Proposed Temporary Warehouse for Storage of Household Products and Electronic Goods for a Period of 3 Years
at
Lots 1493 S.A (Part), 1494 S.A (Part) and 1494 RP (Part) in D.D. 119, Kung Um Road, Yuen Long, N.T.

Annex 1 Drainage Assessment

A. Site particulars

- 1.1.1 The application site is abutting a local vehicular access leading to Kung Um Road. (Figure 1) It possesses an area of approximately 678m².
- 1.1.2 The application site had been hard paved. The eastern part of the site is covered by two warehouses. The western part of the application site is uncovered.

B. Level and gradient of the subject site & proposed surface channel

- 1.1.3 The subject site has been hard paved and occupied an area of approximately 678m². It has a very gentle gradient sloping from east to west from about +9.2mPD to +8.8mPD.
- 1.1.4 In order to follow the topography of the application site, the proposed surface channel will be constructed following the gradient of the site. As demonstrated in the calculation in Annex 1.3 hereunder, 300mm surface U-channel will be capable to drain the surface runoff accrued at the subject site.

C. Catchment area of the proposed drainage provision at the subject site

- 1.1.5 It is found that the land at the application site is comparatively higher than the adjoining land. As such, no external catchment has been identified.

D. Particulars of the existing drainage facilities to accept the surface runoff collected at the application site

- 1.1.6 According to recent site inspection, a natural drain is found to the west of the site. (Figure 5)

1.2 Runoff Estimation & Proposed Drainage Facilities

A. Proposed drainage facilities

- 1.2.1 Subject to the above calculations, it is determined that 300mm surface U-channel which is made of concrete along the site periphery is adequate to intercept storm water passing through and generated at the application site (**Figure 5**).
- 1.2.2 The intercepted stormwater will then be discharged to the natural drain to the west via the proposed 300mm surface U-channel outside the application site for dissipation. (**Figure 5**)
- 1.2.3 The calculations in **Annex 1.3** shows that the proposed 300mm surface channel has adequate capacity to cater for the surface runoff generated at the subject site and the external catchment. A sand trap is proposed at the terminal catchpit.
- 1.2.4 All the proposed drainage facilities, including the section of surface channel proposed in between of the subject site to the open drain, will be provided and maintained at the applicant's own expense. Also, surface U-channel will be cleaned at regular interval to avoid the accumulation of rubbish/debris which would affect the dissipation of storm water.
- 1.2.5 Prior to the commencement of drainage works, the applicant will seek the consent of the District Lands Office/Yuen Long and the registered land owner for any drainage works outside the application site or outside the jurisdiction of the applicant.
- 1.2.6 The provision of the proposed surface U-channel will follow the gradient of the application site. All the proposed drainage facilities will be constructed and maintained at the expense of the applicant.
- 1.2.7 All proposed works at the site periphery would not obstruct the flow of surface runoff from the adjacent areas, the provision of trees and surface U-channel at site boundary is detailed hereunder:
 - (a) Soil excavation at site periphery, although at minimal scale, is inevitably for the provision of surface U-channel and landscaping. In the reason that the accumulation of excavated soil at the site periphery would obstruct the free flow of the surface runoff from the surroundings, the soil will be cleared at the soonest possible after the completion of the excavation process.
 - (b) No leveling work will be carried at the site periphery. The level of the site periphery will be maintained during and after the works. As such, the works at the site periphery would not either alter or obstructed the flow of surface runoff from adjacent areas.
 - (c) Some holes will be provided at the toe of hoarding so as to allow unobstructed flow of surface runoff to and from adjacent area.

