Form No. S16-III
表格第 S16-III 號

APPLICATION FOR PERMISSION UNDER SECTION 16 OF THE TOWN PLANNING ORDINANCE (CAP.131)

根據《城市規劃條例》(第131章)
第16條遞交的許可申請

**Applicable to Proposal Only Involving Temporary Use/Development of
Land and/or Building Not Exceeding 3 Years in Rural Areas or Renewal
of Permission for such Temporary Use or Development***

**適用於祇涉及位於鄉郊地區土地上及/或建築物內進行為期不超過三年
的臨時用途/發展或該等臨時用途/發展的許可續期的建議***

*Form No. S16-I should be used for other Temporary Use/Development of Land and/or Building (e.g. temporary use/developments in the Urban Area) and Renewal of Permission for such Temporary Use or Development.

*其他土地上及/或建築物內的臨時用途/發展 (例如位於市區內的臨時用途或發展) 及有關該等臨時用途/發展的許可續期，應使用表格第 S16-I 號。

7. Justifications 理由

The applicant is invited to provide justifications in support of the application. Use separate sheets, if necessary.
 現請申請人提供申請理由及支持其申請的資料。如有需要，請另頁說明。

1. The proposed development is a shop & service which will sell building materials to the nearby residents.
2. The application site is vacant at the moment.
3. The proposed development would benefit the residents in the vicinity by catering their demand for building materials especially that most of the residents in the adjoining area is low density housing.
4. The proposed development is a temporary use for a period of 3 years which would not jeopardize the long term planning intention of the current zoning.
5. The proposed development is not incompatible with the surrounding environment including residential developments.
6. Similar shop and services in "R(C)" zone such as A/YL-NIM/369 adjacent to the application site was granted with planning permission. Similar preferential treatment should be granted to the current application.
7. The applicant will comply with planning conditions if the Town Planning Board see fits.
8. Minimal traffic impact.
9. Insignificant environmental and noise impacts because the applied use is housed within an enclosed structure and no operation will be held during sensitive hours.
10. Insignificant drainage impact because surface U-channel will be provided at the application site.
11. The proposed development is a column 2 use in the "R(C)" zone.
12. The building materials to be available at the application site includes sanitary ware and hand tools for home fitting purpose.

Proposed Temporary Shop and Services (Retail Shop for Selling Building Materials) for a Period of 3 Years

at

Lot 1574 (Part) in D.D. 105, Ngau Tam Mei, Yuen Long, N.T.

Annex 1 Estimated Traffic Generation

- 1.1 The application site is served by a vehicular track leading from Hung Fa Hom Road.
- 1.2 The estimated average traffic generation and traffic generation rate at peak hours are as follow:

Type of Vehicle	<u>Average Traffic Generation Rate</u> (pcu/hr)	<u>Average Traffic Attraction Rate</u> (pcu/hr)	<u>Traffic Generation Rate at Peak Hours</u> (pcu/hr)	<u>Traffic Attraction Rate at Peak Hours</u> (pcu/hr)
Private car	0.4	0.4	2	2
Light Goods Vehicle	0.3	0.3	1.5	0
Total	0.7	0.7	3.5	2

Note 1: The opening hour of the proposed development is restricted to 9:00 a.m. to 7:00 p.m. from Mondays to Sundays including public holidays;

Note 2: The pcu of private car and light goods vehicle is taken as 1 and 1.5 respectively; &

Note 3: Morning peak is defined as 7:00a.m. to 9:00a.m. whereas afternoon peak is defined as 5:00p.m. to 7:00p.m.

- 1.3 As shown in the above estimation, it is estimated that the proposed development would not generate significant amount of traffic. It would not affect the traffic condition of San Tam Road especially that the application site is actually limited in size. The negligible increase in traffic would not aggravate the traffic condition of Hung Fa Hom Road and nearby road networks.

Annex 2 Drainage Assessment

2. Existing Situation

A. Site particulars

2.1.1 The subject site possesses an area of about 1,010m².

2.1.2 The site is occupied by some movable temporary structures and vehicles. Some temporary structures were found to the north and south of the application site and Maple Garden is found to the west of the application site.

