Guidelines on Submission of Visual Impact Assessment for Planning Applications to the Town Planning Board (TPB PG-No. 41).

1.7. This VIA report has made reference to the selected viewpoints (VPs) adopted in the Visual Appraisal for the Approved DSP dated February 2019 (VA for Approved DSP), with minor adjustments to account for the changes in development context. The VPs adopted in this VIA has obtained no in-principal objection from the Urban Design & Landscape Section of Planning Department (UD&L, PlanD) in October 2025. The notional design of the Approved DSP has been adopted as the baseline visual condition for assessment (**Appendix 1** refers).

1.8. This VIA report will cover the followings:

Section 2:	describes the indicative development proposal under the current S16 Planning Application;
Section 3:	identifies the area of assessment and the visual context of the Application Site;
Section 4:	identifies the key visual sensitive receivers;
Section 5:	appraises the potential visual impacts induced by the S16 Planning Application; and
Section 6:	summarizes the findings of the VIA.

2. THE INDICATIVE DEVELOPMENT PROPOSAL

2.1. The subject S16 Planning Application seeks TPB permission for (i) minor relaxation of maximum permissible DPR from 7.5 to 8.0, while keeping the total PR unchanged at 9.0 to enhance development flexibility to meet market needs and (ii) minor relaxation of BHR from 120mPD to 140mPD to facilitate the adoption of MiC and aboveground carpark design to respond to the recent Government initiatives.

2.2. The proposed minor relaxation of DPR from 7.5 to 8.0 could allow for construction of more domestic areas to meet the market needs. The relaxation also allows more flexibility on the PR interchangeability between domestic PR and non-domestic PR for the future development. It will not propose any restriction on the non-domestic PR, which allows flexibility in adjusting the final GFA mix and the provision of non-domestic PR at detailed design stage, subject to the maximum DPR of 8.0 and a total PR of 9.0 of the Application Site.

2.3. The proposed minor relaxation of BHR from 120mPD to 140mPD is as a result of two factors:

(i) an increase of about 11m for MiC; and

(ii) an increase of about 9m [1] for above-ground carpark subject to detailed design.

Should MiC not be adopted by practisers in the implementation of the future development, the minor relaxation of BHR to 129mPD would still be needed for the above-ground carpark design.

2.4. While the subject S16 Planning Application is a non-scheme-based submission, the notional block plan and section plan are provided in **Figure 2.1 and Figure 2.2** for illustration purpose and for conducting necessary technical assessments (Notional Design). Except for any planning condition(s) to be imposed, the design of the future development will not be bounded by the notional design submitted in the S16 Planning Application.

Comparison of the Approved DSP Proposal and the Current S16 Planning Proposal

2.5. A comparison of indicative development parameters between the notional design of the Approved DSP Proposal and the Current S16 Planning Proposal is provided in **Table 2.1** below.

[1] An increase of about 7 – 9m for adoption of above-ground carpark, subject to detailed design.

Table 2.1: Comparison of Indicative Development Parameters of the Approved DSP Proposal and Current S16 Planning Proposal

Development Parameters	Approved DSP Proposal [A]	Current S16 Planning Proposal [B]	Difference [B]-[A] (% change)
Site Area - Application Site Area (for PR Calculation) (m^2)	About 5,352	About 5,307 (1)	-45 (-0.8%)
Maximum PR (3) - Total PR - Domestic PR	 9.0 7.5	 9.0 8.0(2)	 No Change +0.5 (+6.7%)
Max GFA (3) Total GFA (m^2) Domestic GFA (m^2)	 About 48,168 About 40,140	 About 47,763(1)(2) About 42,456(1)(2)(3)	 -405 (-0.8%) +2,316 (+5.8%)
Max. BH (mPD)	120	140	+20 (+16.7%)
GIC Facilities(4) (m^2)	About 800	About 800	No Change
Sunken Plaza (m^2)	About 1000	About 1000	No Change
Under Notional Design			
No. of Residential Towers	3 towers	2 towers	-1 (-33.3%)
No. of Storeys - Domestic - Clubhouse - Podium - Basement	 29 storeys 1 storey 3 storeys 5 storeys	 31 storeys 1 storey 5 storeys 2 storeys	 +2 (+6.9%) No Change +2 (+66.7%) -3 (-60.0%)
Average Flat Size (m^2)	About 42.8(5)	About 42.8	No Change(5)
No. of Flats	About 938(5)(6)	About 992(6)	+54 (+5.8%)(5)
Anticipated Population	About 2251(5)(7)	About 2480(8)	+229 (+10.2%)(5)
Site Coverage (9)	Domestic portion: Not more than 40% Non-domestic portion below 15m: Not more than 100% Non-domestic portion above 15m: Not more than 65%	Domestic portion: Not more than 40% Non-domestic portion below 15m: Not more than 100% Non-domestic portion above 15m: Not more than 65%	No change

Remarks:

(1) As per area zoned "R(A)" under the Approved DSP with minor adjustment of area to reflect the net site area under land grant, resulting to corresponding adjustment in GFA.

(2) Excluding 10% of MiC floor area which could be disregarded from calculation of GFA and plot ratio as per Joint Practice Note No. 8.

(3) The domestic and non-domestic PR/GFA are for illustrative purpose only. To allow flexibility and optimum use of development potential, development at the Application Site is subject to a maximum domestic PR and total PR. The actual domestic and non-domestic PRs and GFAs would be worked out at detailed design stage.

(4) GIC to be exempted from GFA calculation under the Approved DSP.

(5) For a like-to-like analysis, an average flat size of about 42.8 sq.m. under the Current S16 Planning Proposal has been applied to both the approved DSP and current S16 scenarios in the comparison table to show the net increase in the number of flats and population. For reference, the notional design for the Approved DSP for KC-015 approved by CE in C in Sep 2020 had adopted an average flat size of about 49.6 sq.m. with about 938 no. of flats and an estimated population of about 1940.

(6) The actual no. of flats would be worked out at detailed design stage.

(7) In lined with the notional design adopted for the Approved DSP, the estimated population is based on the average domestic household size of 2.4 persons in Lung Shing District Council Constituency Area under the Population By-census 2016.

(8) Based on Population Census 2021, the average domestic household size in Lung Shing District Council Constituency Area is 2.5 persons.

(9) Assumed in accordance with the First Schedule of Building (Planning) Regulation that for a Class C site with building height over 61m, the site coverage shall not exceed 40% for a domestic building or for the domestic part of a composite building, and shall not exceed 65% for a non-domestic building, or for the non-domestic part of a composite building. If the non-domestic podium does not exceed 15m in height, a site coverage of not more than 100% shall be permitted. The actual site coverage for the development at the Application Site will be determined at detailed design stage.

2.6. All previously committed planning gains under the Approved DSP Proposal have been retained, including:

- Provision of a split-level sunken plaza of about 1,000sq.m., which connects with the future subway (to be constructed by CEDD) linking Kai Tak Development Area (KTDA) and its Underground Shopping Street (USS), to create a nodal point to connect this part of Kowloon City District with KTDA for enhancing the area's connectivity and walkability. The sunken plaza will be opened for public use and will incorporate retail components, sitting area and event space for place-making opportunities to enrich users' experience, as well as providing a 50m setback of towers from Prince Edward Road East to enhance wind flow penetration;

- Replanning and converting the existing portion of Sa Po Road within the Application Site to optimize the configuration of the sunken plaza, provide solution space for bus queuing at the pavement of Prince Edward Road East and enhanced pedestrian circulation;

- Provide not less than 800 sq.m. of GFA for GIC uses to meet the community needs; and

- Provide PVP to address local parking demand. The URA submitted a Technical Note on Public Vehicle Park for KC-015 in April 2025 to Transport Department (TD), proposing minor reduction of PVP provision from 300 nos. under the Approved DSP to 217 nos. to reflect an updated estimate of local parking demand. The Note has obtained no in-principle objection from TD and no in- principle objection from Kowloon City District Council (KCDC) after consultation. As such, the current S16 Planning Proposal adopts the reduced numbers of PVP provision (i.e. 217 private car parking spaces).

3. AREA OF ASSESSMENT

3.1 Baseline Visual Condition

3.1.1 To comprehensively appraise the potential visual impacts arising from the Current S16 Planning Proposal, the notional design of the Approved DSP Proposal, with maximum DPR of 7.5, total PR of 9.0 and BHR of 120mPD, will serve as baseline visual condition of the Application Site to assess the visual changes. The Notional Design of the Approved DSP Proposal is provided in **Appendix 1** and its indicative development parameters is available in **Table 2.1**.

3.2 Area of Visual Influence (AVI)

3.2.1 According to TPB PG-No. 41, the assessment area (i.e., the visual envelope) should cover the AVI within which the future development at the Application Site is pronouncedly visible from key sensitive viewers. The assessment area for the VIA is defined by the visual envelope ("VE") of the Application Site. The VE has taken 3 times of the proposed building height of the proposed development (i.e. 140mPD x 3 = 420m) as an assumption.

3.2.2 As illustrated in **Figure 3.1**, the assessment area extends to a cluster of public housing, which includes Mei Tung Estate, Tung Tau Estate and Tung Wui Estate, as well as a portion of the Kowloon Walled City Park to the north; the Light Public Housing at Olympic Avenue to the east; a cluster of medium-to-high rise residential developments in KTDA to the south; and the Nga Tsin Wai Road area which is the urban core of Kowloon City with a mixed of existing tenement buildings, recent high-rise residential developments and the planned URA KC-017 development to the west. Apart from the coverage of the assessment area, the strategic viewpoint from Quarry Bay Park located across the Victoria Harbour (i.e. SVP 4), has also been identified for assessment (**Figure 3.3** refers).

3.2.3 The VPs for selected this VIA has made reference to those adopted in the VA for the Approved DSP, as the visual context surrounding the Application Site remains largely unchanged that most of the VPs adopted in the VA for Approved DSP are considered applicable and valid for the current assessment. Minor adjustments have been made where necessary to reflect the changes in development context. The VPs

adopted in this VIA has obtained no in-principal objection from UD&L, PlanD in October 2025.

3.2.4 In view of the above, the following VPs, including 7 local VPs (**Figure 3.1** and **Figure 3.2** refer) and 1 Strategic VP (**Figure 3.3** refers), are identified for assessment:

Local VPs

VP 1: Prince Edward Road East Bus Stop
VP 2: Kai Tak Road
VP 3: Kowloon Walled City Park
VP 4: Future GIC Complex of KC-017 (near the existing entrance of Carpenter Road Park)
VP 5: Olympic Avenue
VP 6: Kai Tak Station Square
VP 7: Tung Tau Estate

Strategic VP

VP8: Quarry Bay Park (SVP4)

3.3 Visual Context and Character

3.3.1 The visual context is shaped by the combined composition of all the visual elements which come into sight of the viewers. Presently the assessment area is predominantly built-up areas with the following visual elements (**Figure 3.4** refers):

- The Application Site is currently vacant and is surrounded by site hoarding, as the demolition works were completed in 2024. The Application Site falls within the Nga Tsin Wai Road area, the urban core of Kowloon City, characterized with sporadic redevelopment, where older, low-rise tenement buildings coexist with recent high-rise residential developments.

- Immediately adjoins the Application Site in the same street block have two relatively new high-rise buildings, namely High Place (~87mPD) which is a private residential development adjoin the northeastern corner of the Application Site and the Carlson Court (~76mPD) at Sa Po Road which is an off-campus student residence managed by the Hong Kong Baptist University.

- Adjoining part of the south western boundary of the Application Site is the Site C1 of the URA KC-017 development. KC-017 was implemented by way of a development scheme in accordance with Section 25 of the URAO and has been approved by CE in C in September 2023. Site C1 of KC-017 is planned with a BHR of 40mPD, comprising a low-rise commercial/ retail block at its north and the at-grade gateway square at its south, which will connect with the existing Tak Ku Ling Road Rest Garden and the sunken plaza at the Application Site, forming a scalable gateway between the Nga Tsin Wai Road area of Kowloon City area and the KTDA. The remaining sites of KC-017 is located further west, which comprises Site A and C2 (also known as the main sites) planned for high-rise residential development with BHR of 160mPD, and Site B planned as a Government, Institution or Community (GIC) complex with BHR of 100mPD.

- The area to the west of the Application Site across Kai Tak Road comprises a mix of low-to-medium rise tenement buildings with ground floor shops, together with a recent high-rise residential development known as AVA 55 (~92mPD).

- To the north and northeast of the Application Site across Carpenter Road are two recent high-rise residential developments known as Billionaire Royale (~170mPD) and Le Billionaire (~145mPD).

- To the east of the Application Site across Sa Po Road are the medium-rise residential building named Po Shing Court (~52mPD) and the Regal Oriental Hotel (~51mPD).

- To the south of the Application Site across Prince Edward Road East is the KTDA, which features a mix of community, housing, business, tourism and infrastructural uses. The KTDA is under active construction and the area situated at the closest proximity to the Application Site is a cluster of planned residential developments with BHR of 100mPD to 135mPD. To the further south is the Kai Tak Sports Park with BHR of 55mPD, which mainly comprises the main stadium, public sports ground and indoor sports centre building with various active and passive open spaces.

3.3.2 Apart from the major visual elements discussed above, the vicinity includes various recreation grounds, such as Shek Ku Lung Playground to the north-east of the Application Site; Kowloon Walled City Park and

Carpenter Road Park to the north-west across the Carpenter Road, Olympic Garden and Argyle Street Playground to the further south-west and the Kai Tak Station Square within the KTDA to the further south-east across Prince Edward Road East.

3.3.3 With the consideration of the above, it is observed that the Application Site is situated within a dense urban core characterised by a stepped building height profile which gradually stepped down from inland area where buildings across Carpenter Road, i.e. Billionaire Royale and Le Billionaire with building height of 170mPD & 145mPD respectively, down to the Kai Tak area where buildings step down from 135mPD to 55mPD to the waterfront, which the Current S16 Planning Proposal would fully respect.

3.4 Visual Quality of Current S16 Planning Proposal

3.4.1 While the subject S16 Planning Application is a non-scheme-based submission, the Current S16 Planning Proposal proposed to adopt MiC construction method and aboveground carpark design, with incorporation of the following key visual qualities:

- **Compatibility with surrounding environment:** The future buildings at the Application Site with a maximum building height of 140mPD adheres to the established stepped building height profile of the area, which descent from inland area with taller buildings (e.g. Billionaire Royale with 170mPD) down to the Kai Tak area where buildings step down from 135mPD to 55mPD to the waterfront.

- **Enhance visual permeability of the surrounding developments:** By reducing the number of towers to 2 nos. and strategically repositioning them away from Kai Tak Road, the Current S16 Planning Proposal opens up the views of the neighbouring developments (e.g. the High Place and AVA 55), enhancing visual permeability and comfort of the surrounding area.

- **Enhance visual and spatial connection:** The Current S16 Planning Proposal retains the provision of a split-level sunken plaza which serves as a significant visual anchor to visually and spatially connect with the at-grade gateway square of the adjacent KC-017 and the existing Tak Ku Ling Road Rest Garden, forming a cohesive and sizable gateway between the urban core of Kowloon City and KTDA.

- **Maintain vibrant street frontage and visual interest:** The Current S16 Planning Proposal prioritizes visual interest at the human scale by ensuring the provision of active ground-floor retail frontages to maintain the vibrant and visually stimulating streetscape.

- **Preservation of strategic ridgeline views:** The proposed maximum building height of 140mPD ensures the preservation of strategic ridgeline views by remaining well within the 20% building-free zone below the ridgelines as recommended in the HKPSG, thus ensuring the visual connection to the natural mountain backdrop is well protected and maintained.

4. KEY VISUAL SENSITIVE RECEIVERS AT LOCAL VIEWPOINTS

4.1 As per the requirements of TPB PG-No. 41, key visually sensitive receivers (VSRs) are those people, who have views of the Application Site from the most affected VPs in the AVI, and they are most likely to be affected by the proposed visual change. The identified VSRs of the VIA include the public at popular areas for outdoor activities, recreation, rest, leisure and prominent travel routes where their visual attention may be caught by the proposed development.

4.2 VSRs are categorised based on the characters and what they engage in the public VPs. The sensitivity of receivers of visual changes will be influenced by:

1) The activities they are engaged in;
2) The duration for which the proposed development remains visible;
3) View towards the change is full or partial; and
4) The public perception towards the portion of the proposed development.