Annex 1.3 Drainage Calculation for the Proposed Provision of Drainage Facilities at Subject Site

1. Runoff Estimation

1.1 Rational method is adopted for estimating the designed run-off

$$Q = k \times i \times A / 3,600$$

Assuming that:

- i. The area of the entire catchment is approximately 678m²; &
- ii. The application site is totally hard paved and therefore the value of run-off co-efficient (k) is taken as 1.

$$\text{Difference in Land Datum} = 9.2\text{m} - 8.8\text{m} = 0.4\text{m}$$

$$L = 52\text{m}$$

$$\therefore \text{Average fall} = 1\text{m in } 130\text{m}$$

According to the Brandsby-Williams Equation adopted from the "Stormwater Drainage Manual – Planning, Design and Management" published by the Drainage Services Department (DSD),

$$\text{Time of Concentration } (t_c) = 0.14465 [L / (H^{0.2} \times A^{0.1})]$$

$$t_c = 0.14465 [52 / (0.77^{0.2} \times 678^{0.1})]$$

$$t_c = 4.13 \text{ minutes}$$

With reference to the Intensity-Duration-Frequency Curves provided in the abovementioned manual, the mean rainfall intensity (i) for 1 in 50 recurrent flooding period is found to be 285mm/hr

$$\text{By Rational Method, } Q = 1 \times 285 \times 678 / 3,600$$

$$\therefore Q = 53.675 \text{ l/s} = 3,220.5 \text{ l/min}$$

In accordance with the Chart or the Rapid Design of Channels in "Geotechnical Manual for Slopes", 300mm surface U-channel in 1:130 gradient is considered adequate to dissipate all the stormwater accrued by the application site. The intercepted stormwater will then be discharged to the natural drain to the west of the application site for dissipation.

Annex 2 Estimated Traffic Generation

- 2.1 The application site is abutting Kung Um Road. Having mentioned that the site is intended for warehouse for storage of household products and electronic goods which is static in nature, traffic generated by the proposed development is extremely insignificant.
- 2.2 The estimated average traffic generation and traffic generation rate at peak hours are as follow:

