

2020年 10月 3 0日

此文件在\_\_\_\_\_收到。城市規劃委員會  
只會在收到所有所需的資料及文件後才正式確認收到

30 OCT 2020

The application received on \_\_\_\_\_  
The Planning Board will formally acknowledge  
the date of receipt of the application only upon receipt  
of all the required information and documents.

Form No. S16-III  
表格第 S16-III 號

# APPLICATION FOR PERMISSION UNDER SECTION 16 OF THE TOWN PLANNING ORDINANCE (CAP.131)

根據《城市規劃條例》(第131章)  
第16條遞交的許可申請

**Applicable to Proposal Only Involving Temporary Use/Development of  
Land and/or Building Not Exceeding 3 Years in Rural Areas or Renewal  
of Permission for such Temporary Use or Development\***

**適用於祇涉及位於鄉郊地區土地上及/或建築物內進行為期不超過三年  
的臨時用途/發展或該等臨時用途/發展的許可續期的建議\***

\*Form No. S16-I should be used for other Temporary Use/Development of Land and/or Building (e.g. temporary use/developments in the Urban Area) and Renewal of Permission for such Temporary Use or Development.

\*其他土地上及/或建築物內的臨時用途/發展 (例如位於市區內的臨時用途或發展) 及有關該等臨時用途/發展的許可續期，應使用表格第 S16-I 號。

Applicant who would like to publish the notice of application in local newspapers to meet one of the Town Planning Board's requirements of taking reasonable steps to obtain consent of or give notification to the current land owner, please refer to the following link regarding publishing the notice in the designated newspapers: [https://www.info.gov.hk/tpb/en/plan\\_application/apply.html](https://www.info.gov.hk/tpb/en/plan_application/apply.html)

申請人如欲在本地報章刊登申請通知，以採取城市規劃委員會就取得現行土地擁有人的同意或通知現行土地擁有人所指定的其中一項合理步驟，請瀏覽以下網址有關在指定的報章刊登通知：  
[https://www.info.gov.hk/tpb/tc/plan\\_application/apply.html](https://www.info.gov.hk/tpb/tc/plan_application/apply.html)

## **General Note and Annotation for the Form**

### **填寫表格的一般指引及註解**

# "Current land owner" means any person whose name is registered in the Land Registry as that of an owner of the land to which the application relates, as at 6 weeks before the application is made  
「現行土地擁有人」指在提出申請前六星期，其姓名或名稱已在土地註冊處註冊為該申請所關乎的土地的擁有人的人

& Please attach documentary proof 請夾附證明文件

^ Please insert number where appropriate 請在適當地方註明編號

Please fill "NA" for inapplicable item 請在不適用的項目填寫「不適用」

Please use separate sheets if the space provided is insufficient 如所提供的空間不足，請另頁說明

Please insert a 「✓」 at the appropriate box 請在適當的方格內上加上「✓」號

|                                 |                         |              |
|---------------------------------|-------------------------|--------------|
| For Official Use Only<br>請勿填寫此欄 | Application No.<br>申請編號 | A/NE-7KLN/37 |
|                                 | Date Received<br>收到日期   | 30 OCT 2020  |

- The completed form and supporting documents (if any) should be sent to the Secretary, Town Planning Board (the Board), 15/F, North Point Government Offices, 333 Java Road, North Point, Hong Kong.  
申請人須把填妥的申請表格及其他支持申請的文件 (倘有), 送交香港北角渣華道 333 號北角政府合署 15 樓城市規劃委員會(下稱「委員會」)秘書收。
- Please read the "Guidance Notes" carefully before you fill in this form. The document can be downloaded from the Board's website at <http://www.info.gov.hk/tpb/>. It can also be obtained from the Secretariat of the Board at 15/F, North Point Government Offices, 333 Java Road, North Point, Hong Kong (Tel: 2231 4810 or 2231 4835), and the Planning Enquiry Counters of the Planning Department (Hotline: 2231 5000) (17/F, North Point Government Offices, 333 Java Road, North Point, Hong Kong and 14/F, Sha Tin Government Offices, 1 Sheung Wo Che Road, Sha Tin, New Territories).  
請先細閱《申請須知》的資料單張, 然後填寫此表格。該份文件可從委員會的網頁下載 (網址: <http://www.info.gov.hk/tpb/>)。亦可向委員會秘書處 (香港北角渣華道 333 號北角政府合署 15 樓 - 電話: 2231 4810 或 2231 4835) 及規劃署的規劃資料查詢處 (熱線: 2231 5000) (香港北角渣華道 333 號北角政府合署 17 樓及新界沙田上禾輦路 1 號沙田政府合署 14 樓) 索取。
- This form can be downloaded from the Board's website, and obtained from the Secretariat of the Board and the Planning Enquiry Counters of the Planning Department. The form should be typed or completed in block letters. The processing of the application may be refused if the required information or the required copies are incomplete.  
此表格可從委員會的網頁下載, 亦可向委員會秘書處及規劃署的規劃資料查詢處索取。申請人須以打印方式或以正楷填寫表格。如果申請人所提交的資料或文件副本不齊全, 委員會可拒絕處理有關申請。

### 1. Name of Applicant 申請人姓名/名稱

(☐ Mr. 先生 / ☐ Mrs. 夫人 / ☐ Miss 小姐 / ☐ Ms. 女士 / ☒ Company 公司 / ☐ Organisation 機構)

MAN CHI CONSULTANTS AND CONSTRUCTION LTD. (敏志顧問及建築工程有限公司)

### 2. Name of Authorised Agent (if applicable) 獲授權代理人姓名/名稱 (如適用)

(☐ Mr. 先生 / ☐ Mrs. 夫人 / ☐ Miss 小姐 / ☐ Ms. 女士 / ☒ Company 公司 / ☐ Organisation 機構)

AIKON DEVELOPMENT CONSULTANCY LIMITED (毅勤發展顧問有限公司)

### 3. Application Site 申請地點

|  |  |
|--|--|
| (a) Full address / location / demarcation district and lot number (if applicable)<br>詳細地址/地點/丈量約份及地段號碼 (如適用) | Lots 388 S.A, 388 S.B, 388 RP(Part) and 390 RP(Part) in D.D.78 and Adjoining Government Land, Tsung Yuen Ha, Ta Kwu Ling North, New Territories  |

#### 4. "Current Land Owner" of Application Site 申請地點的「現行土地擁有人」

The applicant 申請人 –

- ☐ is the sole "current land owner"<sup>#&</sup> (please proceed to Part 6 and attach documentary proof of ownership).  
是唯一的「現行土地擁有人」<sup>#&</sup> (請繼續填寫第 6 部分，並夾附業權證明文件)。
- ☐ is one of the "current land owners"<sup>#&</sup> (please attach documentary proof of ownership).  
是其中一名「現行土地擁有人」<sup>#&</sup> (請夾附業權證明文件)。
- ☒ is not a "current land owner"<sup>#</sup>.  
並不是「現行土地擁有人」<sup>#</sup>。
- ☐ The application site is entirely on Government land (please proceed to Part 6).  
申請地點完全位於政府土地上 (請繼續填寫第 6 部分)。

#### 5. Statement on Owner's Consent/Notification

就土地擁有人的同意/通知土地擁有人的陳述

- (a) According to the record(s) of the Land Registry as at .....18.9.2020..... (DD/MM/YYYY), this application involves a total of .....4..... "current land owner(s)"<sup>#</sup>.  
根據土地註冊處截至 ..... 年 ..... 月 ..... 日的記錄，這宗申請共牽涉 ..... 名「現行土地擁有人」<sup>#</sup>。

(b) The applicant 申請人 –

- ☒ has obtained consent(s) of .....2..... "current land owner(s)"<sup>#</sup>.  
已取得 ..... 名「現行土地擁有人」<sup>#</sup>的同意。

| Details of consent of "current land owner(s)" <sup>#</sup> obtained 取得「現行土地擁有人」 <sup>#</sup> 同意的詳情 |  |  |
|--|--|--|
| No. of "Current Land Owner(s)"<br>「現行土地擁有人」數目  | Lot number/address of premises as shown in the record of the Land Registry where consent(s) has/have been obtained<br>根據土地註冊處記錄已獲得同意的地段號碼/處所地址 | Date of consent obtained (DD/MM/YYYY)<br>取得同意的日期 (日/月/年) |
| 2  | Lots 388RP and 390RP in D.D.78   | 22.9.2020  |
|  |  |  |
|  |  |  |

(Please use separate sheets if the space of any box above is insufficient. 如上列任何方格的空間不足，請另頁說明)

- ☒ has notified .....2..... "current land owner(s)"<sup>#</sup>  
已通知 ..... 名「現行土地擁有人」<sup>#</sup>。

| Details of the "current land owner(s)" <sup>#</sup> notified 已獲通知「現行土地擁有人」 <sup>#</sup> 的詳細資料 |  |   |
|---|--|---|
| No. of 'Current Land Owner(s)'<br>「現行土地擁有人」數目   | Lot number/address of premises as shown in the record of the Land Registry where notification(s) has/have been given<br>根據土地註冊處記錄已發出通知的地段號碼／處所地址 | Date of notification given<br>(DD/MM/YYYY)<br>通知日期(日/月/年) |
| 1   | Lot 388S.A in D.D.78   | 22.9.2020   |
| 1   | Lot 388S.B in D.D.78   | 22.9.2020   |
|   |  |   |

(Please use separate sheets if the space of any box above is insufficient. 如上列任何方格的空間不足，請另頁說明)

- ☐ has taken reasonable steps to obtain consent of or give notification to owner(s):  
已採取合理步驟以取得土地擁有人的同意或向該人發給通知。詳情如下：

Reasonable Steps to Obtain Consent of Owner(s) 取得土地擁有人的同意所採取的合理步驟

- ☐ sent request for consent to the "current land owner(s)" on \_\_\_\_\_ (DD/MM/YYYY)<sup>&</sup>  
於\_\_\_\_\_ (日/月/年)向每一名「現行土地擁有人」<sup>#</sup>郵遞要求同意書<sup>&</sup>

Reasonable Steps to Give Notification to Owner(s) 向土地擁有人發出通知所採取的合理步驟

- ☐ published notices in local newspapers on \_\_\_\_\_ (DD/MM/YYYY)<sup>&</sup>  
於\_\_\_\_\_ (日/月/年)在指定報章就申請刊登一次通知<sup>&</sup>
- ☐ posted notice in a prominent position on or near application site/premises on \_\_\_\_\_ (DD/MM/YYYY)<sup>&</sup>  
於\_\_\_\_\_ (日/月/年)在申請地點／申請處所或附近的顯明位置貼出關於該申請的通知<sup>&</sup>
- ☐ sent notice to relevant owners' corporation(s)/owners' committee(s)/mutual aid committee(s)/management office(s) or rural committee on \_\_\_\_\_ (DD/MM/YYYY)<sup>&</sup>  
於\_\_\_\_\_ (日/月/年)把通知寄往相關的業主立案法團/業主委員會/互助委員會或管理處，或有關的鄉事委員會<sup>&</sup>

Others 其他

- ☐ others (please specify)  
其他（請指明）

---

---

---

---

Note: May insert more than one 「✓」.

Information should be provided on the basis of each and every lot (if applicable) and premises (if any) in respect of the application.

註：可在多於一個方格內加上「✓」號

申請人須就申請涉及的每一地段（倘適用）及處所（倘有）分別提供資料

**Remark 備註**

The materials submitted in an application to the Board and the Board's decision on the application would be disclosed to the public. Such materials would also be uploaded to the Board's website for browsing and free downloading by the public where the Board considers appropriate.

委員會會向公眾披露申請人所遞交的申請資料和委員會對申請所作的決定。在委員會認為合適的情況下，有關申請資料亦會上載至委員會網頁供公眾免費瀏覽及下載。

**Warning 警告**

Any person who knowingly or wilfully makes any statement or furnish any information in connection with this application, which is false in any material particular, shall be liable to an offence under the Crimes Ordinance.

任何人在明知或故意的情況下，就這宗申請提出在任何要項上是虛假的陳述或資料，即屬違反《刑事罪行條例》。

**Statement on Personal Data 個人資料的聲明**

1. The personal data submitted to the Board in this application will be used by the Secretary of the Board and Government departments for the following purposes:

委員會就這宗申請所收到的個人資料會交給委員會秘書及政府部門，以根據《城市規劃條例》及相關的城市規劃委員會規劃指引的規定作以下用途：

- (a) the processing of this application which includes making available the name of the applicant for public inspection when making available this application for public inspection; and  
處理這宗申請，包括公布這宗申請供公眾查閱，同時公布申請人的姓名供公眾查閱；以及  
(b) facilitating communication between the applicant and the Secretary of the Board/Government departments.  
方便申請人與委員會秘書及政府部門之間進行聯絡。

2. The personal data provided by the applicant in this application may also be disclosed to other persons for the purposes mentioned in paragraph 1 above.

申請人就這宗申請提供的個人資料，或亦會向其他人士披露，以作上述第 1 段提及的用途。

3. An applicant has a right of access and correction with respect to his/her personal data as provided under the Personal Data (Privacy) Ordinance (Cap. 486). Request for personal data access and correction should be addressed to the Secretary of the Board at 15/F, North Point Government Offices, 333 Java Road, North Point, Hong Kong.

根據《個人資料(私隱)條例》(第 486 章)的規定，申請人有權查閱及更正其個人資料。如欲查閱及更正個人資料，應向委員會秘書提出有關要求，其地址為香港北角渣華道 333 號北角政府合署 15 樓。

**Gist of Application 申請摘要**

(Please provide details in both English and Chinese as far as possible. This part will be circulated to relevant consultees, uploaded to the Town Planning Board's Website for browsing and free downloading by the public and deposited at the Planning Enquiry Counters of the Planning Department for general information.)

(請盡量以英文及中文填寫。此部分將會發送予相關諮詢人士、上載至城市規劃委員會網頁供公眾免費瀏覽及下載及存放於規劃署規劃資料查詢處以供一般參閱。)

Dear Sir/Madam,

**Re: Section 16 Planning Application for Proposed Temporary Public Vehicle Park (Excluding Container Vehicle) for a Period of Three Years at Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land, Tsung Yuen Ha, Ta Kwu Ling North, New Territories (Planning Application No. A/NE-TKLN/37)**

We refer to the comments from the Transport Department (TD) dated 3.12.2020 regarding the subject application.

We would like to request for a 2-month temporary deferment of the decision on the planning application by Town Planning Board such that sufficient time can be given to the Applicant to prepare Further Information in addressing the aforesaid comments by the Government Department.

Thank you for your kind attention and should you have any queries, please do not hesitate to contact the undersigned on 3180 7811.

Yours faithfully,  
For and on behalf of

TOWN PLANNING BOARD

By Hand and Email

Dear Sir/Madam,

**Re: Section 16 Planning Application for Proposed Temporary Public Vehicle Park (Excluding Container Vehicle) for a Period of Three Years at Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land, Tsung Yuen Ha, Ta Kwu Ling North, New Territories (Planning Application No. A/NE-TKLN/37)**

We refer to the comments from the Transport Department (TD) dated 3.12.2020 regarding the subject application.

We would like to submit herewith Further Information in response to the comments from TD and the public comments received, as well as to clarify the types and number of car parking spaces proposed to be provided in the application site and the arrangement regarding potential small house developments within the application site for consideration by relevant Government departments and the Board.

In terms of the types and number of car parking spaces proposed to be provided in the application site, we would like to clarify that of a total of 78 car parking spaces proposed to be provided in the application site, 40 of them will be reserved for private cars and the remaining 38 of them will be reserved for van-type light goods vehicles. In terms of the arrangement regarding potential small house developments within the application site, kindly note that current land owner(s) of all the captioned lots of the application site has/have confirmed that construction of small house(s) will not commence at any of the captioned lots during the approval period of the subject application.

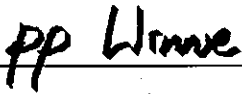

In this regard, we would like to enclose herewith the signed original letters from the current land owner(s) of all the captioned lots of the application site confirming that construction of small house(s) will not commence at any of the captioned lots during the approval period of the subject application, and 70 hard copies of the following documents for consideration by relevant Government departments and the Board:-

- I. Response-to-comment table and revised traffic impact assessment (TIA) report in response to the comments from TD;
- II. Response-to-comment table in response to the public comments received; and
- III. Replacement pages for the Planning Statement and supporting Figure with regard to the abovementioned amendments on types and number of car parking spaces to be provided and the potential arrangement for small house developments on the application site.

Thank you for your kind attention and should you have any queries, please do not hesitate to contact the undersigned at 3180 7811.