4.3 With consideration of the nature of the people who are mostly affected by the proposed visual changes at the key VPs, the selected VSRs of the subject VIA are categorised into two groups, namely;

1) **Recreation** – General public has sights on the Notional Design of the Application Site while engaging in recreational facilities. Their visual sensitivity varies depending on the type of recreational activity they are engaging in.

2) **Traveller** – General public has sights on the Notional Design of the Application Site in public passageways. Their visual experience depends on the speed of travel and whether their views will be continuous or occasional.

4.4 Based on the above criteria, the visual sensitivity of VSRs from the VPs are categorized into 3 grades (i.e. “High”, “Medium”, and “Low”), depending on the duration of stay at the VPs. For example, the visual sensitivity of VSRs from public open spaces is classified as “High”, while the visual sensitivity of travellers is classified as “Low”.

4.5 **Table 4.1** lists the visual sensitivity of the selected VSRs at the selected VPs.

Table 4.1 – Brief Analysis of Visually Sensitive Receivers at Selected Viewing Points

Visually Sensitive Receiver and Type of User (Recreation and/or Traveller)	**Approx. Viewing Distance**	**Quality of Existing View (Good / Fair / Poor)**	**Degree of Visibility on the Notional Design of the Application Site (Full /Partial / Glimpsed)** **Frequency of View of the Notional Design of the Application Site (Frequent / Occasional / Rare)**	**Sensitivity**
VP 1: Prince Edward Road East Bus Stop **VSR:** Nearby residents and pedestrians, users of the Kowloon City Bus-bus Interchange (BBI) **Type of User:** Traveller	About 100m to the south-west of the Application Site	**Fair –** An oblique view of the south-western boundary of the Application Site, capturing the pavement of Prince Edward Road East in the foreground with bus stops at Kowloon City BBI at the right, existing tenement buildings to the left and a sky view partially obstructed by existing medium-to-high rise buildings such as Le Billionaire, Billionaire Royale and the Regal Oriental Hotel at the back.	**Partial View –** The proposed sunken plaza, podium and the lower floors of the residential towers of the Notional Design are visible from this VP due to its proximity to the Application Site. **Frequent View –** This VP is located right next to various bus stop (i.e. the Kowloon City BBI) with a high level of pedestrian activity. Due to the proximity to the Application Site, the pedestrians and facilities users will have a frequent view of the Application Site.	High
VP 2: Kai Tak Road **VSR:** Nearby Residents, shoppers at G/F	About 35m to the west of the Application Site	**Fair –** The view of the western boundary, capturing vacant Application Site surrounded by site hoardings on the left, a row of low-to-medium rise tenement buildings on the right, and a sky view partially obstructed by a relatively new	**Partial View –** The podium and the lower floors of the residential towers of the Notional Design are visible from this VP due to its proximity to the Application Site.	Medium

Visually Sensitive Receiver and Type of User (Recreation and/or Traveller)	**Approx. Viewing Distance**	**Quality of Existing View (Good / Fair / Poor)**	**Degree of Visibility on the Notional Design of the Application Site (Full /Partial / Glimpsed)** **Frequency of View of the Notional Design of the Application Site (Frequent / Occasional / Rare)**	**Sensitivity**
shops and pedestrians/ drivers of Kai Tak Road **Type of User:** Traveller		high-rise building (i.e. the Carlson Court) and various residential developments in the KTDA in the background.	**Occasional View –** This VP is observed with low level of pedestrian and vehicular activities. The VSRs are mainly pedestrians and drivers passing by Kai Tak Road, who are mostly transient in nature, with short duration of stay and major attention on the road/ traffic condition.	
VP 3: Kowloon Walled City Park **VSR:** Tourist to Kowloon Walled City Park, facility users, nearby residents and pedestrians **Type of User:** Recreation	About 290m to the north-west of the Application Site	**Good –** The view of the north-western boundary of the Application Site, capturing the greenery within the park in the foreground, and a sky view partially obstructed by existing medium-to-high rise buildings in the background.	**Partial View –** The podium and the lower floors of the residential tower of the Notional Design will be screened off by the trees in the foreground. **Occasional View –** This VP is located within the Kowloon Walled City Park, an area frequently visits by many tourists and recreational users. The focus of the VSRs is on the park's heritage elements and leisure activities and their view towards the partially-blocked residential towers of the Notional Design is considered occasional.	Medium

Visually Sensitive Receiver and Type of User (Recreation and/or Traveller)	**Approx. Viewing Distance**	**Quality of Existing View (Good / Fair / Poor)**	**Degree of Visibility on the Notional Design of the Application Site (Full /Partial / Glimpsed)** **Frequency of View of the Notional Design of the Application Site (Frequent / Occasional / Rare)**	**Sensitivity**
VP 4: Future GIC Complex of KC-017 (near the existing entrance of Carpenter Road Park) **VSR:** Visitors to the Park, nearby residents and pedestrians **Type of User:** Recreation/ Traveller	About 380m to the west of the Application Site	**Fair –** The view of the western boundary of the Application Site, capturing trees at the entrance of Carpenter Road Park on the left, and low-rise buildings (i.e. the existing Lok Sin Tong Transitional Housing and some tenement buildings) on the right in the foreground, and a sky view partially obstructed by existing medium-to-high rise buildings in the background.	**Partial View –** The major views to the Application Site will be screened off by existing developments in the foreground, leaving only a partial view of the residential tower of the Notional Design. **Occasional View –** While the VSRs at this VP are primarily pedestrians walking along Carpenter Road who are transient in nature, the frequency of view is considered occasional due to the partial obstruction caused by existing buildings.	Medium
VP 5: Olympic Avenue	About 370m to the south-west of the	**Fair –** An oblique view of the south-western boundary of the Application Site, capturing a network of roads and flyovers in the foreground and a sky view partially	**Partial –** The podium and the lower floors of the residential tower of the Notional Design will be screen by the network of roads and flyovers and existing trees and vegetation in the foreground.	Low

Visually Sensitive Receiver and Type of User (Recreation and/or Traveller)	**Approx. Viewing Distance**	**Quality of Existing View (Good / Fair / Poor)**	**Degree of Visibility on the Notional Design of the Application Site (Full /Partial / Glimpsed)** **Frequency of View of the Notional Design of the Application Site (Frequent / Occasional / Rare)**	**Sensitivity**
VSR: Nearby residents and pedestrians/ drivers along the Olympic Avenue **Type of User:** Traveller	Application Site	obstructed by various existing high-rise, single-block buildings within Kowloon City.	**Rare View –** A low level of pedestrian activity is observed at this VP, within mainly pedestrian passing by the footpath of the Olympic Avenue and the construction sites of KTDA. The VSRs will have a rare view of the Application Site as they are mostly transient in nature.	
VP 6: Kai Tak Station Square **VSR:** Nearby residents and pedestrians **Type of User:** Traveller	About 440m to the south-east of the Application Site	**Poor –** An oblique view of the south-eastern boundary of the Application Site from KTDA, capturing an existing high-rise subsidized housing (i.e. Kai Yan Court) on the left, a construction site of a high-rise private residential development on the right in the foreground, and an obstructed sky-view in the background.	**Glimpsed View –** Views are mostly screened off by the existing buildings of Kai Yan Court and the construction site of high-rise private residential development in the foreground. **Rare View –** Although this VP is located within the Station Square with a high level of pedestrian activity observed, the frequency of views towards the Application Site is considered rare due to the obstruction caused by existing and construction sites of high-rise residential buildings in the foreground.	Low

Visually Sensitive Receiver and Type of User (Recreation and/or Traveller)	**Approx. Viewing Distance**	**Quality of Existing View (Good / Fair / Poor)**	**Degree of Visibility on the Notional Design of the Application Site (Full /Partial / Glimpsed)** **Frequency of View of the Notional Design of the Application Site (Frequent / Occasional / Rare)**	**Sensitivity**
VP 7: Tung Tau Estate **VSR:** Nearby residents and pedestrians/ drivers along Lok Sin Road **Type of User:** Traveller	About 340m to the north-east of the Application Site	**Fair –** An oblique view of the north-eastern boundary of the Application Site, capturing existing medium to high-rise public housing blocks (i.e. Tung Wui Estate and Tung Tau Estate) along both sides of Lok Sin Road in the foreground with a sky view partially obstructed by two high-rise buildings (i.e. Billionaire Royale and Le Billionaire)	**Partial View –** Major views will be screened off by existing developments in the foreground with partial view of the residential towers of the Notional Design. **Rare View –** While the VSRs at this VP are primarily pedestrians and drivers along Lok Sin Road who are transient in nature, the frequency of views is considered rare due to the obstruction caused by existing buildings.	Medium
VP8: Quarry Bay Park (Strategic VP (SPV4)) **VSR:** Facility users, pedestrians along the Quarry Bay Promenade	About 4.3km to the southeast of the Application Site on the opposite side of the harbour	**Good –** Long distance panoramic views towards the Application Site largely characterized by the existing high-rise and high-density development in Kwun Tong, Kowloon Bay and KTDA, featuring the Victoria Harbour and the continuous ridgelines extending from Beacon Hill to the Lion Rock and Kowloon Peak as backdrop.	**Glimpsed view –** long distance view of the Notional Design, which will be blended and compatible with the urban built environment along the harbourfront. **Rare view –** Although active pedestrian activities are observed and anticipated, the Notional Design will be largely screened off by buildings in KTDA. Meanwhile, the VSR's view along the promenade would mainly focus on	High

Visually Sensitive Receiver and Type of User (Recreation and/or Traveller)	**Approx. Viewing Distance**	**Quality of Existing View (Good / Fair / Poor)**	**Degree of Visibility on the Notional Design of the Application Site (Full /Partial / Glimpsed)** **Frequency of View of the Notional Design of the Application Site (Frequent / Occasional / Rare)**	**Sensitivity**
Type of User: Recreation			Victoria Harbour, skyline, ridgeline and urban developments.	

5 ASSESSMENT OF VISUAL IMPACTS

5.1 Methodology for the Appraisal of Visual Impacts

5.1.1 With reference to TPB PG-No. 41, the visual appraisal of the overall visual impacts to VSRs can be determined by four aspects:

1) Visual Composition (i.e., to assess the visual effects resulted from changes in massing, heights, disposition, forms etc. viz the overall visual backdrop);

2) Visual Obstruction (i.e., to assess the degree of visual obstruction and loss of views or visual openness due to the proposed development);

3) Effects on Public Viewers (i.e., to assess the visual changes from key public viewing points with a direct sightline to the proposed development); and

4) Effect on Visual Resources (i.e., to assess the change in visual condition, quality, and character of the AVI).

5.1.2 The resultant overall visual impact will be categorized into the following ranges of threshold:

Table 5.1 – Classification of Overall Visual Impacts

Classification	Description
Enhanced	The proposed development in overall term will improve the visual quality and complement the visual character of its setting from most of the identified key public VPs.
Partly Enhanced/ Partly Adverse	The proposed development will exhibit enhanced visual effects to some of the identified key public VPs and at the same time, with or without mitigation measures, exhibit adverse visual effects to some other key public VPs.
Negligible	The proposed development will, with or without mitigation measures, in overall term have insignificant visual effects to most of the identified key public VPs, or the visual effects would be screened or filtered by other distracting visual elements in the assessment area.

Slightly Adverse	The proposed development will, with or without mitigation measures, result in overall term some negative visual effects to most of the identified key public VPs.
Moderately Adverse	The proposed development will, with or without mitigation measures, result in overall term negative visual effects to most of the key identified public VPs.
Significantly Adverse	The proposed development will in overall term cause serious and detrimental effects to most of the identified key public VPs even with mitigation measures.

5.2 Appraisal of Visual Impacts

5.2.1 For the visual appraisal of the local VPs, photomontages of three development scenarios will be prepared for comparison of the changes before and after development of the Notional Design at the Application Site, namely:

i. **Existing Condition** – Illustrating the existing condition of the VPs.

ii. **Approved DSP Proposal** (i.e. the Baseline Scenario) – Referring to the notional design for the Approved DSP for KC-015, with maximum DPR of 7.5, total PR of 9.0 and BHR of 120mPD in accordance to the development controls of the subject "R(A)' zone in the approved DSP (**Appendix 1** refers).

iii. **Current S16 Planning Proposal** (i.e. the Proposed Scenario) – Referring to the Notional Design of the Current S16 Planning Proposal, with proposed maximum DPR of 8.0, total PR of 9.0 and BHR of 140mPD (**Figure 2.1** and **Figure 2.2** refers).

5.2.2 The appraisal of the visual impacts of each VP is conducted by comparing the visual changes between the Approved DSP Proposal and the Current S16 Planning Proposal and summarised in **Table 5.2** below. The corresponding photomontages are shown in **Figures 5.1 to 5.8**.

Table 5.2 – Appraisal of Visual Impacts of Selected Viewpoints

Location of VP	Distance and Direction from the Application Site:	VSR Type	Visual Composition	Visual Obstruction and Visual Permeability	Effect on Visual Elements and Resources	Effect on VSRs	Resultant Overall Visual Impact
VP 1: Prince Edward Road East Bus Stop	About 100m to the south-west of the Application Site	Traveller	As shown in **Figure 5.1**, the visual composition of this VP mainly features a wide pavement of Prince Edward Road East with bus stops (i.e. Kowloon City BBI) and various existing medium-to-high rise buildings (e.g. Le Billionaire, Billionaire Royale and the Regal Hotel etc.) Due to the close proximity to the Application Site, both the Approved DSP Proposal and the Current S16 Planning Proposal (both proposals) will inevitably	The visual openness to the sky is already partially obstructed by the existing medium-to-high rise buildings. Both proposals will result in further obstruction of the sky view, nevertheless a portion of the sky view is still visible. Comparing to the Approved DSP Proposal, the visual openness and permeability remains the same.	The key visual elements are the existing pavement of Prince Edward Road East with bus stops, the existing buildings and the partially obstructed sky view. Under both proposals, the sunken plaza, podium and the lower floors of the proposed towers will be visible and become a dominant visual element, which would reduce the existing sky view.	VSRs of this VP primarily comprise transient pedestrians and local residents, as well as passengers waiting at the bus stops. The attention of these VSRs is predominantly directed towards the road traffic and the buses at the Kowloon City BBI, which direct their line of sight away from the Application Site and resulting in only short, incidental views. Although the VSRs can view the proposed	Negligible

Location of VP	Distance and Direction from the Application Site:	VSR Type	Visual Composition	Visual Obstruction and Visual Permeability	Effect on Visual Elements and Resources	Effect on VSRs	Resultant Overall Visual Impact
			visible with a large building mass at this VP. Nevertheless, comparing with the Approved DSP Proposal, the visual composition remains the same.		If compared with the Approved DSP Proposal, there is no change in visual elements and resources.	towers under both proposals due to the close proximity of this VP to the Application Site, the impact of visual change on VSRs is considered negligible since the visual composition is the same in both proposals.	
VP 2: Kai Tak Road	About 35m to the west of the Application Site	Traveller	As shown in **Figure 5.2**, the visual composition of this VP mainly features low-to-medium tenement buildings along Kai Tak Road with a glimpse of planned residential development in KTDA across the	As the Application Site is currently vacant as demolition works were completed in 2024, this VP possess a relatively open sky view with only a small degree of visual obstruction by the existing buildings at the foreground.	The key visual elements are the existing buildings along Kai Tak Road. Under both proposals, the proposed sunken plaza, podium and the lower floors of	VSRs of this VP are mainly local residents returning home, shoppers at G/F shops and pedestrians/ drivers along Kai Tak Road, who are transient in nature with a relatively short duration of sight	Negligible

Location of VP	Distance and Direction from the Application Site:	VSR Type	Visual Composition	Visual Obstruction and Visual Permeability	Effect on Visual Elements and Resources	Effect on VSRs	Resultant Overall Visual Impact
			Prince Edward Road East in the background. Both proposals will inevitably visible with a large building mass at this VP due to its close proximity to the Application Site. Nevertheless, the visual composition remains largely the same when compared with the Approved DSP Proposal.	While, both proposals will result in some obstruction of the existing sky view, a portion of the sky view will remain visible. When compared directly with the Approved DSP Proposal scenario, the degree of visual openness and permeability remains largely the same.	the proposed towers will be visible and become a dominant visual element, which would reduce the existing sky view. When compared with the Approved DSP Proposal, the visual elements and resources remains largely the same.	towards the Application Site. Due to the close proximity to the Application Site, the VSRs can view the proposed tower under both proposals. Since the visual composition in both proposals remains largely the same, the impact of visual change on VSRs is considered negligible.	
VP 3:	About 290m to the north-west of the	Recreation	As shown in **Figure 5.3**, the visual composition of this VP mainly captures	This VP possess a relatively open sky view with small degree of	Despite the slight visual change brought by the	There will be slight impact on VSRs at this VP, as the Current S16 Planning Proposal will	Slightly adverse

Location of VP	Distance and Direction from the Application Site:	VSR Type	Visual Composition	Visual Obstruction and Visual Permeability	Effect on Visual Elements and Resources	Effect on VSRs	Resultant Overall Visual Impact
Kowloon Walled City Park	Application Site		the vegetations within the Kowloon Walled City Park in the foreground, and various existing middle-to-high rise buildings in the background. The visual composition remains largely unchanged, as park's vegetation screens off the building mass in both proposals. While a minor increase in building height is noted in the Current S16 Planning Proposal when compared to the Approved DSP Proposal, this visual composition remains	visual obstruction from the existing medium-to-high rise buildings. While the proposed towers under both proposals will be visible and will impinge upon this sky view, the additional impact caused by the minor height increase in the Current S16 Planning Proposal would be minor.	Current S16 Planning Proposal, the impact on key visual elements at this VP, namely are the existing vegetations within the Kowloon Walled City Park in the foreground and the background buildings and a partially obstructed sky view, is very minor when compared to the Approved DSP Proposal.	bring minor changes to the visual composition compared to the Approved DSP Proposal. In addition, as the VSRs namely, tourist of the Kowloon Walled City Park and nearby residents/ pedestrians, will likely be engaging in heritage visits and recreational activities, which their attention is primarily directed towards their immediate surroundings within the park, rather than towards distant view of the Application Site.	

