(promulgated on 7.9.2007)

- (a) sympathetic consideration may be given if not less than 50% of the proposed NTEH/Small House footprint falls within the village 'environs' ('VE') of a recognized village and there is a general shortage of land in meeting the demand for Small House development in the "Village Type Development" ("V") zone of the village;
- (b) if more than 50% of the proposed NTEH/Small House footprint is located outside the 'VE', favourable consideration could be given if not less than 50% of the proposed NTEH/Small House footprint falls within the "V" zone, provided that there is a general shortage of land in meeting the demand for Small House development in the "V" zone and the other criteria can be satisfied;
- (c) development of NTEH/Small House with more than 50% of the footprint outside both the 'VE' and the "V" zone would normally not be approved unless under very exceptional circumstances (e.g. the application site has a building status under the lease, or approving the application could help achieve certain planning objectives such as phasing out of obnoxious but legal existing uses);
- (d) application for NTEH/Small House with previous planning permission lapsed will be considered on its own merits. In general, proposed development which is not in line with the criteria would normally not be allowed. However, sympathetic consideration may be given if there are specific circumstances to justify the cases, such as the site is an infill site among existing NTEHs/Small Houses, the processing of the Small House grant is already at an advance stage;
- (e) an application site involves more than one NTEH/Small House, application of the above criteria would be on individual NTEH/Small House basis;
- (f) the proposed development should not frustrate the planning intention of the particular zone in which the application site is located;
- (g) the proposed development should be compatible in terms of land use, scale, design and layout, with the surrounding area/development;
- (h) the proposed development should not encroach onto the planned road network and should not cause adverse traffic, environmental, landscape, drainage, sewerage and geotechnical impacts on the surrounding areas. Any such potential impacts should be mitigated to the satisfaction of relevant Government departments;
- (i) the proposed development, if located within water gathering grounds, should be able to be connected to existing or planned sewerage system in the area except under very special circumstances (e.g. the application site has a building status under the lease or the applicant can demonstrate that the water quality within water gathering grounds will not be affected by the proposed development^);

- (j) the provision of fire service installations and emergency vehicular access, if required, should be appropriate with the scale of the development and in compliance with relevant standards; and
 - (k) all other statutory or non-statutory requirements of relevant Government departments must be met. Depending on the specific land use zoning of the application site, other Town Planning Board guidelines should be observed, as appropriate.
- ^i.e. the applicant can demonstrate that effluent discharge from the proposed development will be in compliance with the effluent standards as stipulated in the Water Pollution Control Ordinance Technical Memorandum.

Detailed Comments from Relevant Government Departments

1. Land Administration

Comments of the District Lands Officer/North, Lands Department (DLO/N, LandsD):

- the application sites (the Sites) fall entirely within the village ‘environs’ (‘VE’) of Kai Leng Village;
- the applicant of Application No. A/NE-PK/188 is an indigenous villager of Sheung Shui, Sheung Shui Heung and the applicant of Application No. A/NE-PK/189 is an indigenous villager of Liu Pok, Sheung Shui Heung. Their eligibility for Small House grant has been ascertained;
- the Sites are old schedule agriculture lots held under Block Government Lease. The Small House grant applications on the Sites have been approved. The basic terms offer are yet to be issued;
- the Sites are covered by Modification of Tenancy No. 37655 and Letter of Approval No. L4654; and
- the proposed locations of septic tank and soakage pit under the current applications are different from the location approved by DLO/N.

2. Agriculture

Comments of the Director of Agriculture, Fisheries and Conservation (DAFC):

- the proposed developments are not supported from agricultural perspective; and
- the Sites fall within the “Agriculture” zone and are vacant. The agricultural activities are active in the vicinity, and agricultural infrastructures such as road access and water sources are also available. The Sites can be used for agricultural activities such as open-field cultivation, greenhouses, plant nurseries, etc. The Sites possess potential for agricultural rehabilitation.

3. Traffic

Comments of the Commissioner for Transport (C for T):

- Small House development should be confined within the “V” zone as far as possible. Although additional traffic generated by the proposed developments is not expected to be significant, such type of development outside the “V” zone, if permitted, will set an undesirable precedent case for similar applications in the future. The resulting cumulative adverse traffic impact could be substantial; and
- notwithstanding the above, the applications only involve development of one Small House at each of the Sites and they can be tolerated on traffic grounds.

4. Environment

Comments of the Director of Environmental Protection (DEP):

- in view of small scale of the proposed developments, the applications alone are unlikely to cause major pollution.

5. Drainage

Comments of the Chief Engineer/Mainland North, Drainage Services Department (CE/MN, DSD):

- no objection to the applications from public drainage viewpoint;
- the Sites are in an area where no stormwater drain maintained by Drainage Services Department is available. Should the applications be approved, an approval condition requiring the submission and implementation of drainage proposal for the Sites should be included to ensure that the proposed developments will not cause adverse drainage impact on the adjacent area; and
- the Sites are within an area where no existing public sewerage connection is available; and
- his advisory comments are set out at **Appendix VII**.

6. Water Supplies

Comments of the Chief Engineer/Construction, Water Supplies Department (CE/C, WSD):

- no objection to the applications; and
- existing water mains are inside the Sites and will be affected. The applicants are required to either divert or protect the water mains found on the Sites; and
- his advisory comments are set out at **Appendix VII**.

