Annex 1 Drainage Assessment

1.1 Introduction

A. Site particulars

- 1.1.1 The application site possesses an area of about 5,500m². The surface of the site has been paved with sand and gravel.
- 1.1.2 The application site is accessible via a vehicular track leading from Fung Kong Tsuen Road.
- 1.1.3 There are some open storage yards and port back-up use such as construction machinery and material storage yard to the south of the site. Some vacant land which is a knoll was found to the north of the application site.

B. Level and gradient of the subject site & proposed surface channel

- 1.1.4 The application site will be hard paved and occupied an area of approximately 5,500m². It has a gradient sloping from north to south from about +24.0mPD to +16.2mPD.
- 1.1.5 In order to follow the topography of the application site, the proposed surface channel will be constructed following the gradient of the site. As demonstrated in the calculation in Annex 1.3 hereunder, 450mm surface U-channel will be capable to drain surface runoff accrued at the subject site and the same passing through the site from adjacent area.

C. Catchment area of the proposed drainage provision at the subject site

- 1.1.6 It is found that the level of the application site is generally higher than the adjoining land except to the north. Hence, an external catchment is found in Figure 4.

D. Particulars of the existing drainage facilities to accept the surface runoff collected at the application site

- 1.1.7 According to recent site inspection, there is a natural drain to the southeast of the application site. (Figure 4)

1.2 Runoff Estimation & Proposed Drainage Facilities

A. Proposed drainage facilities

- 1.2.1 Subject to the above calculations, it is determined that 450mm surface U-channel which is made of concrete along the site periphery is adequate to intercept storm water passing through and generated at the application site. (Figure 4)
- 1.2.2 The collected surface runoff will be conveyed to the natural drain to the southeast of the site through the proposed 450mm surface U-channel outside the application site boundary. (Figure 4)
- 1.2.3 Prior to the commencement of the drainage works, the applicant will seek the consent of the District Lands Office/Yuen Long and the registered land owner for drainage works outside the application site or outside the jurisdiction of the applicant.
- 1.2.4 All the proposed drainage facilities, including the section of surface channel proposed in between of the subject site to the natural drain, will be provided and maintained at the applicant's own expense. Also, channel will be cleaned at regular interval to avoid the accumulation of rubbish/debris which would affect the dissipation of storm water.
- 1.2.5 All proposed works at the site periphery would not obstruct the flow of surface runoff from the adjacent areas, the provision of trees and surface channel at site boundary is detailed hereunder:
 - (a) Soil excavation at site periphery, although at minimal scale, is inevitably for the provision of surface channel and landscaping. In the reason that the accumulation of excavated soil at the site periphery would obstruct the free flow of the surface runoff from the surroundings, the soil will be cleared at the soonest possible after the completion of the excavation process.
 - (b) In view of that soil excavation may be continued for several working days, surface U-channel will be dug in short sections and all soil excavated will be cleared before the excavation of another short section.
 - (c) The level of the site periphery will be maintained during and after the works. As such, the works at the site periphery would not either alter or obstructed the flow of surface runoff from adjacent areas.
 - (d) Some holes will be provided at the toe of site hoarding so as to allow unobstructed flow of surface runoff to and from adjacent area.

Annex 1.3 Drainage Calculation for the Subject Site

1. Runoff Estimation

1.1 Rational method is adopted for estimating the designed run-off

$$Q = k \times i \times A / 3,600$$

Assuming that:

- i. The area of the entire catchment is approximately 9,800m²;
- ii. It is assumed that the value of run-off co-efficient (k) is taken as 0.7 because the external catchment is unpaved.

$$\text{Difference in Land Datum} = 38.6\text{m} - 16.2\text{m} = 22.4\text{m}$$

$$L = 150\text{m}$$

$$\therefore \text{Average fall} = 22.4\text{m in } 150\text{m} \text{ or } 1\text{m in } 6.7$$