Response-to-comment table and revised traffic impact assessment (TIA) report in response to the comments from TD

Proposed Temporary Public Vehicle Park (Excluding Container Vehicle) for a Period of Three Years in “Village Type Development” and “Recreation” Zones, Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land, Tsung Yuen Ha, Ta Kwu Ling North, New Territories (Application No. A/NE-TKLN/37)

Responses to TD Comments

| Departmental Comments<br>Dated 3 <sup>rd</sup> December 2020 (via Transport Department)   | Responses  |                          |                          |  |                         |  |                   |      |      |     |     |                   |      |      |     |     |
|---|--|--------------------------|--------------------------|--|-------------------------|--|-------------------|------|------|-----|-----|-------------------|------|------|-----|-----|
| (i) The applicant shall assess the traffic impact for the design year as 5 years from the date of this submission;  | Noted. The design year is revised to Year 2025.  |                          |                          |  |                         |  |                   |      |      |     |     |                   |      |      |     |     |
| (ii) The applicant should substantiate the traffic generation and attraction from and to the site with reference to the trip rates of similar developments;   | Noted. The surveyed data of three existing public vehicle parks are referenced to estimate the traffic generation and attraction of the proposed development. Section 4.2 is updated for your review and approval.   |                          |                          |  |                         |  |                   |      |      |     |     |                   |      |      |     |     |
| (iii) The applicant shall assess the volume to capacity ratio of the village access of Tsung Yuen Ha Tsuen;   | Noted. Sections 3.4 and 4.6 are updated to include the volume to capacity ratio of the village access of Tsung Yuen Ha Tsuen.  |                          |                          |  |                         |  |                   |      |      |     |     |                   |      |      |     |     |
| (iv) The village access of Tsung Yuen Ha Tsuen is only of single traffic lane. Please assess the queue length (of both the village access and Ling Ma Hang Road) at its junction with Lin Ma Hang Road (i.e. J2); | <p>Noted. The effective length for turning from/to the unnamed access road at the priority junction is 7m/bound. The local peak of the unnamed single track road is observed to be and 5-6 pm.</p> <p>Assumed that the driving speed is 5km/hr along the single traffic lane. As the distance between the proposed development and the priority junction is 31m, it takes 22s for a vehicle to access between the proposed development and the priority junction.</p> <p>Assumed that the queuing space required is 6m/pcu, such that the estimated queue length equals to the design flow multiplied by 6m/pcu. The anticipated traffic flows and queue lengths in 2025 are as follows:</p> <table><tr><td></td><td>Design flow<br/>(veh/min)</td><td>Design flow<br/>(pcu/min)</td><td>Queue Length<br/>(m/min)</td><td>Frequency of<br/>the road link<br/>(min/pcu)</td></tr><tr><td>Unnamed road (EB)</td><td>0.46</td><td>0.55</td><td>3.3</td><td>1.8</td></tr><tr><td>Unnamed road (WB)</td><td>0.57</td><td>0.64</td><td>3.8</td><td>1.6</td></tr></table> <p>In view of the low traffic flow and the sufficiency of effective length for turning from/to the unnamed access road, the anticipated queue is always less than 7m. No queue back along Lin Ma Hang Road is expected.</p> |                          | Design flow<br>(veh/min) | Design flow<br>(pcu/min)                   | Queue Length<br>(m/min) | Frequency of<br>the road link<br>(min/pcu) | Unnamed road (EB) | 0.46 | 0.55 | 3.3 | 1.8 | Unnamed road (WB) | 0.57 | 0.64 | 3.8 | 1.6 |
|   | Design flow<br>(veh/min)   | Design flow<br>(pcu/min) | Queue Length<br>(m/min)  | Frequency of<br>the road link<br>(min/pcu) |                         |  |                   |      |      |     |     |                   |      |      |     |     |
| Unnamed road (EB)   | 0.46   | 0.55                     | 3.3                      | 1.8  |                         |  |                   |      |      |     |     |                   |      |      |     |     |
| Unnamed road (WB)   | 0.57   | 0.64                     | 3.8                      | 1.6  |                         |  |                   |      |      |     |     |                   |      |      |     |     |

Proposed Temporary Public Vehicle Park (Excluding Container Vehicle) for a Period of Three Years in “Village Type Development” and “Recreation” Zones, Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land, Tsung Yuen Ha, Ta Kwu Ling North, New Territories (Application No. A/NE-TKLN/37)

Responses to TD Comments

|   |  |
|---|--|
| (v) The applicant shall advise the management/control measures to be implemented to ensure no queuing of vehicles outside the subject site; | Noted. Traffic controller will be deployed to control vehicles entering or leaving the site to avoid conflict with the road traffic.   |
| (vi) The applicant shall advise the provision and management of pedestrian facilities to ensure pedestrian safety; and                      | Noted. Traffic controller will be deployed to direct the movement of vehicles and pedestrians. The site is also designed for vehicle movements in single direction, which can enhance pedestrian safety. |
| (vii) The village access of Tsung Yuen Ha Tsuen is not managed by TD. The applicant should seek comment from the responsible party.         | Noted. The comments from relevant departments will be sought.  |

## Figures

### Appendix A Junction Analysis

### Appendix B Planning Data from Planning Department

# **1 Introduction**

## **1.1 Background**

The Applicant proposes to convert the existing open space at Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land, Tsung Yuen Ha into temporary car parking use and ancillary facilities to meet the parking demands of villagers of Tsung Yuen Ha as well as the demand arising from Liantang/Heung Yuen Wai Boundary Control Point (BCP).

Under the Approved Ta Kwu Ling North Outline Zoning Plan No. S/NE-TKLN/2, the application site is zoned as “Recreation” and “Village Type Development”. The uses for temporary public vehicle parking (excluding container vehicle) and ancillary facilities require planning permission from the Town Planning Board.

For supporting the planning application, a Traffic Impact Assessment (TIA) report is required to assess the traffic impact of the proposed development.

AXON Consultancy is therefore commissioned to prepare the TIA report to support the subject Planning Application.

## **1.2 Objectives**

The objectives of the traffic impact study are as follows:

- to estimate the potential traffic generation due to the development;
- to assess the future traffic situation in the surrounding network;
- to appraise the potential traffic impact of the development; and
- to consider road improvement proposals, if feasible.

## 2 The Proposed Development

### 2.1 The Site

The site is located at Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land, Tsung Yuen Ha, as shown in **Figure 2.1**. The site area is around 3,776m<sup>2</sup>.

Under the Approved Ta Kwu Ling North Outline Zoning Plan No. S/NE-TKLN/2, the application site is zoned as “Recreation” and “Village Type Development”.

### 2.2 The Temporary Public Vehicle Park

The existing temporary open car park for adjacent construction site at Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land are proposed to be converted into temporary public vehicle parking (excluding container vehicle) near Liantang/Heung Yuen Wai Boundary Control Point (BCP).

The development is proposed to operate on 24-hours basis throughout the week. For conservative purpose, it is assumed that majority of the drivers will reach the site at the observed peaks of the traffic count surveys.

Under the Approved Ta Kwu Ling North Outline Zoning Plan No. S/NE-TKLN/2, the application site is zoned as “Recreation” and “Village Type Development”. Planning permission is required for the use of temporary car park and ancillary facilities.

Considering the operation of BCP, it is expected the demand for parking spaces in the surrounding areas will also increase. To avoid excessive illegal parking in the Tsung Yuen Ha area, the Applicant wish to provide sufficient proper parking spaces in view of the increase in parking space demand. It is also noted by the Applicant that some villagers will seek for cross-border working opportunities in view of the commencement of operation of BCP, which creates demand for parking spaces by the villagers.

In view of the enormous domestic and external demands, 78 no. of private cars and van-type LGVs parking spaces will be provided. Monthly and hourly rental options are available for local villagers and visitors. The arrangement is shown in **Figure 2.2**.

### 2.3 Car Park Layout

As shown in **Figure 2.2**, the proposed car park layout contains 78 no. of private cars. The internal circulation within the proposed car park with dimensions of the internal roads are shown in **Figure 2.3**.

## 3 Existing Traffic Situation

### 3.1 Existing Road Network

The Site can be reached via Lin Ma Hang Road.

Lin Ma Hang Road is a single-two carriageway served as a local road running in north-south direction.

Connecting with Lin Ma Hang Road and Fanling Highway, Heung Yuen Wai Highway is a dual-two carriageway classified as an expressway road running in north-south direction.

### 3.2 Public Transport

Currently, no public transport service provides access to Lin Ma Hang Road via Heung Yuen Wai Highway.

Meanwhile, existing public transport services access to Lin Ma Hang Road via other routings are listed in **Table 3.1** and illustrated in **Figure 3.1**.

**Table 3.1 Existing Public Transport Services**

| Route No.                      | Destination  |
|--------------------------------|--|
| <b>Kowloon Motor Bus (KMB)</b> |  |
| 79K                            | Sheung Shui Bus Terminus – Ta Kwu Ling (Tsung Yuen Ha) |
| <b>Green Minibus (GMB)</b>     |  |
| 59K                            | Sheung Shui Station – Lin Ma Hang                      |

### 3.3 Traffic Count Surveys

In order to appraise the existing traffic conditions, classified turning movement count surveys have been carried out at the key links and junctions of the study area, as presented in **Figure 3.2**, on 18 November 2020 from 7:30am to 10:30am and 4:00pm to 8:00pm.

The traffic counts were recorded in a 15-minutes interval; and to be converted into passenger car unit (pcu) values. The highest consecutive 15-minutes hourly traffic volume is adopted as the peak hour traffic flow.

The morning and afternoon peak hours of the road network have been identified as 8:15am to 9:15am and 5:00pm to 6:00pm respectively. The observed traffic flows in the study area are presented in **Figure 3.3**.

### 3.4 Existing Link Capacity Assessment

The road link capacity assessment is summarised in **Table 3.2**. The Volume to Capacity (V/C) ratio indicates the proportion of the road capacity being used by the peak hour traffic flow. Higher V/C ratio of a road indicates heavier usage of the road link concerns. A V/C ratio equal or less than 0.85 indicates that adequate capacity is available, and vehicles are not expected to experience significant queues and delays.

**Table 3.2 Existing Link Performance**

| No. | Road Link (Direction)   | Link Capacity (veh/hr) | Observed Flow |    | V/C Ratio |      |
|-----|---|------------------------|---------------|----|-----------|------|
|     |   |                        | AM            | PM | AM        | PM   |
| L1  | Slip road of Heung Yuen Wai Highway (from Fanling Highway Northbound to Lin Ma Hang Road Interchange) | 1500 <sup>(1)</sup>    | 89            | 42 | 0.06      | 0.03 |
| L2  | Slip road of Heung Yuen Wai Highway (from Lin Ma Hang Road Interchange to Fanling Highway Southbound) | 1500 <sup>(1)</sup>    | 65            | 92 | 0.04      | 0.06 |
| L3  | Unnamed Access Road of Tsung Yuen Ha Tsuen  | 100 <sup>(2)</sup>     | 27            | 34 | 0.27      | 0.34 |

(1) Assumed that the link capacity of a slip road is equivalent to half of the capacity of a dual-2 lane expressway

(2) TPDM Volume 2 Chapter 3

It can be seen from **Table 3.2** that all key links perform satisfactorily during proposed operation hours.

### 3.5 Existing Junction Capacity Assessment

Based on the observed traffic flows, the junction performance analysis of the key junctions in the vicinity of the subject site during the morning and evening peak hours were assessed in accordance with the Transport Planning Design Manual Volume 2 Chapter 4.

The performance of a priority junction is indicated by its design flow to capacity (DFC). Less than positive 1 indicates that the junction is operating with spare capacity. When DFC equal to positive 1 indicates that the junction is overloaded; resulting in traffic queues and longer delay time.

Based on the observed traffic flows, the performance of the key junctions in the vicinity of the subject site during the morning and evening peak hours was assessed. The results are summarised and presented in **Table 3.3** and the detailed calculation sheets are attached in **Appendix A**.

**Table 3.3 Existing Junction Performance**

| Junction | Location   | Type / Capacity Index   | Observed |      |
|----------|--|-------------------------|----------|------|
|          |  |                         | AM       | PM   |
| J1       | Lin Ma Hang Road Southbound / Horseshoe curve at Lin Ma Hang Road near Tsung Yuen Ha Bus Station | Priority Junction / DFC | 0.08     | 0.05 |
| J2       | Lin Ma Hang Road Northbound / Access Road of Tsung Yuen Ha Tsuen                                 | Priority Junction / DFC | 0.04     | 0.03 |
| J3       | Lin Ma Hang Road Northbound / Lin Ma Hang Road connecting to Heung Yuen Wai Highway              | Priority Junction / DFC | 0.15     | 0.08 |
| J4       | Slip Road from Heung Yuen Wai Highway / Lin Ma Hang Road   | Roundabout / DFC        | 0.09     | 0.10 |

Notes: DFC = design flow to capacity

It can be seen from **Table 3.3** that all key junctions perform satisfactorily during the operation hours.

## 4 Future Traffic Situation

### 4.1 2025 Design Year Road Network

The design year is either 3 years after the completion year or 5 years after the application year, whichever longer. Therefore, year 2025 is therefore used as the design year of the traffic impact assessment.

### 4.2 Development Traffic Generation & Attraction

With reference to the surveyed public vehicle parks in similar scale, the traffic generation and traffic attraction rates are shown in **Table 4.1**. Meanwhile, the pcu factor of a van-type LGV is assumed to be 1.5 pcu/hr.

**Table 4.1 Peak Hours Traffic Generation & Attraction**

| Development  | Generation    |               | Attraction    |               |
|--|---------------|---------------|---------------|---------------|
|  | AM            | PM            | AM            | PM            |
| <b>Trip rate<sup>1</sup> (pcu/hr/parking space)</b>      |               |               |               |               |
| Public Vehicle Park (Tsuen Wan District) <sup>1</sup>    | 0.0794        | 0.1915        | 0.0841        | 0.1869        |
| Public Vehicle Park (Wong Tai Sin District) <sup>1</sup> | 0.1475        | 0.0246        | 0.0820        | 0.1967        |
| Public Vehicle Park (North District) <sup>1</sup>        | 0.1357        | 0.1929        | 0.1143        | 0.0643        |
| <b>Adjusted Trip Rate</b>                                | <b>0.1209</b> | <b>0.1363</b> | <b>0.0935</b> | <b>0.1493</b> |
| <b>Trips (pcu/hr)</b>                                    |               |               |               |               |
| Proposed Parking Facilities                              | 10            | 11            | 8             | 12            |

1. Data referenced from the existing public vehicle parks.

### 4.3 Traffic Generation from Adjacent Development

It is discovered that a proposed temporary car park for private car and van-type LGV (under approved planning application no. A/NE-TKLN/33) is under planning/construction within the design year of 2025 in vicinity of the site. Its traffic generation and attraction, which is summarised in **Table 4.2**, will be incorporated in this report.

**Table 4.2 Traffic Generation and Attraction from adjacent development**

| Development           | Generation |    | Attraction |    |
|-----------------------|------------|----|------------|----|
|                       | AM         | PM | AM         | PM |
| <b>Trip in pcu/hr</b> |            |    |            |    |
| A/NE-TKLN/33          | 57         | 57 | 57         | 57 |

Source: Traffic impact assessment report under planning application no. A/NE-TKLN/33

## 4.4 Annual Traffic Growth

For the estimation of traffic flows in the design year of 2025, it is proposed to adjust the existing traffic flows by considering the natural traffic growth which is related to the increase in car usage.

The traffic forecasts were developed based on the existing traffic flows in 2020 from the traffic surveys and applying an appropriate annual traffic growth factor to derive the background traffic in 2025.

According to the report “Projections of Population Distribution 2019-2028” issued by Planning Department to the public in July 2019, the population growth from base year 2018 to 2025 in North District is shown in **Table 4.3** and **Appendix B**.

**Table 4.3 Projected Population Distribution**

| District Council District | Year 2018 <sup>#</sup> | Year 2025 | Growth Rate p.a. (%) |
|---------------------------|------------------------|-----------|----------------------|
| North                     | 318,400                | 369,900   | 2.2%                 |

<sup>#</sup> Base Year Estimates

The planning data indicate a slight increase in population at a rate of +2.2% per annum. This factor is used to forecast the future traffic volume for this study.

## 4.5 Reference and Design Flows

The growth factor will be applied to the 2020 observed traffic flows to estimate the 2025 reference flows.

The reference and design flows for the year 2025 are calculated from the following formulae:

$$\text{2025 Reference Flows (Figure 4.2)} = \text{2020 Observed Flows (Figure 3.3)} \times (1 + 2.2\%)^5$$

$$\text{2025 Design Flows (Figure 4.3)} = \text{2025 Reference Flows (Figure 4.2)} + \text{Total Development Flows (Figure 4.1)}$$

Based on the observed traffic flows and pattern of existing road network, the 2025 peak hour Reference and Design traffic flows at the critical links and junctions are distributed and assigned in **Figures 4.2** and **4.3** respectively.

