**Relevant Interim Criteria for Consideration of
Application for New Territories Exempted House (NTEH)/Small House in New Territories
(promulgated on 7.9.2007)**

- (a) sympathetic consideration may be given if not less than 50% of the proposed NTEH/Small House footprint falls within the village 'environs' ('VE') of a recognized village and there is a general shortage of land in meeting the demand for Small House development in the "Village Type Development" ("V") zone of the village;
- (b) if more than 50% of the proposed NTEH/Small House footprint is located outside the 'VE', favourable consideration could be given if not less than 50% of the proposed NTEH/Small House footprint falls within the "V" zone, provided that there is a general shortage of land in meeting the demand for Small House development in the "V" zone and the other criteria can be satisfied;
- (c) development of NTEH/Small House with more than 50% of the footprint outside both the 'VE' and the "V" zone would normally not be approved unless under very exceptional circumstances (e.g. the application site has a building status under the lease, or approving the application could help achieve certain planning objectives such as phasing out of obnoxious but legal existing uses);
- (d) application for NTEH/Small House with previous planning permission lapsed will be considered on its own merits. In general, proposed development which is not in line with the criteria would normally not be allowed. However, sympathetic consideration may be given if there are specific circumstances to justify the cases, such as the site is an infill site among existing NTEHs/Small Houses, the processing of the Small House grant is already at an advance stage;
- (e) if an application site involves more than one NTEH/Small House, application of the above criteria would be on individual NTEH/Small House basis;
- (f) the proposed development should not frustrate the planning intention of the particular zone in which the application site is located;
- (g) the proposed development should be compatible in terms of land use, scale, design and layout, with the surrounding area/development;
- (h) the proposed development should not encroach onto the planned road network and should not cause adverse traffic, environmental, landscape, drainage, sewerage and geotechnical impacts on the surrounding areas. Any such potential impacts should be mitigated to the satisfaction of relevant Government departments;
- (i) the proposed development, if located within water gathering grounds, should be able to be connected to existing or planned sewerage system in the area except under very special circumstances (e.g. the application site has a building status under the lease or the applicant can demonstrate that the water quality within water gathering grounds will not be affected by the proposed development*);
- (j) the provision of fire service installations and emergency vehicular access, if required, should be appropriate with the scale of the development and in compliance with relevant standards; and

- (k) all other statutory or non-statutory requirements of relevant Government departments must be met. Depending on the specific land use zoning of the application site, other Town Planning Board guidelines should be observed, as appropriate.
- *i.e. the applicant can demonstrate that effluent discharge from the proposed development will be in compliance with the effluent standards as stipulated in the Water Pollution Control Ordinance Technical Memorandum.

Detailed Comments from Relevant Government Departments

1. Land Administration

Comments of the District Lands Officer/North, Lands Department (DLO/N, LandsD):

- (a) the Sites fall entirely within the village environs of Man Uk Pin Village;
- (b) the applicants claimed themselves to be indigenous villagers of Man Uk Pin Village. Their eligibilities for Small House grants have yet to be ascertained;
- (c) the Sites are not covered by any Modification of Tenancy/Building License;
- (d) the Small House applications under planning applications No. A/NE-MUP/189 to 191 are still being processed by her office; and
- (e) there is no “Fung Shui” area at Man Uk Pin Village.

2. Traffic

Comments of the Commissioner for Transport (C for T):

- (a) she has reservation on the applications. Such type of developments should be confined within the “Village Type Development” (“V”) zone as far as possible. Although additional traffic generated by the proposed developments is not expected to be significant, such type of developments outside the “V” zone, if permitted, will set an undesirable precedent case for similar applications in the future. The resulting cumulative adverse traffic impact could be substantial;
- (b) notwithstanding the above, the applications only involve the construction of one Small House at each site. She considers that the applications can be tolerated unless being rejected on other grounds; and
- (c) the local village access adjacent to the Sites is not managed by Transport Department.

Comments of the Chief Highway Engineer/New Territories East, Highways Department (HyD):

- (a) no comment on the planning applications; and
- (b) the local village access adjacent to the Sites is not maintained by HyD.

