**Annex 1 Drainage Proposal**

**1.1 Existing Situation**

**A. Site particulars**

1.1.1 The application site occupied an area of about 280m<sup>2</sup>.

1.1.2 The area adjacent to the proposed development is mainly rural in nature. It is surrounded by some temporary structures to the west and an approved animal boarding establishment to the north. An open drain is found to the south of the application site.

**B. Level and gradient of the subject site & proposed surface channel**

1.1.3 It has a very gentle gradient sloping from northwest to southeast from about +18.8mPD to +18.4mPD.

**C. Catchment area of the proposed drainage provision at the subject site**

1.1.4 According to **Figure 5**, it is noted that the level of the application site is comparatively higher than the adjoining land except to the north. As such, an external catchment has been identified as shown in **Figure 5**. However, an approved animal boarding establishment with planning permission No. A/YL-KTN/755 is found to the further north of the application site as shown in **Figure 5** of which drainage facilities will be provided at the said site so that the external catchment stops there.

**D. Particulars of the existing drainage facilities to accept the surface runoff collected at the application site**

1.1.5 As shown in **Figure 5**, an open drain is found to the south of the application site.

**1.2 Runoff Estimation**

1.2.1 Rational method is adopted for estimating the designed run-off

$$Q = k \times i \times A / 3,600$$

Assuming that:

- i. The area of the entire catchment is approximately 820m<sup>2</sup>;
- ii. In view of that the majority of the catchment is vegetated in nature, it is assumed that the value of run-off co-efficient (k) is taken as 0.7 for conservative reason.

$$\text{Difference in Land Datum} = 19.6\text{m} - 18.4\text{m} = 1.2\text{m}$$

$$L = 42\text{m}$$

$$\therefore \text{Average fall} = 1.2\text{m in } 42\text{m} \text{ or } 1\text{m in } 35\text{m}$$

According to the Brandsby-Williams Equation adopted from the “Stormwater Drainage Manual – Planning, Design and Management” published by the Drainage Services Department (DSD),

$$\text{Time of Concentration (t}_c\text{)} = 0.14465 [ L / (H^{0.2} \times A^{0.1}) ]$$

$$t_c = 0.14465 [ 42 / (2.86^{0.2} \times 820^{0.1}) ]$$

$$t_c = 2.52 \text{ minutes}$$

With reference to the Intensity-Duration-Frequency Curves provided in the abovementioned manual, the mean rainfall intensity (i) for 1 in 50 recurrent flooding period is found to be 180 mm/hr

$$\text{By Rational Method, } Q_1 = 0.7 \times 325 \times 820 / 3,600$$

$$\therefore Q_1 = 51.82 \text{ l/s} = 3,109.17 \text{ l/min} = 0.05\text{m}^3/\text{s}$$

In accordance with the Chart or the Rapid Design of Channels in “Geotechnical Manual for Slopes”, for an approximate gradient of about 1:80 in order to follow the gradient of the application site, 225mm surface U-channel is considered adequate to dissipate all the stormwater accrued by the application site.

### 1.3 Proposed Drainage Facilities

- 1.3.1 Subject to the calculations in 1.2 above, it is determined that proposed 225mm surface U-channel along the site periphery is adequate to intercept storm water passing through and generated at the application site (**Figure 5**).
- 1.3.2 Catchpit will be provided at the turning point of the surface U-channel. Sand trap or alike will be provided at the terminal catchpit.
- 1.3.3 The collected stormwater will then be dissipate to the open drain to the immediate south of the application site.
- 1.3.4 All the proposed drainage facilities will be provided and maintained at the applicant's own expense.

