Proposed Temporary Warehouses for Storage of Electronic Goods and Construction Materials for a Period of 3 Years

at

Lots 1117 (Part), 1118 S.A (Part), 1118 S.B (Part), 1118 S.C (Part) in D.D. 119, Yuen Long, N.T.

Annex 1 Drainage Assessment

A. Site particulars

- 1.1.1 The application site is accessible via an existing vehicular track leading from Kung Um Road. (Figure 4) It possesses an area of approximately 1,740m².
- 1.1.2 The application site had been hard paved.
- 1.1.3 The application site is surrounded by a good number of open storage yards and warehouses.

B. Level and gradient of the subject site & proposed surface channel

- 1.1.4 The subject site has been hard paved and occupied an area of approximately 1,740m². It has a gradient sloping from north to south from about +28.5mPD to +27.0mPD.
- 1.1.5 In order to follow the topography of the application site, the proposed surface channel will be constructed following the gradient of the site. As demonstrated in the calculation in Annex 1.3 hereunder, 375mm surface U-channel will be capable to drain the surface runoff accrued at the subject site.

C. Catchment area of the proposed drainage provision at the subject site

- 1.1.6 It is noted that the level to the north, south and west of the site is lower than or about the same as the application site.
- 1.1.7 It is noted that a knoll is found to the west of the application site. However, an existing structure was found to the immediate west of the application site so that it blocks the surface runoff from the higher land to the west.
- 1.1.8 As such, no external catchment has been identified.

D. Particulars of the existing drainage facilities to accept the surface runoff collected at the application site

- 1.1.9 According to recent site inspection, a natural drain is found to the south of the application site as shown in the proposed drainage path plan in Figure 5.

1.2 Runoff Estimation & Proposed Drainage Facilities

A. Proposed drainage facilities

- 1.2.1 Subject to the above calculations, it is determined that 375mm surface U-channel which is made of concrete along the site periphery is adequate to intercept storm water passing through and generated at the application site (Figure 5).
- 1.2.2 The intercepted stormwater will then be discharged to the natural drain to the south of the application site via a proposed 375mm surface U-channel outside the application site. (Figure 5)
- 1.2.3 The calculations in Annex 1.3 shows that the proposed 375mm surface channel has adequate capacity to cater for the surface runoff generated at the subject site and the external catchment. A sand trap is proposed at the terminal catchpit.
- 1.2.4 All the proposed drainage facilities, including the section of surface channel proposed in between of the subject site to the open drain, will be provided and maintained at the applicant's own expense. Also, surface U-channel will be cleaned at regular interval to avoid the accumulation of rubbish/debris which would affect the dissipation of storm water.
- 1.2.5 Prior to the commencement of drainage works, the applicant will seek the consent of the District Lands Office/Yuen Long and the registered land owner for any drainage works outside the application site or outside the jurisdiction of the applicant.
- 1.2.6 The provision of the proposed surface U-channel will follow the gradient of the application site. All the proposed drainage facilities will be constructed and maintained at the expense of the applicant.
- 1.2.7 All proposed works at the site periphery would not obstruct the flow of surface runoff from the adjacent areas, the provision of trees and surface U-channel at site boundary is detailed hereunder:
 - (a) Soil excavation at site periphery, although at minimal scale, is inevitably for the provision of surface U-channel and landscaping. In the reason that the accumulation of excavated soil at the site periphery would obstruct the free flow of the surface runoff from the surroundings, the soil will be cleared at the soonest possible after the completion of the excavation process.
 - (b) No leveling work will be carried at the site periphery. The level of the site periphery will be maintained during and after the works. As such, the works at the site periphery would not either alter or obstructed the flow of surface runoff from adjacent areas.
 - (c) Some openings will be provided at the toe of hoarding so as to allow unobstructed flow of surface runoff to and from adjacent area.