According to the Brandsby-Williams Equation adopted from the "Stormwater Drainage Manual – Planning, Design and Management" published by the Drainage Services Department (DSD),

$$\text{Time of Concentration } (t_c) = 0.14465 [L / (H^{0.2} \times A^{0.1})]$$

$$t_c = 0.14465 [150 / (14.93^{0.2} \times 9,800^{0.1})]$$

$$t_c = 5.04 \text{ minutes}$$

With reference to the Intensity-Duration-Frequency Curves provided in the abovementioned manual, the mean rainfall intensity (i) for 1 in 50 recurrent flooding period is found to be 275 mm/hr

$$\text{By Rational Method, } Q = 0.7 \times 275 \times 9,800 / 3,600$$

$$\therefore Q = 524.03 \text{ l/s} = 31,441.67 \text{ l/min} = 0.53 \text{ m}^3/\text{s}$$

In accordance with the Chart or the Rapid Design of Channels in "Geotechnical Manual for Slopes", for an approximate gradient of 1:20, 450mm surface U-channel is considered adequate to dissipate all the storm water generated at the application site.

Annex 2 Estimated Traffic Generation

- 2.1 The application site is abutting a vehicular access leading from Fung Kong Tsuen Road. Sufficient manoeuvring space is proposed for the manoeuvring of light goods vehicle within the application site. No queueing of traffic outside the application site will occur.
- 2.2 The estimated average traffic generation and traffic generation rate at peak hours are as follow:

	<u>Average Traffic Generation Rate</u> (pcu/hr)	<u>Average Traffic Attraction Rate</u> (pcu/hr)	<u>Traffic Generation Rate at Peak Hours</u> (pcu/hr)	<u>Traffic Attraction Rate at Peak Hours</u> (pcu/hr)
Light goods vehicle	0.6	0.6	1.5	1.5

Note 1: The opening hour of the proposed development is restricted to 9:00 a.m. to 7:00 p.m. from Mondays and Saturdays. No operation will be held on Sundays and public holidays.

Note 2: The pcu of light goods vehicle is assumed as 1.5; &

Note 3: Morning peak is defined as 7:00a.m. to 9:00a.m. whereas afternoon peak is defined as 5:00p.m. to 7:00p.m.

- 2.3 In association with the proposed use, adequate space for manoeuvring and loading/unloading of recyclable materials would be provided. By virtue of the fact that the application site is directly linked with Yuen Long Highway via Tin Wah Road and Tin Ying Road, the proposed development being applied would not aggravate the traffic condition of the area.

Lots 182 S.A RP, 185 S.A, 185 S.B & 185 S.C in D.D. 128, Ha Tsuen, Yuen Long, N.T.

Annex 1 Drainage Assessment

1.1 Introduction

A. Site particulars

- 1.1.1 The application site possesses an area of about 5,466m². The surface of the site has been paved with sand and gravel.
- 1.1.2 The application site is accessible via a vehicular track leading from Fung Kong Tsuen Road.
- 1.1.3 There are some open storage yards and port back-up use such as construction machinery and material storage yard to the south of the site. Some vacant land which is a knoll was found to the north of the application site.