- 1.3.5 The provision of the proposed surface channel will follow the gradient of the application site.
- 1.3.6 Prior to the commencement of drainage works, the applicant will seek the consent of the District Lands Office/Yuen Long and relevant registered land owner for works outside the application site or outside the jurisdiction of the applicant.
- 1.3.7 All proposed works at the site periphery would not obstruct the flow of surface runoff from the adjacent areas, the provision of trees and surface channel at site boundary is detailed hereunder:
- (a) Soil excavation at site periphery, although at minimal scale, is inevitably for the provision of surface channel and landscaping. In the reason that the accumulation of excavated soil at the site periphery would obstruct the free flow of the surface runoff from the surroundings, the soil will be cleared at the soonest possible after the completion of the excavation process.
  - (b) In view of that soil excavation may be continued for several working days, surface channel will be dug in short sections and all soil excavated will be cleared before the excavation of another short section.
  - (c) No leveling work will be carried at the site periphery. The level of the site periphery will be maintained during and after the works. As such, the works at the site periphery would not either alter or obstructed the flow of surface runoff from adjacent areas.
  - (d) 10cm will be reserved at the toe of the site hoarding to allow unobstructed flow of surface runoff.

## Annex 2 Estimated Traffic Generation

- 2.1 The application site is serviced by vehicular access leading from Fung Kat Heung Road. It is situated amidst the 'Agriculture' ("AGR") zone and two similar animal boarding establishments which have been approved by Town Planning Board were found to the north of the application site. (TPB Ref.: A/YL-KTN/659 and 755)
- 2.2 The proposed development will operation between 9:00a.m. to 7:00p.m. daily. The maximum number of visitors is 8 per day which can be accommodated by 2 private cars because the site would allow the parking of 2 private cars at any time while another parking space will be reserved for the use of staff for picking up dogs to/from the site and picking up of staff. There will be 4 staffs at the application site. No more than 8 dogs will be accommodated at the application site. No staff will stay overnight at the application site. It is assuming that clients will deliver the dog to the application site and they will collect the dog before the closing of the proposed development. The estimated average traffic generation and traffic generation rate at peak hours are as follow:

Type of Vehicle	Average Traffic Generation Rate (pcu/hr)	Average Traffic Attraction Rate (pcu/hr)	Traffic Generation Rate at <u>Peak Hours</u> (pcu/hr)	Traffic Attraction Rate at <u>Peak Hours</u> (pcu/hr)
Private car	0.6	0.6	3	2