Location of VP	Distance and Direction from the Application Site:	VSR Type	Visual Composition	Visual Obstruction and Visual Permeability	Effect on Visual Elements and Resources	Effect on VSRs	Resultant Overall Visual Impact
			compatible with the surrounding development context.				
VP 4: Future GIC Complex of KC-017 (near the existing entrance of Carpenter Road Park)	About 380m to the west of the Application Site	Traveller / Recreation	As shown in **Figure 5.4**, the visual composition of this VP is framed by existing trees at the entrance of Carpenter Road Park on the left and low-rise buildings (i.e. the existing Lok Sin Tong Transitional Housing and a few existing tenement buildings) on the right. The background consists of medium-to-high rise buildings that partially obstruct the sky view.	The existing sky view is already partially obstructed by the existing medium-to-high rise buildings in Kowloon City (i.e. Le Billionaire, Billionaire Royale and AVA 55). The visual openness will only result in minor additional obstruction when compared with the Approved DSP Proposal.	Despite the slight visual change brought by the Current S16 Planning Proposal, the impact on key visual elements, namely the existing trees, buildings and the partially obstructed sky view, is very minor when compared to the Approved DSP Proposal.	VSRs from this VP are transient in nature, which includes local residents and pedestrians on Carpenter Road as well as visitors en route to the Carpenter Park or the future GIC Complex of KC-017. Given their movement and short duration of stay, their attention is likely focused on immediate surroundings and road conditions rather than distant views of the	Slightly adverse

Location of VP	Distance and Direction from the Application Site:	VSR Type	Visual Composition	Visual Obstruction and Visual Permeability	Effect on Visual Elements and Resources	Effect on VSRs	Resultant Overall Visual Impact
			When compared to the Approved DSP Proposal, the Current S16 Planning Proposal incorporates a minor increase in building height, the overall visual composition remains compatible with the scale of the surrounding development context.			Application Site. As such, the effect of the visual changes on these VSRs is considered to be slight.	
VP 5: Olympic Avenue	About 370m to the south-west of the Application Site	Traveller	As shown in **Figure 5.5**, the visual composition of this VP captures a network of roads and flyovers in the foreground and a sky view partially obstructed by various existing high-	The visual openness to the sky is already partially blocked by the existing roads, flyovers and buildings. While both proposals will result in further obstruction of the sky	The visual elements at this VP includes roads and flyovers in the foreground and a sky view partially obstructed by existing buildings.	The VSRs are transient local residents and pedestrians on Olympic Avenue with short viewing durations, and the S16 Planning Proposal only induces minor	Slightly adverse

Location of VP	Distance and Direction from the Application Site:	VSR Type	Visual Composition	Visual Obstruction and Visual Permeability	Effect on Visual Elements and Resources	Effect on VSRs	Resultant Overall Visual Impact
			rise single-block buildings. The building mass under both proposals will be visible, but it will be partially screened off by the road network in the foreground. The incremental change induced by the S16 Proposal is limited to a minor increase in building height, which is compatible with the surrounding development context.	view, the additional reduction in visual openness and permeability caused by the minor increase in building height under the Current S16 Planning Proposal is considered minor when compared to the Approved DSP.	Although the proposed towers will be a visible element in this VP under both proposals, the minor increase in building height under the Current S16 Planning Proposal will only induce a slight change to the overall composition of visual elements and resources when compared to the Approved DSP Proposal.	building height increase, thus bring a very minor change to the visual composition when compared with the Approved DSP Proposal. As such, the effect of the visual changes on these VSRs is considered to be slight.	
VP 6:	About 440m to the south-east of the	Traveller	As shown in **Figure 5.6**, the visual composition of this VP consists of the	The existing sky view at this VP is limited, being largely obstructed by	The key visual elements at this VP consist of the	The VSRs at this viewpoint are the nearby residents and	Negligible

Location of VP	Distance and Direction from the Application Site:	VSR Type	Visual Composition	Visual Obstruction and Visual Permeability	Effect on Visual Elements and Resources	Effect on VSRs	Resultant Overall Visual Impact
Kai Tak Station Square	Application Site		high-rise subsidized housing buildings (Kai Yan Court) and private residential buildings under construction within the KTDA, which results in a narrow sky view. As the building mass in both proposals has been largely screened off by the existing buildings of Kai Yan Court and the buildings under construction, the visual composition remains largely the same.	existing buildings and those under construction in the KTDA. Since the proposed towers are largely obscured from view in both proposal, the minor height increase in the Current S16 Planning Proposal causes no change to the overall visual openness and permeability.	continuous building mass within the KTDA and a limited sky view. Under both proposals, the towers will be largely blocked by the foreground buildings. Nevertheless, the incremental change to visual elements and resources induced by the Current S16 Planning Proposal is minor, resulting solely from the slight increase in building height when	pedestrians of the KTDA. Despite the high level of activity at this VP, the effect on these VSRs is considered negligible due to the transient nature of the VSRs with their attention focused on the immediate surroundings and the limited view of the Application Site at this VP.	

Location of VP	Distance and Direction from the Application Site:	VSR Type	Visual Composition	Visual Obstruction and Visual Permeability	Effect on Visual Elements and Resources	Effect on VSRs	Resultant Overall Visual Impact
					compared to the Approved DSP.		
VP 7: Tung Tau Estate	About 340m to the north-east of the Application Site	Traveller	As shown in **Figure 5.7**, the visual composition of this VP is characterised by existing medium-to-high rise buildings along both sides of Lok Sin Road in the foreground, with a sky view partially obstructed by two high-rise buildings (i.e. Le Billionnaire and Billionnaire Royale). With building mass in both proposals being largely screen off by existing buildings, the minor increase in building height under the	The existing sky view is partially blocked by the buildings along Lok Sin Road. Since the proposed towers of the Notional Design have been largely screened off under both proposals, the minor increase in building height under the Current S16 Planning Proposal causes no discernible change to the existing visual openness and permeability.	The key visual elements at this VP includes the continuous building mass along both sides of Lok Sin Road. The proposed residential towers of the Notional Design will be largely blocked by and blends in with adjacent residential developments to form a continues residential building mass under both	Viewers from this VP are mainly local residents and pedestrians walking along Lok Sin Road. Since they are transient in nature with relatively short sight duration, the effect of visual changes on VSRs from this VP is considered negligible.	Negligible

Location of VP	Distance and Direction from the Application Site:	VSR Type	Visual Composition	Visual Obstruction and Visual Permeability	Effect on Visual Elements and Resources	Effect on VSRs	Resultant Overall Visual Impact
			Current S16 Planning Proposal does not result in a noticeable visual difference when compared to the Approved DSP Proposal, thus the change in visual composition compared with the Approved DSP Proposal is negligible.		proposals. Therefore, when compared to the Approved DSP, there is no material change to the composition of visual elements and resources.		
VP8: Quarry Bay Park (Strategic Viewing Point)	About 4.3km to the southeast of the Scheme, on the opposite side of the harbour	Recreation	As shown in **Figure 5.8**, visual composition of this viewpoint is characterised by the existing high-rise and high-density development in Kwun Tong, Kowloon Bay and KTDA, featuring the Victoria Harbour and the	Under both proposals, the mountain ridgeline and the 20% building-free zone remain entirely unobstructed. Furthermore, strategic views towards Victoria Harbour and the open sky are preserved and unaffected. As such,	The key visual elements at this VP comprises the view of the Victoria Harbour towards the Kowloon Peninsula with open sky view and the ridgeline as backdrop.	Key VSRs from this VP are the users and pedestrians of the Quarry Bay Promenade. Despite of the observed high level of pedestrian activities at this VP, the visual impact on these VSRs is considered	Negligible

Location of VP	Distance and Direction from the Application Site:	VSR Type	Visual Composition	Visual Obstruction and Visual Permeability	Effect on Visual Elements and Resources	Effect on VSRs	Resultant Overall Visual Impact
			continuous ridgelines extending from Beacon Hill to the Lion Rock and Kowloon Peak as backdrop. From this VP, the substantial building mass of the buildings in KTDA at the forefront has almost entirely shields the Application Site from view. Only a very limited portion of the Notional Design is visible under both proposals, and the change in visual composition between the two scenarios is therefore considered negligible.	the Current S16 Planning Proposal would have negligible impact on the overall visual openness and permeability from this VP.	Since both proposals would not interrupt the 20% building-free zone or the ridgeline, ensuring that the abovementioned key visual elements remain unaffected. As such, the effect on the overall visual elements and resources is considered negligible.	negligible as the primary visual focus of these VSRs is directed towards the Victoria Harbour, the beautiful ridgeline and skyline. Meanwhile, the proposed buildings under both proposals have been largely screened off by the buildings in KTDA.	

6 EVALUATION OF OVERALL VISUAL IMPACT

6.1 This VIA is submitted to evaluate the degree of visual impacts on VSRs from major public VPs arise by the subject S16 Planning Application. The notional design of the Approved DSP Proposal approved by CE in C in September 2020 is adopted as the baseline visual condition to access the potential impact arise by the Current S16 Planning Proposal.

6.2 **Table 6.1** below summarizes the visual sensitivity and impact of the selected VPs.

Table 6.1 – Summary of Visual Impacts

Viewing Points		Visual Sensitivity	Resultant Overall Visual Impact
VP 1:	Prince Edward Road East Bus Stop	High	Negligible
VP 2:	Kai Tak Road	Medium	Negligible
VP 3:	Kowloon Walled City Park	Medium	Slightly adverse
VP 4:	Future GIC Complex of KC-017 (near the existing entrance of Carpenter Road Park)	Medium	Slightly adverse
VP 5:	Olympic Avenue	Low	Slightly adverse
VP 6:	Kai Tak Station Square	Low	Negligible
VP 7:	Tung Tau Estate	Medium	Negligible
VP 8:	Quarry Bay Park (Strategic VP (SPV4))	High	Negligible

6.3 By comparing the views to the Approved DSP Proposal and the Current S16 Planning Proposal from the 8 selected VPs (7 local VPs and 1 SVP), the subject S16 Planning Application will have negligible to slightly adverse visual impacts across all assessed VPs. The anticipated changes in building mass will be limited, as the total PR remains unchanged at 9.0. The proposed minor increase in building height from 120mPD to 140mPD will only result in minor magnitude of visual change, as the Current S16 Planning Proposal generally blends in with the existing urbanscape.

6.4 In conclusion, the subject S16 Planning Application is considered fully acceptable from visual point of view.

Appendix 5.10 Detailed Assessment Results

1. Introduction

1.1.1. The Kai Tak Road / Sa Po Road Development Scheme (KC-015) (the Scheme), is located in Kowloon City and is bounded by Kai Tak Road, Prince Edward Road East, Sa Po Road, and Carpenter Road. The Development Scheme Plan was approved by Chief Executive in Council (CE in C) on 29 September 2020 (the Approved DSP).

1.1.2. With an aim to enhance development flexibility to meet market needs, adopt Modular Integrated Construction (MiC) method and aboveground carpark design in response to the recent Government initiatives, the URA intends to seek Town Planning Board (TPB)'s approval on minor relaxation of domestic plot ratio (DPR) restriction from 7.5 to 8.0 and building height restrictions (BHR) from 120mPD to 140mPD for the Application Site (i.e. the area zoned "R(A)" of the Approved DSP in accordance to Section 16 of the Town Planning Ordinance (S16 Planning Application).

1.1.3. This S16 Planning Application is a "non-scheme-based" submission. The notional design and indicative development parameters provided in the application are solely for illustration purpose and for conducting necessary technical assessments. Except for any planning condition(s) to be imposed, the design of the future development will not be bounded by the notional design submitted in the S16 Planning Application.

1.1.4. Allied Environmental Consultants ("AEC") has been appointed to conduct Environmental Assessment ("EA") to support the subject S16 Planning Application.

2. Objectives

2.1.1. The EA is prepared in support of the S16 Planning Application. The purpose of this EA is to identify and assess the potential impacts of air quality, noise, water quality, land contamination and waste management, based on the notional design and indicative development parameters of the Current S16 Planning Proposal and recommend relevant mitigation measures where necessary.

3. The Current S16 Planning Proposal

3.1.1. The Application Site, with an area of about 5,307 m^2, is broadly bounded by Carpenter Road to the north, Kai Tak Road to the west and Sa Po Road to the east (the Application Site). Please refer to ***Figure 3.1*** for the location plan.

3.1.2. The S16 Planning Application seeks TPB permission for (i) minor relaxation of maximum permissible DPR from 7.5 to 8.0 and (ii) minor relaxation of BHR from 120mPD to 140mPD to enhance development flexibility to meet market needs and at the same time facilitate design flexibility for adopting MiC and aboveground carpark design to the Scheme in response to the recent Government initiatives.

3.1.3. A comparison table for the indicative parameters based on the notional design for the Approved DSP and the current S16 planning proposal is provided in ***Table 3-1*** below.

Table 3-1 Comparison of Indicative Development Parameters of the Approved DSP and the Current S16 Proposal

Development Parameters	Approved DSP [A]	Current S16 Proposal [B]	Difference [B]-[A] (% change)
Site Area - Application Site Area (for PR Calculation) (m^2)	About 5,352	About 5,307 (1)	-45 (-0.8%)
Maximum PR (3) - Total PR - Domestic PR	9.0 7.5	9.0 8.0(2)	No Change +0.5 (+6.7%)
Max GFA (3) Total GFA (m^2) Domestic GFA (m^2)	About 48,168 About 40,140	About 47,763(1)(2) About 42,456(1)(2)(3)	-405 (-0.8%) +2,316 (+5.8%)
Max. BH (mPD)	120	140	+20 (+16.7%)
GIC Facilities(4) (m^2)	About 800	About 800	No Change
Split-level Sunken Plaza (m^2)	About 1000	About 1000	No Change
Under Notional Design			
No. of Residential Towers	3 towers	2 towers	-1 (-33.3%)
No. of Storeys - Domestic - Clubhouse - Podium - Basement	 29 storeys 1 storey 3 storeys 5 storeys	 31 storeys 1 storey 5 storeys 2 storeys	 +2 (+6.9%) No Change +2 (+66.7%) -3 (-60.0%)
Average Flat Size (m^2)	About 42.8(5)	About 42.8(5)	No Change(5)
No. of Flats	About 938(5)(6)	About 992(6)	+54 (+5.8%)(5)
Anticipated Population	About 2251(5)(7)	About 2480(8)	+229 (+10.2%)(5)
Site Coverage (9)	Domestic portion: Not more than 40% Non-domestic portion below 15m:	Domestic portion: Not more than 40% Non-domestic portion below 15m:	No change

Development Parameters	Approved DSP [A]	Current S16 Proposal [B]	Difference [B]-[A] (% change)
	Not more than 100% Non-domestic portion above 15m: Not more than 65%	Not more than 100% Non-domestic portion above 15m: Not more than 65%	

Remarks:

(1) As per area zoned "R(A)" under the Approved DSP with minor adjustment of area to reflect the net site area under land grant, resulting to corresponding adjustment in GFA.