2.1.3 The application site has been hard paved and so no infiltration is assumed.

B. Level and gradient of the subject site & proposed surface channel

2.1.4 The application site is lowest at the northeastern part of the site whereas the southwestern part of the site is the highest part of the application site.

2.1.5 In order to follow the topography of the subject site, the proposed surface U-channel will be constructed following the gradient of the site. As demonstrated in the calculation in succeeding paragraphs, 300mm surface U-channel will be capable to drain surface runoff accrued at the subject site and the said passing through the site from adjacent area.

C. Catchment area of the proposed drainage provision at the subject site

2.1.6 The level of the site is basically higher than the adjacent land except to the southwest which is a knoll. As such, an external catchment has been identified in Figure 4.

D. Particulars of the existing drainage facilities to accept the surface runoff collected at the application site

2.1.7 According to recent site inspection and the 1:1000 map, there is an open drain to the east of the application site (Figure 4).

2.2 Runoff Estimation for the Catchment

2.2.1 Rational method is adopted for estimating the designed run-off

$$Q = k \times i \times A / 3,600$$

Assuming that:

- The area of the entire catchment is approximately 2,350m²; (Figure 4)
- The catchment is hard paved, it is assumed that the value of run-off co-efficient (k) is taken as 1.

$$\text{Difference in Land Datum} = 33.3\text{m} - 16\text{m} = 17.3\text{m}$$

$$L = 135\text{m}$$

$$\therefore \text{Average fall} = 17.3\text{m in } 135\text{m} \text{ or } 1\text{m in } 7.8\text{m}$$

According to the Brandsby-Williams Equation adopted from the "Stormwater Drainage Manual – Planning, Design and Management" published by the Drainage Services Department (DSD),

$$\text{Time of Concentration } (t_c) = 0.14465 [L / (H^{0.2} \times A^{0.1})]$$

$$t_c = 0.14465 [135 / (12.81^{0.2} \times 2,350^{0.1})]$$

$$t_c = 5.39 \text{ minutes}$$

With reference to the Intensity-Duration-Frequency Curves provided in the abovementioned manual, the mean rainfall intensity (i) for 1 in 50 recurrent flooding period is found to be 275 mm/hr

$$\text{By Rational Method, } Q_1 = 1 \times 275 \times 2,350 / 3,600$$

$$\therefore Q_1 = 179.51 \text{ l/s} = 10,770.83 \text{ l/min}$$

2.2.2 In accordance with the Chart or the Rapid Design of Channels in "Geotechnical Manual for Slopes", for an approximate gradient of 1:20 and 1:25, the proposed 300mm surface channel is considered adequate to dissipate all the stormwater accrued by the application site.

2.3 Proposed Drainage Facilities

2.3.1 Subject to the above calculations, it is determined that 300mm surface U-channel along the inner site periphery is adequate to intercept storm water passing through and generate at the subject site (Figure 4).