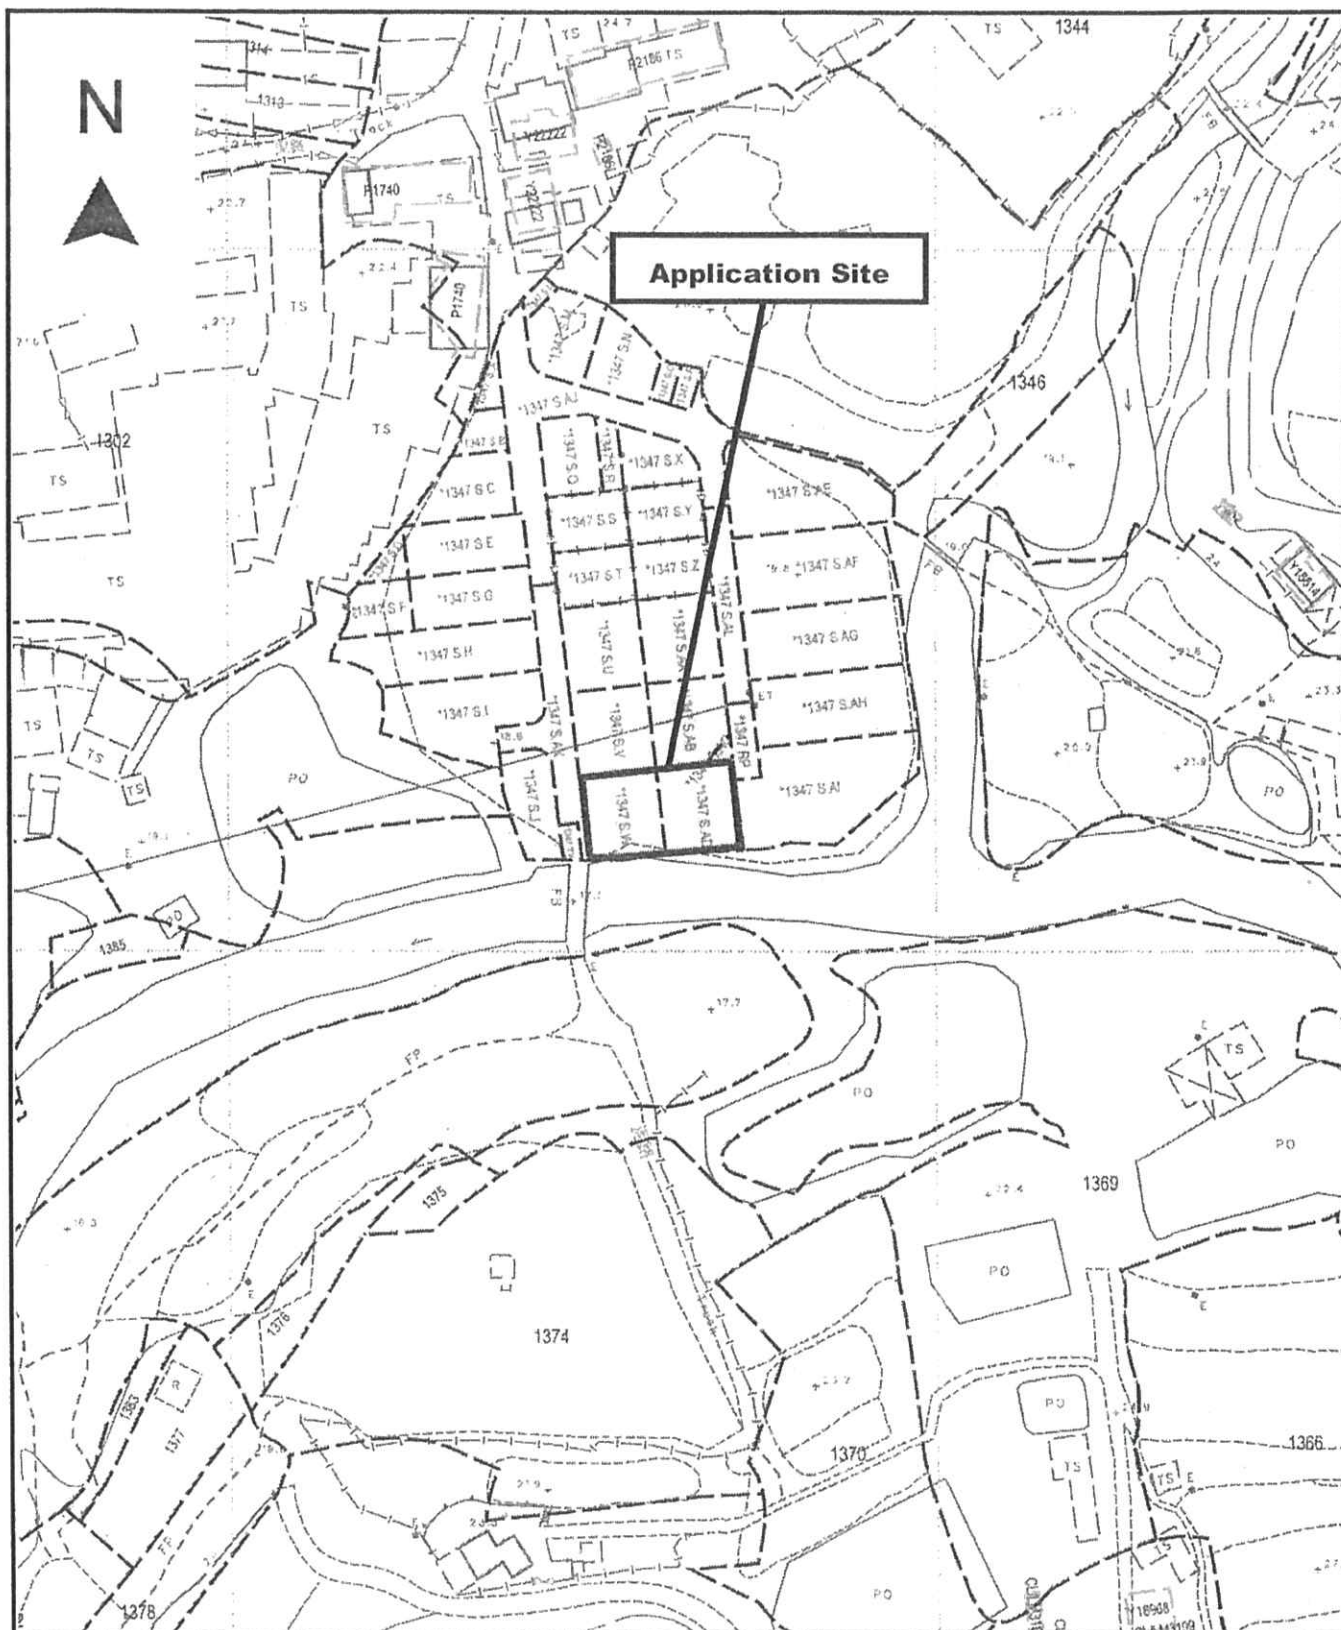

Note 1: The opening hour of the proposed development is restricted to 9:00 a.m. to 7:00 p.m. from Mondays to Sundays including public holidays;

Note 2: The pcu of private car is taken as 1 &

Note 3: Morning peak is defined as 7:00a.m. to 9:00a.m. whereas afternoon peak is defined as 5:00p.m. to 7:00p.m.

- 2.3 The proposed parking spaces at the application site would only be opened to visitors with prior appointment.
- 2.4 As shown in the above estimation, it is estimated that the proposed development would not generate significant amount of traffic. It would not affect the traffic condition of Fung Kat Heung Road because the average traffic generation is only 0.6pcu/hr. The negligible increase in traffic would not aggravate the traffic condition of San Tam Road, Fung Kat Heung Road and nearby road networks.

Our response to the comments of the Transport Department as follows:

Transport Department's comment	Applicant's Response
(a) The applicant should justify the proposed parking and loading / unloading considering the commute of staff / visitors and logistics;	<p>Noted. The maximum number of visitors is 8 per day which can be accommodated by 2 private cars because the site would allow the parking of 2 private cars at any time while another parking space will be reserved for the use of staff for picking up dogs to/from the site and picking up of staff. There will be 4 staffs at the application site. No more than 8 dogs will be accommodated at the application site. No staff will stay overnight at the application site.</p> <p>Also, the proposed parking spaces at the application site would only be opened to visitors with prior appointment.</p>
(b) The applicant should demonstrate the smooth manoeuvring of vehicles to / from San Tam Road, along the local access and within the site;	<p>Noted. As shown in Figure 6, it is noted that there is another animal boarding establishment approved by Town Planning Board on 16.8.2019 to the immediate north of the application site (TPB Ref.: A/YL-KTN/659). On the grounds that the said planning permission and the application site shares the same routing (i.e. common access) from San Tam Road, it would be reasonable to conclude that there is smooth manoeuvring of vehicles to and from San Tam Road and the site to the immediate north of the application site. The applicant also submits a swept path analysis showing that there is smooth manoeuvring of vehicles to and from the common access of the above-mentioned planning permission and the site in Figure 6.</p> <p>The clear width of the road section circled in purple is about 2.26m. As shown in photo 3, it is shown that a private car can pass through the</p>