## 4.6 Link Capacity Assessment

The link capacity assessment results with reference to the net development traffic are summaries in **Table 4.4**.

**Table 4.4 Link Capacity Assessment**

| No. | Road Link (Direction)   | Link Capacity (veh/hr) | Reference Flow (veh/hr) |     | Reference V/C Ratio |      | Design Flow (veh/hr) |     | Design V/C Ratio |      |
|-----|---|------------------------|-------------------------|-----|---------------------|------|----------------------|-----|------------------|------|
|     |   |                        | AM                      | PM  | AM                  | PM   | AM                   | PM  | AM               | PM   |
| L1  | Slip road of Heung Yuen Wai Highway (from Fanling Highway Northbound to Lin Ma Hang Road Interchange) | 1500                   | 141                     | 89  | 0.09                | 0.06 | 147                  | 101 | 0.10             | 0.07 |
| L2  | Slip road of Heung Yuen Wai Highway (from Lin Ma Hang Road Interchange to Fanling Highway Southbound) | 1500                   | 114                     | 145 | 0.08                | 0.10 | 120                  | 157 | 0.08             | 0.10 |
| L3  | Unnamed Access Road of Tsung Yuen Ha Tsuen  | 100                    | 30                      | 38  | 0.3                 | 0.38 | 46                   | 57  | 0.46             | 0.57 |

As presented in **Table 4.4**, the capacity of the key road links would be performing satisfactorily during the peak periods for both Reference and Design Scenarios.

## 4.7 Junction Capacity Assessment

The Junction capacity assessment results with reference to the net development traffic are summarised in **Table 4.5**, with detailed calculation sheets attached in **Appendix A**.

**Table 4.5 2025 Junction Capacity Assessments**

| Junction | Location   | Type / Capacity Index   | 2025      |      |        |      |
|----------|--|-------------------------|-----------|------|--------|------|
|          |  |                         | Reference |      | Design |      |
|          |  |                         | AM        | PM   | AM     | PM   |
| J1       | Lin Ma Hang Road Southbound / Horseshoe curve at Lin Ma Hang Road near Tsung Yuen Ha Bus Station | Priority Junction / DFC | 0.18      | 0.15 | 0.18   | 0.15 |
| J2       | Lin Ma Hang Road Northbound / Access Road of Tsung Yuen Ha Tsuen                                 | Priority Junction / DFC | 0.05      | 0.04 | 0.07   | 0.06 |
| J3       | Lin Ma Hang Road Northbound / Lin Ma Hang Road connecting to Heung Yuen Wai Highway              | Priority Junction / DFC | 0.18      | 0.12 | 0.18   | 0.13 |
| J4       | Slip Road from Heung Yuen Wai Highway / Lin Ma Hang Road   | Roundabout / DFC        | 0.15      | 0.15 | 0.15   | 0.16 |

Notes: DFC = design flow to capacity

It can be seen from **Table 4.5** that, the capacity of all the key junctions would be performing within their capacity during the peak hours for the Reference and Design Scenarios.

## 5 Internal Transport Facilities

### 5.1 Parking Provisions

The proposed car park layout showing the internal transport facilities is illustrated in **Figure 2.2**. 40 no. and approximate 38 no. of provisions for private cars and van-type LGVs are proposed respectively. The proposed van-type LGV parking zone is 5.5m width. As indicated in **Table 5.1**, the dimensions of proposed provisions are in accordance with Hong Kong Planning Standards & Guidelines.

**Table 5.1 Parking Space Dimensions**

| Type of Parking Space | Size                        | References  |
|-----------------------|-----------------------------|-------------|
| Car Parking Space     | 2.5m(W) x 5.0m(L) x 2.4m(H) | Under HKPSG |

### 5.2 Access Arrangement and Swept Path Analyses

An 8m wide existing vehicular access at Lin Ma Hang Road and an access gate connecting the adjacent lots will be maintained as shown in **Figure 2.2**. The swept path analysis (for private car) at the proposed site are shown in **Figure 2.2.1-SP1 to 2.2.2-SP5**.

With reference to the low pedestrian flows around the site, management measures, namely assigning traffic controllers at the site access, will be adopted to ensure road safety.

### 5.3 Safety Measures

To enhance the safety of the site access, safety measures have been proposed as shown in **Figure 2.2**. Traffic controllers will be deployed to control vehicles entering or leaving the site to avoid conflict with the road traffic. Clear guidelines and appropriate trainings would be provided to the patrol staff. Flashing warning sign will be installed at the site entrance, to alert drivers at both sides of Lin Man Hang Road.

When vehicles are expected to enter or leave the site, at least 1 traffic controller will station at each entrance to direct the movement of vehicles and pedestrians into and out of the site to avoid clash or congestion problem.

The pedestrians will walk along the verge opposite to the site, connecting the existing footpath along Lin Ma Hang Road.

## **6 Summary and Conclusion**

### **6.1 Summary**

The applicant proposed to convert the existing open car park at Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land into car parking purpose to meet the parking demands of villagers of Tsung Yuen Ha as well as the demand arising from Liantang/Heung Yuen Wai Boundary Control Point (BCP).

In order to appraise the existing traffic conditions, classified turning movement count surveys have been carried out at the key junctions of the study area on 18 November 2020 from 7:30am to 10:30am and 4:00pm to 8:00pm. The morning and evening peak hours of the road network have been identified as 8:15am to 9:15am and 5:00pm to 6:00pm, respectively.

As the design year is either 3 years after the completion year or 5 years after the application year, whichever longer, so that the design year of the traffic impact assessment is year 2025. Based on the planning data from Planning Department, an annual growth factor of 2.2% was adopted for this study. The growth factor is applied to the observed traffic flows in 2020 to forecast the future traffic volume in 2025.

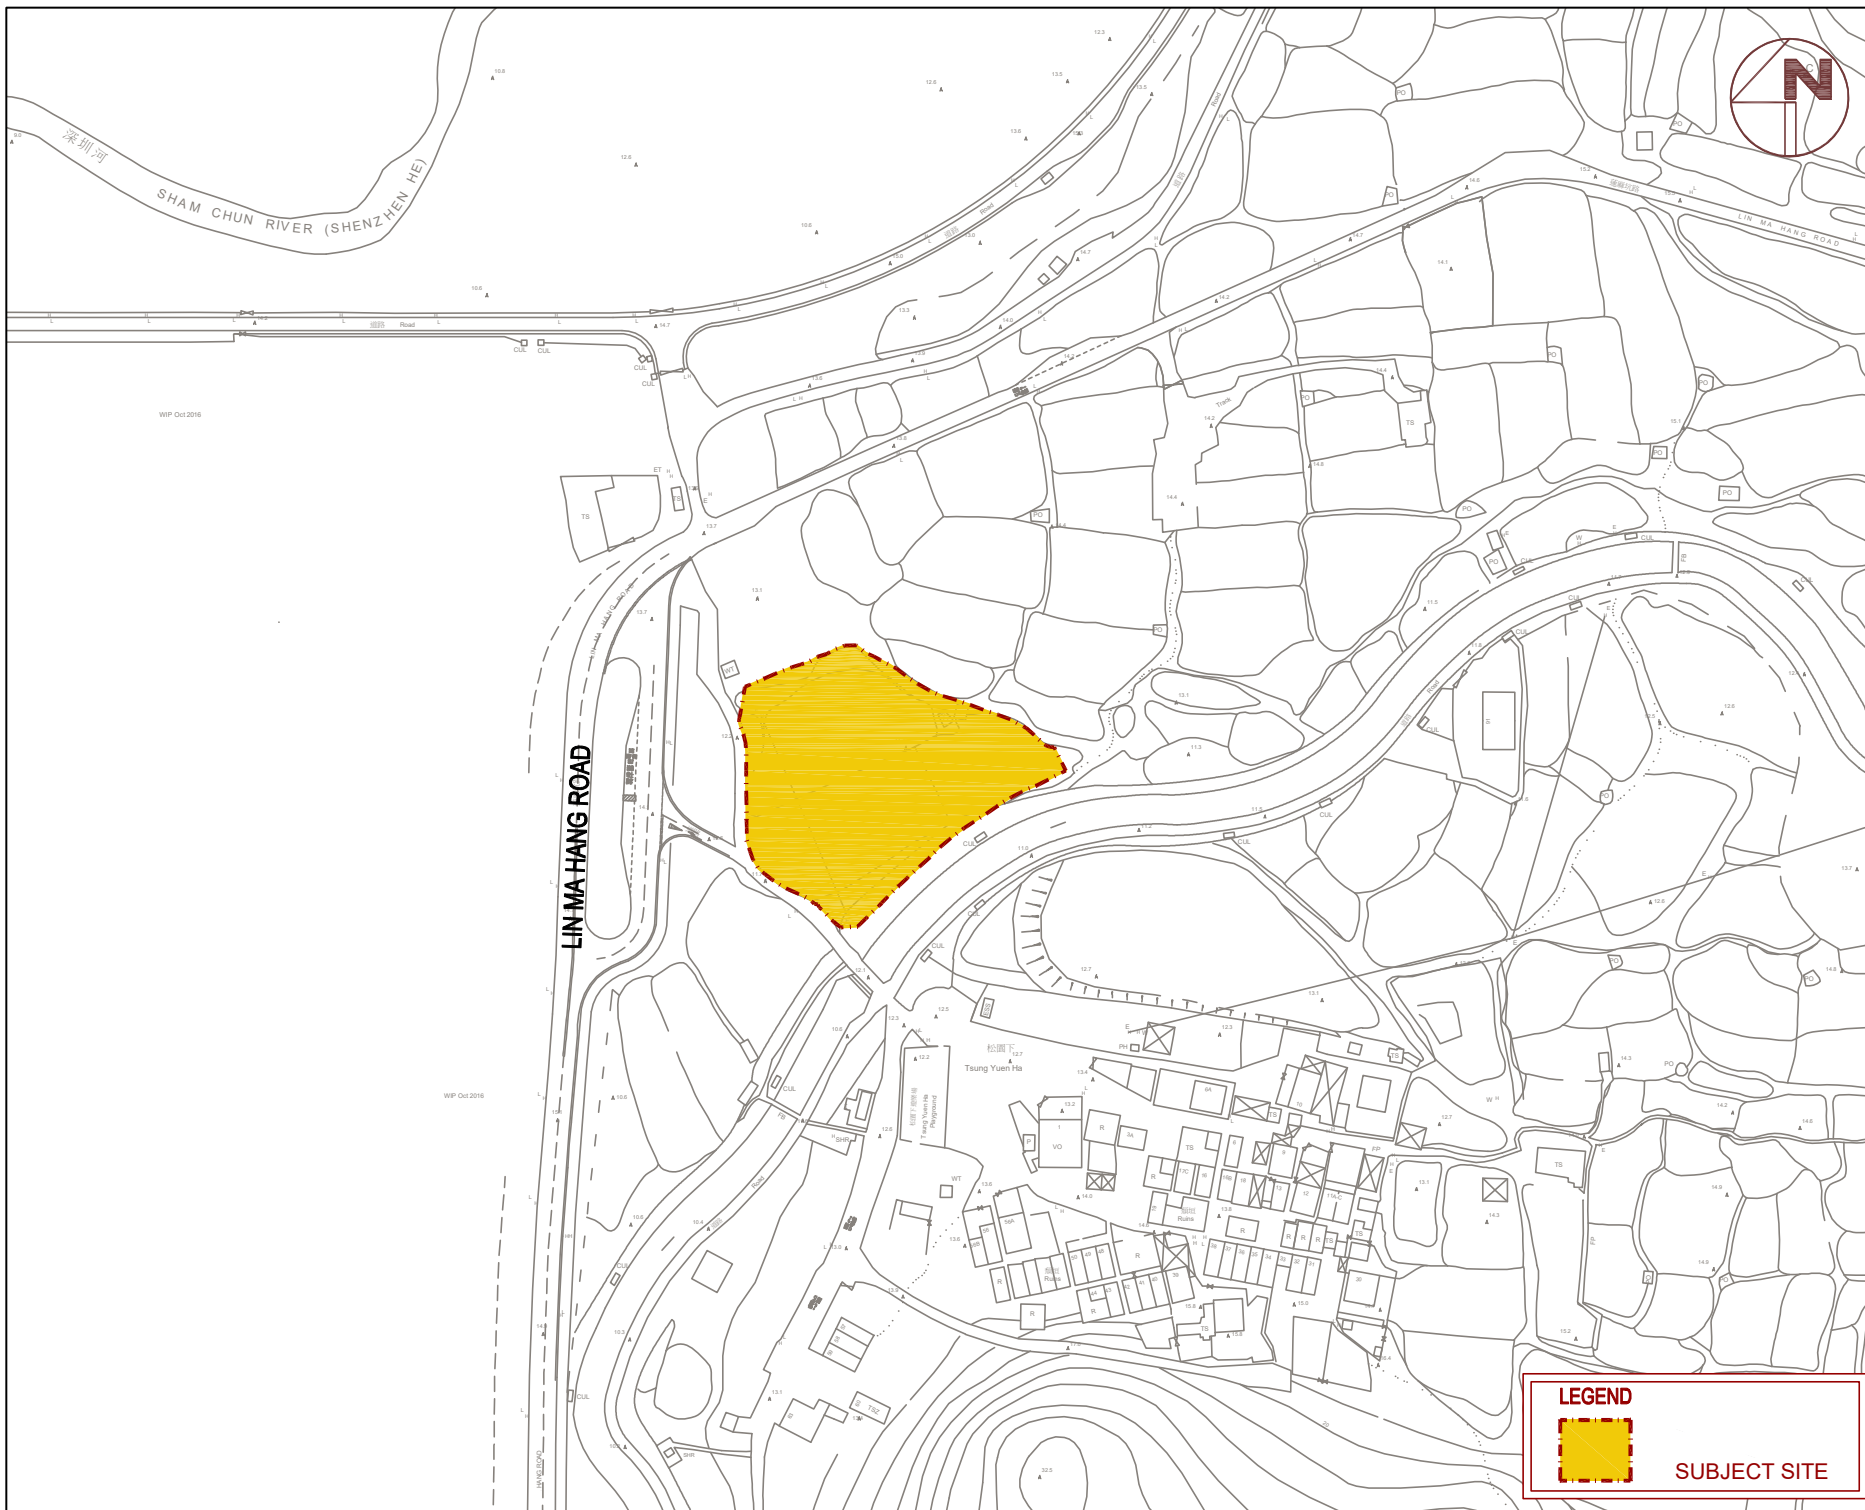

The capacity of all key links and key junctions would be performing within their capacities during the peak hours for both Reference and Design Scenarios.

Therefore, it can be concluded that the proposed development would not generate any additional adverse traffic impact to the road network.

### **6.2 Conclusion**

The findings of the traffic impact assessment indicate that the road network in the vicinity of the Site would be able to cope with the traffic generated by the proposed development and would not cause any adverse impact from traffic perspective.