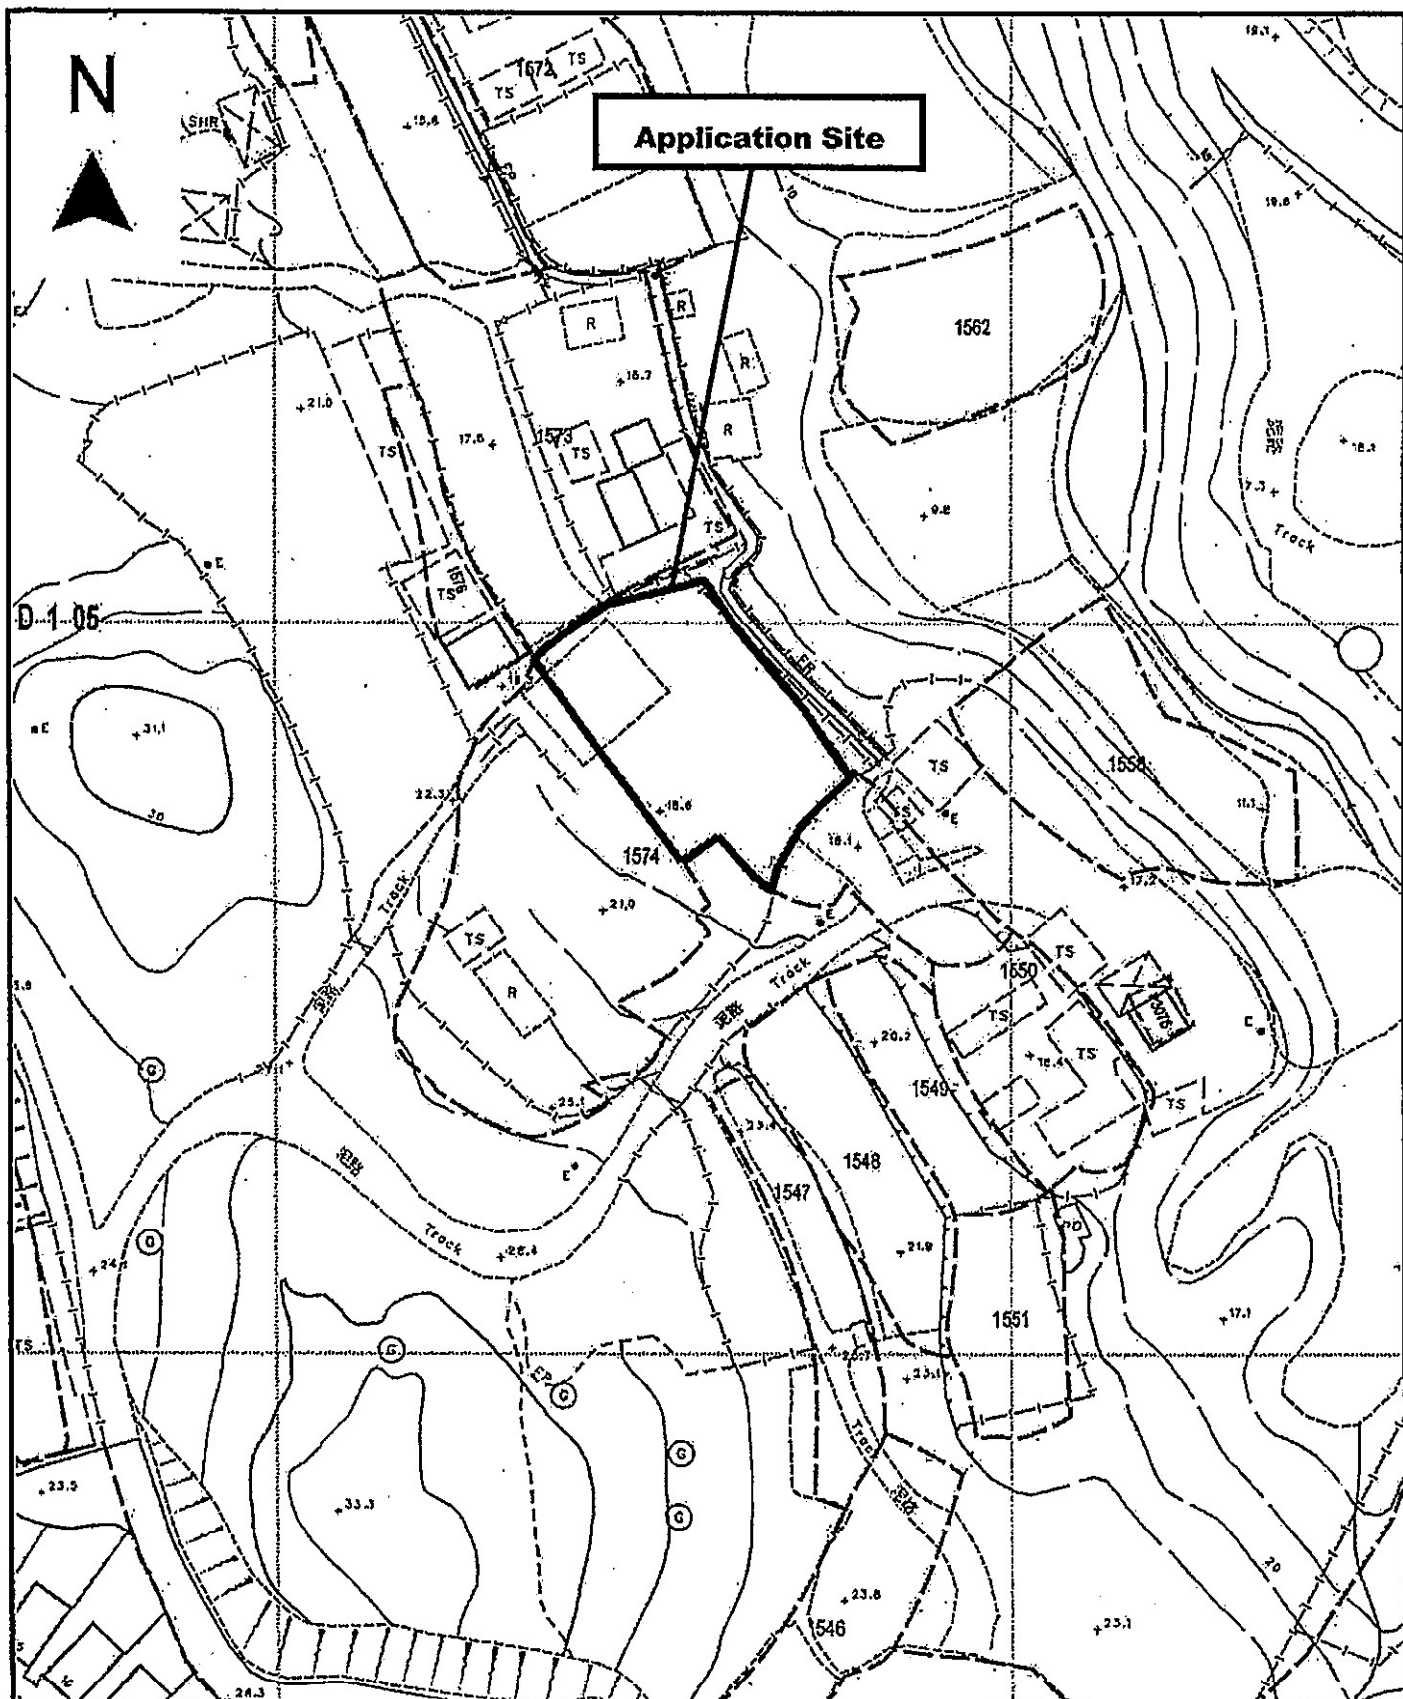

2.3.2 The intercepted stormwater will be discharged to the existing open drain to the east of the subject site. (Figure 4)

2.3.3 All the proposed drainage facilities will be provided and maintained at the applicant's own expense.

2.3.4 The provision of the proposed surface channel will follow the gradient of the application site. All the proposed drainage facilities will be constructed and maintained at the expense of the applicant.

2.3.5 All proposed works at the site periphery would not obstruct the flow of surface runoff from the adjacent areas, the provision of trees and surface channel at site boundary is detailed hereunder:

- (a) Soil excavation at site periphery, although at minimal scale, is inevitably for the provision of surface channel and landscaping. In the reason that the accumulation of excavated soil at the site periphery would obstruct the free flow of the surface runoff from the surroundings, the soil will be cleared at the soonest possible after the completion of the excavation process.
- (b) In view of that soil excavation may be continued for several working days, surface channel will be dug in short sections and all soil excavated will be cleared before the excavation of another short section.
- (c) Neither leveling work nor site formation works will be carried at the subject site. As such, the proposed development would neither alter nor obstruct the flow of surface runoff from adjacent areas.
- (d) Adequate reserve, say, 10cm, will be provided at the toe of the site hoarding to be provided at the application site.

(Attn: The Secretary)

Dear Sir,

Proposed Temporary Shop and Services (Retail Shop for Selling Building Materials) for a Period of 3 Years at Lot 1574 (Part) in D.D. 105, Ngau Tam Mei, Yuen Long, N.T.