	narrowest part of the road where a CLP's electric pole is found. The attached photos 1 and 2 taken at the both sides of the road section circled in purple show that there is sufficient line of sight to observe opposite traffic. The photo viewpoint is shown in updated Figure 6.
(c) The applicant should provide nearest public transport services and indicate on the layout plan; and	Noted. Please refer to Figure 7.  Given that the nearest public transport services are away from the site, there is one parking space reserved for the staff to pick up visitors from the nearest public transport services to the site.
(d) The applicant should note the local access between San Tam Road and the site is not managed by this Department.	Noted.
(e) It is noted that the traffic would require a right-of-way from the site of A/YL-KTN/755. The applicant should clarify (i) whether there is consent for passing through such site; and (ii) whether the site for A/YL-KTN/755 has a vehicular on the southern side for access to the road;	There is consent from the applicant of A/YL-KTN/755 for the right-of-way. The site for A/YL-KTN/755 has a vehicular on the southern side for access to the road.
(f) Given that the nearest public transport is away from the site, please clarify if there is any measure for those visitors without driving.	Given that the nearest public transport services are away from the site, there is one parking space reserved for the staff to pick up visitors from the nearest public transport services to the site.

1	A/YL-KTN/759	Proposed Temporary Animal Boarding Establishment for a Period of 3 Years and Filling of Land	14.5.2021	(1)

### **Rejection Reason:**

- (1) the Site is fragmented with structures excluded. Approving the application would result in piecemeal development and is undesirable from land-use planning and planning control point of view.

Dear Sir/ Madam,

**Proposed Temporary Animal Boarding Establishment (Dog Kennel) for a Period of 3  
Years and Filling of Land  
(A/YL-KTN/797)**

1. We refer to the captioned.
2. We urge the Board to reject this application as the proposed use is unlikely to be in line with the planning intention of Agriculture zone.
3. We also urge the Board to consider in consultation with relevant authorities as to whether the proposed use would have the potential to pollute the watercourse adjacent to the site (as shown in the map in the gist).
4. Thank you for your attention.

A/YL-KTN/797

Lots 1347 S.W and 1347 S.AD in D.D.107, Fung Kat Heung, Kam Tin

Site area : About 280sq.m

Zoning : "Agriculture"

Applied use : Animal Boarding Establishment (Dog Kennel) / 3 Vehicle Parking/ **Filling of Land**

Dear TPB Members,

Fung Kat Heung is awash with 'Animal Boarding Facilities'.

This is a small site. The structure plus the parking spaces take up most of the site. There is no open exercise area. Conclusion is that this is a Destroy To Build application to use for storage or other brownfield uses.

With no previous application on record members should consider the location at the heart of Agriculture zoning intended to promote farming activities to supply the local market with fresh produce.

Mary Mulvihill

**Advisory Clauses**

- (a) note DLO/YL, LandsD's comments that the Site comprises Old Schedule Agricultural Lots held under the Block Government Lease which contains the restriction that no structures are allowed to be erected without the prior approval of the Government. The lots owners will need to apply to his office to permit the structures to be erected or regularize any irregularities on site, if any. Besides, given the proposed use is temporary in nature, only application for regularization or erection of temporary structure(s) will be considered. Applications for any of the above will be considered by LandsD acting in the capacity as the landlord or lessor at its sole discretion and there is no guarantee that such application will be approved. If such application(s) is approved, it will be subject to such terms and conditions, including among others the payment of rent or fee, as may be imposed by the LandsD;
- (b) note C for T's comments that sufficient manoeuvring space shall be provided within the Site. No vehicle should be allowed to queue back to or reverse onto / from public road. The Site is connected to the public road network via a section of a local access road and Fung Kat Heung Road, both of which are not managed by his department. The land status of the local access road should be checked with LandsD. Moreover, the management and maintenance responsibilities of the local access road should be clarified with the relevant lands and maintenance authorities accordingly;
- (c) note CHE/NTW, HyD's comments that his department shall not be responsible for the maintenance of any access connecting the Site and San Tam Road. Adequate drainage measures should be provided to prevent surface water running from the Site to nearby public roads and drains;
- (d) note DEP's comments that the applicant is advised (i) that the proposed structure for animal boarding establishment should be enclosed with soundproofing materials with provision of 24-hour mechanical ventilation and air-conditioning system; (ii) to follow the requirements stipulated in "Code of Practice on Handling the Environmental Aspects of Temporary Uses and Open Storage Site"; (iii) to provide adequate supporting infrastructure/ facilities for proper collection, treatment and disposal of waste/ wastewater generated from the proposed use; (iv) that chemical toilet will be provided at the Site for sewage handling, as proposed by the applicant; and (v) it is the obligation of the applicant to meet the statutory requirements under relevant pollution control ordinances;
- (e) note DAFC's comments that under the Public Health (Animals) (Boarding Establishment) Regulations, Cap. 139I, any person who provides food and accommodation for animals in return for a fee paid by the owner must apply for a Boarding Establishment Licence from his department. Besides, the dogs kept by the applicant should be properly licensed in accordance with Cap. 421 Rabies Ordinance and he is reminded to observe Cap. 169 Prevention of Cruelty to Animals Ordinance at