Response-to-comment table in response to the public comments received

Section 16 Planning Application for Proposed Temporary Public Vehicle Park (Excluding Container Vehicle) for a Period of Three Years at Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land, Tsung Yuen Ha, Ta Kwu Ling North, New Territories

| Major Concerns of the Public Comments   | Responses to Public Comments   |
|---|--|
| <p>(a) The reason for approval of the previous planning application (No. A/NE-TKLN/8) was to support the infrastructural development. It is noted that the applicant had confirmed that renewal of the temporary planning approval for the previous application was unlikely after the completion of the Liantang/Heung Yuen Wai Boundary Control Point (hereinafter referred to as "LT/HYW BCP") project. However, the applicant now wants to continue using the site for parking use.</p> | <p>It should be noted that the current application is <b>not</b> a renewal application for the previous use, which is temporary staff car park and site office for public works for a period of three years approved under application No. A/NE-TKLN/8. Instead, the nature of the current application aims at meeting the substantial parking demand newly arise from the opening of the LT/HYW BCP, as well as the imminent parking demand from the villagers and local residents living in Tsung Yuen Ha and the surrounding areas.</p> <p>The application site falls almost entirely within an area zoned "Village Type Development" (hereinafter referred to as "V") (about 99.3%), with a minor portion of site falling within an area zoned "Recreation" (hereinafter referred to as "REC") (about 0.3%) on the approved Ta Kwu Ling North Outline Zoning Plan No. S/NE-TKLN/2. The proposed use of the current application can satisfy the demand for parking facilities of the villagers of Tsung Yuen Ha and the surrounding areas. As such, the proposed use does not contravene the planning intention of the "V" zone of supporting village development. Besides, the provision of parking spaces may also facilitate the implementation of planning intention of "REC" zone, as the proposed use provides essential parking service to visitors of the area. Given the proposed use is on a temporary basis only, approval of the current application on a temporary basis would not frustrate the long-term planning intentions of the "V" or "REC" zone.</p> |
| <p>(b) The LT/HYW BCP should have included all necessary supporting facilities including car parking spaces within its structure.</p>   | <p>While a public car park with 415 parking spaces will be provided for public use at the LT/HYW BCP, carparks in the vicinity of the LT/HYW BCP are anticipated to play a vital role in helping to relieve the huge parking demand newly arise from the LT/HYW BCP.</p> <p>The proposed development is situated at an ideal and strategic location. With a distance of only about 100m away from the LT/HYW BCP and Tsung Yuen Ha respectively, the application site can provide parking spaces to meet the huge parking demand newly arise from the LT/HYW BCP as well as the imminent parking demand from villagers of Tsung Yuen Ha and the surrounding areas. In addition, the latest figure provided by the Transport and Housing Bureau also suggests that there has been a severe shortage of parking spaces in the North District. The proposed development would meet the demand of the BCP, the villagers, as well as North District as a whole.</p>  |

Section 16 Planning Application for Proposed Temporary Public Vehicle Park (Excluding Container Vehicle) for a Period of Three Years at Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land, Tsung Yuen Ha, Ta Kwu Ling North, New Territories

|   |   |
|---|---|
| <p>(c) Vegetation clearance was involved prior to the submission of the previous application (No. A/NE-TKLN/8). Piecemeal temporary uses would be incompatible with the future village type development on the application site. It would degrade the landscape character of the "Village Type Development" zone.</p> | <p>It should be clearly noted that no vegetation clearance has been or will be involved in the current application.</p> <p>Having considered that a similar planning application for temporary car park (private cars and light goods vehicles) (No. A/NE-TKLN/33) approved by RNTPC of the Board in Year 2020 for a period of three years is located in the immediate northeast of the application site, and similar uses including the LT/HYW BCP and its associated facilities, site offices, temporary car parks as well as other temporary structures are found in the surrounding areas of the application site; the proposed use is considered compatible with the surrounding land uses and environment. Moreover, the current land owner(s) of all the captioned lots of the application site has/have confirmed that construction of small house(s) will not commence at any of the captioned lots during the approval period of the subject application. Given the proposed use is on a temporary basis only, approval of the current application on a temporary basis would not frustrate the long-term planning intentions of the "V" zone.</p> <p>With regard to the landscape aspect, in view of the LT/HYW BCP and various Government infrastructure projects nearby, including the widening of Lin Ma Hang Road Project, the character of the area has already been changed from a rural area to a built-up area with institutional landscape character. The proposed use is therefore compatible with the landscape character of the surrounding environment. Furthermore, it is proposed to continue adopting the landscape proposal as approved under the previous application No. A/NE-TKLN/8 at the application site during the approval period of the current application for screening purpose and to improve the landscape quality of the area. As such, no adverse landscape impact is anticipated to be caused by the proposed use of the current application.</p> |
| <p>(d) The site was involved in an enforcement case.</p>  | <p>It should be emphasized that the site is currently not subject to any planning enforcement action. At present, the entire application site is under a valid planning permission for temporary staff car park and site office for public works which was approved by RNTPC of the Board under application No. A/NE-TKLN/8 for a period of three years until 4.5.2021.</p>   |
| <p>(e) The site should be restored to reflect the planning intention of the zoning on the application site.</p>   | <p>Given the proposed use is on a temporary basis only, approval of the current application on a temporary basis would not frustrate the long-term planning intentions of the "V" or "REC" zone.</p> <p>The applicant is very willing to comply with the approval conditions imposed by the Board and the Government departments as they deem fit for the current application upon approval of</p>  |

Section 16 Planning Application for Proposed Temporary Public Vehicle Park (Excluding Container Vehicle) for a Period of Three Years at Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land, Tsung Yuen Ha, Ta Kwu Ling North, New Territories

|---|--|
|   | the application, which might include an approval condition specifying that upon the expiry of the planning permission of the current application, the reinstatement of the site to an amenity area to the satisfaction of Director of Planning or of the Board.  |
| (e) The proposed development would induce possible adverse and intolerable impacts to Lin Ma Hang Road. | Traffic Impact Assessment ( <b>Appendix I</b> of the current submission refers) has been conducted to examine the key road links and junctions in vicinity of the application site, which include Lin Ma Hang Road. The results of the Traffic Impact Assessment conclude that the road network in the vicinity of the application site would be able to cope with the traffic generated by the proposed use and the proposed use would not cause any adverse impact from the traffic perspective. |

## Appendix | III

---

Replacement pages for the Planning Statement and supporting Figure

which links up between Hong Kong and eastern Shenzhen, Huizhou as well as eastern Guangdong. Being regarded as one of the key infrastructures to strengthen the cross-boundary transport connectivity within the Guangdong-Hong Kong-Macao Greater Bay Area, the BCP is designed to handle 17,850 vehicle trips per day.

- 1.2.3 To facilitate cross-boundary connectivity between Shenzhen and Hong Kong, the LT/HYW BCP will have direct access facilities for both passengers and vehicles. The opening of BCP this year is anticipated to result in a significant increase in traffic flow as well as parking demand in the surrounding areas of the BCP. Whilst a public car park with 415 parking spaces is being provided at the BCP, car parks in the vicinity to the BCP are anticipated to play a vital role in helping to relieve the huge parking demand newly arise from the BCP. The “Planning Study on LT/HYW Cross-boundary Control Point and its Associated Connecting Road in Hong Kong – Feasibility Study” also mentions about the implications of the BCP development, stating that the BCP development may generate land use demand for supporting facilities including car parks and storage yards/warehouses in the area. With a distance of only about 100m away from the BCP, the application site is at an ideal location for providing parking spaces in meeting the huge parking demand newly arise from the BCP.
- 1.2.4 There is a shortage of parking spaces in Tsung Yuen Ha (hereinafter referred to as “the Village”) and North District as a whole in general. According to the Village’s representative, there is a lack of proper parking space within the Village and the villagers often have to make use of the vacant land at the fringe of the Village for parking. In addition, the latest figure provided by the Transport and Housing Bureau suggests that, as in August 2019, North District has a total number of parking spaces of 24,401. The District was the district with the second least total number of parking spaces amongst the 18 District. Shortage of parking spaces in the District has led to problems such as illegal parking of vehicles on roadside, which would significantly reduce road capacity and increase the chance of traffic congestion in the district. Temporary public vehicle park is therefore proposed at the application site to provide proper and legal parking spaces to meet the demand of the villagers of the Village as well as for North District as a whole.
- 1.2.5 Two private lots which fall within the application site (Lots 388 S.A and 388 S.B in D.D. 78) are subject to small house applications. These small house applications were submitted to the Lands Department in late 2015 and are currently under processing. The lot owners of Lots 388 S.A and 388 S.B in D.D. 78 have confirmed that construction of small house(s) will not commence at the concerned lots (Lots 388 S.A and 388 S.B in D.D. 78) during the approval period of the current application.

### **3 PLANNING CONTEXT**

#### **3.1 The Current OZP**

- 3.1.1 The application site currently falls largely within an area zoned “V” (about 99.3%) with a minor portion encroached onto “REC” zone (0.7%) on the Current OZP (please refer to **Figure 3**). The planning intention of “V” zone is to designate both existing recognized villages and areas of land considered suitable for village expansion and reprovisioning of village houses affected by Government projects. Land within this zone is “primarily intended for development of Small Houses by indigenous villagers. It is also intended to concentrate village type development within this zone for a more orderly development pattern, efficient use of land and provision of infrastructures and services.”
- 3.1.2 The planning intention of “REC” zone is primarily for low-density recreational developments for the use of the general public. It encourages the development of active and/or passive recreation and tourism/eco-tourism. Uses in support of the low-density recreational developments may be permitted subject to planning permission.
- 3.1.3 As stipulated in (11)(b) of the Notes of the Current OZP, “...temporary use or development of any land or building not exceeding a period of three years requires permission from the Town Planning Board. Notwithstanding that the use or development is not provided for in terms of the Plan, the Town Planning Board may grant permission, with or without conditions, for a maximum period of three years...”. In this connection, the proposed use requires planning permission from the Board.

#### **3.2 Previously Approved Application**

- 3.2.1 The application site is subject to a previous planning application No. A/NE-TKLN/8 for temporary staff car park and site office for public works. The application was approved by the Board on 4.5.2018 for a Period of three Years on the grounds that the staff car park and site office was to serve the staff/workers of the LT/HYW BCP project; the development was not entirely incompatible with the surrounding environment; and renewal of the application was considered unlikely upon completion of the LT/HYW BCP project.

#### **3.3 Similar Applications**

- 3.3.1 There is one similar application No. A/NE-TKLN/33 for Proposed Temporary Car Park (Private Cars and Light Goods Vehicles) to the immediate northeast of the application site. The application site for the application No. A/NE-TKLN/33 falls mostly within an area zoned “V” (about 74%) with a small portion falling within “REC” zone (about 26%) on the Current OZP. The application was approved by the Board on 4.5.2018 for a period of three years mainly on the consideration that approval of the application on a temporary basis would not frustrate the long term planning intentions of “V” and “REC” zones, and no objection or adverse comments from traffic, environmental, drainage, fire safety and nature conservation points of view.

## 4 THE DEVELOPMENT PROPOSAL

### 4.1 Site Configuration, Layout and Operation

- 4.1.1 It is proposed to utilise the application site for the proposed use (i.e. Proposed Temporary Public Vehicle Park (Excluding Container Vehicle)) for a period of 3 years. The application site has an area of about 3,776m<sup>2</sup> in aggregate comprising 47m<sup>2</sup> of Government land. The application site will provide a total of 78 parking spaces, including 40 private car parking spaces and 38 van-type light goods vehicle (hereinafter referred to as “LGV”) parking spaces. All parking spaces are situated in an open area. There will be four single-storey converted containers at the southwestern and the eastern corners of the application site as security control room, site office, electricity supply room and store room respectively, and there will be a structure as security guard post at the northwestern corner of the application site. The total floor area will be about 60.81m<sup>2</sup> and the height of the converted containers and the structure will not be more than 2.44m. The Indicative Layout Plan is shown in **Figure 4** whilst the key development parameters for the proposed use are detailed in **Table 1**.
- 4.1.2 The operation hours of the public vehicle park are proposed to be 24 hours daily, from Monday to Sunday (including public holidays). The ingress/egress point is proposed to be at the southwestern side of the application site connecting to the access road, which further connects to Lin Ma Hang Road in the west.
- 4.1.3 It is noted that applications for small house developments on the two concerned lots (Lots 388 S.A and 388 S.B in D.D. 78) within the application site are being processed. The lot owners of Lots 388 S.A and 388 S.B in D.D. 78 have confirmed that construction of small house(s) will not commence at the concerned lots (Lots 388 S.A and 388 S.B in D.D. 78) during the approval period of the current application.
- 4.1.4 The approval conditions of the previous application No. A/NE-TKLN/8 on the submission and implementation of landscape proposal and drainage proposal have been fully complied with. In consideration that the current application is located on the same site as the previous application, the nature of the proposed use of the current application is similar to that of the previous application, and the landscape and drainage proposals approved under the previous application are currently properly adopted and maintained on site; it is proposed to continue adopting and maintaining the existing landscape proposal and drainage proposal approved under the previous application at the application site during the approval period of the current application. The existing conditions on site with regard to the implementation of the approved landscape and drainage proposals under the previous application are shown in **Illustrations 2-II to II d and 2-III to III b** respectively.

*Table 1: Proposed Key Development Parameters*

| Items   | Design Parameter(s) (About)   |
|---|---|
| <b>Total Site Area</b><br><b>Uncovered Area</b><br><b>Covered Area</b>  | About 3,776m <sup>2</sup> (including 47m <sup>2</sup> Government Land)<br>About 3,715m <sup>2</sup> (98.4%)<br>About 61m <sup>2</sup> (1.6%)                              |
| <b>Proposed Use(s)</b>  | Temporary Public Vehicle Park (Excluding Container Vehicle)<br>for a Period of Three Years  |
| <b>Container No(s).</b><br><b>Proposed Use(s)</b><br><br><b>No. of Storeys and Dimension</b><br><b>Floor Area for Containers (4 Nos.)</b> | 4 (1 storey)<br>Security Control Room, Site Office, Electricity Supply Room<br>and Store Room<br>1-storey; 6.1m(L) x 2.4m(W) x 2.44m(H) each<br>About 58.56m <sup>2</sup> |

| <b>Total Floor Area</b>   | About 60.81m <sup>2</sup>   |
| <b>No. of Parking Spaces</b><br><b>(Types and No. of Parking Spaces)</b>  | 78<br>(Including 40 private car parking spaces and 38 van-type<br>LGV parking spaces)   |
| <b>Operation Hours</b>  | 24 hours, from Monday to Sunday<br>(including public holidays)  |
| <b>Ingress/Egress</b>   | About 8m wide   |

## 4.2 Vehicular Access and Parking Arrangement

4.2.1 Vehicles are proposed to make use of the ingress/egress point situated at the south-western side of the application site to enter/exit the application site. The width of the ingress/egress point situated at the south-western side of the application site is about 8m wide. **Figure 4** and **Figures 2.2.1 to 2.3 of Appendix 1** demonstrate that there will be no difficulties in internal traffic circulation sense as sufficient space for manoeuvring of vehicles is allowed throughout the application site. No queuing of vehicles along Lin Ma Hang Road will be resulted under any circumstances. The parking arrangement has complied with the requirements as stipulated in the Hong Kong Planning Standards and Guidelines. Moreover, an exit is proposed to be situated at the north-eastern side of the application site, which will be reserved for the adjoining lots including the landlocked sites located to the northeast of the application site.

## 4.3 Landscape Treatment

4.3.1 For complying with the approval conditions on the submission and implementation

of landscape proposal under the previous application No. A/NE-TKLN/8, there are currently 30 existing trees of species *Lagerstroemia Speciosa* within the application site with a minimum spacing of 6m between the trees and a clearance distance of 2m between the trees and the surrounding building structures. In view that the current application is located on the same site as the previous application and all the existing trees at the application site are in a good health condition, it is proposed to continue adopting the landscape proposal as approved under the previous application at the application site during the approval period of the current application for screening purpose and to improve the landscape quality of the area.

- 4.3.2 In addition, peripheral fencing of 2.5m in height is currently erected along the application site. It is proposed that fencings along the current application boundary will be maintained during the approval period of the current application.

#### **4.4 Provision of Drainage Facilities**

- 4.4.1 The current drainage system at the application site was adopted and implemented as for compliance with approval conditions on the submission and implementation of drainage proposal under the previous application. There are currently U-channels with about 225-300mm in diameter running along the site boundary (please refer to **Illustrations 2-III to 2-IIb**). The surface runoff inside the lot area will be naturally diverted to the site boundary, effectively collected/discharged via the existing U-channels and then be drained to the existing nullah at the southeastern boundary of the application site by two outlet points. In view that the current application is located on the same site as the previous application, it is proposed to continue adopting the drainage proposal as approved under the previous application at the application site during the approval period of the current application.

#### **4.5 Arrangement Regarding Potential Small House Developments Within the Application Site**

- 4.5.1 Two private lots within the application site (Lots 388 S.A and 388 S.B in D.D. 78) are subject to small house applications. These small house applications were submitted to the Lands Department in late 2015 and are under processing. The lot owners of Lots 388 S.A and 388 S.B in D.D. 78 have confirmed that construction of small house(s) will not commence at the concerned lots (Lots 388 S.A and 388 S.B in D.D. 78) during the approval period of the current application.

