**Relevant Revised Interim Criteria for Consideration of
Application for NTEH/Small House in New Territories**
(promulgated on 7.9.2007)

- (a) sympathetic consideration may be given if not less than 50% of the proposed NTEH/Small House footprint falls within the village 'environs' ('VE') of a recognized village and there is a general shortage of land in meeting the demand for Small House development in the "Village Type Development" ("V") zone of the village;
- (b) if more than 50% of the proposed NTEH/Small House footprint is located outside the 'VE', favourable consideration could be given if not less than 50% of the proposed NTEH/Small House footprint falls within the "V" zone, provided that there is a general shortage of land in meeting the demand for Small House development in the "V" zone and the other criteria can be satisfied;
- (c) development of NTEH/Small House with more than 50% of the footprint outside both the 'VE' and the "V" zone would normally not be approved unless under very exceptional circumstances (e.g. the application site has a building status under the lease, or approving the application could help achieve certain planning objectives such as phasing out of obnoxious but legal existing uses);
- (d) application for NTEH/Small House with previous planning permission lapsed will be considered on its own merits. In general, proposed development which is not in line with the criteria would normally not be allowed. However, sympathetic consideration may be given if there are specific circumstances to justify the cases, such as the site is an infill site among existing NTEHs/Small Houses, the processing of the Small House grant is already at an advance stage;
- (e) an application site involves more than one NTEH/Small House, application of the above criteria would be on individual NTEH/Small House basis;
- (f) the proposed development should not frustrate the planning intention of the particular zone in which the application site is located;
- (g) the proposed development should be compatible in terms of land use, scale, design and layout, with the surrounding area/development;
- (h) the proposed development should not encroach onto the planned road network and should not cause adverse traffic, environmental, landscape, drainage, sewerage and geotechnical impacts on the surrounding areas. Any such potential impacts should be mitigated to the satisfaction of relevant Government departments;
- (i) the proposed development, if located within water gathering grounds, should be able to be connected to existing or planned sewerage system in the area except under very special circumstances (e.g. the application site has a building status under the lease or the applicant can demonstrate that the water quality within water gathering grounds will not be affected by the proposed development^);

- (j) the provision of fire service installations and emergency vehicular access, if required, should be appropriate with the scale of the development and in compliance with relevant standards; and
 - (k) all other statutory or non-statutory requirements of relevant Government departments must be met. Depending on the specific land use zoning of the application site, other Town Planning Board guidelines should be observed, as appropriate.
- ^i.e. the applicant can demonstrate that effluent discharge from the proposed development will be in compliance with the effluent standards as stipulated in the Water Pollution Control Ordinance Technical Memorandum.

Rejected Applications

Application No.	Proposed Development	Date of Consideration	Rejection Reasons
A/NE-KLH/302	Proposed New Territories Exempted House (Small House)	13.12.2002	R1-R2
A/NE-KLH/405	Proposed Three Houses (New Territories Exempted Houses)	11.6.2010	R1, R3-R4

Rejection Reasons

- R1. The proposed development was not in line with the planning intention of the “Agriculture” (“AGR”) zone which was to retain and safeguard good agricultural land/ farm/fish ponds for agricultural purposes and to retain fallow arable land with good potential for rehabilitation and/or for cultivation and other agricultural purposes. There was no strong justification in the submission/had been provided for a departure from the planning intention.
- R2. The proposed development did not comply with the interim criteria for assessing planning application for NTEH/Small House development in the New Territories in that the application site was located mostly outside the “Village Environs” (“VE”) and the “Village Type Development” (“V”) zone.
- R3. The proposed development, which was located within the WGG and was close to a stream course, would not be able to be connected to the planned sewerage system in the area. The applicant failed to demonstrate in the submission that the proposed development would not cause adverse impact on the water quality in the area.
- R4. The approval of the application would set an undesirable precedent for similar applications within the "AGR" zone, the cumulative effect of which would result in adverse impact on the rural landscape of the area.

Detailed Comments from Relevant Government Departments

1. Land Administration

Comments of the District Lands Officer/Tai Po, Lands Department (DLO/TP, LandsD):

- (a) no objection to the application;
- (b) the applicant is an indigenous villager of Wai Tau Tsuen of Tai Po Heung as confirmed by the Indigenous Inhabitant Representative (IIR). However, his eligibility for Small House (SH) grant have yet to be ascertained;
- (c) the Site is not covered by any Modification of Tenancy or Building Licence;
- (d) the Site is held under Block Government Lease demised for agricultural use. Small House application submitted by the applicant at the Site is still under processing;
- (e) in case the planning application is approved by the Town Planning Board (the Board), LandsD will process the Small House application according to prevailing applicable procedures. However, there is no guarantee at this stage that the Small House application would be approved. If the SH application is approved by LandsD acting in the capacity as landlord at its sole discretion, such approvals will be subject to terms and conditions as may be imposed by LandsD. There is no guarantee to the grant of a right of way to the proposed SH or approval of the emergency vehicular access thereto;
- (f) the estimated number of 10-year SH demand and the number of outstanding SH applications for the village concerned are as follows:

<u>Village</u>	<u>No. of 10-year SH Demand*</u>	<u>No. of Outstanding SH Applications (about)</u>
Wai Tau	295	17

(* The figures of 10-year SH Demand are estimations provided by the IIRs of concerned village and the information so obtained is not verified in any way by DLO/TP.)