(2) Excluding 10% of MiC floor area which could be disregarded from calculation of GFA and plot ratio as per Joint Practice Note No. 8.

(3) The domestic and non-domestic PR/GFA are for illustrative purpose only. To allow flexibility and optimum use of development potential, development at the Application Site is subject to a maximum domestic PR and total PR. The actual domestic and non-domestic PRs and GFAs would be worked out at detailed design stage.

(4) GIC to be exempted from GFA calculation under the Approved DSP.

(5) For a like-to-like analysis, an average flat size of about 42.8 sq.m. under the Current S16 Planning Proposal has been applied to both the approved DSP and current S16 scenarios in the comparison table to show the net increase in the number of flats and population. For reference, the notional design for the Approved DSP for KC-015 approved by CE in C in Sep 2020 had adopted an average flat size of about 49.6 sq.m. with about 938 no. of flats and an estimated population of about 1940.

(6) The actual no. of flats would be worked out at detailed design stage.

(7) In lined with the notional design adopted for the Approved DSP, the estimated population is based on the average domestic household size of 2.4 persons in Lung Shing District Council Constituency Area under the Population By-census 2016.

(8) Based on Population Census 2021, the average domestic household size in Lung Shing District Council Constituency Area is 2.5 persons.

(9) Assumed in accordance with the First Schedule of Building (Planning) Regulation that for a Class C site with building height over 61m, the site coverage shall not exceed 40% for a domestic building or for the domestic part of a composite building, and shall not exceed 65% for a non-domestic building, or for the non-domestic part of a composite building. If the non-domestic podium does not exceed 15m in height, a site coverage of not more than 100% shall be permitted. The actual site coverage for the development at the Application Site will be determined at detailed design stage.

3.1.4. While the subject S16 Planning Application is a "non-scheme-based" submission, this EA is prepared based on the indicative development parameters for S16 Planning Application (i.e. Column (B)) in ***Table 3-1*** above and the notional design provided in ***Appendix 3.1***, for the purpose of conducting technical assessments. The tentative completion year for the Scheme will be 2030/2031.

4. Implication of Environmental Impact Assessment

4.1.1. The Scheme is a planned as a residential development with commercial/ GIC facilities and there are no ecological valuable locations, country parks, or conservation areas within a 500m study area of the Current S16 Proposal. In view of the project nature and the location of the Application site, it is therefore not a designated project under the Environmental Impact Assessment (EIA) Ordinance (Cap. 499). This EA Report has been undertaken with reference to the guidance for environmental considerations provided in Chapter 9 "Environment" of the Hong Kong Planning Standards and Guidelines (HKPSG). This EA Report presents a study of the potential environmental impacts, with respect to air quality, noise, water quality, land contamination and waste management.

5. Air Quality Impact Assessment

5.1. Introduction

5.1.1. This section assesses the potential air quality impacts in association with the Current S16 Proposal by taking into account the following considerations:

- Road traffic emissions from nearby roads within proximity;
- Industrial emissions; and
- Potential cumulative air quality impacts, if any, from nearby major housing development.

5.2. Environmental Legislation, Standards and Criteria

5.2.1. The relevant legislations, standards and guidelines applicable to the present study for the assessment of air quality impacts include:

- Air Pollution Control Ordinance (APCO) (Cap. 311);
- Air Pollution Control (Construction Dust) Regulation;
- Air Pollution Control (Non-road Mobile Machinery) (Emission) Regulation;
- Air Pollution Control (Fuel Restriction) Regulation; and
- Control of Oily Fume and Cooking Odor from Restaurants and Food Business.

Hong Kong Air Quality Objectives

5.2.2. Air quality in Hong Kong is governed under the Air Pollution Control Ordinance ("APCO") (Cap. 311). Under this legislation, the Government has designated various Air Control Zones for the whole territory, and the new Air Quality Objectives ("AQOs") was taken into effect on 11 April 2025. The AQOs stipulate the statutory limits for seven pollutants and dictate the maximum number of allowable exceedances over specified periods as shown in .

Table 5-1 Hong Kong Air Quality Objectives

Pollutant	Averaging Time	Concentration Limit (ug/m^3)[i]	Number of Exceedances to be allowed per Calendar Year
Sulphur Dioxide (SO_2)	10-minute	500	3
	24-hour	40	3
RSP or PM_{10}[ii]	24-hour	75	9
	Annual	30	N/A
FSP or $PM_{2.5}$[iii]	24-hour	37.5	18
	Annual	15	N/A
Nitrogen Dioxide (NO_2)	1-hour	200	18
	24-hour	120	9
	Annual	40	N/A
Ozone (O_3)	8-hour	160	9
	Peak season	100	N/A
Carbon monoxide (CO)	1-hour	30,000	0
	8-hour	10,000	0
	24-hour	4,000	0
Lead (Pb)	Annual	0.5	N/A

Note:
[i] All measurements of the concentration of gaseous air pollutants, i.e., sulphur dioxide, nitrogen dioxide, ozone and carbon monoxide, are to be adjusted to a reference temperature of 293 Kelvin and a reference pressure of 101.325 kilopascal.
[ii] Respirable suspended particulates means suspended particles in air with a nominal aerodynamic diameter of 10 µm or less.
[iii] Fine suspended particulates means suspended particles in air with a nominal aerodynamic diameter of 2.5 µm or less.

Hong Kong Standards and Guidelines

5.2.3. The Hong Kong Planning Standards and Guidelines (HKPSG) also provide guidance for all private and public development projects. A summary of relevant environmental design guidelines extracted from Table 3.1 of the HKPSG Chapter 9 is provided below.

Table 5-2 Recommended Buffer Distance for Land Uses (Table 3.1 of HKPSG Chapter 9)

Polluting Uses	Sensitive Uses	Buffer Distance
Trunk roads and Primary Distributor	(a) Active and passive recreational uses (b) Passive recreational uses (c) Amenity areas	>20m 3 – 20m < 3m
District Distributor	(a) Active and passive recreational uses (b) Passive recreational uses	>10m <10m
Local Distributor	(a) Active and passive recreational uses (b) Passive recreational uses	>5m <5m
Industrial Chimneys	(a) sensitive uses (b) high-rise buildings (c) active open spaces	Within 500m, consult EPD 200m 10 – 100m
Odour sources	sensitive uses	200m

5.3. Background Air Quality

Existing Air Quality at the Nearest Roadside Monitoring Station

5.3.1. The background air quality of the Application Site has been accessed and the nearest EPD air quality monitoring station (AQMS) is the Mong Kok Roadside Monitoring Station which is adopted to represent the ambient air quality of the area. The previous 5 available years of air quality data, i.e., 2020 to 2024, are summarised in to depict local air quality trends.

Table 5-3 Historical Background Air Quality at Mong Kok Air Quality Monitoring Station

Pollutant	Averaging time	Concentration 2020-2024 (µg/m³)[1][2]					AQO (µg/m³)
		2020	2021	2022	2023	2024	
SO_2	4th peak 10-min	45	30	28	39	20	500
	4th peak 24-hr	10	10	7	9	7	40
PM_{10}	10th peak 24-hr	63	69	56	58	60	75
	Annual Average	29	**30**	26	29	26	30
$PM_{2.5}$	19th peak 24-hr	37	37	35	32	35	37.5
	Annual Average	**18**	**18**	**16**	**18**	**17**	15
NO_2	19th peak 1-hr	**214**	**201**	**224**	**212**	187	200
	10th peak 24-hr	**129**	**120**	119	**120**	102	120
	Annual Average	**74**	**70**	**64**	**68**	**65**	40
O_3	10th peak 8-hr	96	97	101	104	108	160
	Peak season	61	60	63	61	56	100
CO	1st peak 1-hr	1,810	2,130	1,670	1,340	1,880	30,000
	1st peak 8-hr	1,580	1,719	1,493	1,138	1,505	10,000
	1st peak 24-hr	1,323	1,479	1,414	1,014	970	4,000

Notes:

[1] Monitoring result(s) exceeding the AQO is/are bolded and underlined.
[2] All air quality data were extracted from EPD's Environmental Protection Interactive Centre.

5.3.2. Exceedances in the concentration of $PM_{2.5}$, PM_{10} and O_3 in the AQO have been recorded at Mong Kok Air Quality Monitoring Station. The exceedances of NO_2, $PM_{2.5}$ and PM_{10} are likely influenced by exhaust emissions from traffic on the busy networks (e.g. Tong Mi Road and Prince Edward Road West) in the Mong Kok Area.

Future Background Air Quality Condition

5.3.3. In view of the tentative completion year of the Current S16 Proposal will be in 2030, it is noted that the PATH v3.0 dataset only provides the nearest projected nearest background air quality concentrations for Year 2030. Therefore, the Year 2030 projections at Grid (42,34) have been adopted as the best available representation of the future background air quality for the Application Site. A summary of the background air quality concentrations for Year 2030 is presented in .

Table 5-4 Background Air Quality Concentration of Pollutants (Year 2030)

Pollutant	Averaging time	AQOs Concentration limit ($\mu g/m^3$) (number of exceedances to be allowed)	Background (42,34) [1][2]
SO_2	4th peak 10-min	500 (3)	20.21
	4th peak 24-hr	40 (3)	6.67
PM_{10}	10th peak 24-hr	75 (9)	50.56
	Annual Average	30	19.95
$PM_{2.5}$	19th peak 24-hr	37.5 (18)	29.22
	Annual Average	15	12.34
NO_2	19th peak 1-hr	200 (18)	90.78
	10th peak 24-hr	120 (9)	39.37
	Annual Average	40	17.66
O_3	10th peak 8-hr	160 (9)	**172.32**
	Peak season	100	**117.62**
CO	1st peak 1-hr	30,000 (0)	583.31
	1st peak 8-hr	10,000 (0)	501.95
	1st peak 24-hr	4,000 (0)	470.81

Notes:
[1] Prediction result(s) exceeding the AQO is/are bolded and underlined.
[2] Future background air quality is represented using PATH data at Level 1.

5.3.4. These data have demonstrated that the concentrations of pollutants are below the AQOs, except for O_3.is not directly emitted from an emission source. It is formed by the chemical reactions of NOx and VOCs under the presence of sunlight and a regional

pollution problem. O_3 is therefore not considered as a key parameter in this assessment.

5.4. Assessment Area and Representative Air Quality Sensitive Receivers (ASRs) during operation phase

5.4.1. In general, the assessment area for an air quality impact assessment (AQIA) is defined by a distance of 500m from the site boundary are shown in ***Figure 5.1.***

5.4.2. Representative air quality sensitive receivers (ASRs) of the Current S16 Proposal were identified for the assessment of the air quality impacts arising from the surrounding air pollution sources during the operational phase. After reviewing the layout, the identified ASRs during operational phase are shown in ***Figure 5.2a*** and ***Figure 5.2b,*** and summarised in .

Table 5-5 Representative Air Sensitive Receivers (ASRs)

ID	Ground level (mPD)	Flagplot Height (mAG)	Floor	Nature of ASR (Short-term/ Long-term) [1]	Usage of ASRs
A01-26	6.1	33.20-130.7	Residential 1/F-31/F	Long term	Residential
		7.5-24.55	Podium 1-5/F [2]	Short term	2/F: GIC [4] 5/F: Clubhouse
		1.50	G/F	Short term	Retail Sunken Plaza [3]
P01-65		-4.85	B1/F	Short term	Sunken Plaza [3]
		-9.95	B2/F	Short term	Sunken Plaza [3]

Remark:

[1]: Short term refers to the averaging time of 10min, 1-hour, 8-hour and 24-hour while long term refers to the averaging time of annual

[2] The ASRs at Podium 1–5/F will be short-term only in terms of duration of stay.

[3] Refer to the commercial use under the "purpose-designed non-domestic portion of a building connecting to the sunken plaza" as per the Approved Development Scheme Plan (DSP)

[4] Child Care Centre (CCC) will be provided as the designated Government, Institution and Community (GIC) use, in accordance with the Land Grant executed in March 2026.

5.4.3. The ASRs have been identified within the Current S16 Proposal and are summarised in . The ASRs comprise Sunken Plaza from B2/F to G/F and retail units at G/F are considered short-term usage ASRs, for which only short-term averaging time criteria are applicable. The ASRs located at 2/F consist of the designated Government, Institution and Community (GIC) use, which will be provided as Child Care Centre

(CCC). CCC operates during daytime only and are accordingly assumed to be short-term ASRs. Clubhouses as recreational facilities such as swimming pool and gymnasium, are also considered to be for short-term usage only. Openable windows will be provided in the habitable rooms of the residential units in Tower 1 and Tower 2; therefore, these are considered long-term ASRs.

5.5. Potential Air Quality Impact - Construction Phase

Emissions Sources from the Project

5.5.1. Foundation and superstructure works would be anticipated during the construction phase. Dust emissions in terms of Total suspended particulates (TSP), respirable suspended particulates (RSP) and fine suspended particulates (FSP) are the key air pollutants during construction. No demolition works will be carried out as there is no existing structure to demolish. MiC construction method will be adopted, and it reduces the extent of on-site construction activities. The reduction in on-site works also leads to fewer material handling processes and less vehicle movement within the Application Site thereby minimizing potential dust emissions within the Application Site. There is provision of basement floors thus soil excavation is expected.

5.5.2. Contractor(s) will be required to transport the excavated materials out from the site to avoid the cumulation of materials on site. Excavated materials will be reused as fill materials within the Current S16 Proposal to minimize dust emission due to transportation of materials. The total volume of stockpile materials generated from Application Site is around 38,967m^3. In case temporary stockpiling of dusty materials is required, the stockpiling location will be covered by tarpaulin sheets and backfilled as soon as possible.

5.5.3. The construction activities are expected to generate about 38,967m^3 of C&D waste as shown in ***Table 9-1***. The construction will last for 4 years, assuming a capacity of 7m^3 per truck, bulk factor of 1.2, 25 working days a month and the works will not be conducted simultaneously, it is estimated that a maximum of 1 truck trip per day would be required for the delivery of excavated material. In view of the estimated number of dump trucks arising from the transportation of inert C&D materials is low, the impacts from transportation off-site are expected to be limited.

5.5.4. Diesel-fuelled machinery operating on-site, including construction trucks and powered mechanical equipment (PMEs) may be the potential source of PM_{10}, $PM_{2.5}$, NO_2, SO_2, and CO during construction stage. The number of PMEs to be used per time over the work site shall be kept to a minimum and subject to selection of Contractor

and future construction management. Concurrent operation of PMEs will be avoided and PMEs are to be placed away from the ASRs as far as practicable to avoid adverse impacts to the nearby ASRs.

Emissions from Concurrent Projects

5.5.5. All potential concurrent projects within a 500m assessment area during construction phase of the Current S16 Proposal have been identified based on best available information and tabulated in ***Table 5-6*** and shown in ***Figure 5.3***.

5.5.6. It is anticipated that appropriate mitigation measures for air quality impact stipulated in the Air Pollution Control (Construction Dust) Regulation will be implemented by the contractors of the concurrent projects. In addition, careful programme management liaison will be arranged to ensure that construction activities near ASRs are efficiently scheduled to prevent concurrent works at the same interfacing locations. As a result, adverse cumulative air quality impact during the construction phase of the Current S16 Proposal is not expected.