### **6.3 Temporary Nature Would Not Jeopardize its Planning Intention of “V” and “REC” Zones**

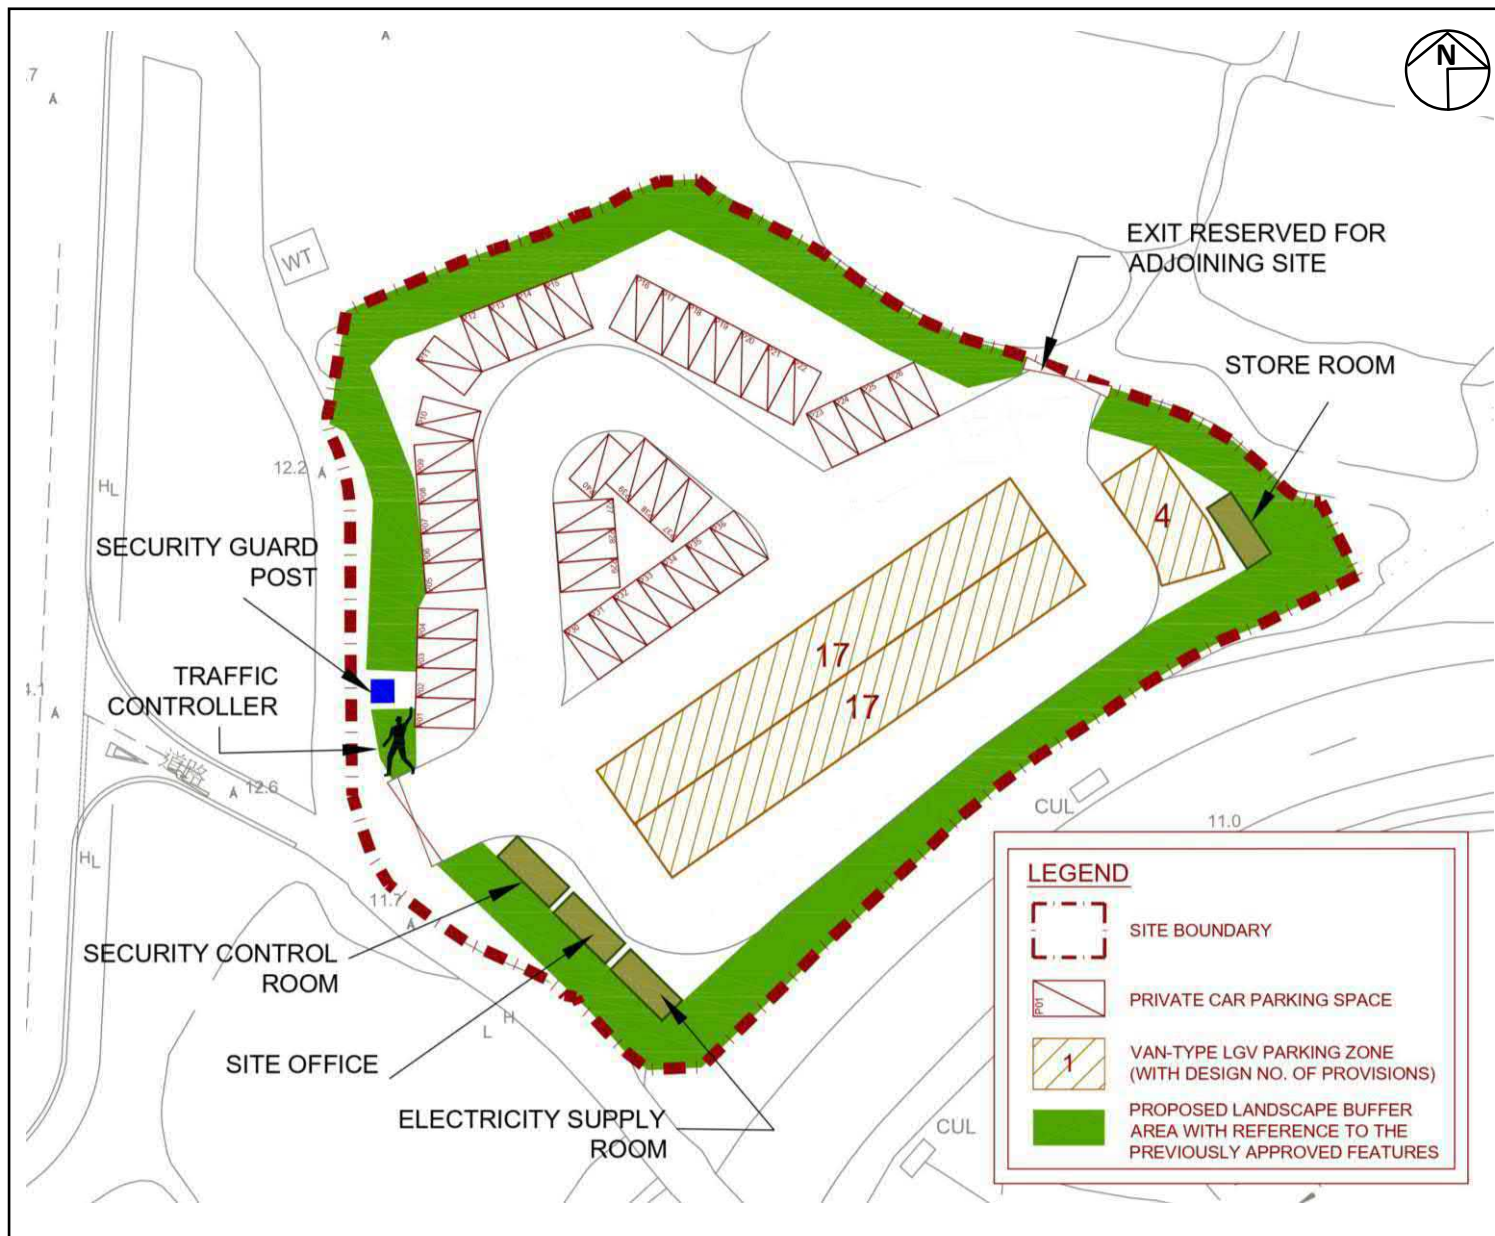

- 6.3.1 The application site falls almost entirely within an area zoned “V” (about 99.3%), with a minor portion of site falling within an area zoned “REC” (about 0.3%) on the Current OZP. Given the proposed use is on a temporary basis only, approval of the application on a temporary basis would not frustrate the long-term planning intentions of the “V” or “REC” zone.
- 6.3.2 Considering that the proposed use aims to address the need for parking facilities of local villagers and the surrounding areas, the proposed use does not contravene the planning intention of the “V” zone of supporting village development. The provision of parking spaces may also facilitate the implementation of planning intention of “REC” zone, as the proposed use provides essential parking service to visitors to the area.

### **6.4 Not Incompatible with Surrounding Land Uses**

- 6.4.1 Having considered that a similar planning application for temporary car park (private cars and light goods vehicles) (No. A/NE-TKLN/33) which locates in the immediate northeast of the application site has been approved by the Board this year and that similar uses, including the LT/HYW BCP and its associated facilities, site offices, temporary car parks as well as other temporary structures are found in the surrounding areas of the application site, the proposed use is considered not incompatible with the surrounding land uses in terms of its geographical location and land use.

### **6.5 Not Adversely Affect the Landscape Character of the Area**

- 6.5.1 In view that the LT/HYW BCP and various Government infrastructure projects nearby, including the widening of Lin Ma Hang Road Project, the character of the area has already been changed from a rural area to a built-up area with institutional landscape character. The proposed use is therefore not incompatible with the surrounding environment.
- 6.5.2 In consideration that the approval conditions of the previous application on the submission and implementation of landscape proposal have been fully complied with; the current application is located on the same site as the previous application; and the nature of the proposed use of the current application is similar to that of the previous application; it is proposed to continue adopting and maintaining the existing landscape proposal approved under the previous application at the application site during the approval period of the current application. No adverse landscape impact caused by the proposed use is anticipated.

Dear Sir/Madam,

**Re: Section 16 Planning Application for Proposed Temporary Public Vehicle Park (Excluding Container Vehicle) for a Period of Three Years at Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land, Tsung Yuen Ha, Ta Kwu Ling North, New Territories (Planning Application No. A/NE-TKLN/37)**

We refer to the comments from the Transport Department (TD) received by us on 11.3.2021 regarding the subject application.

We would like to request for a 2-month temporary deferment of the decision on the planning application by Town Planning Board such that sufficient time can be given to the Applicant to prepare Further Information in addressing the aforesaid comments by the Government Department.

Thank you for your kind attention and should you have any queries, please do not hesitate to contact the undersigned on 3180 7811.

Yours faithfully,  
For and on behalf of  
**Aikon Development Consultancy Limited**

Dear Sir/Madam,

Re: **Section 16 Planning Application for Proposed Temporary Public Vehicle Park (Excluding Container Vehicle) for a Period of Three Years at Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land, Tsung Yuen Ha, Ta Kwu Ling North, New Territories (Planning Application No. A/NE-TKLN/37)**

We refer to the comments from the Transport Department (TD) received by us on 11.3.2021 regarding the subject application.

We would like to submit herewith 70 hard copies of Further Information including Response-to-Comment Table and revised Traffic Impact Assessment (TIA) report with a view to address the aforesaid comments for consideration by TD and the Board. In response to the aforesaid comments from TD, the revised TIA report enclosed involves updates on the survey data, design year, anticipated traffic generation and attraction during peak hours, traffic flows generated from and attracted to the adjacent developments, safety measures and anticipated sight distance of the TIA report.

Please note that an additional hard copy of Further Information is provided to TD direct for their consideration.

Thank you for your kind attention and should you have any queries, please do not hesitate to contact the undersigned at 3180 7811.

Yours faithfully,  
 For and on behalf of  
 Aikon Development Consultancy Limited

RECEIVED  
 2021 APR - 9 P 3:38  
 TOWN PLANNING BOARD

Proposed Temporary Public Vehicle Park (Excluding Container Vehicle) for a Period of Three Years in “Village Type Development” and “Recreation” Zones, Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land, Tsung Yuen Ha, Ta Kwu Ling North, New Territories (Application No. A/NE-TKLN/37)

Responses to TD Comments

| <b>Departmental Comments</b><br><b>Dated 11<sup>th</sup> March 2021 (via Transport Department)</b>  | <b>Responses</b>  |
|---|---|
| (i) The applicant shall provide details of the reference car parks, such as location and no. of car parking space, as listed in table 4.1;  | Noted. Relevant information is added to Table 4.1 for your review and approval.   |
| (ii) The applicant shall explain how to derive the adjusted trip rate and substantiate the use of this adjusted trip rate in table 4.1 in this application;   | Noted. The values are derived by the average of the unit rates of the 4 public vehicle parks. The “adjusted trip rate” is rephrased as “average trip rate” to avoid misinterpretation.  |
| (iii) The applicant shall also make reference to car parks next to other cross boundary facilities in deriving the appropriate trip rate for the application;   | Noted. Relevant information is added to Table 4.1 for your review and approval.   |
| (iv) The applicant shall also consider the cumulative traffic impact due to adjacent developments such as those due to planning applications no. A/NE-TKLN/23 (parent-child play area) and A/NE-TKLN/35 (temporary eating place); | Noted. The cumulative traffic impacts of the mentioned developments are considered in Table 4.2, 4.4 and 4.5 for your review and approval.  |
| (v) The applicant shall consider the traffic impact / traffic situation after the full commissioning of Liantang/Heung Yuen Wai Boundary Control;   | Noted. As goods vehicles and private cars are expected to access the BCP directly through Heung Yuen Wai Highway, the number of goods vehicles and private cars travelled in the study area shall be considered neglectable. Public transports would be dominated. For conservative assessment purpose, the frequency of the 79K (KMB) and 59K (GMB) would be doubled (enhanced from 30 minutes to 15 minutes).<br><br>The traffic impacts of Liantang/Heung Yuen Wai BCP are assessed in 4.4 and 4.5 for your review and approval. |
| (vi) The applicant shall also access the impact to the priority junction at Lin Ma Hang Road and the horseshoe curve at the southern end of the horseshoe curve;  | Noted. The mentioned junction is assessed as J5 in Table 3.3 and 4.5 for your review and approval.  |

Proposed Temporary Public Vehicle Park (Excluding Container Vehicle) for a Period of Three Years in “Village Type Development” and “Recreation” Zones, Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land, Tsung Yuen Ha, Ta Kwu Ling North, New Territories (Application No. A/NE-TKLN/37)

Responses to TD Comments

|  |   |
|--|---|
| (vii) The applicant shall review the description of the road link L1 and L2 and review if Fanling Highway should be mentioned;   | Noted. The mentioned descriptions are revised in Table 3.4 and 4.6.   |
| (viii) The applicant shall review if year 2020 should be used in Table 4.3 as the base year estimate;  | Noted. The base year and design year are revised to Year 2021 and 2026 accordingly.   |
| (ix) The applicant shall review if the aisle width of 6.2m is adequate for 2-way traffic in the car park as shown on figure 2.3;   | Noted. To improve the circulation of the site, the mentioned aisle is revised to 1-way traffic in Figure 2.3.   |
| (x) The applicant shall advise the dimension of the parking area for van-type LGV;   | Noted. The dimensions of the parking area for van-type LGV are added in Figure 2.3.   |
| (xi) The applicant shall demonstrate and ensure that there is adequate sightline at the car park entrance to the vehicular and pedestrian traffic along the village access to Tsung Yuen Ha; and | Noted. As suggested in Section 5.3, a convex mirror is added to improve sightline. The original and improved sightlines at the car park entrance are demonstrated in Figure 5.1.1 and 5.1.2 for your review and approval. |
| (xii) The applicant shall advise the measure in protecting the pedestrian walking along the village access to Tsung Yuen Ha.   | Noted. The revised safety measures are stated in Section 5.3 and Figure 5.1 for your review and approval.   |

# Traffic Impact Assessment for S.16 Planning Application for Proposed Temporary Public Vehicle Park (Excluding Container Vehicle) for a Period of Three Years at Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land, Tsung Yuen Ha, Ta Kwu Ling North, New Territories

## Figures

### Appendix A Junction Analysis

### Appendix B Planning Data from Planning Department

# **1 Introduction**

## **1.1 Background**

The Applicant proposes to convert the existing open space at Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land, Tsung Yuen Ha into temporary car parking use and ancillary facilities to meet the parking demands of villagers of Tsung Yuen Ha as well as the demand arising from Liantang/Heung Yuen Wai Boundary Control Point (BCP).

Under the Approved Ta Kwu Ling North Outline Zoning Plan No. S/NE-TKLN/2, the application site is zoned as “Recreation” and “Village Type Development”. The uses for temporary public vehicle parking (excluding container vehicle) and ancillary facilities require planning permission from the Town Planning Board.

For supporting the planning application, a Traffic Impact Assessment (TIA) report is required to assess the traffic impact of the proposed development.

AXON Consultancy is therefore commissioned to prepare the TIA report to support the subject Planning Application.

## **1.2 Objectives**

The objectives of the traffic impact study are as follows:

- to estimate the potential traffic generation due to the development;
- to assess the future traffic situation in the surrounding network;
- to appraise the potential traffic impact of the development; and
- to consider road improvement proposals, if feasible.

## 2 The Proposed Development

### 2.1 The Site

The site is located at Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land, Tsung Yuen Ha, as shown in **Figure 2.1**. The site area is around 3,776m<sup>2</sup>.

Under the Approved Ta Kwu Ling North Outline Zoning Plan No. S/NE-TKLN/2, the application site is zoned as “Recreation” and “Village Type Development”.

### 2.2 The Temporary Public Vehicle Park

The existing temporary open car park for adjacent construction site at Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land are proposed to be converted into temporary public vehicle parking (excluding container vehicle) near Liantang/Heung Yuen Wai Boundary Control Point (BCP).

The development is proposed to operate on 24-hours basis throughout the week. For conservative purpose, it is assumed that majority of the drivers will reach the site at the observed peaks of the traffic count surveys.

Under the Approved Ta Kwu Ling North Outline Zoning Plan No. S/NE-TKLN/2, the application site is zoned as “Recreation” and “Village Type Development”. Planning permission is required for the use of temporary car park and ancillary facilities.

Considering the operation of BCP, it is expected the demand for parking spaces in the surrounding areas will also increase. To avoid excessive illegal parking in the Tsung Yuen Ha area, the Applicant wish to provide sufficient proper parking spaces in view of the increase in parking space demand. It is also noted by the Applicant that some villagers will seek for cross-border working opportunities in view of the commencement of operation of BCP, which creates demand for parking spaces by the villagers.

In view of the enormous domestic and external demands, 78 no. of private cars and van-type LGVs parking spaces will be provided. Monthly and hourly rental options are available for local villagers and visitors. The arrangement is shown in **Figure 2.2**.

### 2.3 Car Park Layout

As shown in **Figure 2.2**, the proposed car park layout contains 78 no. of private cars. The internal circulation within the proposed car park with dimensions of the internal roads are shown in **Figure 2.3**.

## 3 Existing Traffic Situation

### 3.1 Existing Road Network

The Site can be reached via Lin Ma Hang Road.

Lin Ma Hang Road is a single-two carriageway served as a local road running in north-south direction.

Connecting with Lin Ma Hang Road and Fanling Highway, Heung Yuen Wai Highway is a dual-two carriageway classified as an expressway road running in north-south direction.

### 3.2 Public Transport

Currently, no public transport service provides access to Lin Ma Hang Road via Heung Yuen Wai Highway.

Meanwhile, existing public transport services access to Lin Ma Hang Road via other routings are listed in **Table 3.1** and illustrated in **Figure 3.1**.

**Table 3.1 Existing Public Transport Services**

| Route No.                      | Destination  |
|--------------------------------|--|
| <b>Kowloon Motor Bus (KMB)</b> |  |
| 79K                            | Sheung Shui Bus Terminus – Ta Kwu Ling (Tsung Yuen Ha) |
| <b>Green Minibus (GMB)</b>     |  |
| 59K                            | Sheung Shui Station – Lin Ma Hang                      |

### 3.3 Traffic Count Surveys

In order to appraise the existing traffic conditions, classified turning movement count surveys have been carried out at the key links and junctions of the study area, as presented in **Figure 3.2**, on 18 March 2021 from 7:30am to 10:30am and 4:00pm to 8:00pm.