B. Level and gradient of the subject site & proposed surface channel

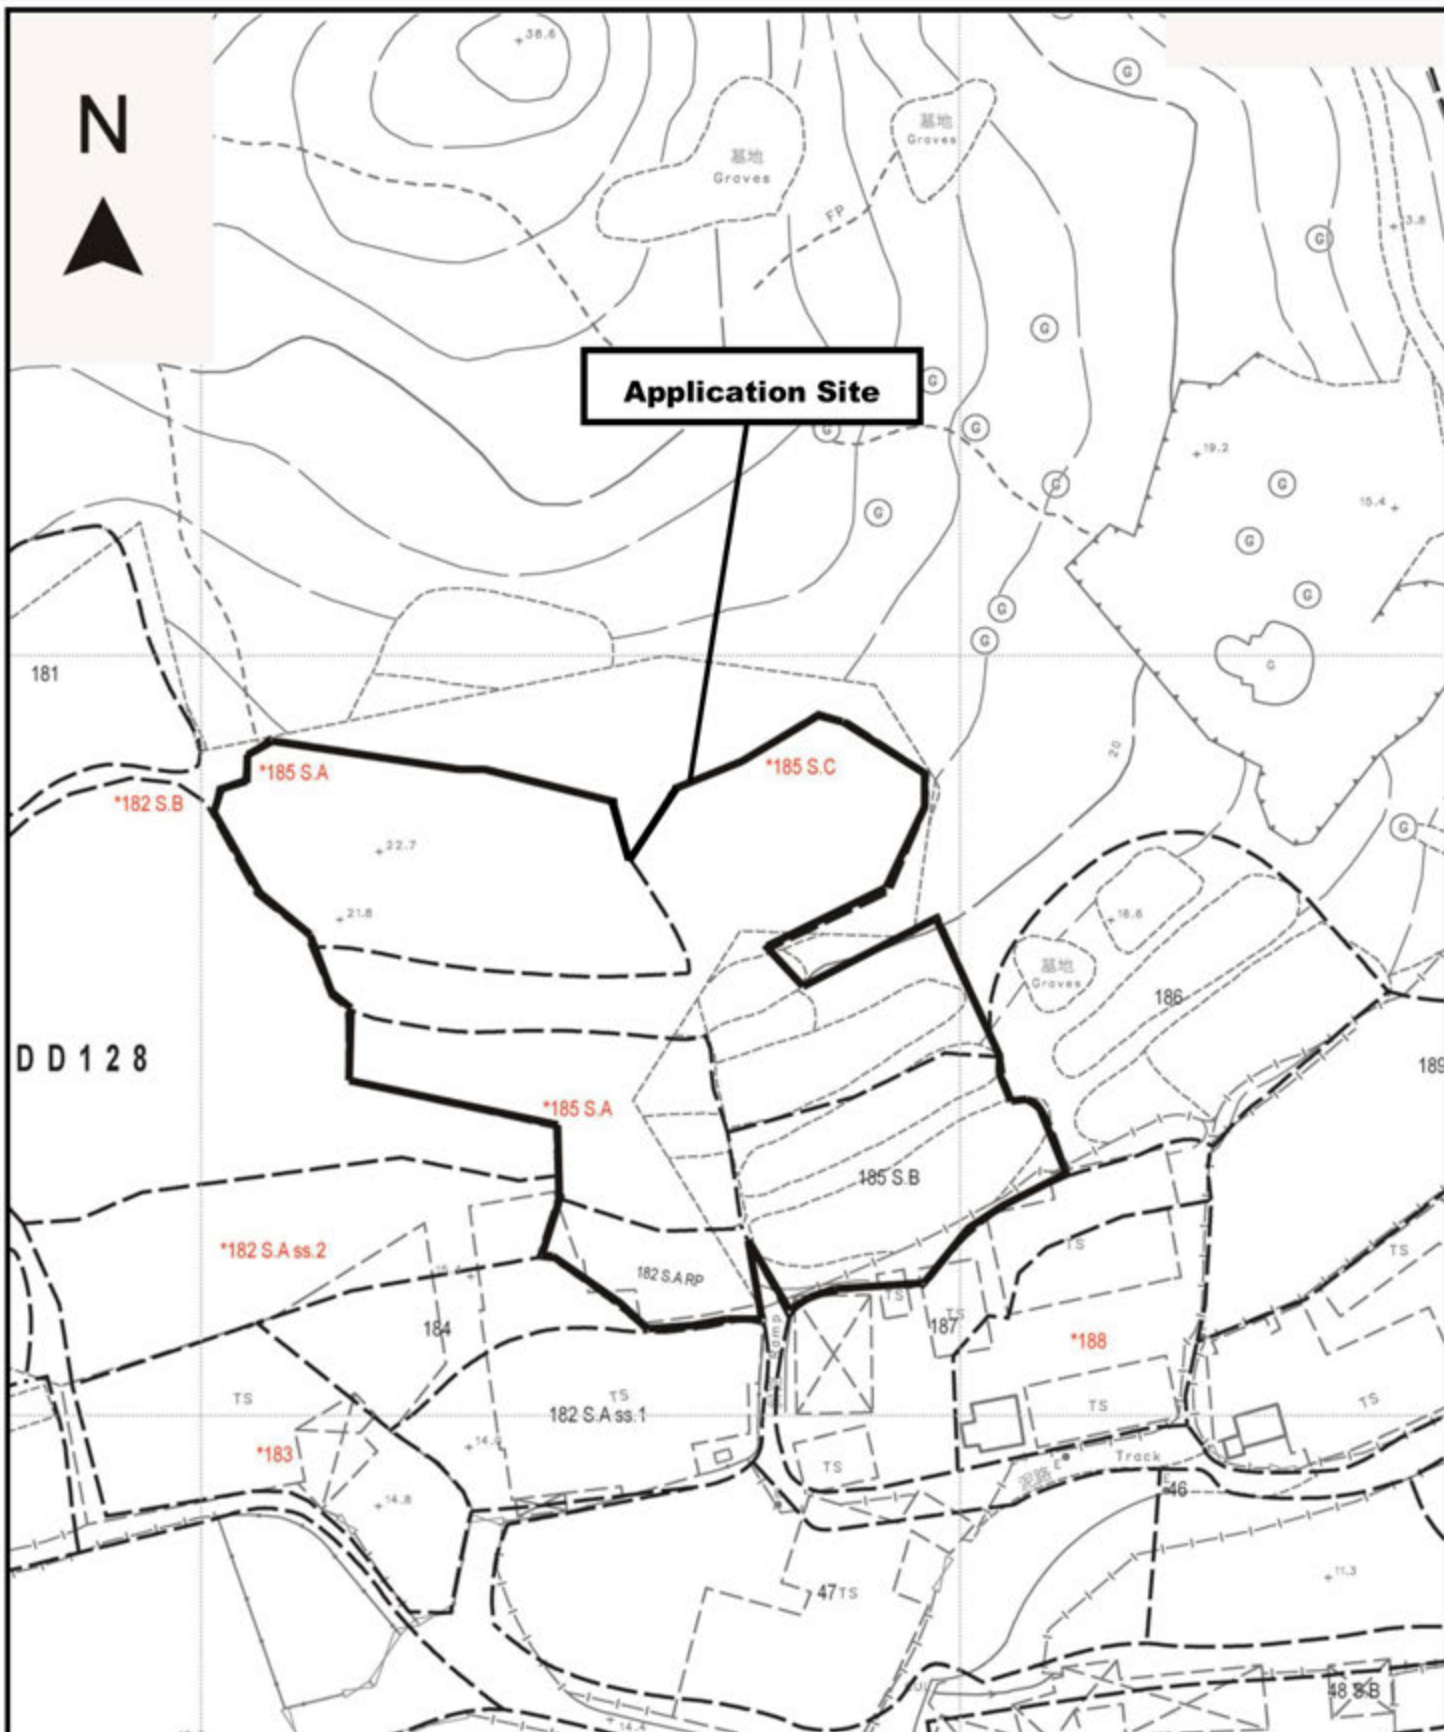

- 1.1.4 The application site will be hard paved and occupied an area of approximately 5,466m². It has a gradient sloping from north to south from about +24.0mPD to +16.2mPD.
- 1.1.5 In order to follow the topography of the application site, the proposed surface channel will be constructed following the gradient of the site. As demonstrated in the calculation in **Annex 1.3** hereunder, 450mm surface U-channel will be capable to drain surface runoff accrued at the subject site and the same passing through the site from adjacent area.

C. Catchment area of the proposed drainage provision at the subject site

- 1.1.6 It is found that the level of the application site is generally higher than the adjoining land except to the north. Hence, an external catchment is found in **Figure 4**.