Table 5-6 List of Concurrent Projects

Concurrent Projects		Tentative Construction Period	Approximate Distance from the Application Site (m)	Assessment of Cumulative Impacts
1	URA Ming Lun Street / Ma Tau Kok Road Development Scheme Plan No. S/K22/URA1/2 and To Kwa Wan Road / Ma Tau Kok Road Development	Since February 2024	100	- No ASRs are expected to be exposed to cumulative impacts. - The concurrent project is expected to be carried out in sections, small scale and in short durations. - Appropriate mitigation measures for air quality and construction noise impact are expected to be implemented by the contractors of the concurrent project. - Careful programme management and liaison will be arranged to ensure that construction activities are efficiently scheduled to prevent concurrent works at nearby interfacing locations. - Adverse cumulative air quality impact during construction phase of the Current S16 Proposal is not expected.
2	456-464 Prince Edward Road West	No available information	112	- Only ASR 9 and ASR 10 are potentially exposed to cumulative impacts. - The concurrent project is expected to be carried out in sections, small scale and in short durations. - Appropriate mitigation measures for air quality and construction noise impact are expected to be implemented by the contractors of the concurrent project. - Careful programme management and liaison will be arranged to ensure that construction activities are efficiently scheduled to prevent concurrent works at nearby interfacing locations. - Adverse cumulative air quality impact during construction phase of the Current S16 Proposal is not expected.
3	Eight Southpark (4-24 Nam Kok Rd)	No available information	218	- Substantial separation distance between the concurrent project and the Current S16 Proposal. - Appropriate mitigation measures for air quality and construction noise impact are expected to be implemented by the contractors of the concurrent projects. - Adverse cumulative air quality impact during construction phase of the Current S16 Proposal is not expected.
4	URA Project at Nga Tsin Wai Road / Carpenter Road (KC-017)	Tentatively 2027 Q3 to 2031	230	
5	Proposed Residential Development at 3-13 Nga Tsin Long Rd	No available information	320	
6	Residential site at 93 & 95 Hau	Commence 2025	368	

Concurrent Projects		Tentative Construction Period	Approximate Distance from the Application Site (m)	Assessment of Cumulative Impacts
	Wong Rd			
7	49 Lion Rock Rd	No available information	425	
8	67-77 Lion Rock Rd	No available information	425	

Proposed Mitigation Measures

5.5.7. With the implementation of sufficient dust suppression measures as stipulated under the Air Pollution Control (Construction Dust) Regulation and good site practices, significant adverse dust generated from the construction of the planned residential developments is not anticipated. Mitigation measures to control construction dust/ gaseous emissions listed below are recommended to be incorporated into future contractor specifications for the contractor's implementation:

- Wetting by water spraying or dust suppression chemical on dusty material before loading and unloading, stockpile of dusty materials, area where breaking, excavation or earth moving activities works is carried out, and unpaved main haul road.
- Providing hoarding of not less than 2.4m high from ground level along the site boundary which is next to a road or other public area.
- Providing effective dust screens, sheeting or netting to enclose any scaffolding built around the perimeter of a building.
- Covering or sheltering any stockpile of dusty materials.
- Disposing of any dusty materials collected by fabric filters or other pollution control system in totally enclosed containers.
- Properly treating any exposed earth, such as by compacting or hydroseeding, within 6 months after the last construction activity.
- Providing vehicle washing facilities at all site exits to wash away any dusty materials from vehicles body and wheels before they leave the site.
- Covering of dust load on vehicles before they leave the site.
- Use of ultra-low sulphur content for on-site generators to minimize black smoke emission.
- Providing water spraying system where available and applicable.
- Restricting heights from which materials are to be dropped, as far as practicable, to minimise the fugitive dust arising from unloading / loading.
- Where the public can be affected by exhaust fumes or smoke emission from any construction plants or activities, shielding the related activities by an incombustible screen such as corrugated sheet of at least 2m in width and 1.8m in height.
- Using enclosed chutes for dropping construction materials to ground level and the chutes are dampened regularly, if applicable.
- The foundation work can be carried out either by percussive piling method or non–percussive pilling method. For this project, the adoption of non–percussive piling method is anticipated which generates lower dust emissions.

- The area where vehicle washing takes place and the section of the road between the washing facilities and the exit point should be paved with concrete, bituminous materials or hardcore.
- Vehicles within the site are restricted to a maximum speed of 10 kph.
- Vehicles are inspected regularly and well maintained to ensure that they are operating efficiently and that exhaust emissions are not causing nuisance.
- Vehicle engines are turned off when they are not in use.
- Haul road of the Application Site is located as far as possible from nearby ASRs.

5.5.8. Requirements set out in the Air Pollution Control (Non-road Mobile Machinery) (Emission) Regulation to control potential emissions from non-road mobile machinery (NRMM) will need to be fully complied with. Therefore, gaseous emissions from diesel-fuelled construction equipment would be minor and would not cause any significant adverse air quality impacts.

5.5.9. To reduce SO_2 emissions from diesel-fuelled machinery operating on-site, Air Pollution Control (Fuel Restriction) Regulations was enacted in 1990 to impose legal control on the types of fuel allowed for use and their sulphur contents in commercial and industrial processes. To improve air quality and protect public health, EPD has introduced the Air Pollution control (Non-road Mobile Machinery) (Emission) Regulation since 1 December 2015, under which only approved or exempted NRMMs are allowed to be used in construction sites. In addition, all construction plants are required to use ULSD (defined as diesel fuel containing not more than 0.001% sulphur by weight) as stipulated in Environment, Transport and Works Bureau Technical Circular (ETWB-TC(W)) No.19/2005 on Environmental Management on Construction Sites. Furthermore, given the localised and small-scaled nature of the Project, as well as the small number of PMEs involved, adverse air quality impacts due to emissions from the use of PMEs would be unlikely.

5.6. Potential Air Quality Impact – Operational Phase

5.6.1. In accordance with EPD's Guidelines on Assessing the 'TOTAL' Air Quality Impacts, contributions from three tiers of emission sources, depending on their distance from the site, should be considered.

Tier 1 (Primary contributions): Project induced emissions
Tier 2 (Secondary contributions): Pollutant-emitting activities in the immediate neighbourhood
Tier 3: Background contributions: Pollution not accounted for in the above two tiers

Tier 1 – Emission from Current S16 Proposal

5.6.2. The nature of the Current S16 Proposal is not environmentally polluting and is primarily for residential use.2-storey basement carparks is proposed. The potential air quality and odour sources include

- Carparks
- Restaurants/ Commercial kitchens
- Refuse Collection Points

5.6.3. The air quality inside the car parks shall comply with the air pollutant standards as recommended by the ProPECC PN 2/96 Control of Air Pollution in Car Parks. Therefore, the mechanical ventilation system of the car parks shall be properly designed to face away from ASRs within site and in the vicinity. Furthermore, the exhaust outlet of the mechanical ventilation system of the car parks shall also be designed to away from the fresh air intakes as far as practicable. The location of the exhaust outlet and fresh air intake of the mechanical ventilation system is not available yet and will be provided at the detailed design stage.

5.6.4. The Current S16 Proposal will provide retail shops at G/F of the Podium and G/F -B2/F of the Split-Level Sunken Plaza. For any potential restaurants arising from this proposed usage, the EPD's guidelines on “Control of Oily Fume and Cooking Odour from Restaurants and Food Business” will be followed in the design of each restaurant for oily fume and odour control.

5.6.5. For refuse collection points, mechanical ventilation and air purifying facilities will be provided according to relevant guidelines. Sufficient management measures will be implemented, including removal of waste on a regular basis etc to minimize potential air quality and odour impact.

5.6.6. In view of relevant guidelines will be followed and implemented at carparks, restaurants/ commercial kitchens and refuse collection points, adverse air quality impact to ASRs within site and in the vicinity is not expected.

Tier 2 – Emissions within 500m study area

Vehicular Emissions from Open Road Traffic

5.6.7. Vehicular emissions from all open roads within the 500m Assessment Area would be taken into account in the assessment. Traffic forecast data, including 24-hour traffic flows and vehicle compositions, as provided by the Project Traffic Consultant would

be adopted. Submission of Traffic forecast data to Transport Department (TD) was made on 2 June 2026 as shown in ***Appendix 5.1***. Endorsement of the adopted traffic forecast data is being sought from TD and will be provided when it is available. The assessment years for air quality impacts would be determined based on the year with the highest emission within the next 15 years following commencement of operation of the Current S16 Proposal. Traffic forecasts for the identified roads would be assessed for four selected years, namely 2030 (the commencement year), 2035 (5 years after commencement), 2040 (10 years after commencement), and 2045 (15 years after commencement). The traffic forecasts for Air Quality Assessment in 2030, 2035, 2040 and 2045 are provided in ***Appendix 5.2***.

Vehicular Emissions from Minibus Terminus/Metered carpark/Public Transport Interchange

5.6.8. There are one Minibus Terminus (MT) and two metered carpark, and one Public Transport Interchanges (PTIs) found within 500m Assessment Area from the Application Site boundary, including Tung Tau Estate (Tung Lung Road) Minibus Terminus (TTEMT), Ning Yuen Street Carpark (NYSCP), Tung Lei Road Carpark (TLRCP) and Kai Tak Public Transport Interchange (KTPTI) as shown in ***Figure 5.4***. Those vehicular emissions would have the potential to cause air quality impacts to the Current S16 Proposal during the operational phase. NO2, RSP and FSP impacts due to vehicular emissions from the above-mentioned MT, metered carparks and PTI (including starting, idling and running emissions) were quantitatively assessed.

5.6.9. For vehicle activity data at TTEMT and KTPTI, the minibus and bus route timetables, including travelling time, arrival and departure times, and headways (in minutes), were referenced from information provided by the respective bus companies. For TLRCP, traffic activity data were referenced to the traffic flow of Tung Lei Road (Road ID: RD_013) as adopted in the traffic forecast as a conservative approach. For NYSCP, vehicle arrival and departure patterns were estimated with reference to the operating hours and number of parking spaces of the car park, and the emission factors for Light Goods Vehicles with a gross vehicle weight of 2.5–3.5 tonnes (i.e. LGV4) were adopted as a conservative approach.

5.6.10. Vehicle activity data adopted for the calculation of starting, idling, and running emissions associated with car parks (including NO, NO_2, RSP, and FSP) were referenced from the Calculation of Start Emissions in Air Quality Impact Assessment published by the Environmental Protection Department (EPD). This reference was used as the basis for calculating starting, idling, and running emissions. Starting and

running emission factors were predicted using the EMFAC-HK model (v4.3). Cold idling emissions were derived from emission factors provided in Annex A of the Calculation of Start Emissions in Air Quality Impact Assessment, while warm idling emissions were estimated using emission factors presented in Road Tunnels: Vehicle Emissions and Air Demand for Ventilation published by the World Road Association.

Vehicular Emissions from Portal

5.6.11. The deck of the Current S16 Proposal above Sa Po Road creates a tunnel-like structure. The vehicular emissions generated inside the tunnel is regarded as volume source and the calculation is referred with Road Tunnels: Vehicle Emissions and Air Demand for Ventilation published by the World Road Association. The location of the portal emission is shown in ***Figure 5.5***.

Industrial Chimney Emissions

5.6.12. Based on desktop study conducted on 11 Nov 2025, no existing chimneys were found within 500m of the Application Site. Given the Current S16 Proposal is for residential use, which is not environmentally polluting in nature and does not have provision of chimneys, hence, no chimney emissions will arise from the Current S16 Proposal and no adverse air quality impact due to chimney emissions is anticipated.

Odour Emission

5.6.13. Based on desktop study conducted on 11 Nov 2025, there are two existing sewage pumping stations within a 500m radius of the Application Site. Kowloon City No. 2 Sewage Pumping Station is located south-west of the site with a separation distance of 280m and Kowloon City No. 1 Sewage Pumping Station is located 400m east of the site. It is anticipated that with appropriate mitigation measures already implemented by the sewage pumping station, potential odour impacts from the sewage pumping stations to the Current S16 Proposal can be properly controlled.

Tier 3 – Background contributions

5.6.14. The background concentrations shall be predicted using the regional scale model "Pollutants in the Atmosphere and their Transport over Hong Kong" (PATH v3.0); and

Major sources identified within 4km from the Application Site boundary

5.6.15. Three major sources fall within the 4km assessment area namely Ma Tou Kok Gas Works, Diamond Hill Crematorium and Kai Tak Cruise Terminal. The emission

inventory of Kai Tak Cruise Terminal, Diamond Hill Crematorium and Ma Tau Kok Gas Works are made reference to the Appendix 3.6 of AEIAR-204/2017 - Kai Tak Multi-purpose Sports Complex, Specified Process Licence (L-12-006(5)) and Appendix 3.5 of AEIAR-204/2017 - Kai Tak Multi-purpose Sports Complex respectively.

5.7. Assessment Methodology

Selection of EMFAC year

5.7.1. The assessment years for air quality impacts would be determined based on the year with the highest emission within the next 15 years following commencement of operation of the Current S16 Proposal. Traffic forecasts for the identified roads would be assessed for four selected years, namely 2030 (the commencement year), 2035 (5 years after commencement), 2040 (10 years after commencement), and 2045 (15 years after commencement). For each assessment year, traffic forecast data would include hourly traffic flows for 18 vehicle classes (in accordance with EMFAC-HK model v4.3) and 24-hour hourly traffic speeds for each identified road. The traffic forecast projections have been submitted to the TD for endorsement by the Project Traffic Consultant.

5.7.2. Sensitivity test will be conducted to determine the total Emission factor (EF) and total vehicle kilometres travelled (VKT) within 500m assessment area using the projected traffic flow with vehicular emission factors in 2030, 2035, 2040 and 2045. The results of the sensitivity test are presented in and ***Appendix 5.3***. Highest EF at the selected year would be adopted for the assessment. Zero-emission vehicles were included in the composite emission factors output by SAMP v2.1. Based on the results, the total emission for NO_2, NO, NO_x, RSP and FSP is the highest among the four sets of data. Therefore, EMFAC year in 2030 with traffic year in 2030 has been selected as the worst-case model year for the air quality.

Table 5-7 Summary of Total Pollutant Emissions (from SAMP V2.1)

EMFAC year	Traffic Year	NO_2	NO	NO_x	FSP	RSP
2030	2030	5.33	67.08	72.41	2.11	2.30
2035	2035	3.49	23.55	27.04	0.67	0.73
2040	2040	1.93	10.89	12.82	0.30	0.33
2045	2045	1.18	6.46	7.64	0.20	0.22

Note:

[1] Temperature and humidity assumptions: AnnualHourMin

Open Road Emissions

5.7.3. The predicted 24-hour traffic flow and vehicle compositions at the identified roads was provided by the traffic consultant according to the methodology endorsed by Transport Department (TD) and are presented in ***Appendix 5.2***. The open roads within the assessment area were modelled as "LINE" sources produced by SAMP as shown in ***Appendix 5.4***. The EMFAC mode under the latest EMFAC-HK model (version 4.3) has been used by EPD's Smart Air Modelling Platform (SAMP) to derive the hourly composite vehicular running emission rates of NO_2, NO, RSP and FSP, based on the predicted 24-hour traffic forecast data for 18 vehicle classes.

5.7.4. EMFAC-HK v4.3 model was adopted in SAMP v2.1 to estimate the vehicular emission rates of NOx (i.e. initial NO + initial NO2), RSP and FSP for vehicular emission arising from open road, and the adopted temperature and relative humidity data were extracted from the meteorological output in SAMP v2.1 of the PATH grids where the road segments are located. The monthly hour minimum temperature and relative humidity data was adopted for the prediction of short-term averages of NO2, while the monthly hour average temperature and relative humidity data was adopted for the prediction of long-term averages of NO2, and annual minimum temperature and relative humidity was adopted for prediction of short-term and long-term averages of RSP and FSP.

5.7.5. Apart from running vehicular emissions, the start emissions for all vehicle types at all assessed roads using the broad-brush approach. The broad-brush approach is based on the trip-to-vehicle kilometres travelled (VKT) ratio for each vehicle type, and the highest NO2, NO, RSP and FSP start emission factors for each vehicle class among different soak times are adopted. The total number of trips and VKT within Hong Kong has been extracted from the default values from the EMFAC-HK model for the respective modelling year. All rural and local roads within the assessment area are considered using the broad-brushed approach. Zero Emission Vehicle (ZEV) Scenario has been considered in the open road emission calculation.