3. Environment

Comments of the Director of Environmental Protection (DEP):

- (a) in view of the small scale of the proposed developments and the location of the septic tanks are located further away from the natural stream, the applications are unlikely to cause major pollution; and

- (b) septic tank and soakaway system is an acceptable means for collection, treatment and disposal of the sewage provided that its design and construction follow the requirements of the ProPECC PN 5/93 “Drainage Plans subject to Comment by the Environmental Protection Department” and are duly certified by an Authorized Person.

4. Landscape

Comments of the Chief Town Planner/Urban Design and Landscape, Planning Department (CTP/UD&L, PlanD):

- (a) she has no objection to the applications from the landscape planning perspective;
- (b) the Sites are located in an area of rural inland plains landscape character surrounded by village houses, farmland and tree clusters. There has been no significant change in the landscape character since the last planning applications were approved. The Sites are covered by self-seeded vegetation. Significant adverse impact on the landscape character and the existing landscape resources within the Sites arising from the proposed use is not anticipated; and
- (c) should these applications be approved by the Board, it is considered not necessary to impose a landscape condition as there is no major public frontage along the site boundaries and the effect of additional landscaping on enhancing the quality of public realm is not apparent.

5. Drainage

Comments of the Chief Engineer/Mainland North, Drainage Services Department (CE/MN, DSD):

- (a) she has no objection to the applications from the public drainage viewpoint; and
- (b) should the applications be approved, a condition should be included to request the applicants to submit and implement a drainage proposal for the Sites to ensure that it will not cause adverse drainage impact on the adjacent area, and the drainage system should be properly maintained at all times during the planning approval period and rectified if they are found inadequate / ineffective during operation.

6. Nature Conservation and Agriculture

Comments of the Director of Agriculture, Fisheries and Conservation (DAFC):

- (a) the applications are not supported from agricultural perspective as the Sites possess potential for agricultural rehabilitation;
- (b) the Sites fall within the “AGR” zone and are vacant. The agricultural activities are active in the vicinity, and agricultural infrastructures such as road access and water sources are also available. The Sites can be used for agricultural activities such as open-field cultivation, greenhouses, plant nurseries, etc; and
- (c) a natural stream, which is the downstream section of the Ecologically Important Stream at Man Uk Pin, is located adjacent to the eastern boundary of the Sites. The applicants should

advise if the proposed use would affect the natural stream nearby, and if any mitigation / preventive measures would be undertaken.

7. Fire Safety

Comments of the Director of Fire Services (D of FS):

- (a) he has no in-principle objection to the applications provided that the proposed houses would not encroach onto any existing emergency vehicular access (EVA) or planned EVA under application in accordance with LandsD's record; and
- (b) the applicants are reminded to observe 'New Territories Exempted Houses – A Guide to Fire Safety Requirements' published by LandsD. Detailed fire safety requirements will be formulated upon receipt of formal application via LandsD.

8. District Officer's Comments

Comments of the District Officer (North), Home Affairs Department (DO(N), HAD):

he has consulted the locals regarding the applications. All consultees, including the Chairman of Sha Tau Kok District Rural Committee, the incumbent North District Councilor of N16 Constituency, the Indigenous Inhabitant Representative (IIR) and the Resident Representative (RR) of Man Uk Pin, have no comment.

9. Demand and Supply of Small House Sites

According to DLO/N's records, the total number of outstanding Small House applications for Man Uk Pin Village is 43 while the 10-year Small House demand forecast for the same village cluster is 448. According to the latest estimate by PlanD, about 2.14 ha (equivalent to 85 Small House sites) of land are available within the "V" zone of Man Uk Pin Village for Small House development. There is insufficient land in the "V" zone of Man Uk Pin Village to meet the future demand of land for Small House development (i.e. about 12.28 ha of land which is equivalent to 491 Small House sites).