7. Landscape

Comments of the Chief Town Planner/Urban Design and Landscape, Planning Department (CTP/UD&L, PlanD):

- no objection to the applications from the landscape planning perspective;
- the Sites are located in an area of rural inland plains landscape character comprising tree clusters, vegetated areas, farmlands and village houses within “V” zone; and
- the Sites are covered by self-seeded vegetation with no significant sensitive landscape resources. Significant adverse impact on the landscape character and the existing landscape resources within the Sites arising from the proposed use is not anticipated.

8. Fire Safety

Comments of the Director of Fire Services (D of FS):

- no in-principle objection to the applications provided that the proposed houses would not encroach on any existing emergency vehicular access (EVA) or planned EVA under application in accordance with LandsD's record.

9. Demand and Supply of Small House Sites

According to DLO/N, LandsD's record, the total number of outstanding Small House applications for Kai Leng Village is 66, while the 10-year Small House demand forecast for concerned village is 279. Based on the latest estimate by Planning Department, about 0.68ha (or equivalent to about 27 Small House sites) of land is available within the "V" zones of Kai Leng Village. Therefore, the land available cannot fully meet the future demand of 345 Small Houses (or equivalent to about 8.63ha of land).

Dear TPB Members,

It is quite shocking that the board has followed the recommendations of PlanD in approving dozens of small houses well outside the "V" zone of Kai Leng when there is still no sewerage system in place.

So much for Asia's World City, the land of The Septic Tank, a facility acceptable in a mountain village but certainly not appropriate for an urban environment.

Recommended Advisory Clauses

- (a) To note the comments of the District Lands Officer/North, Lands Department (DLO/N, LandsD) that if the applicants would like to revise the location of septic tank and soakage pit, reposting of notice may be necessary and further approval may be required;
- (b) to note the comments of the Director of Environmental Protection that septic tank and soakaway system is an acceptable means for collection, treatment and disposal of the sewage provided that its design and construction follow the requirements of the Practice Note for Professional Person (ProPECC) PN 5/93 “Drainage Plans subject to Comment by the Environmental Protection Department” and are duly certified by an Authorized Person;
- (c) to note the comments of the Chief Engineer/Mainland North, Drainage Services Department (CE/MN, DSD) that:
 - (i) all existing flow paths as well as the runoff onto and passing through the application sites (the Sites) should be intercepted and disposed of via proper discharge points. The applicants shall also ensure that no works, including any site formation works, shall be carried out as may adversely interfere with the free flow condition of the existing drain, channels and watercourses on or in the vicinity of the Sites any time during or after the works;
 - (ii) surface channels should be provided along the perimeter of the Sites to collect all the runoff generated from the Sites or passing through the Sites, and discharge the runoff collected to a proper discharge point. Where walls are erected or kerbs are laid along the boundary of the Sites, peripheral channels should be provided on both sides of the walls or kerbs with details to be agreed by DSD; and
 - (iii) the proposed drainage works, whether within or outside the Sites, should be constructed and maintained by the applicants at their own expense. For drainage works to be undertaken outside the Sites, the applicants should obtain prior consent and agreement from DLO/N and/or relevant private lot owners;
- (d) to note the comments of the Chief Engineer/Construction, Water Supplies Department (CE/C, WSD) that:
 - (i) existing water mains as shown in **Plan A-2a** are inside the Sites and will be affected. The applicants are required to either divert or protect the water mains found on the Sites;
 - (ii) if diversion is required, existing water mains inside the Sites are needed to be diverted outside the site boundaries of the proposed developments to lie in Government land. A strip of land of minimum 1.5m in width should be provided for the diversion of existing water mains. The cost of diversion of existing water mains upon request will have to be borne by the applicants; and the applicants shall submit all the relevant proposal to WSD for consideration and agreement before the works commence;

- (iii) if diversion is not required, the following conditions shall apply:
- existing water mains are affected as indicated on **Plan A-2a** and no development which requires resiting of water mains will be allowed;
 - details of site formation works shall be submitted to the Director of Water Supplies for approval prior to commencement of works;
 - no structures shall be built or materials stored within 1.5m from the centre line(s) of water main(s) shown on the plan. Free access shall be made available at all times for staff of the Director of Water Supplies or their contractor to carry out construction, inspection, operation, maintenance and repair works;
 - no trees or shrubs with penetrating roots may be planted within the Water Works Reserve or in the vicinity of the water main(s) shown on the plan. No change of existing site condition may be undertaken within the aforesaid area without the prior agreement of the Director of Water Supplies. Rigid root barriers may be required if the clear distance between the proposed tree and the pipe is 2.5m or less, and the barrier must extend below the invert level of the pipe;
 - no planting or obstruction of any kind except turfing shall be permitted within the space of 1.5m around the cover of any valve or within a distance of 1m from any hydrant outlet; and
 - tree planting may be prohibited in the event that the Director of Water Supplies considers that there is any likelihood of damage being caused to water mains;
- (e) to note the comments of the Director of Fire Services that the applicants are advised to observe 'New Territories Exempted Houses – A Guide to Fire Safety Requirements' published by LandsD. Detailed fire safety requirements will be formulated upon receipt of formal application referred by LandsD; and
- (f) to note that the permissions are only given to the developments under applications. If provision of an access road is required for the proposed developments, the applicants should ensure that such access road (including any necessary filling/excavation of land) complies with the provisions of the relevant statutory plan and obtain planning permission from Town Planning Board where required before carrying out the road work.