Our response to the comments of Transport Department is as follow:

Transport Department's comment	Response
(a) The subject site is connected to Hung Fa Hom Road via a section of local access which is not managed by Transport Department. The land status of the local access should be clarified with the Lands Department by the applicant. Moreover, the management and maintenance responsibilities of the local access should be clarified with the relevant land and maintenance authorities accordingly.	Noted. It is noted that the local access entirely falls upon Government land. The applicant will follow up with DLO/YL.
(b) The applicant should provide details of trip generation to justify the provision of 1 loading/unloading and 2 parking spaces within the subject site.	<p>Noted. The loading/unloading bay will be occupies by light goods vehicle delivering building materials for retail purpose to the application site. It is noted that there will be one vehicular trip of light goods vehicle to and from the site every two days. As such, one loading/unloading bay for light goods vehicle would be adequate for the proposed development.</p> <p>The other two parking spaces for private car will be reserved for visitors with prior booking. As such, two parking spaces would be adequate to meet the demand for visitors with prior booking. The applicant will provide delivery service to the clients so that it will minimize the trip</p>

	generation and attraction generated by visitors.
(c) No vehicle is allowed to queue back to or reverse onto/from public road at any time during the planning approval period.	Noted.

Yours faithfully,

Patrick Tsui

Zoning : "Res (Group C)"
Applied use : Retail Shop of Building Materials / 3 Vehicle Parking

Dear TPB Members,

No previous history of approvals but clearly an established operation. The location is listed in the PlanD promulgates recommendations of second phase review on brownfield sites March 31 2021.

Subject to further study, it is roughly estimated that the 18 ha of scattered brownfield sites in the Ngau Tam Mei area may contribute to the production of a mix of over 6 000 public and private housing units in due course, assuming that the area would all be used for housing developments.

As there is no previous approval for brownfield use members should consider if approval would delay the implementation of the planning intention for the district, adjacent to some large residential developments.

Recommended Advisory Clauses

- (a) To note the comments of the District Lands Officer/Yuen Long, Lands Department (DLO/YL, LandsD) that the Site comprises an Old Schedule Agricultural Lot held under the Block Government Lease which contains the restriction that no structures are allowed to be erected without the prior approval of the Government. Illegal Occupation of Government Land (IOGL) was detected adjoining to the Site. No permission is given for occupation of Government Land (GL) of about 190.4m² in area (subject to verification). The act of occupation of GL without Government's prior approval is not allowed. A converted container was revealed on Lot 1574 in D.D. 105 adjoining the Site. It was suspected that the structure might be used for domestic purpose. According to the prevailing policy, no Short Term Wavier (STW) will be considered for domestic use. Therefore, LandsD reserves the right to take enforcement action against such domestic purpose structure on the concerned lot. The lot owner(s) will need to immediately apply to his office to permit the structures to be erected or regularise any irregularity on the Site, if any. The applicant has to either cease IOGL or apply for a formal approval prior to the actual occupation of the GL. Besides, given the proposed use is temporary in nature, only application for regularisation or erection of temporary structure(s) will be considered. Applications for any of the above will be considered by LandsD acting in the capacity of the landlord or lessor at its sole discretion and there is no guarantee that such application will be approved. If such application is approved, it will be subject to such terms and conditions, including among others the payment of rent or fee, as may be imposed by LandsD;
- (b) to note the comments of the Commissioner for Transport (C for T) that the Site is connected to Hung Fa Hom Road via a section of local access which is not managed by the Transport Department (TD). The land status of the local access should be clarified with LandsD by the applicant. Moreover, the management and maintenance responsibilities of the local access should be clarified with the relevant lands and maintenance authorities accordingly;
- (c) to note the comments of the Chief Highway Engineer/New Territories West, Highways Department (CHE/NTW, HyD) that the proposed access arrangement of the Site from Hung Fa Hom Road should be approved by TD. HyD shall not be responsible for the maintenance of any access connecting the Site and Hung Fa Hom Road. Adequate drainage measures should be provided to prevent surface water running from the Site to the nearby public roads and drains;
- (d) to note the comments of the Director of Environmental Protection (DEP) to follow the relevant mitigation measures and requirements in the latest "Code of Practice on Handling the Environmental Aspects of Temporary Uses and Open Storage Sites" issued by DEP;
- (e) to note the comments of the Chief Engineer/Mainland North, Drainage Services Department (CE/MN, DSD) that the drainage submission should demonstrate how the applicant will collect, convey and discharge rain water falling onto or flowing to the Site. A clear drainage plan showing full details of the existing drains and the proposed drains (e.g. cover and invert levels of pipes/catchpits/outfalls and ground

levels justifying waterflow etc.) with supporting design calculations and charts should be included.