Annex 1.3 Drainage Calculation for the Proposed Provision of Drainage Facilities at Subject Site

1. Runoff Estimation

1.1 Rational method is adopted for estimating the designed run-off

$$Q = k \times i \times A / 3,600$$

Assuming that:

- i. The area of the entire catchment is approximately 1,740m²; & (Figure 5)
- ii. The application site is totally hard paved and therefore the value of run-off co-efficient (k) is taken as 1.

$$\text{Difference in Land Datum} = 28.5\text{m} - 27.0\text{m} = 1.5\text{m}$$

$$L = 52\text{m}$$

$$\therefore \text{Average fall} = 1.5\text{m in } 52\text{m or } 1\text{m in } 34.67$$

According to the Brandsby-Williams Equation adopted from the "Stormwater Drainage Manual – Planning, Design and Management" published by the Drainage Services Department (DSD),

$$\text{Time of Concentration } (t_c) = 0.14465 [L / (H^{0.2} \times A^{0.1})]$$

$$t_c = 0.14465 [52 / (2.88^{0.2} \times 1,740^{0.1})]$$

$$t_c = 2.89 \text{ minutes}$$

With reference to the Intensity-Duration-Frequency Curves provided in the abovementioned manual, the mean rainfall intensity (i) for 1 in 50 recurrent flooding period is found to be 310 mm/hr

$$\text{By Rational Method, } Q = 1 \times 310 \times 1,740 / 3,600$$

$$\therefore Q = 149.83 \text{ l/s} = 8,990 \text{ l/min}$$

In accordance with the Chart or the Rapid Design of Channels in "Geotechnical Manual for Slopes", 375mm surface U-channel in 1:45 and 1:80 gradient is considered adequate to dissipate all the stormwater accrued by the application site and the adjacent land.

Annex 2 Estimated Traffic Generation

2.1 The application site is accessible via a vehicular access leading from Kung Um Road. Having mentioned that the site is intended for storage of electronic goods and construction materials, traffic generated by the proposed development is extremely insignificant. No medium and heavy goods vehicle exceeding 5.5 tonnes and container trailer/tractor will access the application site. To address the concern of the heavy traffic along Kung Um Road, the proposed development will operate from 9:00a.m. to 5:00p.m on Mondays to Saturdays.