I am writing to object the applications (A/NE-MUP/189, 190, 191) with the following reasons:

1. There is neither footpath or vehicular access available for the subject sites;
2. The land leading to the subject sites along the river near the house was illegally being land filled earlier. The said illegal land filling was reported by us (the residents in Man UK Pin Village) to DLO/N, DO/N, DSD and FSD. Representatives of relevant Government Departments have been to the site for investigations and the illegal land filling works were stopped. It is noted that relevant Government Department has installed some bollards to prevent the entry into the illegal filled land area. However, Government Departments have failed to reinstate the illegal land fill back to its original state. Such illegal land filling reduced 1/3 width of the river which will also increase the danger of flooding in the area. However, Government departments have failed and ignored to do the reinstatement but to put the bollards to finish the case. I urged the TPB should seek views from DSO/N regarding the alignment of the river originally by comparing the survey sheets (before and after). DSD should have the record of it as DSD has taken the widening works of the river edge a few years ago;
3. In order not to endanger our lives, I request relevant Government Departments (i.e. DSD, FSD, DSO/N, DO/N) to take immediate actions to do the reinstatement of the river edge;
4. Also, the approval of the applications will encourage such illegal land filling works. TPB should request the applicants to proof the availability of footpath onto the sites instead of just seeing the existing access (illegal land fill) which appears to be available currently;
5. The availability of land within "Village" zone for village house development is still in surplus, TPB should not allow any more sprawl of development onto the village environ within "AGR" zone; and
6. Also, the proposed village houses as per the subject applications are very near to the river, the provision of septic tank might pollute the water quality of the river.

As a member of Man Uk Pin communities, I am writing to express my concerns regarding the proposed 3 applications for building small houses in the designated areas, which are basically around my neighbourhood. I believe that such development would pose significant negative impacts on the natural surrounding environment causing waste pollution, drainage problem, and the disturbance to the proximity.

Man Uk Pin has been lowly-populated and people residing here are longing for the peaceful and quiet living qualities. The proposed construction would result in the destruction of the natural surrounding environment. Construction activities would destroy natural habitats and generate a significant amount of waste, including construction debris, which can be difficult to dispose of properly in rural areas. This waste can end up polluting local waterways as well as the air quality as construction activities can also generate dust, debris, and other pollutants, worsening the current situation brought by the proximity to the landfill site and hence affecting the health of local residents.

The proposed development would also exacerbate the existing drainage problems in the area. The land in this area is already prone to flooding, and the construction of a new development would lead to soil erosion and pollution of waterways, which in turn increase the risk of flooding for nearby properties. This could lead to property damage and could also put residents at risk.

Apart from the above threats, the proposed development is in close proximity to current living premises. The construction works would lead to a number of issues, including increased traffic, noise pollution, and a loss of privacy for nearby residents. These issues could have a significant negative impact on the quality of life for those living nearby.

I believe that the negative impacts of this development would far outweigh any potential benefits which could hardly be public ones, and I strongly recommend rejecting these planning applications, or at least impose strict requirements that the applicants should be obliged to comply, in order to minimise the negative impacts and safeguard the interests of the local residents. Last but not least, an effective report system should be established for overseeing the construction works as well.

Thank you for your consideration.

Dear TPB Members,

2022 applications withdrawn. Strong objections, there is land sufficient for over 100 NET houses still available in the "V" zone..

While approval was granted for previous applications in the Agriculture zone, this was under a now abandoned policy.

A Member asked whether the previous applications on the Sites were approved prior to the Board's adoption of the more cautious approach for considering applications for Small House development. In response, Mr Tim T.Y. Fung, STP/STN, said that the previous applications (No. A/NE-MUP/96 to 98) on the Sites were approved in 2014 before the Board's adoption of the more cautious approach

Moreover "Formation of new village cluster" if not permitted under the Small House Policy that clearly indicates that "refers to a 300-*feet* radius from the edge of the last village type *house* built before the introduction of the *Policy*".

At a time that most citizens are crammed into very tall cubicles built on small footprints, it is unacceptable that inefficient land use be tolerated.

Dear TPB Members,

2014 approval is history. The applications should be consider afresh and in line with current policies and conditions.