(For preparation of the drainage proposal, the Guideline on preparation of the drainage proposal is available in DSD homepage at http://www.dsd.gov.hk/EN/Files/Technical_Manual/dsd_guideline/Drainage_Submission.pdf).

Approval of the drainage proposal must be sought prior to the implementation of drainage works on site. The applicant should make re-submission of the drainage proposal to address his comments:

- (a) The drainage plan submitted is too small, unclear and without the required detailed information as mentioned above.
- (b) All manholes should be numbered and marked with invert levels to demonstrate that there is no backflow effect.
- (c) The last manhole should be specified on plan. Details of the manhole with sump pit should be provided.
- (d) For the proposed discharge point and flow path: (i) Please review the proposed discharge point i.e. the existing open drain may not be an ideal location for discharging stormwater. (ii) Concrete pipes (instead of U-channels) should be used between the last manhole and the discharge point. (iii) Please provide a cross sectional plan showing details of the discharge point with invert levels verifying no backflow effect. (iv) Photos showing the existing condition of the proposed discharge point and flow path should be submitted.

After completion of the required drainage works, the applicant shall provide DSD for reference a set of record photographs showing the completed drainage works with corresponding photograph locations marked clearly on the approved drainage plan. DSD will inspect the completed drainage works jointly with the applicant with reference to the set of photographs. The applicant shall ascertain that all existing flow paths would be properly intercepted and maintained without increasing the flooding risk of the adjacent areas. The drainage proposal/works as well as the site boundary should not cause encroachment upon areas outside his jurisdiction. No public sewerage maintained by his office is currently available for connection. For sewage disposal and treatment, agreement from DEP shall be obtained. The applicant should consult DLO/YL regarding all the proposed drainage works outside the site boundary in order to ensure unobstructed discharge from the Site in future. All the proposed drainage facilities should be constructed and maintained by the applicant at his own cost. The applicant should ensure and keep all drainage facilities on the Site under proper maintenance at all times;

- (f) to note the comments of the Director of Fire Services (D of FS) that the applicant shall submit relevant layout plans incorporated with the proposed fire services installations (FSIs) to his department for approval. The layout plans should be drawn to scale and depicted with dimensions and nature of occupancy. The location of where the proposed FSIs to be installed should be clearly marked on the layout plans. If the proposed structure(s) is required to comply with the Buildings Ordinance (BO) (Cap. 123), detailed fire service requirements will be formulated upon receipt of formal submission of general building plans; and

- (g) to note the comments of the Chief Building Surveyor/New Territories West, Buildings Department (CBS/NTW, BD) that before any new building works (including containers/open sheds as temporary buildings, demolition and land filling, etc.) are to be carried out on the Site, prior approval and consent of the Building Authority (BA) should be obtained, otherwise they are unauthorised building works (UBW) under BO. An Authorised Person should be appointed as the coordinator for the proposed building works in accordance with the BO. For UBW erected on leased land, enforcement action may be taken by BD to effect their removal in accordance with the prevailing enforcement policy against UBW as and when necessary. The granting of any planning approval should not be construed as an acceptance of any existing building works or UBW on the Site under BO. The Site shall be provided with means of obtaining access thereto from a street and emergency vehicular access in accordance with Regulations 5 and 41D of the Building (Planning) Regulations (B(P)R) respectively. The Site does not abut on a specified street of not less than 4.5m wide and its permitted development intensity shall be determined under Regulation 19(3) of the B(P)R at the building plan submission stage. Any temporary shelters or converted containers for office, storage, washroom or other uses are considered as temporary buildings and are subject to the control of Part VII of B(P)R. Detailed checking under BO will be carried out at building plan submission stage.