The traffic counts were recorded in a 15-minutes interval; and to be converted into passenger car unit (pcu) values. The highest consecutive 15-minutes hourly traffic volume is adopted as the peak hour traffic flow.

The morning and afternoon peak hours of the road network have been identified as 8:15am to 9:15am and 5:00pm to 6:00pm respectively. The observed traffic flows in the study area are presented in **Figure 3.3**.

### 3.4 Existing Link Capacity Assessment

The road link capacity assessment is summarised in **Table 3.2**. The Volume to Capacity (V/C) ratio indicates the proportion of the road capacity being used by the peak hour traffic flow. Higher V/C ratio of a road indicates heavier usage of the road link concerns. A V/C ratio equal or less than 0.85 indicates that adequate capacity is available, and vehicles are not expected to experience significant queues and delays.

**Table 3.2 Existing Link Performance**

| No. | Road Link (Direction)  | Link Capacity (veh/hr) | Observed Flow |    | V/C Ratio |      |
|-----|--|------------------------|---------------|----|-----------|------|
|     |  |                        | AM            | PM | AM        | PM   |
| L1  | Slip road from Heung Yuen Wai Highway (Northbound) to Lin Ma Hang Road Interchange | 1500 <sup>(1)</sup>    | 86            | 24 | 0.06      | 0.02 |
| L2  | Slip road from Lin Ma Hang Road Interchange to Heung Yuen Wai Highway (Southbound) | 1500 <sup>(1)</sup>    | 67            | 71 | 0.04      | 0.05 |
| L3  | Unnamed Access Road of Tsung Yuen Ha Tsuen   | 100 <sup>(2)</sup>     | 12            | 10 | 0.12      | 0.10 |

(1) Assumed that the link capacity of a slip road is equivalent to half of the capacity of a dual-2 lane expressway

(2) TPDM Volume 2 Chapter 3

It can be seen from **Table 3.2** that all key links perform satisfactorily during proposed operation hours.

### 3.5 Existing Junction Capacity Assessment

Based on the observed traffic flows, the junction performance analysis of the key junctions in the vicinity of the subject site during the morning and evening peak hours were assessed in accordance with the Transport Planning Design Manual Volume 2 Chapter 4.

The performance of a priority junction is indicated by its design flow to capacity (DFC). Less than positive 1 indicates that the junction is operating with spare capacity. When DFC equal to positive 1 indicates that the junction is overloaded; resulting in traffic queues and longer delay time.

Based on the observed traffic flows, the performance of the key junctions in the vicinity of the subject site during the morning and evening peak hours was assessed. The results are summarised and presented in **Table 3.3** and the detailed calculation sheets are attached in **Appendix A**.

**Table 3.3 Existing Junction Performance**

| Junction | Location   | Type / Capacity Index   | Observed |      |
|----------|--|-------------------------|----------|------|
|          |  |                         | AM       | PM   |
| J1       | Lin Ma Hang Road Southbound / Horseshoe curve at Lin Ma Hang Road near Tsung Yuen Ha Bus Station | Priority Junction / DFC | 0.08     | 0.04 |
| J2       | Lin Ma Hang Road Northbound / Access Road of Tsung Yuen Ha Tsuen                                 | Priority Junction / DFC | 0.02     | 0.02 |
| J3       | Lin Ma Hang Road Northbound / Lin Ma Hang Road connecting to Heung Yuen Wai Highway              | Priority Junction / DFC | 0.16     | 0.05 |
| J4       | Slip Road from Heung Yuen Wai Highway / Lin Ma Hang Road   | Roundabout / DFC        | 0.09     | 0.08 |
| J5       | Lin Ma Hang Road Northbound / Horseshoe curve at Lin Ma Hang Road near Tsung Yuen Ha Bus Station | Priority Junction / DFC | 0.13     | 0.07 |

Notes: DFC = design flow to capacity

It can be seen from **Table 3.3** that all key junctions perform satisfactorily during the operation hours.

## 4 Future Traffic Situation

### 4.1 2026 Design Year Road Network

The design year is either 3 years after the completion year or 5 years after the application year, whichever longer. Therefore, year 2026 is therefore used as the design year of the traffic impact assessment.

### 4.2 Development Traffic Generation & Attraction

With reference to the existing/committed public vehicle parks, the traffic generation and traffic attraction rates are shown in **Table 4.1**. Meanwhile, the pcu factor of a van-type LGV is assumed to be 1.5 pcu/hr.

**Table 4.1 Peak Hours Traffic Generation & Attraction**

| Public Vehicle Park                           |               | Generation                      |                | Attraction     |                |
|---|---------------|---------------------------------|----------------|----------------|----------------|
|   |               | AM                              | PM             | AM             | PM             |
|   | No. of Spaces | Traffic flow <sup>1</sup> (pcu) |                |                |                |
| Hoi Shing Road, Tsuen Wan <sup>1</sup>        | 214           | 17                              | 41             | 18             | 40             |
| Sze Mei Street, San Po Kong <sup>2</sup>      | 300           | 44                              | 25             | 7              | 59             |
| Wai Hong Road, Fanling <sup>1</sup>           | 63            | 9                               | 12             | 7              | 4              |
| HZMB, Lantau <sup>1</sup>                     | 163           | 21                              | 39             | 42             | 33             |
| Trip rate <sup>1</sup> (pcu/hr/parking space) |               |                                 |                |                |                |
| Hoi Shing Road, Tsuen Wan <sup>1</sup>        |               | 0.0794                          | 0.1915         | 0.0841         | 0.1869         |
| Sze Mei Street, San Po Kong <sup>2</sup>      |               | 0.1475                          | 0.0246         | 0.0820         | 0.1967         |
| Wai Hong Road, Fanling <sup>1</sup>           |               | 0.1429                          | 0.1905         | 0.1111         | 0.0635         |
| HZMB, Lantau <sup>1</sup>                     |               | 0.1288                          | 0.2393         | 0.2577         | 0.2025         |
| <b>Average Trip Rate</b>                      |               | <b>0.1247</b>                   | <b>0.1615</b>  | <b>0.1337</b>  | <b>0.1624</b>  |
| Trips in veh/hr (pcu/hr)                      |               |                                 |                |                |                |
| <b>Proposed Parking Facilities</b>            |               | <b>10 (13)</b>                  | <b>13 (16)</b> | <b>11 (13)</b> | <b>13 (16)</b> |

1. Data referenced from the existing public vehicle parks.

2. Anticipated data reference from approved TIA of Planning Application No. A/K11/235.

### 4.3 Traffic Generation from Adjacent Development

It is discovered that a few numbers of developments are under planning/construction within the design year of 2026 in vicinity of the site. Its traffic generation and attraction, which is summarised in **Table 4.2**, will be incorporated in this report.

**Table 4.2 Traffic Generation and Attraction from adjacent development**

| Development                              | Generation     |                | Attraction     |                |
|--|----------------|----------------|----------------|----------------|
|  | AM             | PM             | AM             | PM             |
| <b>Trip in veh/hr (pcu/hr)</b>           |                |                |                |                |
| A/NE-TKLN/23 <sup>1</sup>                | 2 (5)          | 2 (5)          | 2 (5)          | 2 (5)          |
| A/NE-TKLN/33 <sup>1</sup>                | 52 (57)        | 52 (57)        | 52 (57)        | 52 (57)        |
| A/NE-TKLN/35 <sup>1</sup>                | 1 (1)          | 1 (1)          | 1 (1)          | 1 (1)          |
| Liantang/Heung Yuen Wai BCP <sup>2</sup> | 8 (16)         | 8 (16)         | 8 (16)         | 8 (16)         |
| <b>Net</b>                               | <b>63 (79)</b> | <b>63 (79)</b> | <b>63 (79)</b> | <b>63 (79)</b> |

1. Traffic impact assessment reports of the mentioned planning applications.

2. Assumed that the frequency of the 79K (KMB) and 59K (GMB) would be doubled after full commissioning of Liantang/Heung Yuen Wai Boundary Control Point.

#### 4.4 Annual Traffic Growth

For the estimation of traffic flows in the design year of 2026, it is proposed to adjust the existing traffic flows by considering the natural traffic growth which is related to the increase in car usage.

The traffic forecasts were developed based on the existing traffic flows in 2021 from the traffic surveys and applying an appropriate annual traffic growth factor to derive the background traffic in 2026.

According to the report “Projections of Population Distribution 2019-2028” issued by Planning Department to the public in July 2019, the population growth from base year 2018 to 2026 in North District is shown in **Table 4.3** and **Appendix B**.

**Table 4.3 Projected Population Distribution**

| District Council District | Year 2018 <sup>#</sup> | Year 2026 | Growth Rate p.a. (%) |
|---------------------------|------------------------|-----------|----------------------|
| <b>North</b>              | 318,400                | 372,600   | 2.0%                 |

<sup>#</sup> Base Year Estimates

The planning data indicate a slight increase in population at a rate of +2.0% per annum. This factor is used to forecast the future traffic volume for this study.

#### 4.5 Reference and Design Flows

The growth factor will be applied to the 2021 observed traffic flows to estimate the 2026 reference flows.

The reference and design flows for the year 2026 are calculated from the following formulae:

**2026 Reference Flows (Figure 4.2) = 2021 Observed Flows (Figure 3.3)**

$$\times (1 + 2.0\%)^5$$

$$\text{2026 Design Flows (Figure 4.3)} = \text{2026 Reference Flows (Figure 4.2)} + \text{Total Development Flows (Figure 4.1)}$$

Based on the observed traffic flows and pattern of existing road network, the 2026 peak hour Reference and Design traffic flows at the critical links and junctions are distributed and assigned in **Figures 4.2** and **4.3** respectively.

## 4.6 Link Capacity Assessment

The link capacity assessment results with reference to the net development traffic are summaries in **Table 4.4**.

**Table 4.4 Link Capacity Assessment**

| No. | Road Link (Direction)  | Link Capacity (veh/hr) | Reference Flow (veh/hr) |     | Reference V/C Ratio |      | Design Flow (veh/hr) |     | Design V/C Ratio |      |
|-----|--|------------------------|-------------------------|-----|---------------------|------|----------------------|-----|------------------|------|
|     |  |                        | AM                      | PM  | AM                  | PM   | AM                   | PM  | AM               | PM   |
| L1  | Slip road from Heung Yuen Wai Highway (Northbound) to Lin Ma Hang Road Interchange | 1500                   | 147                     | 78  | 0.10                | 0.05 | 156                  | 88  | 0.10             | 0.06 |
| L2  | Slip road from Lin Ma Hang Road Interchange to Heung Yuen Wai Highway (Southbound) | 1500                   | 126                     | 130 | 0.08                | 0.09 | 134                  | 140 | 0.09             | 0.09 |
| L3  | Unnamed Access Road of Tsung Yuen Ha Tsuen   | 100                    | 15                      | 13  | 0.15                | 0.13 | 36                   | 39  | 0.36             | 0.39 |

As presented in **Table 4.4**, the capacity of the key road links would be performing satisfactorily during the peak periods for both Reference and Design Scenarios.

## 4.7 Junction Capacity Assessment

The Junction capacity assessment results with reference to the net development traffic are summarised in **Table 4.5**, with detailed calculation sheets attached in **Appendix A**.

**Table 4.5 2026 Junction Capacity Assessments**

| Junction | Location   | Type / Capacity Index   | 2026      |      |        |      |
|----------|--|-------------------------|-----------|------|--------|------|
|          |  |                         | Reference |      | Design |      |
|          |  |                         | AM        | PM   | AM     | PM   |
| J1       | Lin Ma Hang Road Southbound / Horseshoe curve at Lin Ma Hang Road near Tsung Yuen Ha Bus Station | Priority Junction / DFC | 0.19      | 0.14 | 0.19   | 0.14 |
| J2       | Lin Ma Hang Road Northbound / Access Road of Tsung Yuen Ha Tsuen                                 | Priority Junction / DFC | 0.03      | 0.02 | 0.06   | 0.06 |

| Junction | Location   | Type / Capacity Index   | 2026      |      |        |      |
|----------|--|-------------------------|-----------|------|--------|------|
|          |  |                         | Reference |      | Design |      |
|          |  |                         | AM        | PM   | AM     | PM   |
| J3       | Lin Ma Hang Road Northbound / Lin Ma Hang Road connecting to Heung Yuen Wai Highway              | Priority Junction / DFC | 0.19      | 0.13 | 0.19   | 0.15 |
| J4       | Slip Road from Heung Yuen Wai Highway / Lin Ma Hang Road   | Roundabout / DFC        | 0.16      | 0.14 | 0.17   | 0.15 |
| J5       | Lin Ma Hang Road Northbound / Horseshoe curve at Lin Ma Hang Road near Tsung Yuen Ha Bus Station | Priority Junction / DFC | 0.29      | 0.23 | 0.32   | 0.26 |

Notes: DFC = design flow to capacity

It can be seen from **Table 4.5** that, the capacity of all the key junctions would be performing within their capacity during the peak hours for the Reference and Design Scenarios.

## 5 Internal Transport Facilities

### 5.1 Parking Provisions

The proposed car park layout showing the internal transport facilities is illustrated in **Figure 2.2**. 40 no. and approximate 38 no. of provisions for private cars and van-type LGVs are proposed respectively. The proposed van-type LGV parking zone is 5.5m width. As indicated in **Table 5.1**, the dimensions of proposed provisions are in accordance with Hong Kong Planning Standards & Guidelines.

**Table 5.1 Parking Space Dimensions**

| Type of Parking Space | Size                        | References  |
|-----------------------|-----------------------------|-------------|
| Car Parking Space     | 2.5m(W) x 5.0m(L) x 2.4m(H) | Under HKPSG |

### 5.2 Access Arrangement and Swept Path Analyses

An 8m wide existing vehicular access at the unnamed access road connecting Lin Ma Hang Road and an access gate connecting the adjacent lots will be maintained as shown in **Figure 2.2**. The swept path analysis (for private car) at the proposed site are shown in **Figure 2.2.1-SP1** to **2.2.2-SP5**.

### 5.3 Safety Measures

A few management measures to ensure road safety are demonstrated in **Figure 5.1**:

- Traffic controllers will be deployed to control vehicles entering or exiting the site to avoid conflict with the road traffic.
  - When vehicles are expected to enter or leave the site, at least 1 traffic controller will station at each entrance to direct the movement of vehicles and pedestrians into and out of the site to avoid clash or congestion problem;
  - Clear guidelines and appropriate trainings would be provided to the patrol staff;
- A pair of amber revolving lanterns will be installed at the site entrance at a height about 2m from ground level and would be in use throughout the operation time;
- Pedestrian traffic signals will be installed along the footpath to minimise the conflict between pedestrians and site traffic;
- A convex mirror will be installed at a height about 2m from ground level at the site entrance for improved sightline as presented in **Figure 5.1.2**.

Meanwhile, the existing footpath connecting with Lin Ma Hang Road is about 5m away from the site boundary, pedestrians could then access to the public road safely.

## **6 Summary and Conclusion**

### **6.1 Summary**

The applicant proposed to convert the existing open car park at Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land into car parking purpose to meet the parking demands of villagers of Tsung Yuen Ha as well as the demand arising from Liantang/Heung Yuen Wai Boundary Control Point (BCP).

In order to appraise the existing traffic conditions, classified turning movement count surveys have been carried out at the key junctions of the study area on 18 March 2021 from 7:30am to 10:30am and 4:00pm to 8:00pm. The morning and evening peak hours of the road network have been identified as 8:15am to 9:15am and 5:00pm to 6:00pm, respectively.

As the design year is either 3 years after the completion year or 5 years after the application year, whichever longer, so that the design year of the traffic impact assessment is year 2026. Based on the planning data from Planning Department, an annual growth factor of 2.0% was adopted for this study. The growth factor is applied to the observed traffic flows in 2021 to forecast the future traffic volume in 2026.

The capacity of all key links and key junctions would be performing within their capacities during the peak hours for both Reference and Design Scenarios.