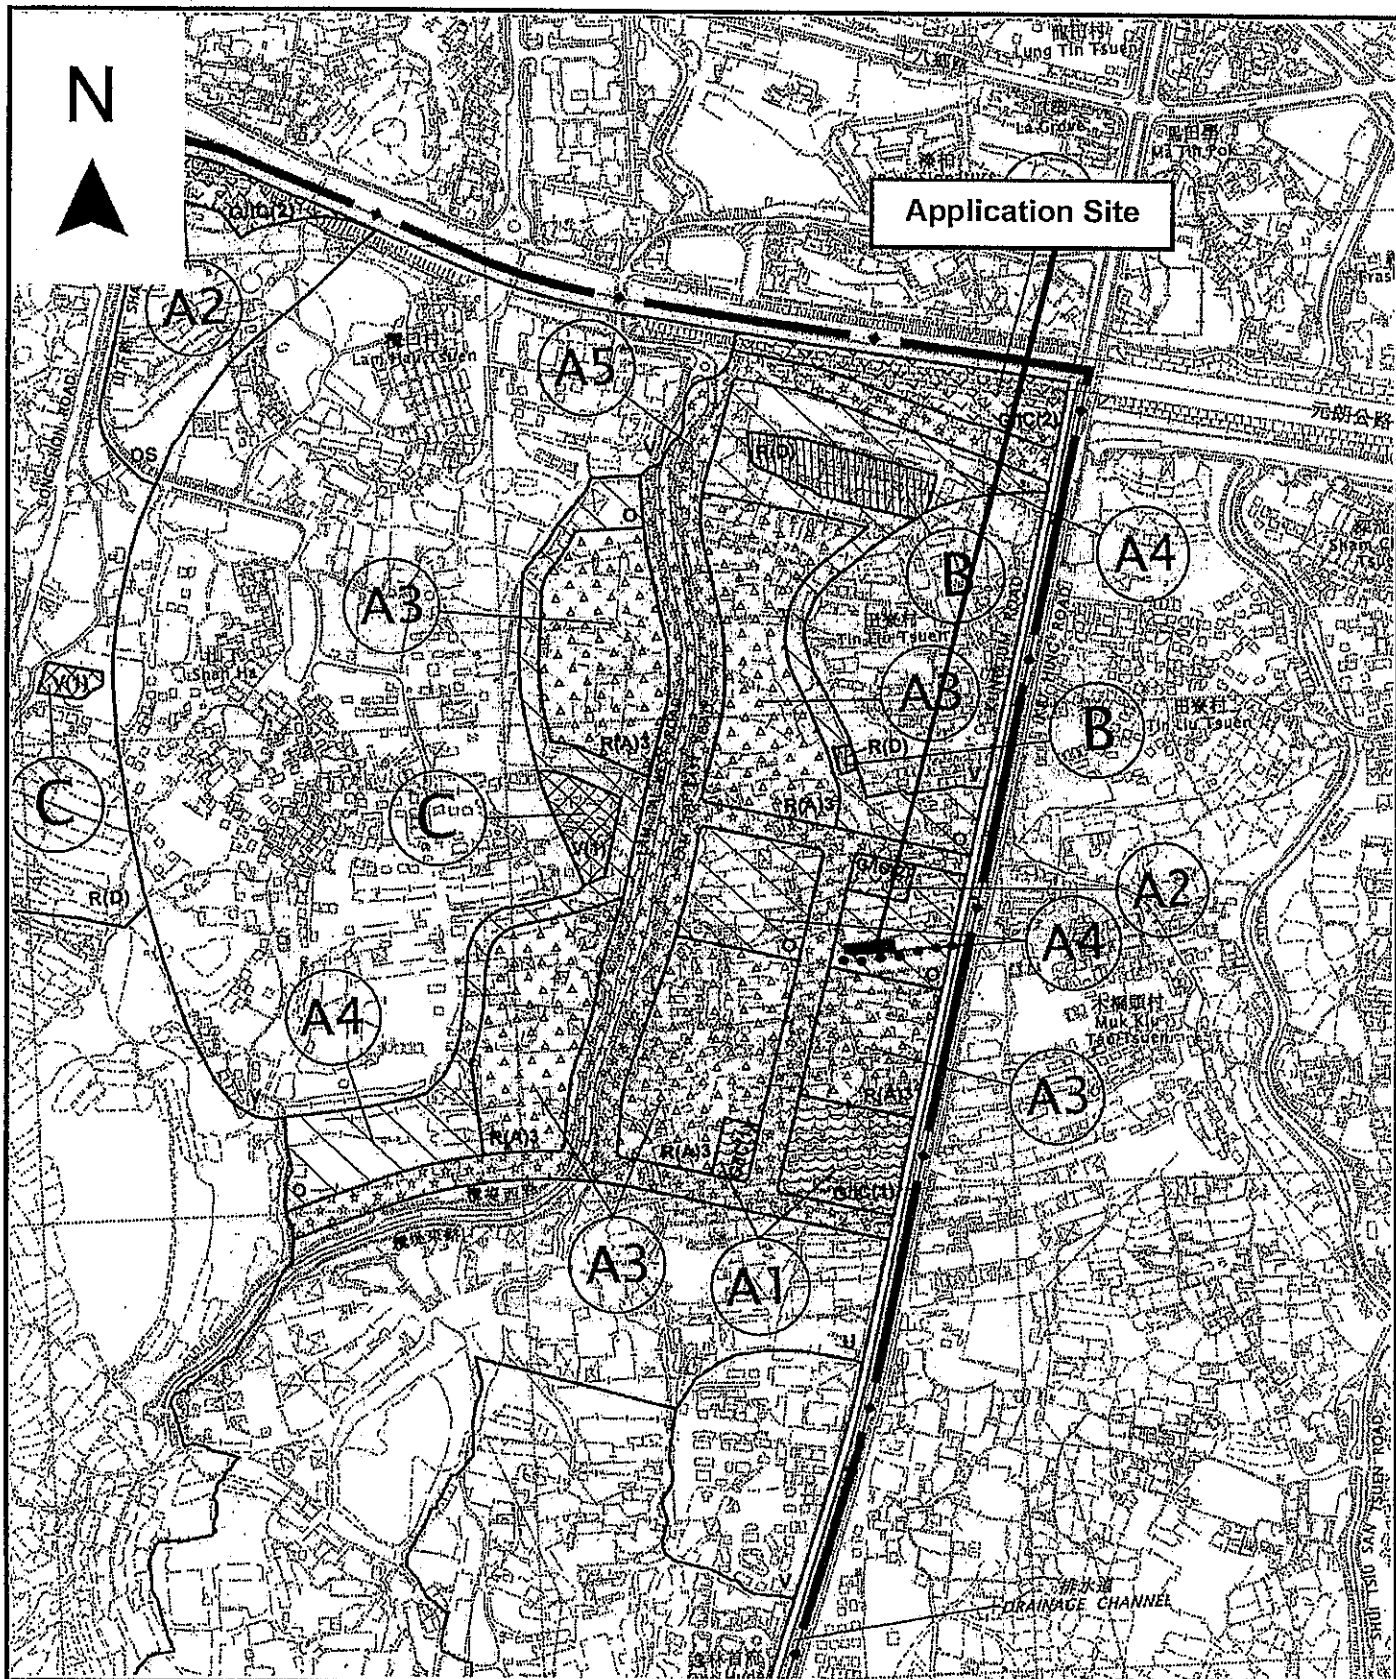

Type of Vehicle	<u>Average Traffic Generation Rate</u> (pcu/hr)	<u>Average Traffic Attraction Rate</u> (pcu/hr)	<u>Traffic Generation Rate at Peak Hours</u> (pcu/hr)	<u>Traffic Attraction Rate at Peak Hours</u> (pcu/hr)
Light goods vehicle	0.19	0.19	0	0

Note 1: The opening hour of the proposed development is restricted to 9:00 a.m. to 5:00 p.m. from Mondays to Saturdays. No operation will be held on Sundays and public holidays.

Note 2: The pcu of light goods vehicle is taken as 1.5.

Note 3: Morning peak is defined as 7:00a.m. to 9:00a.m. whereas afternoon peak is defined as 5:00p.m. to 7:00p.m.

- 2.3 As shown in the above estimation, it is estimated that the proposed development would not generate significant amount of traffic especially that the site is occupied for warehouse use since 2016. It would not affect the traffic condition of Kung Um Road.
- 2.4 In association with the intended purpose, adequate space for manoeuvring of vehicle would be provided within the application site and queueing up of traffic would not be the result especially that the traffic generated is insignificant. The negligible increase in traffic would not aggravate the traffic condition of Kung Um Road and nearby road networks.

Dear TPB Members,

Site was rezoned to OS as part of the plans for extensive high rise residential development in the district.

Again conditions were not fulfilled. NINE extensions of time. Members can no longer accept without question PlanD's glossing over the issue with the glib statement that 'As such, sympathetic consideration might be given to the application'.

Authorities have a duty to ensure compliance with regulations not to condone failure.

Dear TPB Members,

Member approved Application 800.

However approval for revoked for failure to comply with multiple conditions:
As the applicant had failed to comply with conditions (j), (l) & (m) satisfactorily by 12.2.2018, These are related to drainage and fire services.

Are members prepared to reward previous unapproved land use followed by failure to comply with conditions this time around?

Applied Use : Proposed Temporary Warehouse for Household Products

Dear TPB Members,

Unfortunately no images are provided to indicate what the site looks like presently and what it is being used for. Is it Agriculture land, vegetated, trees?

What are the future plans for the district?

Warehousing should be conducted in designated areas, in multi storey facilities provided with the necessary amenities, communal parking, etc.

Is approving these 'Temporary' arrangements for haphazard facilities and inefficient land use the best approach? This system has resulted in the environmental and ecological devastation of much of NT.

Approval of such applications is encouraging the bad practices that have turned what in other jurisdictions are charming rural villages into toxic time bombs.