2. Agriculture

Comments of the Director of Agriculture, Fisheries and Conservation (DAFC):

- the Site falls within “AGR” and “V” zones and is currently a piece of abandoned land. There are active agricultural activities in the vicinity, and agricultural infrastructure such as footpath and water source is available. The Site can be used for agricultural activities such as open-field cultivation, greenhouses, plant nurseries, etc. As the Site possesses potential for

agricultural rehabilitation, the application is not supported from agricultural point of view.

3. Environment

Comments of the Director of Environmental Protection (DEP):

- (a) the Site falls within “AGR” and “V” zones and is within water gathering grounds (WGG). There is existing public sewer at about 35m away from the Site and with sufficient capacity to accommodate discharge from the proposed development. However, the applicant proposed the use of septic tank and soakway system to treat wastewater generated in-site, which should be avoided within WGG according to Chapter 9 of the Hong Kong Planning Standard and Guidelines. Therefore, he does not support the application unless the following conditions are imposed:
 - (i) the proposed house will be connected to the public sewer;
 - (ii) adequate land space within the Site will be reserved for connection of the proposed house to the public sewer;
 - (iii) written consent(s) and/or LandsD’s permission can be obtained from the relevant lot owner(s) for laying and maintaining sewage pipes; and
 - (iv) the cost of sewer connection and maintenance will be borne by the applicant.

4. Landscape

Comments of the Chief Town Planner/Urban Design and Landscape, Planning Department (CTP/UD&L, PlanD) :

- (a) according to aerial photo of 2021, the Site is located in an area of settled valleys landscape character surrounded by village houses and farmlands. The Site is vacant and paved with no significant landscape resource observed. Hence, significant adverse impact on existing landscape resources arising from the proposed development is not anticipated;
- (b) the proposed Small House is considered not entirely incompatible with its surrounding environment; and
- (c) as there is insufficient space within the Site for meaningful landscaping and there is no major public frontage along the site boundary, should the Board approve this application, it is considered not necessary to impose a landscape condition as the effect of additional landscaping on enhancing the quality of public realm is not apparent.

5. Traffic

Comments of the Commissioner for Transport (C for T):

- (a) such type of development should be confined within the “V” zone as far as possible. Although additional traffic generated by the proposed development is not expected to be significant, such type of development outside “V” zone, if permitted, will set an undesirable precedent for similar applications in the future. The resulting cumulative adverse traffic impact could be substantial;
- (b) notwithstanding the above, the application only involving development of a Small House can be tolerated on traffic grounds; and
- (c) the proposed development is adjacent to a footpath. The maintenance and management party of the access road should be consulted.

6. Drainage and Sewerage

Comments of the Chief Engineer/Mainland North, Drainage Services Department (CE/MN, DSD):

- (i) the applicant should have its own stormwater collection and discharge system to cater for the runoff generated within the Site and overland flow from surrounding of the Site e.g. surface channel of sufficient size along the perimeter of the Site; sufficient openings should be provided at the bottom of the boundary wall/fence to allow surface runoff to pass through the Site if any boundary wall/fence are to be erected. Any existing flow path affected should be re-provided. The applicant shall neither obstruct overland flow nor adversely affect the existing natural streams, village drains, ditches and the adjacent areas. The applicant is required to maintain the drainage systems properly and rectify/modify the nearby existing/original drainage system if they are found to be inadequate or ineffective to accommodate the additional runoff arisen from the proposed development. The applicant shall also be liable for and shall indemnify claims and demands arising out of damage or nuisance caused by failure or ineffectiveness of the modified drainage systems caused by their works;
- (ii) DSD’s maintained public sewer exists in the vicinity but the feasibility of sewerage connection is subject to the invert of discharge connection pipe leading from the Site. No stud pipe is reserved for sewage connection. It is noted that the applicant would use septic tank instead of connecting to the public sewerage system. Views and comments from EPD should be sought;
- (iii) written consent(s) from relevant lot owner(s) and/or LandsD’s permission for laying new drains/channels and/or modifying/upgrading existing ones outside the application lot(s) or on government land (where required) should be provided;
- (iv) an approval condition of submission and implementation of the drainage proposal for the Site to the satisfaction of DSD or the TPB should be imposed to ensure that the proposed development will not cause adverse drainage impact to the adjacent area; and

- (v) the cost and work of drainage and sewerage connection as well as future maintenance responsibility shall be borne by the applicant.

7. Water Supplies

Comments of the Chief Engineer of Construction (CE/C, WSD):

- (a) does not support the application;
- (b) it is noted that the applicant proposes to adopt septic tank system for foul water disposal. It is also noted that there is existing public sewer nearby the subject site with sufficient capacity to accommodate discharge from the proposed house, and EPD does not support the application unless the proposed house will be connected to public sewer. As such, compliance with the "Interim Criteria for Consideration of Applications for NTEH/Small House in NT" item (i) cannot be established for the proposed development. The wastewater generated from the proposed development and septic tank may have potential to cause water pollution to the WGG.

