The ground floors of other existing industrial buildings in the area are used mainly for several commercial purposes such as metal shops, food shops and other commercial uses.

Planning approval was already given to the same unit for “cake shop” use vide Application No. A/K5/140 in June 1991. The design of the ground floor of the Subject Building is typical of similar industrial buildings in that the whole ground floor can be used for commercial purposes. The floor loading and fire-proof period are satisfied as the new uses are lesser stringent than industrial use.

The accessibility of the Subject Building is good. The MTR Tsuen Wan Line Cheung Sha Wan Station is located within a 5-minute walking distance from the Subject Building. Various bus routes are also serving the vicinity. More importantly, the potential shoppers are mainly local ones. They work in the area and take the opportunity to do shopping or to order services. Shoppers coming from other districts purely to do shopping are unlikely to take place there as the area is an established residential and industrial area rather than being a shopping area. There are existing loading and unloading facilities in the building. The existing use of the application premises is a cake shop. The increase in traffic, if any, is considered to be minimal.

Hence, the applied uses as shop and services at the application premises on the ground floor of the Subject Building are compatible with the existing uses in the area.
