Proposed Temporary Open Storage of Construction Material & Ancillary Site Office for a Period of 3 Years
at
Lot 1064 (Part) in D.D. 119, Pak Sha Tsuen, Yuen Long, N.T.

Annex 1 Estimated Traffic Generation

- 1.1 The application site is accessible via a vehicular access leading from Kung Um Road. It is intended for the open storage of construction material. Given the limited size of the application site, the traffic generation and attraction would be minimal.
- 1.2 The estimated average traffic generation and traffic generation rate at peak hours are as follow:

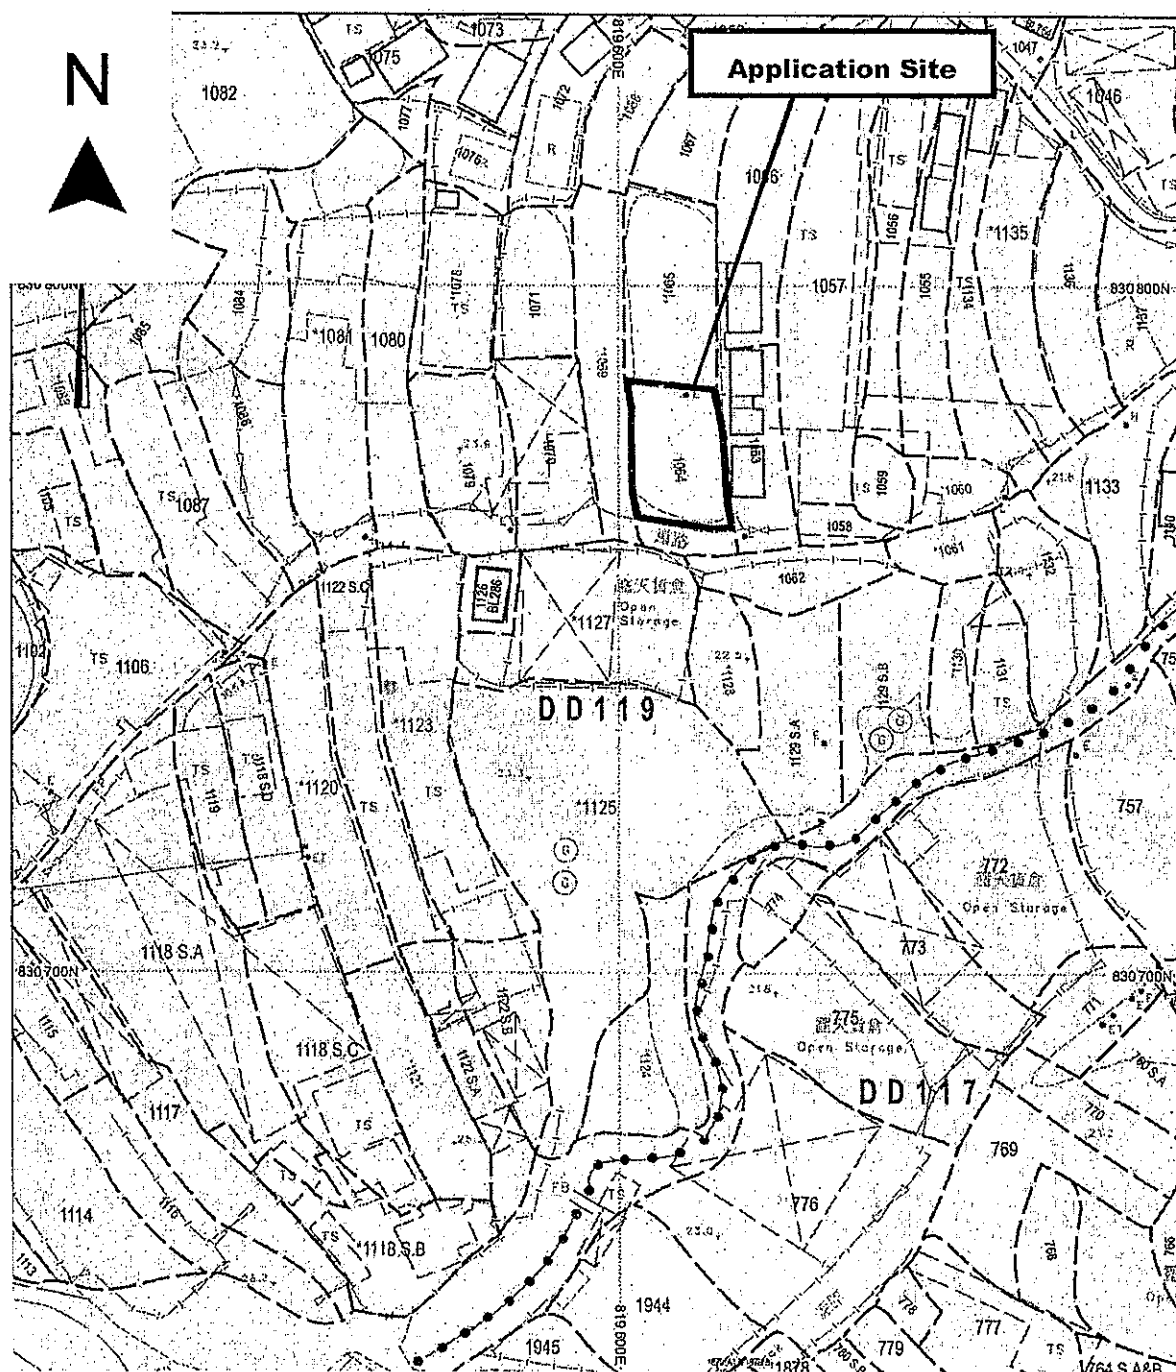

Type of Vehicle	<u>Average Traffic Generation Rate</u> (pcu/hr)	<u>Average Traffic Attraction Rate</u> (pcu/hr)	<u>Traffic Generation Rate at Peak Hours</u> (pcu/hr)	<u>Traffic Attraction Rate at Peak Hours</u> (pcu/hr)
Light goods vehicle	0.19	0.19	0	0

Note 1: The opening hour of the proposed development is restricted to 9:00 a.m. to 5:00 p.m. from Mondays to Saturdays. No operation will be held on Sundays and public holidays.

Note 2: The pcu of light goods vehicle is taken as 1.5.

Note 3: Morning peak is defined as 7:00a.m. to 9:00a.m. whereas afternoon peak is defined as 5:00p.m. to 7:00p.m.

- 1.3 In association with the proposed development, adequate space for manoeuvring of vehicle would be provided as shown in **Figure 3**. The negligible increase in traffic would not aggravate the traffic condition of Kung Um Road and nearby road networks.