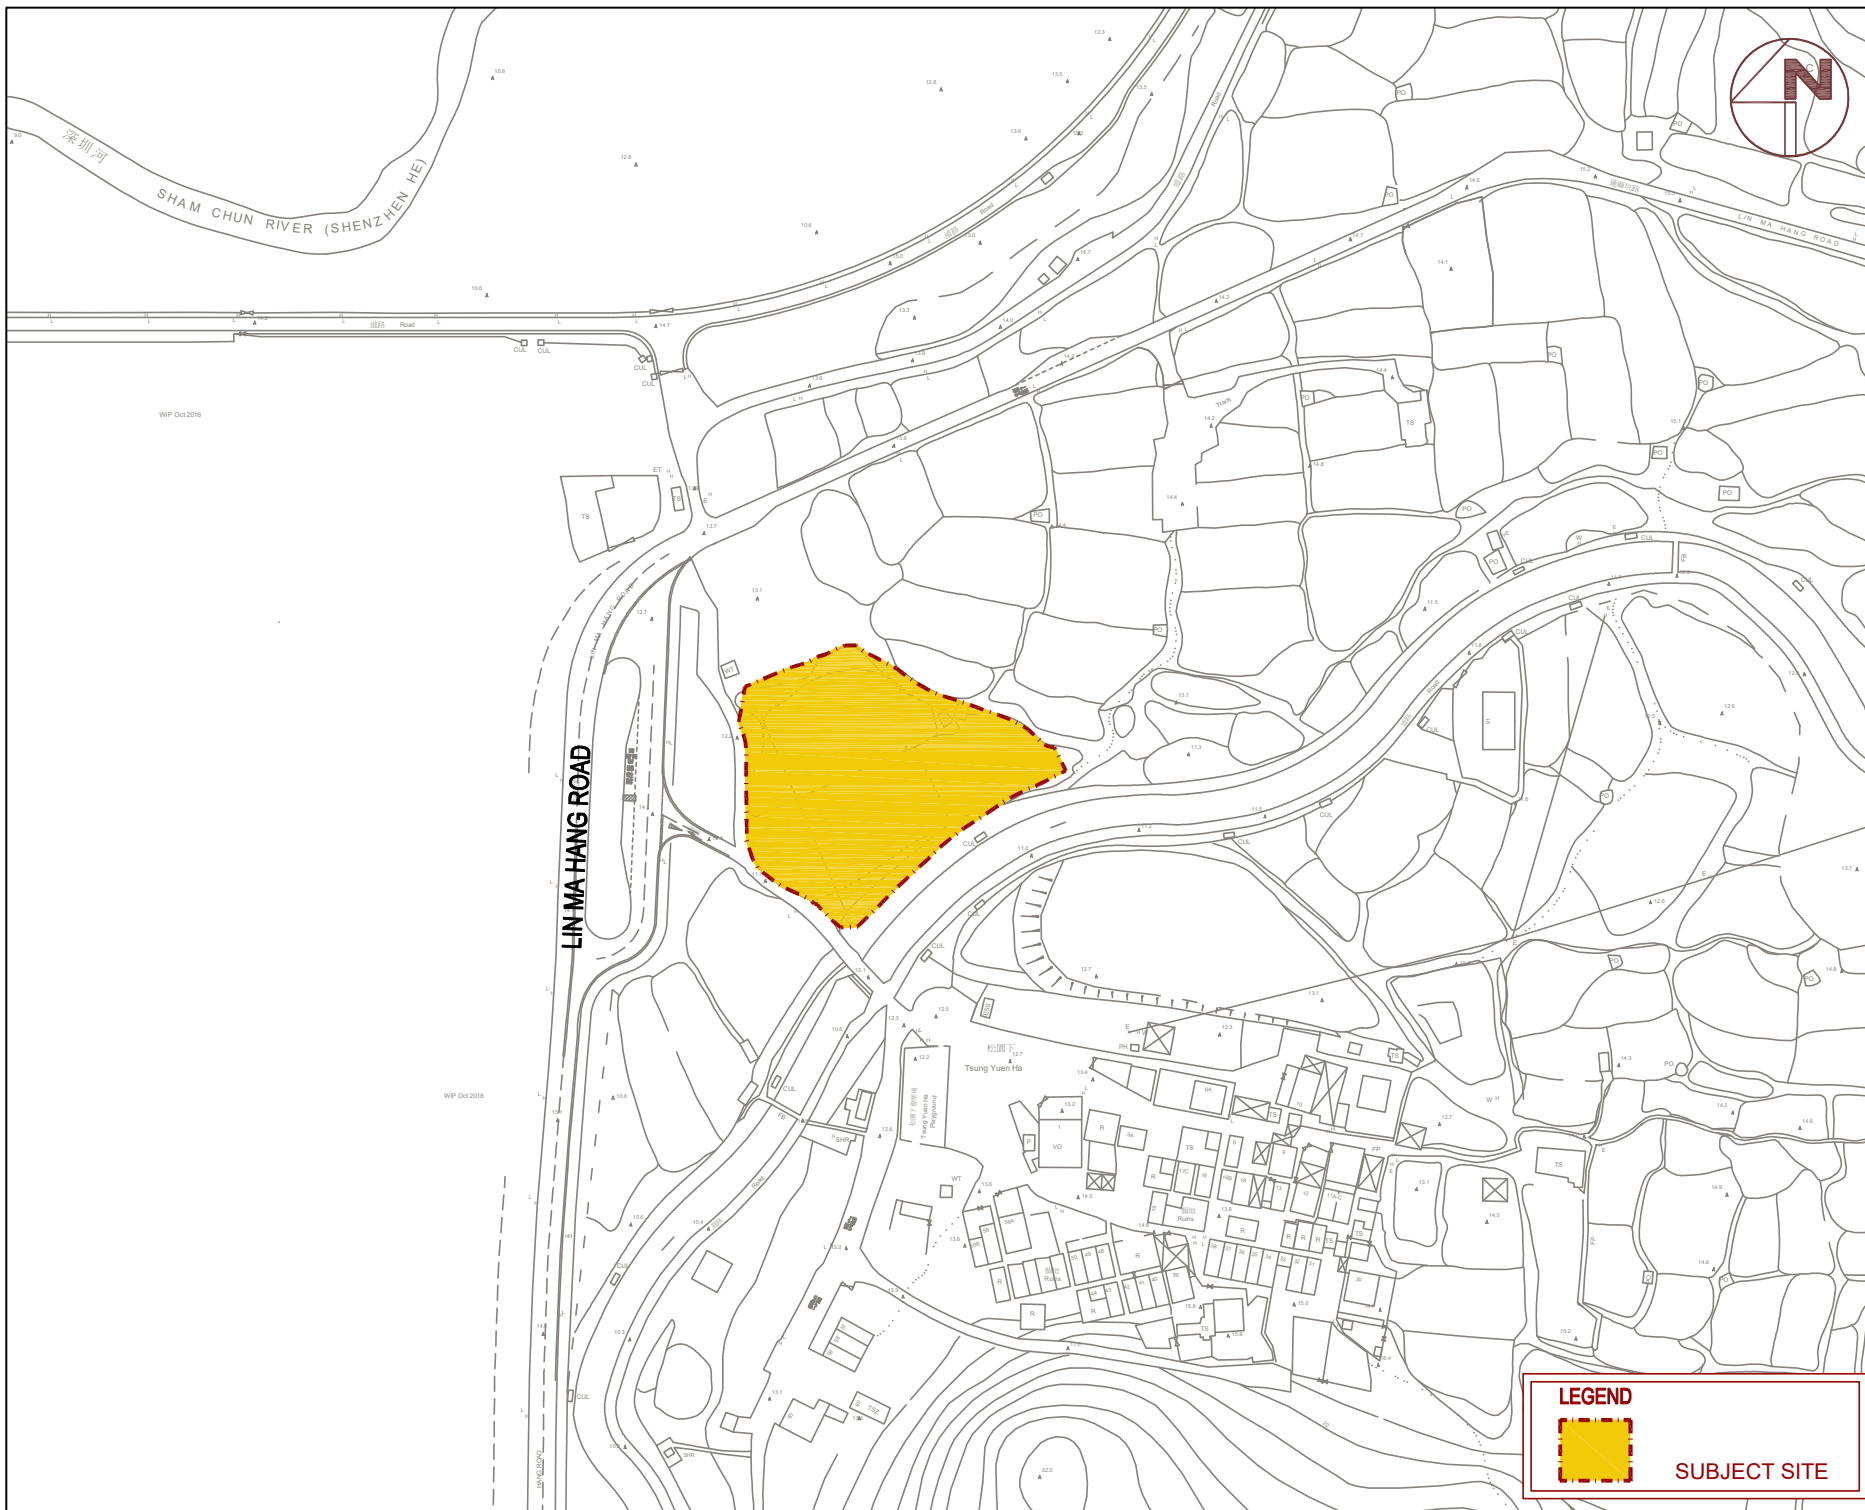

Therefore, it can be concluded that the proposed development would not generate any additional adverse traffic impact to the road network.

### **6.2 Conclusion**

The findings of the traffic impact assessment indicate that the road network in the vicinity of the Site would be able to cope with the traffic generated by the proposed development and would not cause any adverse impact from traffic perspective.

Diagram showing the junction layout. Lin Ma Hang Road NB (ARM C) has two lanes with flow rates of 156 and 10. The junction has three arms: ARM A (right), ARM B (down), and ARM C (left). Lane widths are indicated: 12 for the left lane, 10 for the right lane, and 12 for the down lane. A north arrow points to the right.

Diagram showing the junction layout. Lin Ma Hang Road NB (ARM C) has two lanes with flow rates of 124 and 3. The junction has three arms: ARM A (right), ARM B (down), and ARM C (left). Lane widths are indicated: 10 for the left lane, 10 for the right lane, and 10 for the down lane. A north arrow points to the right.

Dear Sir/Madam,

**Re: Section 16 Planning Application for Proposed Temporary Public Vehicle Park (Excluding Container Vehicle) for a Period of Three Years at Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land, Tsung Yuen Ha, Ta Kwu Ling North, New Territories (Planning Application No. A/NE-TKLN/37)**

We refer to the comments from the Transport Department (TD) received by us on 10.5.2021 regarding the subject application.

We would like to enclose herewith the Response-to-Comment Tables and Replacement Pages for the Revised Traffic Impact Assessment with a view to address i) the aforesaid comments from TD and ii) the additional concerns raised by the public comments for Further Information received by the Board on 8.2.2021 and 9.4.2021 respectively for consideration by relevant Government departments and the Board.

Thank you for your kind attention and should you have any queries, please do not hesitate to contact the undersigned at 3180 7811.

Yours faithfully,  
For and on behalf of  
**Aikon Development Consultancy Limited**

Thomas Luk *MTCP, MHKIREA, MRTPI, RPP*

| (i) Convex mirror should not be used as a traffic improvement measure.                           | Noted. The revised Section 5.3, Figure 5.1 and Figure 5.1.1 are enclosed herewith for your review and approval. |
| (ii) Employment of traffic signal as a traffic measure is not supported.                         | Noted. The revised Section 5.3, Figure 5.1 and Figure 5.1.1 are enclosed herewith for your review and approval. |

## 5 Internal Transport Facilities

### 5.1 Parking Provisions

The proposed car park layout showing the internal transport facilities is illustrated in **Figure 2.2**. 40 no. and approximate 38 no. of provisions for private cars and van-type LGVs are proposed respectively. The proposed van-type LGV parking zone is 5.5m width. As indicated in **Table 5.1**, the dimensions of proposed provisions are in accordance with Hong Kong Planning Standards & Guidelines.

**Table 5.1 Parking Space Dimensions**

| Type of Parking Space | Size                        | References  |
|-----------------------|-----------------------------|-------------|
| Car Parking Space     | 2.5m(W) x 5.0m(L) x 2.4m(H) | Under HKPSG |

### 5.2 Access Arrangement and Swept Path Analyses

An 8m wide existing vehicular access at the unnamed access road connecting Lin Ma Hang Road and an access gate connecting the adjacent lots will be maintained as shown in **Figure 2.2**. The swept path analysis (for private car) at the proposed site are shown in **Figure 2.2.1-SP1** to **2.2.2-SP5**. Sufficient sightline is provided as presented in **Figure 5.1.1**.

### 5.3 Safety Measures

A few management measures to ensure road safety are demonstrated in **Figure 5.1**:

- Traffic controllers will be deployed to control vehicles entering or exiting the site to avoid conflict with the road traffic.
  - When vehicles are expected to enter or leave the site, at least 1 traffic controller will station at each entrance to direct the movement of vehicles and pedestrians into and out of the site to avoid clash or congestion problem;
  - Clear guidelines and appropriate trainings would be provided to the patrol staff;
- A pair of amber revolving lanterns will be installed at the site entrance at a height about 2m from ground level and would be in use throughout the operation time;

Meanwhile, the existing footpath connecting with Lin Ma Hang Road is about 5m away from the site boundary, pedestrians could then access to the public road safely.

Section 16 Planning Application for Proposed Temporary Public Vehicle Park (Excluding Container Vehicle) for a Period of Three Years at Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land, Tsung Yuen Ha, Ta Kwu Ling North, New Territories

| Major Additional Concerns of the Public Comments for Further Information Received by the Board on 8.2.2021 and 9.4.2021  | Responses to Public Comments  |
|--|---|
| (a) The current application would increase traffic flow and lead to potential traffic congestion concern.  | The current application has conducted <b>Traffic Impact Assessment (TIA)</b> for the proposed use. Results of the <b>TIA</b> indicate that the road network in the vicinity of the application site would be able to cope with the traffic generated by the proposed use of the current application. No adverse traffic impact is expected to be generated by the proposed use.   |
| (b) The application site is linked to the village access of Tsung Yuen Ha, which further connects to Lin Ma Hang Road. Since the village access of Tsung Yuen Ha serves as the only pedestrian and vehicle access for Tsung Yuen Ha, the proposed use of the current application would cause danger to the residents of Tsung Yuen Ha, especially to the children and the elderly. | As detailed in <b>Section 5.3</b> of the <b>TIA</b> conducted for the current application, a number of safety management measures are proposed to be imposed on site to ensure road safety, which include deployment of traffic controllers to direct the movement of vehicles and pedestrians into and out of the site, and installation of a pair of amber revolving lanterns at the site entrance.<br><br>With the adoption of the abovementioned safety management measures on site, the safety of the residents and other pedestrians walking along the village access to Tsung Yuen Ha could be ensured.  |
| (c) The current application will increase pedestrian flow, cause adverse environmental impacts to the surrounding areas and increase the risk of fire of the area.   | Considering that the proposed use is for temporary public vehicle park (excluding container vehicle) only, additional pedestrian flow generated by the proposed use of the current application is expected to be minimal and insignificant.<br><br>With regard to the potential adverse environmental impacts and potential risk of fire brought by the proposed use of the current application to the surrounding areas, as mentioned in <b>Section 4</b> of the <b>Planning Statement</b> , the existing on-site drainage facilities and landscape measures approved under the previous application at the application site are proposed to be maintained on site for the current application. In addition, the applicant is willing to comply with all the approval conditions as the Board and the relevant Government departments deem fit for the current application upon approval of the application. As such, no adverse environmental impacts or additional risk of fire is expected to be brought by the proposed use of the current application to the surrounding areas. |

Section 16 Planning Application for Proposed Temporary Public Vehicle Park (Excluding Container Vehicle) for a Period of Three Years at Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D.78 and Adjoining Government Land, Tsung Yuen Ha, Ta Kwu Ling North, New Territories

|   |   |
|---|---|
| <p>(d) The proposed use of the current application is not in line with the planning intentions of “Village Type Development” (“V”) and “Recreation” (“REC”) zones.</p>  | <p>The application site falls almost entirely within an area zoned “V” with a minor portion of site falling within an area zoned “REC” on the approved Ta Kwu Ling North Outline Zoning Plan No. S/NE-TKLN/2.</p> <p>Considering that the proposed use of the current application can satisfy the demand for parking facilities of the villagers of Tsung Yuen Ha and the surrounding areas, the proposed use does not contravene the planning intention of “V” zone for supporting village development. Besides, the provision of parking spaces may also facilitate the implementation of planning intention of “REC” zone, as the proposed use provides essential parking service to visitors of the area. Given the proposed use is on a temporary basis only, approval of the current application on a temporary basis would not frustrate the long-term planning intentions of the “V” or “REC” zone.</p>   |
| <p>(e) Approval of the current application would set an undesirable precedent for similar uses. Cumulative impact of approving applications with similar uses as the current application would result in general degradation of the environment, as well as unsatisfactory town planning and insufficient land use of the area.</p> | <p>It should be noted that a similar planning application for temporary car park (private cars and light goods vehicles) (No. A/NE-TKLN/33), which is located to the immediate northeast of the application site has been approved by the Board on 24.4.2020. In addition, the application site is subject to a previous application No. A/NE-TKLN/8 for temporary staff car park and site office for public works for a period of three years. The previous application has a similar nature of proposed use as that of the current application. Having considered the approval of a similar planning application and a previous planning application by the Board, the current application will not set an undesirable precedent to other similar cases.</p> <p>As mentioned in <b>Section 4</b> of the <b>Planning Statement</b>, the applicant undertakes to adopt proper on-site treatments and measures to ensure no adverse impacts would be brought by the current application on the surrounding areas. Furthermore, in order to further minimise the potential impact to the surrounding area, the applicant is willing to comply with all the approval conditions imposed by the Board and the relevant Government departments as they deem fit for the current application upon approval of the application, which might include an approval condition specifying that upon the expiry of the planning permission of the current application, the reinstatement of the site to an amenity area to the satisfaction of Director of Planning or of the Board.</p> |

主旨: Re: A/NE-TKLN/8 DD 78 Tsung Yuen Ha Parking

A/NE-TKLN/3.7

A/NE-TKLN/8

Lots in D.D. 78 and Adjoining Government Land, Tsung Yuen Ha, Ta Kwu Ling North

Site area : About 3,776 m<sup>2</sup> Includes Government Land of about 47 m<sup>2</sup>

Zoning : "VTD" and "Recreation"

Applied Use: 78 Vehicle Parking

Dear TPB Members,

The previous application was approved because the parking was to support the infrastructure development. As advised by ArchSD, the **LT/HYW BCP project was expected to complete in end 2018**. The applicant had also confirmed that renewal of the temporary planning approval was unlikely after completion of the LT/HYW BCP project. As such, should the application be approved, a shorter period of one year approval was recommended to allow flexibility in the construction programme

But now that it has been completed the applicant wants to continue using the site as a parking lot.