2.2 The estimated average traffic generation and traffic generation rate at peak hours are as follow:

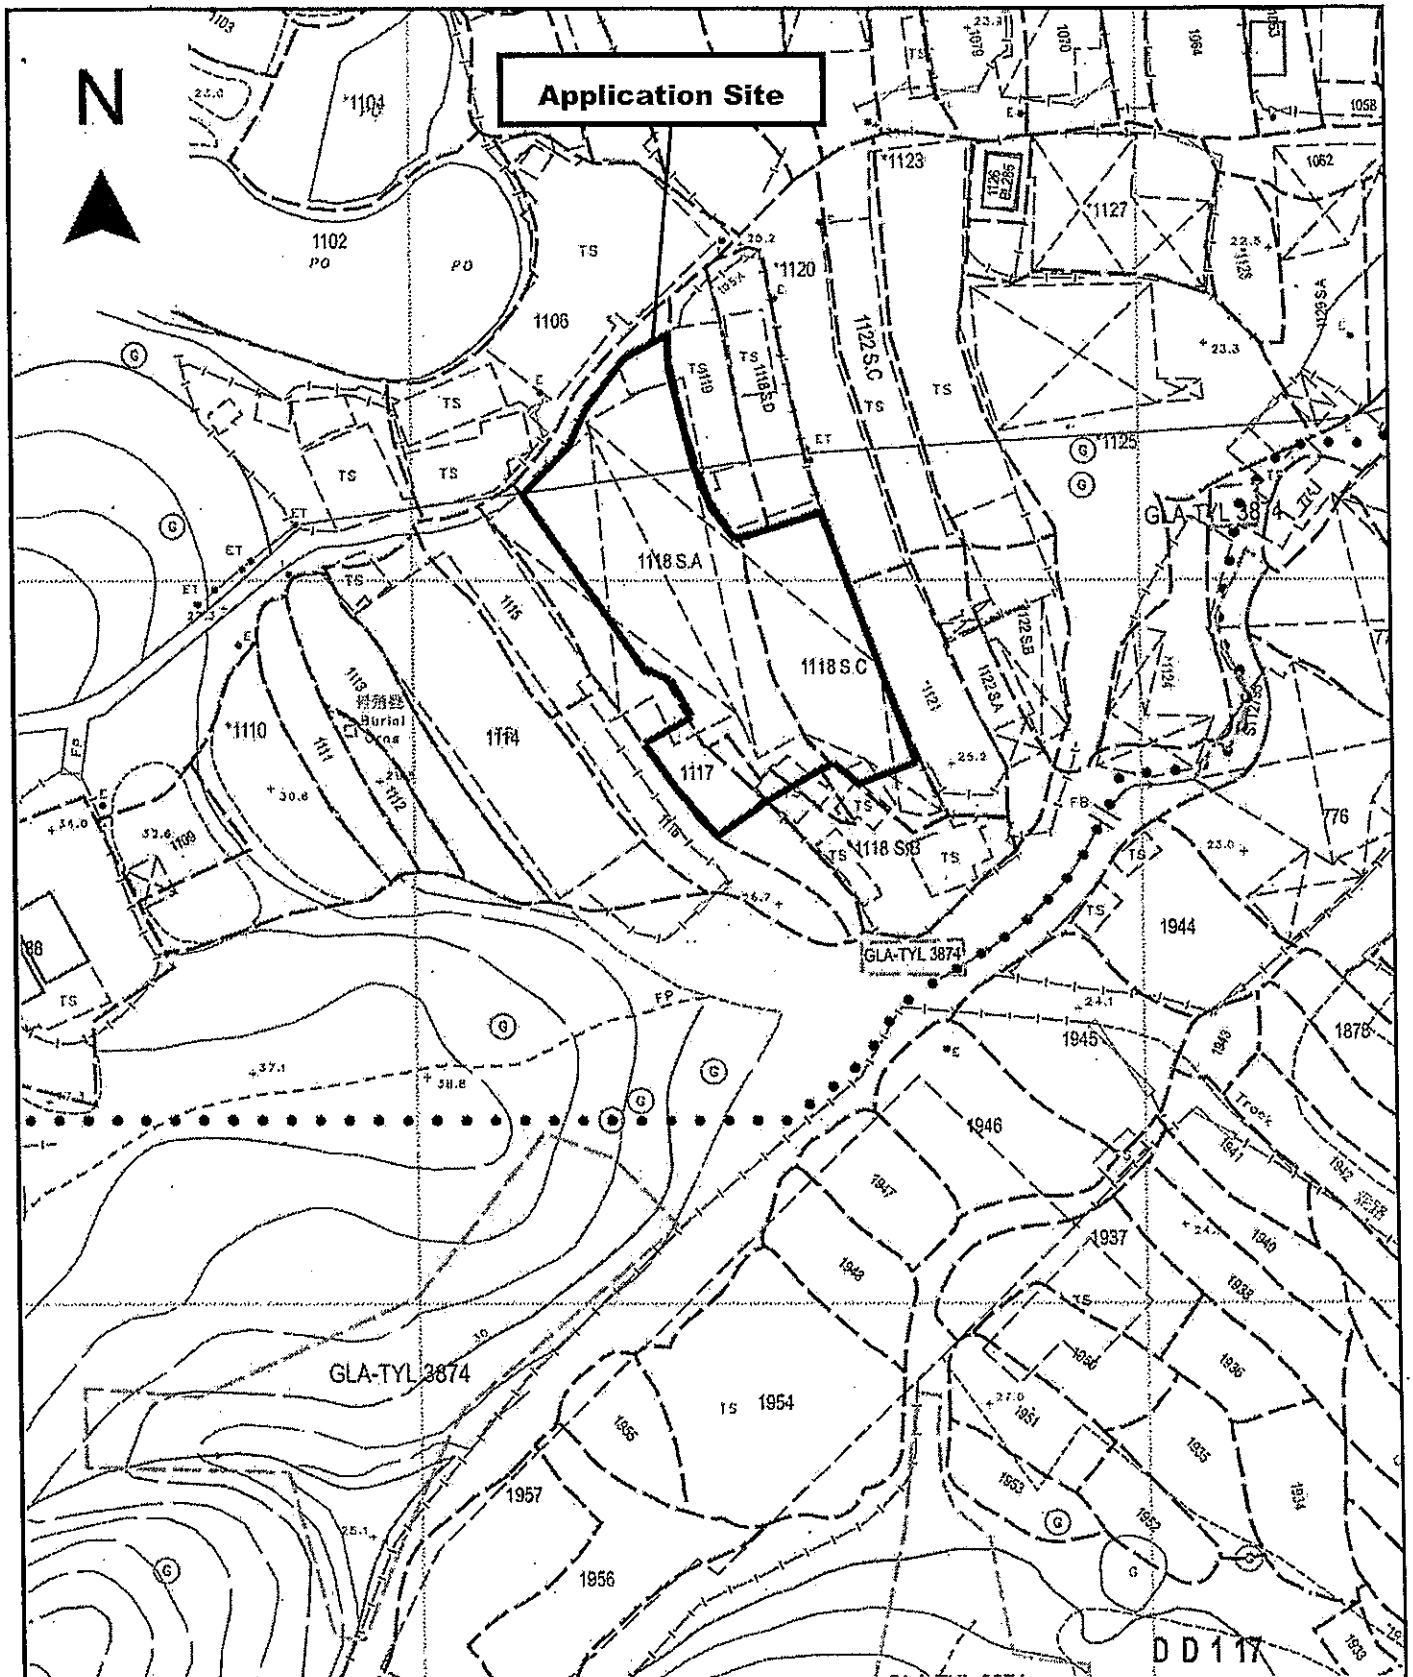

Type of Vehicle	<u>Average</u> Traffic Generation Rate (pcu/hr)	<u>Average</u> Traffic Attraction Rate (pcu/hr)	Traffic Generation Rate at <u>Peak Hours</u> (pcu/hr)	Traffic Attraction Rate at <u>Peak Hours</u> (pcu/hr)
Light goods vehicle	0.38	0.38	0	0

Note 1: The opening hour of the proposed development is restricted to 9:00 a.m. to 5:00 p.m. from Mondays to Saturdays. No operation will be held on Sundays and public holidays.

Note 2: The pcu of light goods vehicle is taken as 1.5.

Note 3: Morning peak is defined as 7:00a.m. to 9:00a.m. whereas afternoon peak is defined as 5:00p.m. to 7:00p.m.

2.3 In association with the intended purpose, adequate space for manoeuvring of vehicle would be provided and so queueing up of traffic would not be the result especially that the traffic generated is insignificant. The negligible increase in traffic would not aggravate the traffic condition of Kung Um Road and nearby road networks.