**Town Planning Board Guidelines for
Application for Open Storage and Port Back-up Uses
(TPB PG-No.13F)**

1. On 27.3.2020, the Town Planning Board Guidelines for Application for Open Storage and Port Back-up Uses under Section 16 of the Town Planning Ordinance (TPB PG-No. 13F) were promulgated, which set out the following criteria for the various categories of area:
 - (a) Category 1 areas: favourable consideration will normally be given to applications within these areas, subject to no major adverse departmental comments and local objections, or the concerns of the departments and local residents can be addressed through the implementation of approval conditions. Technical assessments should be submitted if the proposed uses may cause significant environmental and traffic concerns;
 - (b) Category 2 areas: planning permission could be granted on a temporary basis up to a maximum period of 3 years, subject to no adverse departmental comments and local objections, or the concerns of the departments and local residents can be addressed through the implementation of approval conditions. Technical assessments, where appropriate, should be submitted to demonstrate that the proposed uses would not have adverse drainage, traffic, visual, landscaping and environmental impacts on the surrounding areas;
 - (c) Category 3 areas: applications would normally not be favourably considered unless the applications are on sites with previous planning approvals (irrespective of whether the application is submitted by the applicant of previous approval or a different applicant). Sympathetic consideration may be given if genuine efforts have been demonstrated in compliance with approval conditions of the previous planning applications and relevant technical assessments/proposals have been included in the fresh applications, if required, to demonstrate that the proposed uses would not generate adverse drainage, traffic, visual, landscaping and environmental impacts on the surrounding areas. Planning permission could be granted on a temporary basis up to a maximum period of 3 years, subject to no adverse departmental comments and local objections, or the concerns of the departments and local residents can be addressed through the implementation of approval conditions; and
 - (d) Category 4 areas: applications would normally be rejected except under exceptional circumstances. For applications on sites with previous planning approvals (irrespective of whether the application is submitted by the applicant of previous approval or a different applicant), and subject to no adverse departmental comments and local objections, sympathetic consideration may be given if genuine efforts have been demonstrated in compliance with approval conditions of the previous planning applications and relevant technical assessments/proposals have been included in the fresh applications, if required, to demonstrate that the proposed uses would not generate adverse drainage, traffic, visual, landscaping and environmental impacts on the surrounding areas. The intention is however to encourage the phasing out of such non-conforming uses as early as possible. A maximum period of 2 years may be allowed upon renewal of planning permission for an applicant to identify suitable sites for relocation. No further renewal of approval will be given unless under very exceptional circumstances and each application for renewal of approval will be assessed on its individual merit.

2. In assessing applications for open storage and port back-up uses, the other major relevant assessment criteria are also summarized as follows:
- (a) the use of sites of less than 1,000 m² each for open storage uses and 2,000 m² each for port back-up uses in rural areas, is generally not encouraged, other than sites located in major corridors, industrial/godown/workshop areas, quarrying activities or where it is demonstrated that optimum use is made of the site. This is to prevent the further proliferation of small sites in rural areas, minimizing sprawl over countryside areas and reducing travel trips;
 - (b) port back-up sites and those types of open storage uses generating adverse noise, air pollution and visual intrusion and frequent heavy vehicle traffic should not be located adjacent to sensitive receivers such as residential dwellings, hospitals, schools and other community facilities;
 - (c) port back-up uses are major generators of traffic, with container trailer/tractor parks generating the highest traffic per unit area. In general, port back-up sites should have good access to the strategic road network, or be accessed by means of purpose built roads;
 - (d) adequate screening of the sites through landscaping and/or fencing should be provided where sites are located adjacent to public roads or are visible from surrounding residential areas;
 - (e) there is a general presumption against conversion of agricultural land and fish ponds to other uses on an ad hoc basis, particularly in flood prone areas or sites which would obstruct natural drainage channels and overland flow; and
 - (f) for applications involving sites with previous planning approvals, should there be no evidence to demonstrate that the applicants have made any genuine effort to comply with the approval conditions of the previous planning applications, planning permission may be refused, or a shorter compliance period for the approval conditions may be imposed, notwithstanding other criteria set out in the Guidelines are complied with.

**Relevant extracts of the Town Planning Board Guidelines on
“Renewal of Planning Approval and Extension of Time for Compliance with Planning
Conditions for Temporary Use or Development”
(TPB PG-No. 34D)**

1. The criteria for assessing applications for renewal of planning approval include:
 - (a) whether there has been any material change in planning circumstance since the previous temporary approval was granted (such as a change in the planning policy/land-use zoning for the area) or a change in the land uses of the surrounding areas;
 - (b) whether there are any adverse planning implications arising from the renewal of the planning approval (such as pre-emption of planned permanent development);
 - (c) whether the planning conditions under previous approval have been complied with to the satisfaction of relevant Government departments within the specified time limits;
 - (d) whether the approval period sought is reasonable; and
 - (e) any other relevant considerations.
2. Under normal circumstances, the approval period for renewal should not be longer than the original validity period of the temporary approval. In general, the Board is unlikely to grant an approval period exceeding three years unless there are strong justifications and the period is allowed for under the relevant statutory plans. Depending on the circumstances of each case, the Board could determine the appropriate approval period, which may be shorter than the time under request.

