2	A/YL-LFS/386	Proposed filling of land and pond	CPA	22.1.2021	3, 4

**Rejection Conditions**

1. The proposed development does not comply with the Town Planning Board Guidelines for "Application for Developments within the Deep Bay Buffer Zones" in that there is insufficient information in the submission to demonstrate that the proposed development is required to support the conservation of the natural features and scenic qualities of the area;
2. There is insufficient information in the submission to demonstrate that the proposed development would not have significant adverse ecological and drainage impacts on the surrounding areas;
3. The approval of the application would set an undesirable precedent for similar applications. The cumulative effect of approving such similar applications would result in a general degradation of the environment of the area; and
4. The proposed filling of land and pond is not in line with the planning intention of the “Coastal Protection Area” (“CPA”) zone which is to conserve, protect and retain the natural coastlines and the sensitive coastal natural environment with a minimum of built development. There is a general presumption against development in this zone. There is no strong planning justification in the submission for a departure from the planning intention.

## Proposed Filling and Excavation of Land for Permitted Agricultural Use (Application No. A/YL-LFS/391)

Dear Chairman and Members,

Designing Hong Kong Limited **objects** the captioned for the following reasons:

- The proposed area is zoned as "**Coastal Protection Area (CPA)**". The planning intention of this zone is primarily for conserving, protecting and retaining the natural coastlines and the sensitive coastal natural environment, including attractive geological features, physical landform or area of high landscape, scenic or ecological value, with a minimum of built development. It may also cover areas which serve as natural protection areas sheltering nearby developments against the effects of coastal erosion.
- From the Google Earth's aerial image, the proposed site has been filled without any previous planning approval. We concern the Town Planning Board may be rewarding an "**Destroy First, Development Later**" practice and **unauthorized development** here through the approval of captioned application.

February 2021

# 創建 Designing Hong Kong 香港 .com

- The approval of the application would set an undesirable precedent for other applications within the "Coastal Protection Area (CPA)" zone, and lead to a general degradation of the natural environment and landscape of the area.

Here we submit our concerns for your consideration.

Yours,

**Designing Hong Kong Limited**

Dear Sir/Madam,

**RE: Proposed Filling and Excavation of Land for Permitted Agricultural Use in  
"Coastal Protection Area" in Sha Kiu Tsuen, Tsim Bei Tsui (AYL-LFS/391)**

WWF shows concern to the captioned.

**"Destroy first, develop later" approach may have adopted**

Comparing to the Google Earth's aerial images in Fig 1, over 60% of the application site had been filled in with vegetation clearance found. The applied use is likely to legalize such observed activities. Since we now don't have neither the environmental situation inside the application site nor whether the application is associated with unlawful development, we would like to ask the Town Planning Board to request government authorities to check whether the application is linked with unauthorized development including the emerged structure. If that was the case, we would like to ask the Town Planning Board to proactively deter such "Destroy first, build later" planning application so as to be consistent with the Government press release on 4 July 2011 which stated that *"the Board is determined to conserve the rural and natural environment and will not tolerate any deliberate action to destroy the rural and natural environment in the hope that the Board would give sympathetic consideration to subsequent development on the site concerned"*<sup>1</sup>.

We would be grateful if our comment could be considered by the Town Planning Board.

Lots 174 and 181 in D.D. 129, Nam Sha Po, Lau Fau Shan  
Site area : About 3,270sq.m  
Zoning : "Coastal Protection Area"  
Applied development : Filling and Excavation of Land

Dear TPB Members,

The excavation is already underway. Not only are the lots adjacent to ponds, they border the mangroves. Application 331 was withdrawn but the destruction of the habitat went ahead and some ponds have already been filled in.

CPA is by definition a moist ambiance and certainly not suited to agriculture. This is clearly a Destroy to Build work in progress.

What enforcement action is being taken? This location facing Deep Bay plays an essential role in protecting our northern coastline from the elements. Degradation on this scale cannot be tolerated.

Site area : About 3,902m<sup>2</sup> Includes Government Land of about 292m<sup>2</sup>  
Zoning : "Coastal Protection Area"  
Applied Use: Barbecue Area and Camping Ground

Dear TPB Members,

I strongly object to this application.

The Planning Intention of CPA is :

*This zoning is intended to conserve, protect and retain the natural coastlines and the sensitive coastal natural environment, including attractive geological features, physical landform or area of high landscape, scenic or ecological value, with a minimum of built development. It may also cover areas which serve as natural protection areas sheltering nearby developments against the effects of coastal erosion.*

*There is a general presumption against development in this zone. In general, only developments that are needed to support the conservation of the existing natural landscape or scenic quality of the area or are essential infrastructure projects with overriding public interest may be permitted.*

The proposed development would in no way conserve the natural landscape, on the contrary it would introduce foreign elements. Neither is it essential in nature.

Moreover this is not a site, it is two separate areas, Dozens of people tramping over a sensitive coastal area and partying into the night would certainly disturb the ecology and rhythm of nature. Then there is also the issue of toilet facilities and grey water to cater for the 'campers'.

There have been many media reports recently of such camping facilities being used as accommodation for low cost tour groups.

Members must reject the application as approval would encourage similar activities to proliferate leading to severe degradation of the natural environment.