This is unacceptable. The Liantang/Heung Yuen Wai Boundary Control Point should have all necessary support services like parking incorporated into its structure. If not then some hard questions should be asked as the generation of more brownfields would indicate flaws in the design of the facility.

In addition :

The Chief Town Planner/Urban Design and Landscape, Planning Department (CTP/UD&L, PlanD) had reservation on the application as vegetation clearance had taken - 42 - place on site prior to submission of the application. The cumulative effect of approving these piecemeal temporary uses was incompatible with the future village type developments and would degrade the landscape character and living environment within the "Village Type Development"

the Chairman stated that according to the Paper, the site was being used for the applied use and was involved in an enforcement case.

Note that it took three extensions before conditions were complied with.

The site should be restored to reflect its zoning intention. The transformation of Lin Ma Hang Road into a facsimile of Kam Sham Road and other trashed sections of NT cannot be tolerated.

The application must be rejected to curb further trashing of the newly opened district.

Mary Mulvihill

**Subject:** A/NE-TKLN/8 DD 78 Tsung Yuen Ha Parking

A/NE-TKLN/8

Lots in D.D. 78 and Adjoining Government Land, Tsung Yuen Ha, Ta Kwu Ling North

Site area : About 3,776 m<sup>2</sup> Includes Government Land of about 47 m<sup>2</sup>

Zoning : "VTD" and "Recreation"

Applied Use: 88 Staff Car Park and Site Office for Public Works

Dear TPB Members,

A large site to be used for parking for a public works project.

It is about time that these government funded works set a good example by using modern equipment to reduce the extent of the land required and the impact that brownfield use has on sites zoned for uses such as Recreation.

I trust that members will question the applicant on this matter.

有關規劃申請 (編號：A/NE-TKLN/37) 之意見表達

本人為香園圍村村民。以下是本人的想法 —

1. 蓮塘/香園圍口岸已經建成，隨著口岸開通泊車需求將會大大加重。與其任由車輛亂泊、違泊在附近村路兩旁，會為村民（尤其小朋友）造成危險，倒不如利用現時空置土地。
2. 我們村民及鄰近地區居民都需要泊車，但村內缺乏泊車位置，經常要停泊於村邊緣的空地。此申請所提供的臨時停車場能為我們提供一個妥善的泊車地點。
3. 空置土地有足夠空間，用作臨時停車場不會為附近環境造成太大負擔。批准申請作臨時停車場同時能增加土地使用，為社區增添活力，避免因土地荒廢而造成凌亂之感。
4. 此規劃申請擬作臨時公眾停車場，比起以往申請作為職員停車場及寫字樓，更加能惠及本人及鄰居們。
5. 申請是三年臨時性質，能在現階段好好利用閒置的土地之餘，日後仍可將土地用作鄉村式發展及康樂用途。

綜合以上的想法，本人認為此規劃申請值得支持。本人故此希望城規會能盡快考慮批准此申請，使我們村民及鄰近地區居民能盡早受益使用此停車場。

致：北角渣華道 333 號  
北角政府合署 15 樓  
城市規劃委員會秘書處

有關規劃申請 (編號：A/NE-TKLN/37) 之意見表達

本人為香園圍村居民代表 (萬春明)。以下是本人的想法 —

1. 蓮塘/香園圍口岸已經建成，隨著口岸開通泊車需求將會大大加重。與其任由車輛亂泊、違泊在附近村路兩旁，會為村民 (尤其小朋友) 造成危險，倒不如利用現時空置土地。
2. 我們村民及鄰近地區居民都需要泊車，但村內缺乏泊車位置，經常要停泊於村邊緣的空地。此申請所提供的臨時停車場能為我們提供一個妥善的泊車地點。
3. 空置土地有足夠空間，用作臨時停車場不會為附近環境造成太大負擔。批准申請作臨時停車場同時能增加土地使用，為社區增添活力，避免因土地荒廢而造成凌亂之感。
4. 此規劃申請擬作臨時公眾停車場，比起以往申請作為職員停車場及寫字樓，更加能惠及本人及鄰居們。
5. 申請是三年臨時性質，能在現階段好好利用閒置的土地之餘，日後仍可將土地用作鄉村式發展及康樂用途。

綜合以上的想法，本人認為此規劃申請值得支持。本人故此希望城規會能盡快考慮批准此申請，使我們村民及鄰近地區居民能盡早受益使用此停車場。

反對，鄉郊設臨時公眾停車場將會增加附近車輛出入流量，引至附近交通阻塞，環境污染，增加引發火警危機，影響村民安全及生活質數。

T.1. Seq 1

5-13

敬啟者；城市規劃委員會收

有關打鼓嶺北松園下村 78 地段 388sa-388sb-388rp-390rp, 申請編號 A/NE-TKLN/37 等地段規劃現申請提出反對, 本人是松園下村原居民, 這地段作為停車場對本村居民帶來了很多危險, 因為村口出車只有車路一條, 從村口行出來又沒有行人路, 如做停車場會有很多頭車輛出入(包括大貨車), 引致在村口出入或有互不讓路的情況, 本村有好多老人家同小孩子都是用同一出入口, 這樣會對本村居民做成危險景象出現, 同時因人流增加, 會對環境做成污染, 因為過去三年同樣都有這些事實出現, 污水流入河流, 垃圾到處都有沒有人清理, 當時也有向使用人反映過但都是一樣沒有改善, 所以今次向城規作出這地段做停車場的計劃作出反對.

此致!

反對，鄉郊設停車場將會增加附近車輛出入流量，引至附近交通阻塞，環境污染，增加引發火警危機，影響村民安全及生活質數。

寄件者: [REDACTED]  
寄件日期: 2021年03月10日星期三 3:47  
收件者: tpbpd  
主旨: A/NE-TKLN/37 DD 78 Tsung Yuen Ha  
附件: Tsung Yuen Ha - Google Maps.pdf

A/NE-TKLN/37

Lots 388 S.A, 388 S.B, 388 RP (Part) and 390 RP (Part) in D.D. 78 and Adjoining Government Land, Tsung Yuen Ha, Ta Kwu Ling North

Site area : About 3,776sq.m Includes Government Land of about 47sq.m

Zoning : "VTD" and "Recreation"

Applied use : 78 Vehicle Parking

Dear TPB Members,

The site is adjacent to Application 30 that was withdrawn. Google Maps show that both sites has been recently stripped and excavated. There have been a number of applications for the area close to the new border crossing. Most were withdrawn.

The development was not in line with the planning intention of the 'VTD' and "Recreation" zones. There is no strong planning justification in the submission to merit a departure from such planning intentions, even on a temporary basis.

Parking facilities are an inefficient land use and should be accommodated in high rise buildings, underground or in stacked facilities, see attached. The villagers own 2,100 sqft homes. If they want to keep a car then they should convert a portion of the ground floor of their spacious residences into a car port. This is common practice all over the world and private residential compounds in NT include a car port or two on ground floor of each unit.

Approval of the application, even on a temporary basis, would set an undesirable precedent for similar uses. The cumulative impact of approving such applications would result in a general degradation of the environment of the area and repeat the bad planning and inefficient land use that has destroyed much of NT.

With the Heung Yuen Wai Border Control there is the opportunity to put in place efficient and co-ordinated support facilities with extensive underground parking. TPB must ensure that this is not squandered by rejecting these piecemeal brownfield plans. The Ta Kwu Ling villages must not be allowed to become sprawling brownfields as was tolerated in other parts of NT.

Members must question if enforcement action has been initiated for both sites.

Mary Mulvihill

隨著新口岸落成，區內居民以及來往口岸人士對泊車需求日漸增加，甚至會衍生出違泊問題。是次臨時停車場申請正正可以「地盡其用」，善用其地理優勢適切地提供泊車設施。申請亦不會為交通、景觀、環境方面造成任何不便或負擔，因此本人支持申請！

## 意見詳情

Details of the Comment :

反對，鄉郊設停車場必會增加附近車輛出入流量，引至附近交通阻塞，環境污染，增加引發火警危機，影響村民安全及生活質數。

**Recommended Advisory Clauses**

- (a) to note the following comments of DLO/N, LandsD:
  - (i) the Site comprises private lots and adjoining Government land (GL). The private lots are Old Schedule lots held under the Block Government Lease (demised for agricultural use) without any guaranteed right of access. The applicant should make his own arrangement for acquiring access to the Site and there is no guarantee that any adjoining GL would be allowed for vehicular access to the Site for the proposed use. Two Small House applications at Lots 388 S.A and 388 S.B (**Plan A-2**) have been received within the Site and are now under processing;
  - (ii) the actual occupation area does not tally with the Site. There are unauthorized structures erected on Lot 388 RP without prior approval from his office. The aforesaid structures are not acceptable under the Lease concerned. As such, his office issued a warning letter against the unauthorized structures and registered it in Land Registry in 2017 pending further lease enforcement action. Moreover, it is noted that a portion of the GL within the Site is being illegally occupied. His office also reserves the right to take necessary land control action against the illegal occupation of Government land; and
  - (iii) should the application be approved, the owners of the lots concerned shall apply to his office for Short Term Waiver (STW) and a Short Term Tenancy (STT) covering all actual occupation area and structures concerned. The applications for STW and STT will be considered by Government in its landlord's capacity and there is no guarantee that they will be approved. If the STW and STT applications are approved, the commencement date would be backdated to the first date of occupation and they will be subject to such terms and conditions to be imposed including payment of waiver fee/ rent and administrative fees as considered appropriate by his office;
- (b) to note the comments of C for T that the village access of Tsung Yuen Ha is not managed by TD. The applicant shall seek agreement/ comment from the responsible party;
- (c) to note the comments of CE/NTE, HyD that the section of Lin Ma Hang Road adjacent to the Site and the access road leading from Lin Ma Hang Road to the Site (**Plan A-2**) are being constructed under CEDD's Contract No. CV/2013/03 – "Liantang/Heung Yuen Wai Boundary Control Point Site Formation and Infrastructure Works – Contract 5" and will be handed over to HyD and HAD respectively for maintenance in the future;
- (d) to note the following comments of DEP:
  - (i) as the application is temporary in nature, the applicant is advised to follow EPD's latest "Code of Practice on Handling Environmental Aspects of Temporary Uses and Open Storage Sites (CoP)";
  - (ii) should the application be approved, the applicant should also be reminded of his obligation to strictly comply with all environmental protection/ pollution control ordinances, in particular Water Pollution Control Ordinance and Waste Disposal Ordinance, and to follow relevant measures given in the EPD's latest CoP, during construction and operation stages of the proposal; and

- (iii) the applicant should also be reminded that necessary precautionary/ pollution control measures should be put in place to prevent any pollution of nearby environment during construction and operation stages of the proposed use;
- (e) to note the comments of DAFC that the applicant should adopt good site practice to avoid adverse impact on the nullah nearby;
- (f) to note the following comments of CTP/UD&L, PlanD:
  - (i) it is noted that, generally, the trunk of the existing trees is tightly tied with stakes/guys, which girdles the tree bark and affects tree growth. The applicant is reminded that the connections with stakes/guys should be inspected and adjusted regularly to avoid trunk girdling. If the trees have been established, the concerned stakes/guys can be removed;
  - (ii) the applicant is reminded to maintain proper and regular housekeeping for the planting area. There should be no piling of building materials, objects or debris on the planting area. Weeding of planting areas should be carried out in regular basis for health growth of the plants; and
  - (iii) the applicant is also reminded of the importance of undertaking proper tree care for existing trees within the Site. Useful information published by the GLTM Section, DEVB on general tree maintenance, tree risk management and proper planting practices is available for reference in the following links:

[https://www.greening.gov.hk/tc/tree\\_care/practices.html](https://www.greening.gov.hk/tc/tree_care/practices.html)
- (g) to note the following comments of CE/MN, DSD:
  - (i) if the existing drainage system is found to be inadequate or ineffective during operation, the applicant is required to rectify the system to the satisfaction of the relevant Government departments at his own cost;
  - (ii) it is noted that the proposed development is operated 24 hours a day and the car park is open to the public. Apart from “sand and silt”, it is likely that the runoff from the car park will be contaminated by petroleum, water from car washing activity etc. The applicant is required to review the existing drainage facilities and advise any measures to avoid the contaminated runoff entering the existing stormwater drainage system; and

- (iii) the Site is in an area where no public sewerage connection is available;
- (h) to note the following comments of D of FS:
- (i) in consideration of the design/nature of the proposal, FSIs are anticipated to be required. Therefore, the applicant is advised to submit relevant layout plans incorporated with the proposed FSIs to his Department for approval. In addition, the applicant should be also advised that the layout plans should be drawn to scale and depicted with dimensions and nature of occupancy and the location of where the proposed FSI to be installed should be clearly marked on the layout plans; and
  - (ii) the applicant is reminded that if the proposed structure(s) is required to comply with the Buildings Ordinance (Cap. 123), detailed fire service requirements will be formulated upon receipt of formal submission of general building plans;
- (i) to note the following comments of CE/C, WSD:
- (i) existing water mains will be affected. The applicant is required to either divert or protect the water mains found on Site. If diversion is required, existing water mains inside the Site are needed to be diverted outside the site boundary of the proposed development to lie in Government land. A strip of land of minimum 1.5m in width should be provided for the diversion of existing water mains. The cost of diversion of existing water mains upon request will have to be borne by the grantee/ applicant; and the applicant shall submit all the relevant proposal to WSD for consideration and agreement before the works commence;
  - (ii) if diversion is not required, the following conditions shall apply:
    - existing water mains are affected and no development which requires resiting of water mains will be allowed;
    - details of site formation works shall be submitted to the Director of Water Supplies for approval prior to commencement of works;
    - no structures shall be built or materials stored within 1.5 metres from the centre line(s) of water main(s). Free access shall be made available at all times for staff of the Director of Water Supplies or their contractor to carry out construction, inspection, operation, maintenance and repair works;
    - no trees or shrubs with penetrating roots may be planted within the Water Works Reserve or in the vicinity of the water main(s). No change of existing site condition may be undertaken within the aforesaid area without the prior agreement of the Director of Water Supplies. Rigid root barriers may be required if the clear distance between the proposed tree and the pipe is 2.5m or less, and the barrier must extend below the invert level of the pipe;
    - no planting or obstruction of any kind except turfing shall be permitted within the space of 1.5 metres around the cover of any valve or within a distance of 1 m from any hydrant outlet; and
    - tree planting may be prohibited in the event that the Director of Water Supplies considers that there is any likelihood of damage being caused to water mains;

- (j) to note the following comments of CBS/NTW, BD:
- (i) before any new building works are to be carried out on the Site, the prior approval and consent of the Building Authority (BA) should be obtained unless they are exempted building works or commenced under the simplified requirement under the Minor Works Control System. Otherwise they are Unauthorized Buildings Works (UBW). An Authorized Person (AP) should be appointed as the coordinator for the proposed building works in accordance with the Building Ordinance (BO);
  - (ii) for UBW erected on leased land, enforcement action may be taken by BA to effect their removal in accordance with BD's enforcement policy against UBW as and when necessary. The granting of any planning approval should not be construed as an acceptance of any existing building works or UBW on the Site under the BO;
  - (iii) any temporary shelters or converted containers for storage or washroom or workshop or other uses considered as temporary buildings are subject to control under the Building (Planning) Regulations (B(P)Rs) Pt. VII;
  - (iv) the Site shall be provided with means of obtaining access thereto from a street and emergency vehicular access in accordance with Regulation 5 and 41D of the B(P)Rs respectively;
  - (v) if the Site is not abutting on a specified street having a width not less than 4.5m wide, its development intensity shall be determined by the BA under Regulation 19(3) of the B(P)Rs at the building plan submission stage; and
  - (vi) formal submission under the BO is required for any proposed new works, including any temporary structures. Detailed comments under BO will be provided at building plan submission stage.