Septic tanks 25 Jan 2019

65. Members noted that the requirement of sewerage connection was clearly stated in the HKPSG, and generally considered that the Board should follow the requirement in considering the current application. Mr Elvis W.K. Au, Deputy Director of Environmental Protection (1) of EPD, said that after the promulgation of the guideline on controlling effluent discharge in WGGs under Chapter 9 of the HKPSG, it had been the government policy to require new developments within WGGs to be connected to public sewers. The Government had also briefed the Board on the environmental and health risks arising from septic tank installation in the areas. In 2002, the Board revised the "Interim Criteria for Consideration of Application for New Territories Exempted House/Small House in New Territories" which clearly stated that generally the Board only supported new Small House development in WGG if it was connected to the public sewerage system. Notwithstanding that existing buildings with septic tanks in unsewered areas were tolerated, the requirement for sewerage connection would help avoid worsening the water quality in WGGs. So far, EPD and WSD had consistently followed that requirement in handling similar cases.

While CFA ruled that the right to build small houses is protected by the Basic Law, the policy had never had a statutory basis and was subject to the discretion of the Lands Department. This indicates that as the OZP stipulates that the sites are zoned for Agriculture then they are designated for other use.

Land is still available within the "Village Type Development" zone of Man Uk Pin Village where land is primarily intended for Small House development. It is considered more appropriate to concentrate the proposed Small House development close to the existing village cluster for orderly development pattern,

efficient use of land and provision of infrastructures and services. The rights of villagers have therefore been considered and accommodated with the VTD zone.

TPB should reject the applications as they are not in line with the planning vision for the district.

65. Members noted that the requirement of sewerage connection was clearly stated in the HKPSG, and generally considered that the Board should follow the requirement in considering the current application. Mr Elvis W.K. Au, Deputy Director of Environmental Protection (1) of EPD, said that after the promulgation of the guideline on controlling effluent discharge in WGGs under Chapter 9 of the HKPSG, it had been the government policy to require new developments within WGGs to be connected to public sewers. The Government had also briefed the Board on the environmental and health risks arising from septic tank installation in the areas. In 2002, the Board revised the "Interim Criteria for Consideration of Application for New Territories Exempted House/Small House in New Territories" which clearly stated that generally the Board only supported new Small House development in WGG if it was connected to the public sewerage system. Notwithstanding that existing buildings with septic tanks in unsewered areas were tolerated, the requirement for sewerage connection would help avoid worsening the water quality in WGGs. So far, EPD and WSD had consistently followed that requirement in handling similar cases.

While CFA ruled that the right to build small houses is protected by the Basic Law, the policy had never had a statutory basis and was subject to the discretion of the Lands Department. This indicates that as the OZP stipulates that the sites are zoned for Agriculture then they are designated for other use.

Land is still available within the "Village Type Development" zone of Man Uk Pin Village where land is primarily intended for Small House development. It is considered more appropriate to concentrate the proposed Small House development close to the existing village cluster for orderly development pattern,

efficient use of land and provision of infrastructures and services. The rights of villagers have therefore been considered and accommodated with the VTD zone.

TPB should reject the applications as they are not in line with the planning vision for the district.

I am writing to object the applications (A/NE-MUP/189, 190, 191) with the following reasons:

1. There is neither footpath or vehicular access available for the subject sites;
2. The land leading to the subject sites along the river near the house was illegally being land filled earlier. The said illegal land filling was reported by us (the residents in Man UK Pin Village) to DLO/N, DO/N, DSD and FSD. Representatives of relevant Government Departments have been to the site for investigations and the illegal land filling works were stopped. It is noted that relevant Government Department has installed some bollards to prevent the entry into the illegal filled land area. However, Government Departments have failed to reinstate the illegal land fill back to its original state. Such illegal land filling reduced 1/3 width of the river which will also increase the danger of flooding in the area. However, Government departments have failed and ignored to do the reinstatement but to put the bollards to finish the case. I urged the TPB should seek views from DSO/N regarding the alignment of the river originally by comparing the survey sheets (before and after). DSD should have the record of it as DSD has taken the widening works of the river edge a few years ago;
3. In order not to endanger our lives, I request relevant Government Departments (i.e. DSD, FSD, DSO/N, DO/N) to take immediate actions to do the reinstatement of the river edge;
4. Also, the approval of the applications will encourage such illegal land filling works. TPB should request the applicants to proof the availability of footpath onto the sites instead of just seeing the existing access (illegal land fill) which appears to be available currently;
5. The availability of land within "Village" zone for village house development is still in surplus, TPB should not allow any more sprawl of development onto the village environ within "AGR" zone; and
6. Also, the proposed village houses as per the subject applications are very near to the river, the provision of septic tank might pollute the water quality of the river.