Portal Emissions

5.7.6. The portal emission is modelled as "VOLUME" sources as shown in ***Figure 5.5***. In accordance with the recommendations in the Permanent International Association of Road Congress Report (PIARC, 1991), the pollutants were assumed to eject from the portal as a portal jet such that 2/3 of the total emissions is dispersed within the first 50m of the portal and the other 1/3 of the total emissions within the second 50m.

5.7.7. The annual minimum temperature and RH values (11^{o}C and 18%) at PATH grids (42,34) were used in the calculation as a conservative approach. The SAMP v2.1 with ZEV scenario was used for the calculation of composite vehicular emission factor and emission rates. ***Appendix 5.5*** is provided for the volume sources produced by SAMP.

Minibus Terminus/Metered carpark/ Public Transport Interchange Emissions

5.7.8. The start emissions, running exhaust emissions, and idling emissions (i.e., NO, NO2, RSP, and FSP) associated with the MT/Metered carpark and PTI are calculated based on the start emission and running exhaust emission factors predicted by EMFAC-HK model, cold idling emission factors from Calculation of Start Emissions in Air Quality Impact Assessment published by EPD, warm idling emission factors from Road Tunnels: Vehicle Emissions and Air Demand for Ventilation published by World Road Association. Starting emissions from diesel vehicles equipped with selective catalytic reduction (SCR) systems were assumed to be dispersed over a total distance from the point where the vehicle start occurred. Running and idling emissions were assumed to be released at their respective locations. The detailed calculation of emission is provided in ***Appendix 5.6.***

5.7.9. Precise approach has been adopted to estimate the MT, meter carpark and PTI emission. Starting emissions from terminating vehicles, together with idling and running emissions from both terminating and non-terminating vehicles (where applicable), were included and modelled in the assessment. For emissions occurring beyond the car park boundaries, the remaining spread distance of starting emissions from terminating vehicles was also considered and modelled. Calculated starting emissions from terminating vehicles were adjusted to account for their corresponding idling emissions within the car parks, with reference to the Calculation of Start Emissions in Air Quality Impact Assessment.

5.7.10. One MT, two metered carpark and one PTIs were identified within 500m Assessment Area from the Application Site Boundary of the Current S16 Proposal, as shown in ***Figure 5.4***. The nature of Tung Tau Estate (Tung Lung Road) Minibus Terminus (TTEMT), Tung Lei Road Carpark (TLRCP), Ning Yuen Street Carpark (NYSCP) is open Area. The emission from the vehicles within these MT/Metered carparks would be released to the atmosphere directly and modelled as “AREAPOLY” sources. Kai TaK Public Transport Interchange is equipped with mechanical ventilation. As the opening/ingress/egress of the PTI is located outside the 500m study area, for conservative approach, 100% emission within PTI would be released through the

nearest location to the Application Site boundary of PTI, assumed it is the ventilation exhaust louvre.

Major Point Sources within 4km

5.7.11. The major source emission is modelled as "POINT" sources and the detailed calculation is provided in ***Appendix 5.7***.

Meteorological Conditions

5.7.12. According to the Model Guidelines, the steady-state Gaussian dispersion model United States Environmental Protection Agency (USEPA) AERMOD model is adopted for assessing the potential air quality impact arising from the operation of the crematorium. Hourly meteorological data from PATH v3.0 of the concerned grids were adopted in the model run. The mixing height is capped between 119m and 2009m according to the observation in Year 2019 by HKO. For the treatment of calm hours, the wind speeds are capped at 0.5 m/s for those from PATH v3.0 below 0.5 m/s.

Surface Characteristics

5.7.13. Details of the surface characteristics of the grids are extracted from EPD's SAMP and presented in ***Appendix 5.8.*** The surface characteristics in the vicinity of the assessment area were based on the 2024 land utilization file disclosed by the Planning Department.

Definition of Urban or Rural

5.7.14. The "urban" option is adopted in AERMOD, and the population of 410,634 taken from the latest 2021 census for the Kowloon City District, was used for the urban option setting.

Terrain

5.7.15. The default "ELEVATED" mode is adopted in AERMOD.

Conversion of NO_x to hourly NO_2 concentration

- Ozone limiting method for short-term cumulative NO_2 Assessment

5.7.16. For NO_x emissions from the point sources, the initial NO_2/NO_x ratio of 10% is applied according to the Heathrow Airport Air Quality Studies report[1], with 90% of the emitted NO_x assumed to be NO. For vehicular emission, emission factors for NO_2 and NO (which is assumed by subtracting the NO_2 emission factor from the NO_x emission factor in EMFAC v4.3) has been obtained from EMFAC v4.3 and then predicted separately in AERMOD. The total predicted vehicular NO_2 will then be estimated according to the Ozone Limiting Method (OLM) as described in the EPD Guideline.

$[NO_2]_{predicted} = [NO_2]_{vehicular} + 0.1\ [NO_x]_{industrial} + MIN\ \{[NO]_{vehicular} + 0.9\ [NOx]_{industrial}, \text{ or } (46/48)\ [O_3]_{PATH}\}$

where

$[NO_2]_{predicted}$ is the predicted NO_2 concentration

$[NO_2]_{vehicular}$ is the sum of predicted initial NO_2 concentration from open roads, portals, minibus terminus and planned PTI $[NO_x]_{industrial}$ is the sum of predicted initial NO_x concentration from the industrial emission sources

$[NO]_{vehicular}$ is the sum of predicted initial NO concentration from open roads, portals, minibus terminus and planned PTI

MIN means the minimum of the two values within the brackets

$[O_3]_{PATH}$ is the representative O_3 from rerun PATH concentration (from other contribution)

(46/48) is the molecular weight of NO_2 divided by the molecular weight of O_3

- Jenkin Method for Long-term Cumulative NO_2 Assessment

5.7.17. For the long-term cumulative NO2 assessment (i.e., predictions of annual average NO2 concentration). Jenkin method was adopted for the conversion of cumulative NOx to NO2 by using the functional form of an annual mean of NO2-to-NOx with reference to the Review of Methods for NO to NO2 Conversion in plumes at short

[1] C. McHugh, M. Williams, C. Price & C. Lad, *Air Quality Studies for Heathrow: Base Case, Segregated Mode, Mixed Mode and Third Runway Scenarios modelled using ADMS-Airport (Final Report),* Department of Transport (2007).

ranges[2]. The mentioned functional form is referenced from Jenkin, 2004a[3] and is presented as follows:

$$[NO_2] = \frac{\left([\mathrm{NOx}] + [\mathrm{OX}] + \frac{\mathrm{J}}{\mathrm{k}}\right) - \sqrt{([NOx] + [OX] + \frac{J}{k})^2 - 4[NOx][OX]}}{2}$$

where

$[NO_2]$ is the NO_2 concentration

$[NO_x]$ is the NO_x concentration

[OX] is the sum of NO_2 concentration and O_3 concentration (i.e.[OX] = $[NO_2]$ + $[O_3]$)

J is the photolysis rate of NO_2

k is the rate coefficient for reaction between NO and O_3

5.7.18. The annual mean data obtained from the EPD's air quality monitoring stations (AQMS), including the Shum Shui Po general station, Tap Mun general station, and Mong Kok roadside stations, were analysed using the functional form provided above. The function from curve would fit the annual mean data when [OX] = 86.94µg/m3 and J/K = 15.388µg/m3. The obtained functional form curve was adopted for the cumulative annual average NOx to NO2 conversion as shown in ***Appendix 5.9***. The cumulative annual average NOx to NO2 conversion equation for this assessment was calculated as follows:-

$$[NO_2]_c = ([NOx]^c + 86.94 + 15.388) - \sqrt{([NOx]^c + 86.94 + 15.388)2 - 4[NOx]^c \times 86.94}$$

where

$[NO_2]_c$ is the predicted cumulative NO_2 concentration in µg/m^3

$[NO_x]_c$ is the predicted cumulative NO_x concentration (i.e., the sum of the total predicted NO_x concentration from AERMOD and PATH v3.0) in µg/m^3

[2] *Environment Agency. 2007.Review of methods for NO to NO2 conversion in plumes at short range. Prepared by Environmental Agency.*

[3] *Jenkin. 2004a. Analysis of sources and partitioning of oxidant in the UK Part 1: The NOx-dependence of annual mean concentrations of nitrogen dioxide and ozone.* Atmospheric Environment, 38, 5117-5129.

5.8. Assessment result

5.8.1. The cumulative air quality impacts at the representative ASRs have been assessed. The predicted cumulative concentrations of NO_2, RSP, and FSP at the representative ASRs during the operational phase of the Project are presented in ***Table 5-8***. Detailed assessment results at all relevant assessment heights for the identified representative ASRs are provided in ***Appendix 5.10***. The assessment results indicate that the 10th highest daily average and annual average RSP concentrations, the 19th highest daily average and annual average FSP concentrations, and the 19th highest hourly average, 10th highest daily average, and annual average NO_2 concentrations at all representative ASRs would comply with the Air Quality Objectives (AQOs) depends on the short-term/long term nature of ASRs.

5.8.2. For Sa Po Road located beneath the deck-over of the Current S16 Proposal, pedestrian presence is anticipated to be transient in nature; therefore, the area is not identified as an ASR. In addition, no exceedance of the hourly NO_2 criterion is predicted at the relevant ASRs (i.e. A11–A13 and A24–A26). Hence, no adverse air quality impact on pedestrians on Sa Po Road is anticipated.

5.8.3. All ASRs from B2/F to 5/F are identified as short-term in nature, in accordance with their intended usage as described in . Accordingly, only short-term air quality criteria have been assessed for these ASRs. Exceedances of 19th highest hourly and 10th highest daily NO2 are found at G/F while 10th highest daily RSP and 19th highest daily FSP complied with the AQO. As there is exceedance found on G/F, no fresh air intakes and air sensitive receivers will be located within the predicted exceedance zone (***Figure 5.16*** and ***Figure 5.17*** refers). The contour of 19th highest daily FSP, 10th highest daily RSP and 19th highest hourly and 10th highest daily NO2 is provided in ***Figure 5.6*** to ***Figure 5.17***. Therefore, it is anticipated that no adverse air quality impact towards the ASRs from B2/F to 5/F.

5.8.4. ASRs from Residential 1/F to 31/F are identified as long-term in nature. The assessment results indicate that there would be no exceedance of the relevant daily and annual RSP and FSP criteria, nor of the hourly, daily, and annual NO_2 criteria at these ASRs.

Table 5-8 Predicted Cumulative Concentrations at Representative Air Sensitive Receivers During the Operation Phase

Pollutant	Criterion	AQO	Base elevation (mPD)	Max Concentration (µg/m³) at a flagpole of (m)								
				-9.95	-4.85	1.5	7.5	11.25	16	19.75	24.55	33.2-130.7
				B2/F	B1/F	G/F	1/F	2/F	3/F	4/F	5/F	Residential 1/F-31/F
FSP or $PM_{2.5}$	19th Highest Daily Average	37.5	6.1	32.45	32.84	35.05	31.72	30.80	30.14	29.87	29.65	29.49
	Annual [2]	15										12.53
RSP or PM_{10}	10th Highest Daily Average	75		53.66	54.04	56.39	53.02	52.12	51.45	51.17	50.94	50.75
	Annual [2]	30										20.15
NO_2	19th Highest Hourly Average	200		178.00	180.83	**201.89**	166.68	148.38	132.04	121.37	110.24	100.70
	10th Highest Daily Average	120		111.19	115.77	**136.82**	87.65	69.35	59.46	55.63	51.68	47.35
	Annual [2]	40										22.18

Note:
[1] Bolded and underlined values represent exceedances of the AQOs.
[2] ASR located from B2/F to 5/F are considered as short term ASRs. Thus, annual average concentration of pollutants for these ASRs are not assessed.

5.9. Conclusions

5.9.1. During the construction phase, with the implementation of dust suppression measures of the Current S16 Proposal and provision of good site practice as stipulated under the Air Pollution Control (Construction Dust) Regulation, Air Pollution Control (Non-road Mobile Machinery) (Emission) Regulation and Air Pollution Control (Fuel Restriction) Regulations, fugitive dust impacts and gaseous emission from diesel-fuelled construction equipment and machinery to the nearby air sensitive receivers due to construction works are expected to be insignificant. Therefore, it is anticipated that no adverse air quality impact to the air sensitive receivers during construction phase.

5.9.2. During the operation phase, the air quality impacts of emissions from the surrounding to our Current S16 Proposal were assessed by AERMOD modelling. The predicted results indicated that it complies with AQO where no ASR is located in the exceedance zone at G/F. It is anticipated that there will be no adverse air quality impact towards the Current S16 Proposal.

6. Noise Impact Assessment

6.1.1. The Agreement and Conditions of Grant by Private Treaty Grant (PTG) was executed in 6 March 2026. Under the PTG Clause (72), a Noise Impact Assessment (NIA) shall be submitted to the Director of Lands, and the grantee shall implement and maintain the Approved Noise Mitigation Measures (NMM).

6.1.2. The NIA for complying PTG Clause is under preparation and will be submitted for approval. The Current S16 Proposal adopted for the S16 planning application is being studied. Appropriate NMM will be proposed for approval. In view of the above, noise impact induced by the proposed minor relaxation of maximum permissible DPR and BHR shall be studied and mitigated. Insurmountable noise impact from the Current S16 Proposal is thus not anticipated.

7. Water Quality Impact Assessment

7.1. Introduction

7.1.1. This section assesses the potential water quality impacts in association with the S16 Planning Application.

7.2. Legislation and Standards on Water Quality

7.2.1. The Water Pollution Control Ordinance (WPCO, Cap.358) provides a mechanism for setting effluent standards as specified in the "Technical Memorandum on Standards for Effluents Discharged into Drainage and Sewerage Systems, Inland and Coastal Waters". All discharges into government sewerage systems, marine and inland waters are required to comply with the standards stipulated in this Technical Memorandum. The entire Hong Kong waters are divided into ten Water Control Zones (WCZs) and four supplementary WCZs. Each WCZ has a designated set of statutory Water Quality Objectives (WQOs) designed to protect the inland and/or marine environment and its users. The Application Site is in the Victoria Harbour (Phase Two) WCZ. The corresponding WQOs are listed in ***Table 7-1***.

Table 7-1 Summary of Water Quality Objectives for Victoria Harbour (Phase Two) WCZ

Parameters	Objectives	Sub-Zone
Aesthetic Appearance	(a) There should be no objectionable odours or discoloration of the water. (b) Tarry residues, floating wood, articles made of glass, plastic, rubber or of any other substances should be absent. (c) Mineral oil should not be visible on the surface. Surfactants should not give rise to a lasting foam. (d) There should be no recognisable sewage-derived debris. (e) Floating, submerged and semi-submerged objects of a size likely to interfere with the free movement of vessels, or cause damage to vessels, should be absent. (f) The water should not contain substances which settle to form objectionable deposits.	Whole zone
Bacteria	The level of Escherichia coli should not exceed 1 000 per 100 mL, calculated as the geometric mean of the most recent 5 consecutive samples taken at intervals of between 7 and 21 days.	Inland waters
Colour	Human activity should not cause the colour of water to exceed 50 Hazen units.	Inland waters

Parameters	Objectives	Sub-Zone
Dissolved Oxygen	(a) The level of dissolved oxygen should not fall below 4 mg per litre for 90% of the sampling occasions during the whole year; values should be calculated as the annual water column average (see Note). In addition, the concentration of dissolved oxygen should not be less than 2 mg per litre within 2 m of the seabed for 90% of the sampling occasions during the whole year.	Marine waters
	(b) The level of dissolved oxygen should not be less than 4 mg per litre.	Inland waters
pH	(a) The pH of the water should be within the range of 6.5–8.5 units. In addition, human activity should not cause the natural pH range to be extended by more than 0.2 unit.	Marine waters
	b) Human activity should not cause the pH of the water to exceed the range of 6.0–9.0 units.	Inland waters
Temperature	Human activity should not cause the daily temperature range to change by more than 2.0ºC.	Whole zone
Salinity	Human activity should not cause the salinity level to change by more than 10%.	Whole zone
Suspended solids	(a) Human activity should neither cause the suspended solids concentration to be raised more than 30% nor give rise to accumulation of suspended solids which may adversely affect aquatic communities.	Marine waters
	(b) Human activity should not cause the annual median of suspended solids to exceed 25 mg per litre.	Inland waters
Ammonia	The un-ionized ammoniacal nitrogen level should not be more than 0.021 mg per litre, calculated as the annual average (arithmetic mean).	Whole zone
Nutrients	(a) Nutrients should not be present in quantities sufficient to cause excessive or nuisance growth of algae or other aquatic plants.	Marine waters
	(b) Without limiting the generality of objective (a) above, the level of inorganic nitrogen should not exceed 0.4 mg per litre, expressed as annual water column average (see Note).	Marine waters
5-Day biochemical oxygen demand (BOD_5)	The 5-day biochemical oxygen demand should not exceed 5 mg per litre.	Inland waters
Chemical Oxygen Demand (COD)	The chemical oxygen demand should not exceed 30 mg per litre.	Inland waters
Toxic Substances	(a) Toxic substances in the water should not attain such level as to produce significant toxic, carcinogenic, mutagenic or teratogenic effects in humans, fish or any other aquatic organisms, with due regard to biologically cumulative effects in food chains and to interactions of toxic substances with each other.	Whole zone
	(b) Human activity should not cause a risk to any beneficial use of the aquatic environment.	Whole zone

Source: Statement of Water Quality Objectives (Victoria Harbour (Phase Two) Water Control Zone).