D. Particulars of the existing drainage facilities to accept the surface runoff collected at the application site

- 1.1.7 According to recent site inspection, there is a natural drain to the southeast of the application site. (**Figure 4**)

Recommended Advisory Clauses

- (a) to resolve any land issues relating to the development with the concerned owner(s) of the Site;
- (b) the planning permission is given to the development/use under application. It does not condone any other development/use (i.e. open storage of construction materials) which currently exists on the Site but not covered by the application. Immediate action should be taken to discontinue such development/use not covered by the permission;
- (c) to note the comments of the District Lands Officer/Yuen Long, Lands Department (DLO/YL, LandsD) that:
 - (i) the Site comprises Old Schedule Agricultural Lots (OSAL) held under the Block Government Lease which contains the restriction that no structures are allowed to be erected without the prior approval of the Government; and
 - (ii) the lot owner(s) will need to apply to his office to permit the structures to be erected or regularise any irregularities on site, if any. Besides, given the proposed use is temporary in nature, only application for regularisation or erection of temporary structure(s) will be considered. Application(s) for any of the above will be considered by LandsD acting in the capacity of the landlord or lessor at its sole discretion and there is no guarantee that such application(s) will be approved. If such application is approved, it will be subject to such terms and conditions, including among others the payment of rent or fee, as may be imposed by LandsD;
- (d) to note the comments of the Commissioner for Transport (C for T) that the local track leading to the Site is not under Transport Department (TD)'s purview. - (e) to note the comments of the Chief Highway Engineer/New Territories West, Highways Department (CHE/NTW, HyD) that:
 - (i) adequate drainage measures shall be provided to prevent surface water running from the Site to the nearby public roads and drains; and
 - (ii) the access road connecting the Site with Fung Kong Tsuen Road is not and will not be maintained by HyD. HyD should not be responsible for maintaining any access connecting the Site with Fung Kong Tsuen Road;
- (f) to note the comments of the Chief Engineer/Mainland North, Drainage Services Department (CE/MN, DSD) on the submitted drainage proposal that:
 - (i) please indicate clearly the full alignment of the discharge path (i.e. proposed 600mm U-channel) from the Site all the way down to the ultimate discharge point. Please also clarify whether intermediate catchpits and gratings would be installed for the 600mm U-channel;
 - (ii) the existing nullah/channel/watercourse, to which the applicant proposed to discharge the stormwater from the Site is not maintained by DSD. The applicant should identify the owner of the existing drainage facilities and obtain consent from the owner prior to commencement of the proposed works. In the case that it is a local village drains, District Officer (Yuen Long) should be consulted;

- (iii) further to (i) and (ii) above, since there is no record of the said discharge path, please provide site photos to demonstrate its presence and existing condition;
 - (iv) please demonstrate with hydraulic calculation that the proposed 600mm U-channel is adequate to collect, convey and discharge the surface runoff accrued on the Site and also the overland flow intercepted from the adjacent lands;
 - (v) it is noted that the gradient of the proposed 450mm U-channel is relatively steep. Please ensure the depth of the concerned U-channel would not hinder the routine maintenance especially at the downstream of the system;
 - (vi) the cover levels and invert levels of the proposed U-channels, catchpits/sand traps should be shown on the drainage plan;
 - (vii) please revisit the alignment of the proposed 450mm U-channel at the southern part of the Site. Acute angle bend between inlet and outlet features should be avoided;