all times;

- (f) note D of FS' comments that in consideration of the design/nature of the proposal, water supply for firefighting and FSIs are anticipated to be required. Therefore, the applicant is advised to submit relevant layout plans incorporated with the proposed water supply for fire fighting and FSIs to his Department for approval. The layout plans should be drawn to scale and depicted with dimensions and nature of occupancy. The location of where the proposed FSI to be installed should be clearly marked on the layout plans. The applicant is reminded that if the proposed structure(s) is required to comply with the Buildings Ordinance (BO)(Cap. 123), detailed fire service requirements will be formulated upon receipt of formal submission of general building plans;
- (g) note CBS/NTW, BD's comments that before any new building works (including containers/open sheds as temporary building, demolition and land filling, etc.) are to be carried out on Site, prior approval and consent of the Building Authority should be obtained, otherwise they are UBW under the BO. An Authorized Person should be appointed as the co-ordinator for the proposed building works in accordance with the BO. For UBW erected on leased land, enforcement action may be taken by the BD to effect their removal in accordance with the prevailing enforcement policy against UBW as and when necessary. The granting of any planning approval should not be construed as an acceptance of any existing building works or UBW on the Site under the BO. The Site shall be provided with means of obtaining access thereto from a street and emergency vehicular access in accordance with Regulations 5 and 41D of the Building (Planning) Regulations (B(P)R) respectively. The Site does not abut on a specified street of not less than 4.5m wide and its permitted development intensity shall be determined under Regulation 19(3) of the B(P)R at the building plan submission stage. Any temporary shelters or converted containers for office, storage washroom or other uses are considered as temporary buildings are subject to the control of Part VII of the B(P)R. If the proposed use under application is subject to issue of a license, the applicant should be reminded that any existing structures on the Site intended to be used for such purposes are required to comply with the building safety and other relevant requirements as may be imposed by the licensing authority. Detailed checking under the BO will be carried out at building plan submission stage;
- (h) note DFEH's comments that proper license/ permit issued by his department is required if there is any food business/ catering service/ activities regulated by the DFEH under the Public Health and Municipal Services Ordinance (Cap. 132) and any other relevant legislation for the public and the operation of any business should not cause any obstruction. If the proposal involves any commercial / trading activities, there should be no encroachment on the public place and no environmental nuisance should be generated to the surroundings. Its state should not be a nuisance or injurious or dangerous to health and surrounding environment. Any animal carcass/ parts shall be properly wrapped or bagged before disposal and in accordance with the relevant legislation. Also, for any waste generated from the activities in the premises, the applicant should handle on their own / at their expenses; and

- (i) note DEMS' comments that in the interest of public safety and ensuring the continuity of electricity supply, the parties concerned with planning, designing, organizing, supervising and conducting any activity near the underground cable or overhead line under the application should approach the electricity supplier (i.e. CLP Power) for the requisition of cable plans (and overhead line alignment drawings, where applicable) to find out whether there is any underground cable and/or overhead line within and/or in the vicinity of the Site. They should also be reminded to observe the Electricity Supply Lines (Protection) Regulation and the "Code of Practice on Working near Electricity Supply Lines" established under the Regulation when carrying out works in the vicinity of the electricity supply lines.