Dear Sir/ Madam,

**Proposed Filling and Excavation of Land for Permitted Agricultural Use**  
**(A/YL-LFS/391)**

1. We refer to the captioned.
2. We first would like the Board to look at some recent aerial photos showing the application site and its surroundings (**Figure 1**).
3. We observed from the Planning Department on 1 April 2021 that an Enforcement Notice has been issued for an enforcement case (E/YL-LFS/509) covering (partially but largely) the current application site; Reinstatement Notice has also been issued but we could not observe that Compliance Notice has been issued. We urge the Board to liaise with relevant authorities as to whether this case has been settled and whether the site has been appropriately reinstated (if still required).
4. In addition, we urge the Board to consider whether the applicant needs to appropriately demonstrate that there is a need for the proposed filling and excavation of land, and whether the applicant needs to appropriately demonstrate that the proposed filling and excavation of land would not cause any environmental impacts (e.g., drainage, landscape, water quality) on the surroundings (which are covered by Coastal Protection Area (CPA) zone) and the nearby Deep Bay wetland area.
5. We also urge the Board to thoroughly consider the potential cumulative impacts of approving this application on the CPA zone in the area, as the approval would set a precedent for other similar applications in this CPA zone.

6. Thank you for your attention.

**Advisory Clauses**

- (a) prior planning permission should have been obtained before commencing the development on the application site (the Site);
- (b) to note the comments of the District Lands Officer/Yuen Long, Lands Department (DLO/YL, LandsD) that the Site comprises Old Schedule Agricultural Lots (OSALs) held under the Block Government Lease which contains the restriction that no structures are allowed to be erected without the prior approval of the Government;
- (c) to note the comments of the Chief Highway Engineer/New Territories West, Highways Department (CHE/NTW, HyD) that no vehicular access is proposed or to be granted under the application and it is on the understanding that there is and will be no vehicular access to/from the Site;
- (d) to note the comments of the Director of Environmental Protection (DEP) that the applicant is reminded that the land should not be filled with construction waste and it is the applicant's responsibility to comply with all relevant environmental legislations during construction and operation of the project. The applicant shall follow the Recommended Pollution Control Clauses for Construction Contracts ([https://www.epd.gov.hk/epd/english/environmentinhk/eia\\_planning/guide\\_ref/rpc\\_1.html](https://www.epd.gov.hk/epd/english/environmentinhk/eia_planning/guide_ref/rpc_1.html)) to minimize the environmental impacts during the construction stage;
- (e) to note the comments of the Chief Engineer/Mainland North, Drainage Services Department (CE/MN, DSD) that the applicant is required to demonstrate in the drainage proposal that the proposed filling and excavation works will not obstruct the overland flow nor cause any adverse drainage impact to the adjacent areas. The applicant should also be reminded that the Site is at relatively low-lying area next to the coastline. The applicant should prepare himself against possible seawater inundation due to tidal effect and storm surge;
- (f) to note the comments of the Chief Engineer of Port Work Division, Civil Engineering and Development Department (CE/PWD, CEDD) that according to his record, no seawalls or marine structures maintained by his division are located within or in the vicinity of the Site. Nevertheless, the maximum superimposed load behind the existing seawall shall be limited to such an extent so as not to render inadequate the margin of safety of, or impair the structural integrity and stability of, or cause danger to any existing seawall. Any new works within the Site shall be so designed and constructed as not to adversely affect the existing seawalls and other marine structures and facilities within or adjoining or formed for provision of services to or formed for the support or protection of the Site. No earth, debris, spoil of whatever nature or building materials shall be dumped on any adjoining foreshore and seabed. In the event of earth, debris, spoil of whatever nature or building materials from the Site or other areas affected by the works on the Site being eroded and washed down onto the foreshore and seabed, the applicant shall be responsible for removal of the same at his own cost;
- (g) to note the comments of the Chief Town Planner/ Urban Design and Landscape, Planning Department (CTP/UD&L, PlanD) that the applicant is advised that the approval of section 16 application by TPB does not imply approval of the tree works such as pruning, transplanting and/or felling under lease. The applicant is reminded

to approach relevant authority/government department(s) direct to obtain the necessary approval on tree works; and

- (h) to note the comments of the Chief Building Surveyor/New Territories West, Buildings Department (CBS/NTW, BD) that the excavation and backfilling works should be carried out under the supervision of a competent person. The applicant is advised that according to Building (Minor Works) Regulation, excavation with a depth between 0.3m to 3m falls within the items of Class I or Class II minor works and subject to the Minor Works Control System. The excavation works should be supervised by competent persons, who are Professional and/or Prescribed Registered Contractor. The applicant may visit the website (<http://www.bd.gov.hk/english/index.html>) for details. Adequate precautionary measures and suitable working procedures should be adopted in carrying out the above works to safeguard the stability of any building, structure, land, street or services. When any natural, formed or man-made land has due to any cause been rendered so dangerous or liable to become so dangerous that it will collapse, or be likely to collapse, and thereby will cause, or will be likely to cause, a risk of injury to any person or damage to any property, enforcement action may be taken by the BD. If the existing structures (not being a New Territories Exempted House) are erected on leased land without the approval of the Building Authority (BA), they are unauthorized building works (UBW) under the Building Ordinance (BO) and should not be designated for any proposed use under the application. For UBW erected on leased land, enforcement action may be taken by BD to effect their removal in accordance with the prevailing enforcement policy against UBW as and when necessary. The granting of any planning approval should not be construed as an acceptance of any existing building works or UBW on the Site under the BO. The Site shall be provided with means of obtaining access thereto from a street and emergency vehicular access in accordance with Regulations 5 and 41D of the Building (Planning) Regulations (B(P)R) respectively. The Site does not abut on a specified street of not less than 4.5m wide and its permitted development intensity shall be determined under Regulation 19(3) of the B(P)R at the building plan submission stage.