 - (ix) standard details should be provided to indicate the sectional details of the proposed U-channels and the catchpits;
 - (x) where walls or hoarding are erected and laid along the site boundary, adequate opening should be provided to intercept the existing overland flow passing through the Site;
 - (xi) the development should neither obstruct overland flow nor adversely affect existing natural streams, village drains, ditches and the adjacent areas, etc.; and
 - (xii) the applicant should consult District Lands Officer/Yuen Long and seek consent from the relevant owners for any drainage works to be carried out outside his lot boundary before commencement of the drainage works;
- (g) to note the comments of the Chief Building Surveyor/New Territories West, Buildings Department (CBS/NTW, BD) that:
- (i) if the existing structures (not being a New Territories Exempted House) are erected on leased land without the approval of the Building Authority (BA), they are unauthorized building works (UBW) under the Buildings Ordinance (BO) and should not be designated for any proposed use under the application;
 - (ii) for UBW erected on leased land, enforcement action may be taken by BD to effect their removal in accordance with the prevailing enforcement policy against UBW as and when necessary. The granting of any planning approval should not be construed as an acceptance of any existing building works or UBW on the Site under the BO;
 - (iii) before any new building works (including containers/open sheds as temporary buildings, demolition and land filling, etc.) are to be carried out on the Site, prior approval and consent of the Building Authority should be obtained, otherwise they are UBW under the BO. An Authorized Person should be appointed as the co-ordinator for the proposed building works in accordance with the BO;
 - (iv) the Site shall be provided with means of obtaining access thereto from a street and emergency vehicular access in accordance with Regulations 5 and 41D of the Building

(Planning) Regulations (B(P)R) respectively;

- (vi) any temporary shelters or converted containers for office, storage, washroom or other uses are considered as temporary buildings are subject to the control of Part VII of the B(P)R; and
- (vii) detailed checking under the BO will be carried out at building plan submission stage;
- (h) to note the comments of the Director of Fire Services (D of FS) that in consideration of the design/nature of the proposal, fire service installations (FSIs) are anticipated to be required. Therefore, the applicant is advised to submit relevant layout plans incorporated with the proposed FSIs to his department for approval. In addition, the applicant should also be advised that the layout plans should be drawn to scale and depicted with dimensions and nature of occupancy and the location of where the proposed FSIs to be installed should be clearly marked on the layout plans. However, the applicant is reminded that if the proposed structure(s) is/are required to comply with the BO, detailed fire service requirements will be formulated upon receipt of formal submission of general building plans;
- (i) to note the comments of the Chief Engineer/Construction, Water Supplies Department (CE/C, WSD) that for provision of water supply to the development, the applicant may need to extend his/her inside services to the nearest suitable government water mains for connection. The applicant shall resolve any land matter (such as private lots) associated with the provision of water supply and shall be responsible for the construction, operation and maintenance of the inside services within the private lots to WSD's standards;
- (j) to note the comments of the Director of Environmental Protection (DEP) that any stockpiling of metal and plastic should be properly covered to prevent dust nuisance. The applicant should follow the relevant mitigation measures and requirements in the latest 'Code of Practice on Handling Environmental Aspects of Temporary Uses and Open Storage Sites' issued by the Environmental Protection Department to minimise any potential environmental nuisances; and
- (k) to note the comments of the Antiquities and Monuments Office, Development Bureau (AMO, DEVB) that the applicant is required to inform AMO immediately when any antiquities or supposed antiquities under the Antiquities and Monuments Ordinance (Cap. 53) are discovered in the course of works.

Lots 182 S.A RP, 185 S.A, 185 S.B and 185 S.C in D.D.128 and Adjoining Government Land, Ha Tsuen

Site area: About 5,500sq.m Includes Government Land of about 34sq.m

Zoning: "Res (Group D)" and "GIC"

Applied use: Recyclable Collection Centre for Metal and Plastic / 2 Vehicle Parking

Dear TPB Members,

There is no history of approval for this brownfield use.

Is this an extension of the approved recycling operation on adjoining lots, Application 1138?. Despite a history of revocation and failure to fulfill conditions on 26 August using the usual trick of applying under another name :

Members had no question on the application

But you have a duty to inquire into matters and this has been directed by the High Court.

So is this an extension of the 1138 operation and in view of the absence of history is it an ongoing but unapproved operation.

In view of the zoning and the pledges to phase out brownfield use, the board should not be approving additional brownfield uses.