7.2.2. Chapter 9 of HKPSG sets out the guidelines for sewage collection and disposal whereby public sewers should be used as it is considered the most efficient and safe means of disposing sewage.

7.2.3. The Professional Persons Environmental Consultative Committee Practice Note 2/24

Construction Site Drainage (ProPECC PN2/24) provides guidelines for the handling and disposal of construction discharges. It is applicable to this study for the control of site runoff and wastewater generated during the construction phase. The types of discharges from construction sites outlined in the ProPECC PN2/24 include:

- Surface runoff;
- Groundwater;
- Boring and drilling water;
- Wastewater from concrete batching;
- Wheel washing water;
- Bentonite slurries;
- Water for testing and sterilization of water retaining structures and water pipes;
- Wastewater from building construction and site facilities; and
- Acid cleaning, etching and pickling wastewater.

7.2.4. The Professional Persons Environmental Consultative Committee Practice Note 1/23 Drainage Plans subject to Comment by the Environmental Protection Department (ProPECC PN 1/23) provides guidelines for Drainage Plans and practices for handling, treatment and disposal of various effluent discharges of the Current S16 Proposal to stormwater drains and foul sewers during the operational phase. The design of site drainage and disposal of various site effluents generated with the Current S16 Proposal should follow the relevant guidelines and practices as given in the ProPECC PN1/23.

7.3. Surrounding Environmental Context and Water Sensitive Receivers

7.3.1. The Application Site is located on urban flat land. Key WSRs within 500m from the boundary of the site were identified at ***Table 7-2*** below and their respective locations are illustrated in ***Figure 7.1***.

7.3.2. There are two waterbodies identified within 500m from the site boundary. There is an existing pond within Carpenter Road Park and Kai Tak River is located 305m east from the site boundary, flowing in a south-easterly direction. However, the Application Site is located downstream of both waterbodies therefore the water quality will not be affected by the Current S16 Proposal.

7.3.3. No other WSRs such as country parks, water gathering grounds, beaches or water uses for agriculture have been identified within the 500m study area of the Application Site.

Table 7-2 Summary of Representative Water Sensitive Receivers

ID	Location	Distance(m)
WSR01	Kai Tak River	322
WSR02	Carpenter Road Park pond	272

7.3.4. It should be noted that the S16 Planning Application will not involve any construction works at/ within the identified water sensitive receivers.

7.4. Potential Impacts During Construction Phase

7.4.1. Wastewater will likely be generated from groundwater extraction during foundation works and construction site surface run-off which will be mainly laden with suspended solids such as silt and mud. The water quality of effluent will be affected by the following:

i. General Construction Activities;
ii. Wash water from vehicles, equipment and dust suppression sprays;
iii. Potential minor oil leaks or spills from vehicles and plants;
iv. Site surface runoff and erosion of exposed bare soil and earth, drainage channels, earth working areas and stockpiles; and
v. Sewage generated from on-site workforce.

7.5. Mitigation Measures and Good Site Practice

Construction Runoff & Drainage

7.5.1. There is a need to apply to EPD for a discharge license for the discharge of effluent from the construction site under the WPCO. Any surface runoff and wastewater generated from the works area during the construction phase should be treated and discharged in accordance with the requirements of the discharge license.

7.5.2. Runoff and drainage shall be avoided or minimised with the implementation of mitigation measures and good site practices outlined in ProPECC PN 2/24 which shall include but not limited to the following.

i. Providing perimeter channels to intercept storm runoff from outside the site. These shall be constructed in advance of site formation works and earthworks.

ii. Providing sand/silt removal facilities such as sand traps, silt traps and sediment basins to remove sand/silt particles from runoff to meet the requirements of the standard in Technical Memorandum on Standards for Effluents Discharged into Drainage and Sewerage Systems, Inland and Coastal Waters under the WPCO. These facilities shall be properly and regularly maintained. Channels or earth bunds or sand bag barriers shall be provided on site to properly direct storm water to such silt removal facilities.

iii. Minimising soil excavation works by careful programming of works during rainy seasons.

iv. Protecting exposed soil surface by paving as practical to reduce the potential of soil erosion.

v. Protecting temporary access roads by crushed gravel and exposed slope surfaces shall be protected when rainstorms are likely to occur.

vi. Avoiding trench excavation in the wet season as far as practicable, and, if necessary, these trenches shall be excavated and backfilled in short sections. Rainwater pumped out from trenches or foundation excavations should be discharged into storm drains via silt removal facilities.

vii. Covering the open stockpiles of construction materials on site with tarpaulin or similar fabric during rainstorms. Measures should be taken to prevent the washing away of construction materials, soil, silt or debris into any drainage system.

viii. Vehicle wheel washing facilities should be provided at the site exit such that mud, debris, etc. attached to the vehicle wheels or body can be washed off before the vehicle leaves the work site". Settling out the sand and silt in the wash water from the vehicles leaving the wheel washing facility, which ensures no earth, mud and debris is deposited on the road, before discharging into the storm drain. The section of the road between the wheel washing bay and the public road shall be paved with a back-fall to prevent wash water or other site runoff from entering the public area.

ix. Planning ahead the temporary site drainage management and wastewater treatment system for collection, treatment, reuse and discharge of surface runoff and wastewater before the construction works start.

x. Groundwater pumped out of wells, etc. for the lowering of ground water level in basement or foundation construction should be discharged into storm drains after the removal of silt in silt removal facilities.

General Construction Activities

7.5.3. Debris and rubbish generated on site shall be collected, handled, and disposed of properly. All fuel tanks shall be provided with locks and be sited on sealed areas, within bunds of a capacity equal to 110% of the storage capacity of the largest tank. Open storm water drains and culverts near the works area shall be covered to block

the entrance of large debris and refuse.

7.5.4. Any service shop and maintenance facilities should be located on hard standings within a bunded area, and sumps and oil interceptors should be provided. Maintenance of vehicles and equipment involving activities with potential for leakage and spillage should only be undertaken within the areas appropriately equipped to control these discharges.

Sewage Generated from On-site Workforce

7.5.5. The sewage from construction work force is expected to be handled by portable chemical toilets. Portable toilets shall be provided by licensed contractors who shall be responsible for appropriate disposal of collected sewage and maintenance of these facilities.

Evaluation of Impact

7.5.6. The construction phase of the Project will be land-based which does not involve any marine works or works at the waterbodies identified. Therefore, it is unlikely that the Project will have any adverse water quality impact from construction work, given good site practices properly implemented on site by Contractor.

7.5.7. The mitigation measures and good site practices will be included in the contract for contractor's implementation. With the provision and implementation of the abovementioned mitigation measures, adverse water quality impact during construction phase is not anticipated.

7.6. Potential Impacts During the Operational Phase

7.6.1. During the operational phase of the Current S16 Proposal, surface run-off and sewage generated by the residents are the main sources of water quality impacts. Surface run-off on site will be properly collected via stormwater drains and discharged to the existing drainage system (FSH4002820 to FSH4002804). The sewage will be discharged to existing public sewerage manhole FMH4030180. The design of site drainage and disposal of various site effluents generated with the Current S16 Proposal should follow the relevant guidelines and practices as given in the ProPECC PN1/23. Effluent arising from Current S16 Proposal is subject to the control of WPCO, and the effluent discharge should be in compliance with the WPCO-TM and WPCO discharge license conditions.

7.6.2. As the sewage generated from the Current S16 Proposal will be discharged into the

nearby public foul sewer, no adverse water quality impact due to the Current S16 Proposal at this part of the Kowloon City area is anticipated. Therefore, no mitigation measures are considered necessary for the existing sewers.

Surface Runoff

7.6.3. The Application Site is a redevelopment site. Surface runoff within the Application Site will be collected and discharged into the existing public stormwater drainage network at the terminal manhole (SMH4037340). A greenery area will be provided at the Current S16 Proposal which will increase the filtration of stormwater and minimise surface runoff.

7.6.4. In order to minimise pollution loading, silt/sand traps should be provided for the drainage systems of open areas. Moreover, the pollution loading of runoff can be controlled by best management practice. The operator shall manage the cleaning of roads and open areas within the Site before heavy rain. To further minimise pollution loading, cleaning shall be carried out during low traffic periods. Cleaning methods for road/open areas, such as manual cleaning or mechanical methods and including street sweepers are recommended to be adopted. The substances during cleaning shall be collected as far as practicable for off-site disposal at landfill sites. After the removal of the substances, the pollution loading of runoff will be reduced.

7.7. Conclusion

7.7.1. The Project would not involve any construction works at/ within the water sensitive receivers. Therefore, the water source of the existing WSRs is not expected to be affected during the construction and operational phases of the Project.

7.7.2. For construction phase, water quality impact is expected to be minimal when appropriate mitigation measures and good site practices are implemented to properly discharge site run-off.

7.7.3. The contractor shall apply for a Discharge License from EPD under the WPCO. All site discharges should be treated as necessary in accordance with the terms and conditions of the Discharge License.

7.7.4. For the operational phase, potential water quality impacts are mainly due to surface runoff and sewage generation from future occupants associated with the Current S16 Proposal. Following the ProPECC PN1/23, no adverse water quality impact related to surface runoff is anticipated. Moreover, all sewage generated from the Current S16 Proposal will be discharged to the public foul sewer. Thus, no adverse water quality

impact on the nearby WSRs during the operational phase is anticipated.

7.7.5. With the implementation of the above mitigation measures, water quality impact is not anticipated during the construction phase and the operational phase of the Current S16 Proposal.

8. Land Contamination

8.1. Guidelines

8.1.1. This site appraisal is prepared in accordance with the following guidance:

- Guidance Manual for Use of Risk-Based Remediation Goals (RBRGs) for Contaminated Land Management (Guidance Manual), dated December 2007, Revised in April 2023;
- Guidance Note for Contaminated Land Assessment and Remediation (Guidance Note), dated 15 August 2007, Revised in April 2023; and
- Practice Guide for Investigation and Remediation of Contaminated Land (Practice Guide), dated August 2011, Revised in April 2023.

8.2. Previous Studies related to Land Contamination

8.2.1. Since there were some ground floor shops which were previously operated as car repair shops and shops with hardware / engineering parts, LandsD has incorporated a decontamination clause into the draft land grant for the District Lands Conference ("DLC") meeting in December 2022 regarding the requirement of Preventive Works or Contamination Assessment or the Decontamination Works.

8.2.2. According to Remediation Report (Version 2.2) prepared by Cinotech Consultants Limited dated June 2025, a Contamination Assessment Plan (CAP) was prepared in November 2023. The site inspection (SI) works were conducted in January 2024 and March 2024. A Contamination Assessment Report (CAR) and Remediation Action Plan (RAP) were submitted and agreed by EPD in Aug 2024 and the recommended remediation works were carried out according to the agreed CAR-cum-RAP in early 2025. Confirmatory sampling and analysis were carried out to confine the Final Contamination Zone and confirmed that all the contaminated soil has been excavated. The land contamination works, as identified in the Remediation Report of Land Contamination Assessment dated June 2025, have been completed. Consequently, the S.C. related to Land Contamination Assessment was removed from the executed land grant in March 2026. No adverse land contamination impact is anticipated.

8.3. Conclusion

8.3.1. Land contamination assessment has been conducted since 2024 and remediation works were conducted in 2025. There is no changes in land use since 2025. Thus no further evaluation land contamination is conducted in this report.

9. Waste Management

9.1. Legislation and Standards on Waste Management

Waste Disposal Ordinance (WDO) (Cap. 354)

9.1.1. Waste Disposal Ordinance, Cap. 354 provides legislative control on pollution caused by all forms of wastes such as livestock wastes, chemical waste etc. It provides the statutory framework for the planning, management and control of wastes in Hong Kong.

Public Health and Municipal Services Ordinance (Cap.132)

9.1.2. The Public Cleansing and Prevention of Nuisances Regulation provides control on illegal tipping of waste on unauthorised (unlicensed) sites.

Waste Disposal (Chemical Waste) (General) Regulation (Cap.354C)

9.1.3. Under the WDO, Waste Disposal (Chemical Waste) (General) Regulation (Cap.354C) provides regulations for chemical waste control, and administers the possession, storage, collection, transport and disposal of chemical waste. EPD has also issued the Code of Practice on the Packaging, Labelling and Storage of Chemical Wastes (1992), which details how the chemical waste producers should comply with the regulations on chemical waste.

Waste Disposal (Charges for Disposal of Construction Waste) Regulation (Cap.354N)

9.1.4. Under the Waste Disposal (Charges for Disposal of Construction Waste) Regulation, construction waste delivered to a landfill for disposal must not contain more than 50% by weight of inert material; construction waste delivered to a sorting facility for disposal must contain more than 50% by weight of inert material; and construction waste delivered to Public Fill Reception Facilities for disposal must consist entirely of inert material.

Other Environmental Regulations / Guidelines

- Land (Miscellaneous Provisions) Ordinance (Cap. 28)
- ETWB TC(W) No. 22/2003 and 22/2003A, Additional Measures to Improve Site Cleanliness and Control Mosquito Breeding on Construction Sites
- Works Bureau TC No. 12/2002, Specifications Facilitating the Use of Recycled Aggregates
- Trip Ticket System for Disposal of Construction & Demolition Materials (DEVB TC(W) No. 6/2010)
- Environmental Management on Construction Sites (ETWB TC(W) No. 19/2005)
- Public Filling Facilities (WBTC No. 2/93B)
- Fill Management (WBTC No. 12/2000)
- Code of Practice on the Packaging, Labeling and Storage of Chemical Waste
- DevB TCW No. 8/2010 "Enhanced Specification for Site Cleanliness and Tidiness
- Management of Construction and Demolition Materials (Technical Circular No. 11/2019) published by CEDD
- CEDD's Project Administration Handbook for Civil Engineering Works
- Monitoring of Solid Waste in Hong Kong – Waste Statistics for 2024

9.2. Assessment Approach and Criteria

9.2.1. The assessment of waste management implications from the construction and operation of the Project includes the following tasks:

- Identification of types and quantities of waste arising from various construction activities based on the latest understandings;
- Evaluation of opportunities for waste reduction, re-use and recycling on-site or off-site;
- Identification of disposal options for each type of waste;
- Evaluation of potential impacts from the handling (including stockpiling, labelling, packaging and storage), collection, transportation and reuse/disposal of waste with respect to potential hazards, air and odour emissions, noise, wastewater discharges and public transport; and
- Proposing mitigation measures and evaluation of residual impact.

9.3. Potential Impacts during Construction Phase

Construction & Demolition (C&D) waste

9.3.1. The construction works of the Project mainly include foundation works and superstructure construction. Construction & Demolition (C&D) materials generated from the construction works comprise of inert and non-inert materials.

9.3.2. For inert C&D materials (or public fills), such as soil, rock, concrete, etc., can be reused on-site as filling materials or off-site as public fill at public fill reception facilities. Non-inert C&D materials, such as glass, steel, plastics, timber, paper, etc., should be reused or recycled as far as possible before landfill disposal, which should only be considered as the last resort for waste handling.

