REDEVELOPMENT OF "New Territories Exempted House(s)" ON LOT No. 1740 IN D.D. 8

政府大渠橋墩口

SCALE 1:1000

擬興建(新界豁免管制屋宇)的狗頭隔宅

**Relevant Revised Interim Criteria for Consideration of Application for
NTEH/Small House in New Territories
(promulgated on 7.9.2007)**

- (a) sympathetic consideration may be given if not less than 50% of the proposed NTEH/Small House footprint falls within the village 'environs' ('VE') of a recognized village and there is a general shortage of land in meeting the demand for Small House development in the "Village Type Development" ("V") zone of the village;
- (b) if more than 50% of the proposed NTEH/Small House footprint is located outside the 'VE', favourable consideration could be given if not less than 50% of the proposed NTEH/Small House footprint falls within the "V" zone, provided that there is a general shortage of land in meeting the demand for Small House development in the "V" zone and the other criteria can be satisfied;
- (c) development of NTEH/Small House with more than 50% of the footprint outside both the 'VE' and the "V" zone would normally not be approved unless under very exceptional circumstances (e.g. the application site has a building status under the lease, or approving the application could help achieve certain planning objectives such as phasing out of obnoxious but legal existing uses);
- (d) application for NTEH/Small House with previous planning permission lapsed will be considered on its own merits. In general, proposed development which is not in line with the criteria would normally not be allowed. However, sympathetic consideration may be given if there are specific circumstances to justify the cases, such as the site is an infill site among existing NTEHs/Small Houses, the processing of the Small House grant is already at an advance stage;
- (e) an application site involves more than one NTEH/Small House, application of the above criteria would be on individual NTEH/Small House basis;
- (f) the proposed development should not frustrate the planning intention of the particular zone in which the application site is located;
- (g) the proposed development should be compatible in terms of land use, scale, design and layout, with the surrounding area/development;
- (h) the proposed development should not encroach onto the planned road network and should not cause adverse traffic, environmental, landscape, drainage, sewerage and geotechnical impacts on the surrounding areas. Any such potential impacts should be mitigated to the satisfaction of relevant government departments;
- (i) the proposed development, if located within water gathering grounds, should be able to be connected to existing or planned sewerage system in the area except under very special circumstances (e.g. the application site has a building status under the lease or the applicant can demonstrate that the water quality within water gathering grounds will not be affected by the proposed development^);

- (j) the provision of fire service installations and emergency vehicular access, if required, should be appropriate with the scale of the development and in compliance with relevant standards; and
 - (k) all other statutory or non-statutory requirements of relevant government departments must be met. Depending on the specific land use zoning of the application site, other Town Planning Board guidelines should be observed, as appropriate.
- ^i.e. the applicant can demonstrate that effluent discharge from the proposed development will be in compliance with the effluent standards as stipulated in the Water Pollution Control Ordinance Technical Memorandum.

A/NE-LT/717

Lot 1740 in D.D. 8 and adjoining Government Land, Chuen Shui Tseng, Lam Tsuen

Site area : 39.95sq.m Includes Government Land of 2.7sq.m

Zoning : "Agriculture"

Applied use : NET House

Dear TPB Members,

It is obvious that the site is well outside the village cluster and encroaches on to government land. The size of the site is also of concern as it allows no buffer space.

The proposed development is not in line with the planning intention of the "Agriculture" zone which is to retain and safeguard good agricultural land for agricultural purposes. This zone is also intended to retain fallow arable land with good potential for rehabilitation. No strong planning justification has been given in the submission for a departure from the planning intention.

Land is still available within the "V" zone of Chuen Shui Tseng which is primarily intended for Small House development. It is considered more appropriate to concentrate the proposed Small House development within the "V" zone for more

orderly development pattern, efficient use of land and provision of infrastructure and services.”

TPB should reject this application in line with previous decisions for the same area as approval would set an undesirable precedent of encouraging random development, septic tanks and general degradation of the countryside.

Mary Mulvihill

Recommended Advisory Clauses

- (a) to note the comments of the Chief Engineer/Mainland North, Drainage Services Department (CE/MN, DSD) that:
 - (i) the proposed development should have its own stormwater collection and discharge systems to cater for the runoff generated within the Site and overland flow from other areas surrounding the Site. Any existing flow path affected should be re-provided. The applicant should neither obstruct overland flow nor adversely affect the existing natural streams, village drains, ditches and the adjacent areas. The applicant should maintain the drainage systems properly and rectify/modify the nearby existing/original drainage systems if they are found to be inadequate or ineffective to accommodate the additional runoff arisen from the development of the Site. The applicant shall also be liable for and shall indemnify claims and demands arising out of damage or nuisance caused by failure or ineffectiveness of the modified drainage systems caused by his works;
 - (ii) there are public sewers maintained by DSD in the vicinity but the feasibility of sewerage connection is subject to the invert level of discharge connection pipe leading from the Site. The applicant should demonstrate the technical feasibility of sewerage connection. Should the applicant choose to dispose of the sewage of the proposed New Territories Exempted House (NTEH) through other means, views and comments from Environmental Protection Department should be sought;
 - (iii) the applicant should provide written consent(s) from relevant lot owner(s) and/or Lands Department's permission for laying new drains/channels and/or modifying/upgrading existing ones outside the Site or on government land (where required); and
 - (iv) the cost and works or drainage and sewerage connection as well as future maintenance responsibility should be borne by the applicant.
- (b) to note the comments of the Chief Engineer/Construction, Water Supplies Department (CE/C, WSD) that:
 - (i) the foul water drainage system of the proposed NTEH can be connected to the public sewerage system in the area and the applicant should connect the whole of the foul water drainage system to the public sewerage system;
 - (ii) adequate protective measures shall be taken to ensure that no pollution or siltation occurs to the water gathering grounds;
 - (iii) the applicant should submit an executed Deed of Grant of Easement for each private lot through which the sewer connection pipes are proposed to pass to demonstrate that it is both technically and legally feasible to install sewerage pipes from the proposed NTEH to the sewerage system via relevant private lots; and

- (iv) for provision of water supply to the proposed development, the applicant may need to extend the inside services to the nearest suitable Government water mains for connection. The applicant should resolve any land matter (such as private lots) associated with the provision of water supply and should be responsible for the construction, operation and maintenance of the inside services within the private lots to WSD's standards;
- (c) to note the comments of the Chief Town Planner/Urban Design and Landscape, Planning Department (CTP/UD&L, PlanD) that the approval of application does not imply approval of tree works such as pruning, transplanting and felling under lease. The applicant should seek approval for any proposed tree works from relevant departments prior to commencement of the works;
- (d) to note the comments of the Director of Fire Services (D of FS) that the applicant should observe "New Territories Exempted Houses - A Guide to Fire Safety Requirements" published by LandsD. Detailed fire safety requirements will be formulated upon receipt of formal application referred by LandsD; and
- (e) to note that the permission is only given to the development under application. If provision of an access road is required for the proposed development, the applicant should ensure that such access road (including any necessary filling/excavation of land) complies with the provisions of the relevant statutory plan and obtain planning permission from the Town Planning Board where required before carrying out the road works.