Details of the Comment :

As a member of Man Uk Pin communities, I am writing to express my concerns regarding the proposed 3 applications for building small houses in the designated areas, which are basically around my neighbourhood. I believe that such development would pose significant negative impacts on the natural surrounding environment causing waste pollution, drainage problem, and the disturbance to the proximity.

Man Uk Pin has been lowly-populated and people residing here are longing for the peaceful and quiet living qualities. The proposed construction would result in the destruction of the natural surrounding environment. Construction activities would destroy natural habitats and generate a significant amount of waste, including construction debris, which can be difficult to dispose of properly in rural areas. This waste can end up polluting local waterways as well as the air quality as construction activities can also generate dust, debris, and other pollutants, worsening the current situation brought by the proximity to the landfill site and hence affecting the health of local residents.

The proposed development would also exacerbate the existing drainage problems in the area. The land in this area is already prone to flooding, and the construction of a new development would lead to soil erosion and pollution of waterways, which in turn increase the risk of flooding for nearby properties. This could lead to property damage and could also put residents at risk.

Apart from the above threats, the proposed development is in close proximity to current living premises. The construction works would lead to a number of issues, including increased traffic, noise pollution, and a loss of privacy for nearby residents. These issues could have a significant negative impact on the quality of life for those living nearby.

I believe that the negative impacts of this development would far outweigh any potential benefits which could hardly be public ones, and I strongly recommend rejecting these planning applications, or at least impose strict requirements that the applicants should be obliged to comply, in order to minimise the negative impacts and safeguard the interests of the local residents. Last but not least, an effective report system should be established for overseeing the construction works as well.

Thank you for your consideration.

Dear TPB Members,

2022 applications withdrawn. Strong objections, there is land sufficient for over 100 NET houses still available in the "V" zone.

While approval was granted for previous applications in the Agriculture zone, this was under a now abandoned policy.

A Member asked whether the previous applications on the Sites were approved prior to the Board's adoption of the more cautious approach for considering applications for Small House development. In response, Mr Tim T.Y. Fung, STP/STN, said that the previous applications (No. A/NE-MUP/96 to 98) on the Sites were approved in 2014 before the Board's adoption of the more cautious approach

Moreover "Formation of new village cluster" if not permitted under the Small House Policy that clearly indicates that "refers to a 300-feet radius from the edge of the last village type *house* built before the introduction of the *Policy*".

At a time that most citizens are crammed into very tall cubicles built on small footprints, it is unacceptable that inefficient land use be tolerated.

Recommended Advisory Clauses

- (a) to note the comments of Director of Fire Services that the applicants should observe ‘New Territories Exempted Houses – A Guide to Fire Safety Requirements’ published by Lands Department (LandsD). Detailed fire safety requirements will be formulated upon receipt of formal application via LandsD;
- (b) to note the comments of the Director of Environmental Protection that septic tank and soakaway system is an acceptable means for collection, treatment and disposal of the sewage provided that its design and construction follow the requirements of the ProPECC PN 5/93 “Drainage Plans subject to Comment by the Environmental Protection Department” and are duly certified by an Authorized Person;
- (c) to note the comments of the Chief Engineer/Mainland North, Drainage Services Department that the Site is in an area where no public sewerage connection and no public stormwater system are available. The applicant should construct and maintain the proposed drainage works whether within or outside the lot boundary by lot owner at his own expense; and the drainage system should be properly maintained at all times during the planning approval period and rectified if they are found inadequate / ineffective during operation; and
- (d) to note that the permission is only given to the development under application. If provision of an access road is required for the proposed development, the applicant should ensure that such access road (including any necessary filling/excavation of land) complies with the provisions of the relevant statutory plan and obtain planning permissions from the Town Planning Board where required before carrying out the road works.