8. Fire Safety

Comments of the Director of Fire Services (D of FS):

- (a) no in-principle objection to the application; and
- (b) the applicant is reminded to observe 'New Territories Exempted Houses – A Guide to Fire Safety Requirements' published by the LandsD. Detailed fire safety requirements will be formulated upon receipt of formal application referred by LandsD.

9. Demand and Supply of Small House Sites

According to the DLO/TP, LandsD's record, the total number of outstanding Small House applications for Wai Tau Tsuen is 17 while the 10-year Small House demand forecast for the same villages is 295.

Based on the latest estimate by the Planning Department, about 2.73 ha of land (or equivalent to about 109 Small House sites) are available within the "V" zone of Wai Tau Tsuen. Therefore, the land available cannot fully meet the future Small House demand of about 7.8 ha (or equivalent to about 312 Small House sites).

Dear TPB Members,

Minutes from recent application:

While land available within the "V" zone was insufficient to fully meet the Small House demand, it was capable to meet the 130 outstanding Small House applications. It was considered more appropriate to concentrate the proposed Small House development within the "V" zone for more orderly development pattern, efficient use of land and provision of infrastructures and services.

There is also the issue of Septic Tank. With the advent of global warming and severe flooding forecast for NT this form of drainage should not be encouraged.

Details of the Comment :

The land owner has already built two houses on the plot of land. Further development and the use of AGR should not be granted for the sake of making money and not for the need of the land owner's family. Furthermore the main access road outside my house [REDACTED] is very narrow and there was no improvement since I built my house in 1995. Any vehicle over 5.5 ton cannot pass through including large fire engines. Further developments will create all sorts of problems and endless arguments. No improvement on access road no further developments should be allowed.

Thanks for your understanding and considerations.

Recommended Advisory Clauses

- (a) to note the comments of the District Lands Officer/Tai Po, Lands Department (DLO/TP, LandsD) that:

in case the planning application is approved by the Town Planning Board (the Board), LandsD will process the Small House application according to prevailing applicable procedures. However, there is no guarantee at this stage that the Small House application would be approved. If the Small House application is approved by LandsD acting in the capacity as landlord at its sole discretion, such approval will be subject to terms and conditions as may be imposed by LandsD. There is no guarantee to the grant of a right of way to the proposed Small House or approval of the emergency vehicular access thereto;

- (b) to note the comments of Director of Environmental Protection (DEP) that:

- (i) the proposed Small House should be connected to the public sewer for sewage disposal;
- (ii) written consent(s) and/or LandsD's permission should be obtained from the adjacent lot owner(s) for laying and maintaining sewage pipes;
- (iii) adequate land space within the Site should be reserved for connection of the proposed Small House to the public sewer; and
- (iv) the cost of sewer connection and maintenance should be borne by the applicant;

- (c) to note the comments of the Chief Engineer/Mainland North of Drainage Services Department (CE/MN, DSD) that:

- (i) the applicant should have its own stormwater collection and discharge system to cater for the runoff generated within the Site and overland flow from surrounding of the Site e.g. surface channel of sufficient size along the perimeter of the Site; sufficient openings should be provided at the bottom of the boundary wall/fence to allow surface runoff to pass through the Site if any boundary wall/fence are to be erected. Any existing flow path affected should be re-provided. The applicant shall neither obstruct overland flow nor adversely affect the existing natural streams, village drains, ditches and the adjacent areas. The applicant is required to maintain the drainage systems properly and rectify/modify the nearby existing/original drainage system if they are found to be inadequate or ineffective to accommodate the additional runoff arisen from the proposed development. The applicant shall also be liable for and shall indemnify claims and demands arising out of damage or nuisance caused by failure or ineffectiveness of the modified drainage systems caused by their works;
- (ii) DSD's maintained public sewer exists in the vicinity but the feasibility of sewerage connection is subject to the invert of discharge connection pipe leading from the Site. No stud pipe is reserved for sewage connection. It is noted that the applicant would use septic tank instead of connecting to the public sewerage system. Therefore, should the applicant choose to dispose of

the sewage of the proposed development through septic tank or other means, views and comments from EPD should be sought;

- (iii) written consent(s) and/or LandsD's permission from relevant lot owner(s) for laying new drains/channels and/or modifying/upgrading existing ones outside the application lot(s) or on government land (where required) should be obtained; and
 - (iv) the cost and work of drainage and sewerage connection as well as future maintenance responsibility shall be borne by the applicant;
- (d) to note the comments of the Director of Fire Services (D of FS) that the applicant is reminded to observe 'New Territories Exempted Houses – A Guide to Fire Safety Requirements' published by LandsD. Detailed fire safety requirements will be formulated during land grant stage; and
- (e) to note that the permission is only given to the development under application. If provision of an access road is required for the proposed development, the applicant should ensure that such access road (including any necessary filling/excavation of land) complies with the provisions of the relevant statutory plan and obtain planning permission from the Town Planning Board where required before carrying out the road works.