Advisory clauses

- (a) to resolve any land issues relating to the development with the concerned owner(s) of the application site (the Site);
- (b) the Site should be kept in a clean and tidy condition at all times;
- (c) to note the comments of the District Lands Officer/Yuen Long, Lands Department that the Site comprises an Old Schedule Agricultural Lot held under the Block Government Lease which contains the restriction that no structures are allowed to be erected without the prior approval of the Government. The lot owner(s) will need to apply to her office to permit the structures to be erected or to regularise any irregularities on site, if any. Besides, given the proposed use is temporary in nature, only application for regularisation or erection of temporary structure(s) will be considered. Applications for any of the above will be considered by her department acting in the capacity of the landlord or lessor at its sole discretion and there is no guarantee that such application will be approved. If such application is approved, it will be subject to such terms and conditions, including among others the payment of rent or fee, as may be imposed by her department;
- (d) to note the comments of the Commissioner for Transport that the local track leading to the Site is not under her purview. You shall obtain consent of the owners/ managing parties of the local track for using it as the vehicular access to the Site. Sufficient space should be provided within the Site for manoeuvring of vehicles. No parking, queuing and reverse movement of vehicles on public road are allowed;
- (e) to note the comments of the Chief Highway Engineer/New Territories West, Highways Department that adequate drainage measures should be provided to prevent surface water running from the Site to the nearby public roads and drains. The access road connecting the Site with Kung Um Road is not and will not be maintained by his office. His office shall not be responsible for maintaining any access connecting the Site with Kung Um Road;
- (f) to note the comments of the Director of Environmental Protection that the relevant mitigation measures and requirements in the latest “Code of Practice on Handling the Environmental Aspect of Temporary Uses and Open Storage Use” should be followed to minimise any potential environmental nuisances on the surrounding area;
- (g) to note the comments of the Chief Building Surveyor/New Territories West, Buildings Department (BD) that before any new building works (including containers / open sheds as temporary buildings) are to be carried out on the Site, prior approval and consent of the BD should be obtained, otherwise they are unauthorised building works (UBW) under the Buildings Ordinance (BO). An Authorised Person should be appointed as the co-ordinator for the proposed building works in accordance with the BO. For UBW erected on leased land, enforcement action may be taken by the BD to effect their removal in accordance with BD’s enforcement policy against UBW as and when necessary. The granting of any planning approval should not be construed as an acceptance of any existing building works or UBW on the Site under the BO. The Site shall be provided with means of obtaining access thereto from a street and emergency vehicular access in accordance with Regulations 5 and 41D of the Building (Planning) Regulations (B(P)R) respectively. If the Site does not abut on a specified street of not

less than 4.5m wide, its permitted development intensity shall be determined under Regulation 19(3) of the B(P)R at the building plan submission stage; and

- (h) to note the comments of the Project Manager (West), Civil Engineering and Development Department that based on the preliminary project boundary of the proposed Yuen Long South (YLS) Development, the Site falls within the boundary of the proposed YLS Development – Stage 3. The YLS Development would provide land to meet the medium to long term housing needs of Hong Kong and the detailed implementation programme with phasing and packaging of works for YLS Development – Stage 3 is being formulated. Besides, the vehicular access to the Site, as shown in the submission (**Drawing A-1** of this RNTPC Paper), falls within the boundary of YLS Development – Stage 2 Phase 2. The land resumption and clearance programme of the project is subject to Executive Council’s authorisation on land resumption and Finance Committee’s funding approval of the project. Land clearance operation is tentatively targeted to commence in 2024. Thus, the proposed vehicular access to the Site would be in conflict with the proposed works under the project. You should propose future access to the Site for his agreement in due course.