Chemical waste

9.3.3. Chemical waste is defined in the Cap 354C Waste Disposal (Chemical Waste) (General) Regulation. Where the construction processes produce chemical waste, the contractor must register with EPD as a chemical waste producer. Chemical waste that is likely to arise from the construction activities for the Proposed Project includes:

- Used paints, engine oils, hydraulic fluids and waste fuel;
- Spent mineral oils / cleansing fluids from machineries; and
- Spent solvent / solutions, some of which may be halogenated, from equipment cleansing activities.

9.3.4. Accidental spillages of chemicals in the works area may contaminate the top soils on exposed ground/ earth. The contaminated soil particles may be washed away by construction runoff causes water pollution.

9.3.5. Chemical wastes pose environmental and health and safety hazards if not stored and disposed of in an appropriate manner as outlined in the Waste Disposal (Chemical Waste) (General) Regulation. These hazards include:

- Toxic effects to workers;
- Adverse effects on water quality from spills; and
- Fire hazards.

9.3.6. The amount of chemical waste to be generated throughout construction phase cannot be accurately predicted at this stage since it largely depends on the contractor's housekeeping measures. The amount of chemical waste to be generated would be quantified in the Waste Management Plan (WMP) as part of the EMP to be prepared by the Contractors.

9.3.7. The chemical waste generated are to be handled, stored, collected, transported and disposed by licensed chemical waste collectors in accordance with the Waste Disposal (Chemical Waste) (General) Regulation, impacts such as potential hazard and spillage will not be anticipated.

General Refuse

9.3.8. General refuse such as food scraps, waste paper, empty containers, etc. would be generated from the workforce during the construction phase. General refuse should be stored in enclosed bins separately from C&D materials and chemical wastes. Recycling bins should also be placed to encourage recycling. Enclosed and covered areas should be provided for general refuse collection to prevent waste materials being blown around by wind, flushed or leached into nearby waters, or creating an odour nuisance or pest and vermin problem. Also, routine cleaning for these areas should be implemented to keep areas clean, so that intentional or accidental release to the surrounding environment does not occur with proper management.

Estimation on C&D Materials Quantity

9.3.9. The majority of C&D materials will be generated from the key construction activities mentioned in ***Section 9.3.2***. Demolition waste is not anticipated since the site is currently vacant. Where possible, inert C&D materials will be re-used on site and sent to public fill reception facilities as a last resort.

9.3.10. As advised by project team, the quantities of C&D materials generated will be subject to further design development and contractor's operation procedure/practices. The estimated quantities for all types of waste to be generated is summarised in the table below.

Table 9-1 Summary of Construction Waste Generated

Type of Waste	Total Waste Generation Quantity	On-Site Reused Quantity	Handling Arrangement and Outlets	Remark
Inert C&D Materials [1]	43,680 m^3	9,446 m^3 (assume 20% reusable rate)	Delivered to the public fill reception facilities	According to Hong Kong Waste Statistics for 2024, a total of 90% of construction waste generated will be used as public fill. (67% of C&D waste was delivered to public fill reception facilities, while 23% of C&D waste was transferred to other projects for direct reuse). Estimated inert C&D materials: = 48,000 – 4,320 = 43,680 m^3
Non-inert C&D Materials	4,320 m^3	Recycled and reused as much as practicable	Disposed of at the landfill	According to Hong Kong Waste Statistics for 2024, 9% of C&D waste was disposed of at landfill. Estimated non-inert C&D materials: = total C&D materials x 9% = 48,000 x 0.09 = 4,320 m^3
Chemical Waste[2]	Less than 100L per month	-	Collected by licensed collector for the disposal of at licensed treatment facilities (e.g. Chemical Waste Treatment Centre (CWTC) at Tsing Yi)	-
General Refuse from Workforce[3]	65 kg/day	Recycled as much as practicable	Disposed of at the landfill	Assumed maximum of 100 workers working simultaneously at the Current S16 Proposal. Assumed waste generation rate is 0.65 kg/worker/day

Note:

[1] Includes, but not limited to excavated soil, broken concrete, granular materials etc.

[2] Includes, but not limited to, scrap batteries or acid/alkali from construction plant maintenance activities; used paints, engine oils, hydraulic fluids and waste fuel, etc.

[3] Includes, but not limited to, food waste, aluminum cans, waste paper, etc

9.4. Mitigation Measures to Control Construction Waste Impact

General

9.4.1. All C&D materials shall be sorted on-site into inert and non-inert C&D waste materials, where the materials can be recycled or reused shall be re-used on site as far as possible. Inert C&D materials shall be delivered to the public fill reception facilities as far as practicable. Any remaining non-inert C&D materials shall be delivered to sorting facilities and landfills. In order to facilitate process of transferring the construction waste to Government waste disposal facilities (e.g. public fill reception facilities, sorting facilities and landfills), waste sorting and segregation shall be carried out on site in accordance with the following categories:

- Hard rock and large broken concrete suitable for reuse on the Site or recycling;
- Metals (i.e. aluminium can, steel metal, ferrous metal, and non-ferrous metal);
- Plastic (i.e. plastic bag, plastic bottle, plastic packaging, etc.)
- Paper;
- Chemical waste;
- Materials suitable for disposal at public fill reception facilities, sorting facilities and landfills

9.4.2. In addition, the Contractor is required to implement good EMP and practices on the handling and disposal of waste, including but not limited to,

- Handle, store and dispose of all wastes in accordance with the Waste Disposal Ordinance;
- Handle, store and dispose of chemical waste in accordance with the EPD recommended Codes of Practice on the Packaging, Labelling & Storage of Chemical Wastes and Waste Disposal (Chemical Waste) (General) Regulation under the Waste Disposal Ordinance;
- Store general refuse in enclosed bins or compaction units separate from C&D materials and chemical wastes. A reputable waste collector should be employed to collect and dispose of general refuse from the site on a daily or every second day basis;
- Plan and stock construction materials carefully to minimize amount of waste generated and avoid unnecessary generation of waste;
- Waste storage areas within the Application Site should be well maintained and cleaned regularly to prevent cross-contamination;
- Cover trucks with tarpaulin and transporting waste in enclosed containers to minimize windblown litter and dust during transportation;
- Maintain temporary stockpiles and ensure with well cover to prevent inclement

weather (e.g. heavy rain).

9.4.3. To clearly spell out the types and amount of waste generated and its associated mitigation measures, a Waste Management Plan (WMP), as part of EMP, should be prepared in accordance with ETWB TC(W) No.19/2005 and submitted to the Project / Site Engineer for approval. The recommended mitigation measures should form the basis of the WMP.

C&D Materials/Waste

9.4.4. Waste management planning is needed prior to the commencement of construction works. The strategy to construction waste management is to avoid, minimise, reuse, re-cycle and finally dispose of waste with the desirability descending in this order. Contractor(s) will be required to implement effective waste management measures to ensure their practices are in line with the strategies. In order to minimise the generation of wood waste, steel is recommended to be used for formworks. The quantities of C&D materials will be subject to further design development and contractor's operation procedure/practices. The Contractor shall develop and implement their EMP and Waste Management Plan (which is part of the EMP) to control any potential adverse impact associated with the construction waste as far as possible.

9.4.5. It is presently anticipated that most of the C&D materials/waste will need to be transported off-site for re-use, recycling and disposal by trucks. With the implementation of the recommended dust and noise control / mitigation measures presented in the air quality and noise sections, such as covering and stockpiling materials to avoid dust and other nuisance impacts from truck movements, these secondary environmental factors are not expected to be a concern.

9.4.6. C&D materials should be segregated from other wastes to avoid contamination and ensure acceptability at Public Fill Reception Facilities areas or reclamation site. The following mitigation measures should be implemented in handling the excavated and C&D materials:

- Maintain temporary stockpiles and ensure with well cover to prevent inclement weather;
- Reuse excavated fill material for backfilling;
- Carry out on-site sorting; and
- According to the DEVB TC(W) No. 6/2010, implement a trip-ticket system for each works contract to ensure that the disposal of C&D materials/waste is properly documented and verified.

9.4.7. Where waste generation is unavoidable, the potential for recycling or reuse shall be considered. If waste cannot be recycled, disposal routes described in the EMP shall be followed. The amount of waste generated, recycled, and disposed shall be recorded. Trip-ticket system shall also be implemented in accordance with Development Bureau TC(W) No. 6/2010 to monitor the disposal of C&D material and control fly-tipping. Delivery site is subject to the designation by the PFC according to the DEVB TC(W) No.6/2010.

Chemical Waste

9.4.8. If chemical wastes are produced at the construction site, the Contractor would be required to register with the EPD as a Chemical Waste Producer and to follow the guidelines stated in the Code of Practice on the Packaging, Labelling and Storage of Chemical Wastes. Good quality containers compatible with the chemical wastes should be used. Appropriate labels should be securely attached on each chemical waste container indicating the corresponding chemical characteristics of the chemical waste, such as explosives, flammable, oxidizing, irritant, toxic, harmful, corrosive, etc. Chemical waste should be collected by a licensed collector and to be disposed of at a licensed chemical waste treatment and disposal facility in accordance with the Waste Disposal (Chemical Waste) (General) Regulation.

9.4.9. Mitigation measures will also include the provision of protective gloves and clothing to site workers, use of bulk earth movers to remove contaminated materials to prevent any possible human contact, provision of adequate washing facilities and the use of licensed chemical waste collectors to ensure legal disposal of waste, etc.

General Refuse

9.4.10. Recycling bins should also be placed to encourage recycling. Enclosed and covered areas should be provided for general refuse collection to prevent waste materials from being blown around by the wind, flushed or leached into nearby waters, or creating an odour nuisance or pest and vermin problem. Also, routine cleaning for these areas should be implemented to keep areas clean, so that intentional or accidental release into the surrounding environment does not occur without proper management.

9.4.11. With the implementation of good waste management practices at the Site, and the abovementioned mitigation measures at the Application Site, adverse environmental

impacts are not expected to arise from the storage, handling and transportation of C&D materials, chemical waste and general refuse generated during construction phase.

9.5. Potential Impacts and Mitigation Measures during the Operational Phase

General Refuse

9.5.1. The major type of waste generated from the operational phase is general refuse. With reference to *Monitoring of Solid Waste in Hong Kong - Waste Statistics for 2024* by the EPD, the disposal rate of domestic waste was 0.86 kg/person/day. The estimated population will be 2,480[4] people. Therefore, the estimated quantities of general refuse anticipated will be 2,133 kg/day (0.86 kg/person/day x 2,480 residents).

9.5.2. General refuse will be removed on a regular basis to minimise odour, pest and litter impacts. To promote the recycling of waste paper, aluminium cans and plastic bottles, the 3-coloured waste separation bins for the collection of recyclable municipal waste will be clearly labelled and placed at convenient locations. The recyclable materials will then be collected by reliable waste recycling agents on a regular basis. Waste generated will be disposed of at government waste disposal facilities such as SENT Landfill in Clear Water Bay. Hence, adverse waste management implications are not anticipated during the operational phase.

9.5.3. Food waste is the main source of unpleasant odours and environmental hygiene concerns during the operational phase. The Project Team will explore the feasibility of providing separate recycling bins for food waste to facilitate the recycling of food waste on-site or off site in a hygienic manner in detailed design stage. The collected food waste will be disposed of at Organic Resources Recovery Centre (ORRC).

9.6. Conclusion

9.6.1. During the construction phase, the major waste types generated by the construction activities for this project will include C&D materials from the construction of foundation works, substructure and superstructures work; chemical waste from maintenance and servicing of construction site and equipment; and general refuse from the workforce. Provided that all these identified wastes are reused and recycled if appropriate, handled, transported and disposed of in strict accordance with the

[4] Estimated based on "Average Domestic Household Size in Lung Shing District Council in 2021 Population Census" of 2.5 persons per household. The Current S16 Proposal will provide about 992 residential units.

relevant legislative and recommended requirements and that the recommended good site practices and mitigation measures are properly implemented, no adverse environmental impact is expected during the construction phase.

9.6.2. During the operational phase, the key waste types generated will be general refuse. Provided that all these wastes are reused and recycled as appropriate, handled, transported and disposed of in strict accordance with the relevant legislative requirements and the recommended mitigation measures are properly implemented, no adverse environmental impact is expected during the operational phase.

10. Conclusion

Air Quality Impact

10.1.1. Potential air quality impact, noise impact, water quality impact, land contamination and waste management during construction and operation phase of the project are evaluated in this Environmental Assessment Report for the Application Site.

10.1.2. Fugitive dust due to construction works and gaseous emission from construction equipment would make insignificant air quality impacts to the nearby air sensitive receivers, with the implementation of air quality control measures and good site practice as stipulated under Air Pollution Control (Construction Dust) Regulation, Air Pollution Control (Non-road Mobile Machinery) (Emission) Regulation and Air Pollution Control (Fuel Restriction) Regulations. With the implementation of dust suppression measures and good site practices, no adverse air quality impact is anticipated during construction phase.

10.1.3. No active chimneys and SP license records were identified within 200m form the Current S16 Proposal based on the site survey conducted. In addition, no odour emission sources were found based on the site surveys and desktop study.

10.1.4. The current scheme has allowed adequate setback distance for all air sensitive uses from the major roads to meet the minimum requirement as stipulated in HKPSG. Relevant guidelines for carparks, restaurants and commercial kitchens and refuse collection points will be fully complied with and with implementation of mitigation measures if necessary. Hence, no adverse air quality impact is anticipated.

Water Quality Impact

10.1.5. For water quality impact during construction phase, it is expected to be minimal when appropriate guidelines and mitigation measures stated in ETWB TC (Works) No. 5/2005 and good site practice outlined in ProPECC PN 2/24 are implemented to properly discharge site run-offs. Hence, no adverse water quality impact is anticipated.

Land Contamination

10.1.6. For land contamination, land contamination assessment and remediation works have been conducted in 2025. Given there is no change in land use since 2025. Further land contamination is considered not necessary.

Waste Management

10.1.7. For waste management, top priority should be given to waste avoidance, followed by minimization, reuse/recycling, treatment and disposal of waste as a last resort during construction and operation phases. C&D material, general refuse and chemical waste are expected to be generated from the construction phase, while general refuse and chemical waste will be the major waste generated from operation phase. Provided that all these wastes are reused and recycled if appropriate, handled, stored and disposed of in strict accordance with the relevant legislative requirements and the recommended mitigation measures are properly implemented, no adverse waste impact is anticipated.

10.1.8. For waste management during construction phase, C&D waste will be properly sorted on-site into inert and non-inert waste for recycling and disposed of at designated facilities. Top priority should be given to waste avoidance, followed by minimization, reuse/recycling, treatment and disposal of waste as a last resort. During the operational phase, general refuse will be the major waste type. Recycling bins will be provided to promote separation of recyclables and will be collected regularly by recycling agents. The Project Team will explore feasibility of providing separate bins for food waste with disposal to the ORRC. Provided that all these wastes are reused and recycled if appropriate, handled, stored and disposed of in strict accordance with the relevant legislative requirements and the recommended mitigation measures are properly implemented, no adverse waste impact is anticipated during construction and operational phases.

Submission record of Traffic Forecast Data to Transport Department (TD)

(Confirmation of the adopted traffic forecast data is being sought from TD and will be provided when it is available)

From: Dickens [redacted]
Sent: Tuesday, June 2, 2026 11:15 AM
To: Hon Yeung LI [redacted]
Cc [redacted]
Subject: [EXTERNAL] Technical Note on Traffic Forecast for Environmental Assessment of Upcoming S16 Submission for Kai Tak Road / Sa Po Road Development Scheme (KC-015)

CAUTION: This Email is from an EXTERNAL source. Ensure you trust this sender before clicking on any links or attachments.

Dear Mr LI,

Aurecon Hong Kong Limited (Aurecon) has been appointed as the traffic sub-consultant for the captioned study. Please find the enclosed Technical Note for your review and comments.

It should be grateful if you could provide your comments by **16 June 2026**. The hard copy will be delivered to your office in the next few days.

If you have any further questions, please do not hesitate to contact Mr. Dickens Lo a[redacted] or Mr. Raymond Pau a[redacted]

Best Regards,
Dickens Lo
Traffic Engineer, Aurecon
T [redacted]

At Aurecon, we encourage flexible working. If you receive an email from us outside your work hours, we don't expect you to read it, act on it, or reply until you return.