Mary Mulvihill

Advisory clauses

- (a) to resolve any land issues relating to the development with the concerned owner(s) of the application site (the Site);
- (b) shorter compliance period is imposed in order to monitor the progress of compliance with approval conditions. Should you fail to comply with any of the approval conditions again resulting in the revocation of planning permission, sympathetic consideration may not be given to any further applications;
- (c) to note the comments of the District Lands Officer/Yuen Long, Lands Department (DLO/YL, LandsD) that the Site comprises Old Schedule Agricultural Lots held under the Block Government Lease which contains the restriction that no structures are allowed to be erected without the prior approval of the Government. Within the Site, Lots 1493 S.A & 1494 S.A and 1494 RP in D.D. 119 are covered by Short Term Waivers (STW) No. 4896 and 4899 respectively permitting structures erected thereon for the purpose of “Temporary Warehouse for Storage of Household Products”. The STW holder(s) will need to apply to her office for modification of the STW conditions where appropriate. Besides, given the proposed use is temporary in nature, only application for regularisation or erection of temporary structure(s) will be considered. Applications for any of the above will be considered by her department acting in the capacity of the landlord or lessor at its sole discretion and there is no guarantee that such application will be approved. If such application is approved, it will be subject to such terms and conditions, including among others the payment of rent or fee, as may be imposed by her department;
- (d) to note the comments of the Commissioner for Transport that the local track leading to the Site is not under her purview. Consent of the owners/managing parties of the local track should be obtained for using it as the vehicular access to the Site. Sufficient space should be provided within the Site for manoeuvring of vehicles. No parking, queuing and reverse movement of vehicles on public road are allowed;
- (e) to note the comments of the Chief Highway Engineer/New Territories West, Highways Department that adequate drainage measures should be provided to prevent surface water running from the Site to the nearby public roads and drains. The access road connecting the Site with Kung Um Road is not and will not be maintained by his department. His office shall not be responsible for maintaining any access connecting the Site and Kung Um Road;
- (f) to note the comments of the Director of Environmental Protection that the relevant mitigation measures and requirements in the latest “Code of Practice on Handling the Environmental Aspect of Temporary Uses and Open Storage Use” should be followed to minimise any potential environmental nuisances on the surrounding area;
- (g) to note the comments of the Chief Engineer/Mainland North, Drainage Services Department that the drainage facilities should be implemented on the Site in accordance with the agreed drainage proposal. You are required to rectify the drainage system if they are found to be inadequate or ineffective during operation. You shall be liable for and shall indemnify claims and demands arising out of damage or nuisance caused by a failure of the drainage system. The proposed development should neither obstruct overland flow nor adversely affect any existing natural streams, village drains, ditches

and the adjacent areas. DLO/YL, LandsD should be consulted and consent from the relevant lot owners should be sought for any works to be carried out outside your lot boundary before commencement of the drainage works;

- (h) to note the comments of the Director of Fire Services that the installation/ maintenance/ modification/ repair work of fire service installations shall be undertaken by a Registered Fire Service Installation Contractor (RFSIC). The RFSIC shall after completion of the installation/ maintenance/ modification/ repair work issue to the person on whose instruction the work was undertaken a certificate (FS 251) and forward a copy of the certificate to him. If the proposed structure(s) is required to comply with the Buildings Ordinance (BO) (Cap. 123), detailed fire service requirements will be formulated upon receipt of formal submission of general building plans;
- (i) to note the comments of the Chief Building Surveyor/New Territories West, Buildings Department (BD) that if the existing structures (not being a New Territories Exempted House) are erected on leased land without the approval of the Building Authority (BA), they are unauthorised building works (UBW) under the BO and should not be designated for any proposed use under the application. For UBW erected on leased land, enforcement action may be taken by the BD to effect their removal in accordance with the prevailing enforcement policy against UBW as and when necessary. The granting of any planning approval should not be construed as an acceptance of any existing building works or UBW on the Site under the BO. Before any new building works (including containers/open sheds as temporary buildings, demolition and land filling, etc.) are to be carried out on the Site, prior approval and consent of the BA should be obtained, otherwise they are UBW. An Authorised Person should be appointed as the co-ordinator for the proposed building works in accordance with the BO. The Site shall be provided with means of obtaining access thereto from a street and emergency vehicular access in accordance with Regulations 5 and 41D of the Building (Planning) Regulations (B(P)R) respectively. The Site does not abut on a specified street of not less than 4.5m wide and its permitted development intensity shall be determined under Regulation 19(3) of the B(P)R at the building plan submission stage.