Advisory clauses

- (a) to resolve any land issues relating to the development with the concerned owner(s) of the application site (the Site);
- (b) to note the comments of the District Lands Officer/Yuen Long, Lands Department (DLO/YL, LandsD) that the Site comprises Old Schedule Agricultural Lots held under the Block Government Lease which contains the restriction that no structures are allowed to be erected without the prior approval of the Government. The lot owner(s) will need to apply to her office to permit structures to be erected or to regularise any irregularities on site, if any. Besides, given the proposed use is temporary in nature, only application for regularisation or erection of temporary structure(s) will be considered. Applications for any of the above will be considered by her department acting in the capacity of the landlord or lessor at its sole discretion and there is no guarantee that such application will be approved. If such application is approved, it will be subject to such terms and conditions, including among others the payment of rent or fee, as may be imposed by her department;
- (c) to note the comments of the Commissioner for Transport that the local track leading to the Site is not under her purview. Consent of the owners/ managing parties of the local track should be obtained for using it as the vehicular access to the Site. Sufficient space should be provided within the Site for manoeuvring of vehicles. No parking, queuing and reverse movement of vehicles on public road are allowed;
- (d) to note the comments of the Chief Highway Engineer/New Territories West, Highways Department that adequate drainage measures should be provided to prevent surface water running from the Site to the nearby public roads and drains. The access road connecting the Site with Kung Um Road is not and will not be maintained by his office. His office shall not be responsible for maintaining any access connecting the Site and Kung Um Road;
- (e) to note the comments of the Director of Environmental Protection that the relevant mitigation measures and requirements in the latest “Code of Practice on Handling the Environmental Aspects of Temporary Uses and Open Storage Sites” issued by the Environmental Protection Department should be followed to minimise any potential environmental nuisances on the surrounding areas;
- (f) to note the comments of the Chief Engineer/Mainland North, Drainage Services Department on the submitted drainage proposal that the existing drainage facilities, to which the stormwater of the development from the Site would discharge, are not maintained by her office. You should identify the owner of the existing drainage facilities to which the proposed connection will be made and obtain consent from the owner prior to commencement of the proposed works. In the case that it is a local village drains, District Officer/Yuen Long should be consulted. The location and details (i.e. cross section) of the proposed hoarding/peripheral wall, if any, should be shown on the proposed drainage plan. Overland flow from adjacent area should not be obstructed. Cross sections showing the existing and proposed ground levels of the Site with respect to the adjacent areas should be given. The development should neither obstruct overland flow nor adversely affect existing natural streams, village drains, ditches and the adjacent areas, etc. DLO/YL, LandsD should be consulted and consent from the relevant lot owners should be sought for any works to be carried out outside your lot boundary before commencement of the drainage works;
- (g) to note the comments of the Director of Fire Services that in consideration of the design/nature of the proposal, fire service installations (FSIs) are anticipated to be required. Relevant layout plans incorporated with the proposed FSIs should be submitted to his

department for approval. The layout plans should be drawn to scale and depicted with dimensions and nature of occupancy. The location of where the proposed FSIs to be installed should also be clearly marked on the layout plans. If the proposed structure(s) is required to comply with the Buildings Ordinance (BO)(Cap. 123), detailed fire service requirements will be formulated upon receipt of formal submission of general building plans;

- (h) to note the comments of the Chief Building Surveyor/New Territories West, Buildings Department (BD) that if the existing structures (not being a New Territories Exempted House) are erected on leased land without the approval of the Building Authority (BA), they are unauthorised building works (UBW) under the BO and should not be designated for any proposed use under the application. For UBW erected on leased land, enforcement action may be taken by the BD to effect their removal in accordance with the prevailing enforcement policy against UBW as and when necessary. The granting of any planning approval should not be construed as an acceptance of any existing building works or UBW on the Site under the BO. Before any new building works (including containers/open sheds as temporary buildings, demolition and land filling, etc.) are to be carried out on the Site, prior approval and consent of the BA should be obtained, otherwise they are UBW. An Authorised Person should be appointed as the co-ordinator for the proposed building works in accordance with the BO. The Site shall be provided with means of obtaining access thereto from a street and emergency vehicular access in accordance with Regulations 5 and 41D of the Building (Planning) Regulations (B(P)R) respectively. The Site does not abut on a specified street of not less than 4.5m wide and its permitted development intensity shall be determined under Regulation 19(3) of the B(P)R at building plan submission stage. Any temporary shelters or converted containers for office, storage, washroom or other uses are considered as temporary buildings are subject to the control of Part VII of the B(P)R. Detailed checking under the BO will be carried at building plan submission stage; and
- (i) to note the comments of the Project Manager (West), Civil Engineering and Development Department that based on the preliminary project boundary of the proposed Yuen Long South (YLS) Development, the Site falls within the boundary of the proposed YLS Development – Stage 3. The YLS Development would provide land to meet the medium to long term housing needs of Hong Kong and the detailed implementation programme with phasing and packaging of works for YLS Development – Stage 3 is being formulated. Besides, the vehicular access to the Site, as shown in the submission (**Drawing A-1** of this RNTPC Paper), falls within the boundary of YLS development – Stage 2 Phase 2. The land resumption and clearance programme of the project is subject to Executive Council's authorisation on land resumption and Finance Committee's funding approval of the project. Land clearance operation is tentatively targeted to commence in 2024. Thus, the proposed vehicular access to the Site would be in conflict with the proposed works under the project. Future access to the Site shall be proposed for his agreement in due course.
