Annex 1 Estimated Traffic Generation

- 1.1 The application site is abutting and serviced by Shan Ha Road and vehicular access leading from the said road. Having mentioned that the site is intended for open storage of construction materials, equipment and machinery in only 3,763m², traffic generated by the proposed development is extremely insignificant.
- 1.2 The estimated average traffic generation and traffic generation rate at peak hours are as follow:

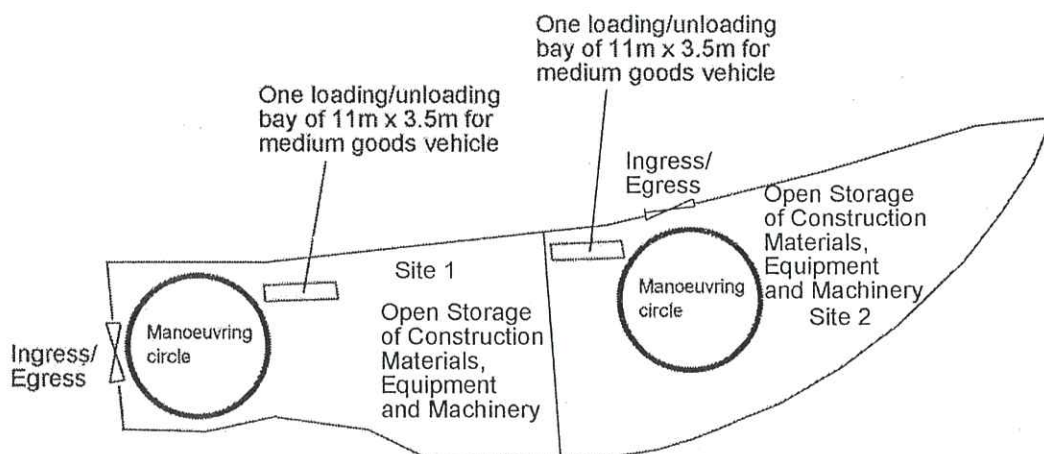

Type of Vehicle	<u>Average Traffic Generation Rate</u> (pcu/hr)	<u>Average Traffic Attraction Rate</u> (pcu/hr)	<u>Traffic Generation Rate at Peak Hours</u> (pcu/hr)	<u>Traffic Attraction Rate at Peak Hours</u> (pcu/hr)
Medium goods vehicle	0.375	0.375	2	2

Note 1: The opening hour of the proposed development is restricted to 7:00 a.m. to 11:00 p.m. from Mondays to Saturdays. No operation will be held on Sundays and public holidays.

Note 2: The pcu of medium goods vehicle is taken as 2.

Note 3: Morning peak is defined as 7:00a.m. to 9:00a.m. whereas afternoon peak is defined as 5:00p.m. to 7:00p.m.

- 1.3 As shown in the above estimation, it is estimated that the proposed development would not generate significant amount of traffic. It would not affect the traffic condition of Shan Ha Road.
- 1.4 In association with the intended purpose, adequate space for manoeuvring of vehicle would be provided within the application site and queueing up of traffic would not be the result especially that the traffic generated is insignificant. The negligible increase in traffic would not aggravate the traffic condition of Shan Ha Road and nearby road networks.

Town Planning Board Guidelines for
Application for Open Storage and Port Back-up Uses
(TPB PG-No.13F)

1. On 27.3.2020, the Town Planning Board Guidelines for Application for Open Storage and Port Back-up Uses under Section 16 of the Town Planning Ordinance (TPB PG-No. 13F) were promulgated, which set out the following criteria for assessing planning applications for open storage and port back-up uses:

Various Categories of Area

- (a) Category 1 areas: favourable consideration will normally be given to applications within these areas, subject to no major adverse departmental comments and local objections, or the concerns of the departments and local residents can be addressed through the implementation of approval conditions. Technical assessments should be submitted if the proposed uses may cause significant environmental and traffic concerns;
- (b) Category 2 areas: planning permission could be granted on a temporary basis up to a maximum period of 3 years, subject to no adverse departmental comments and local objections, or the concerns of the departments and local residents can be addressed through the implementation of approval conditions. Technical assessments, where appropriate, should be submitted to demonstrate that the proposed uses would not have adverse drainage, traffic, visual, landscaping and environmental impacts on the surrounding areas;
- (c) Category 3 areas: applications would normally not be favourably considered unless the applications are on sites with previous planning approvals (irrespective of whether the application is submitted by the applicant of previous approval or a different applicant). Sympathetic consideration may be given if genuine efforts have been demonstrated in compliance with approval conditions of the previous planning applications and relevant technical assessments/proposals have been included in the fresh applications, if required, to demonstrate that the proposed uses would not generate adverse drainage, traffic, visual, landscaping and environmental impacts on the surrounding areas. Planning permission could be granted on a temporary basis up to a maximum period of 3 years, subject to no adverse departmental comments and local objections, or the concerns of the departments and local residents can be addressed through the implementation of approval conditions; and
- (d) Category 4 areas: applications would normally be rejected except under exceptional circumstances. For applications on sites with previous planning approvals (irrespective of whether the application is submitted by the applicant of previous approval or a different applicant), and subject to no adverse departmental comments and local objections, sympathetic consideration may be given if genuine efforts have been demonstrated in compliance with approval conditions of the previous planning applications and relevant technical assessments/proposals have been included in the fresh applications, if required, to demonstrate that the proposed uses would not generate adverse drainage, traffic, visual, landscaping and environmental impacts on the surrounding areas. The intention is however to encourage the phasing out of such non-conforming uses as early as possible. A maximum period of 2 years may be

allowed upon renewal of planning permission for an applicant to identify suitable sites for relocation. No further renewal of approval will be given unless under very exceptional circumstances and each application for renewal of approval will be assessed on its individual merit.

2. For applications within new development areas (NDAs), the following criteria are applicable:
 - (a) The planning for various NDAs (including potential development areas) in the New Territories has been in progress and the land use proposals for some of these areas have been incorporated as appropriate into relevant statutory town plans. The NDAs will be implemented by phases. While it is envisaged that the existing open storage and port back-up uses in these areas will be gradually phased out, sympathetic consideration may be given to applications for continued operation of these uses during the interim period before the sites are required for NDA development.
 - (b) For existing open storage and port back-up uses with previous planning approval(s) and/or permitted under the previous Outline Zoning Plans, sympathetic consideration may be given to the application (irrespective of whether the application is submitted by the applicant of previous approval or a different applicant) until the concerned site is required for implementation of NDA development, provided that the relevant approval conditions, if any, have been complied with. Technical assessments, where appropriate, should be submitted to demonstrate that the continued operation of the current uses would not have adverse drainage, traffic, visual, landscaping and environmental impacts on the surrounding areas and the concerns of the departments and local residents, if any, can be addressed through the implementation of the approval conditions
 - (c) In view of the impending implementation of NDAs, new open storage and port back-up uses are generally not encouraged to infiltrate into the NDAs. There is a general presumption against such uses at greenfield areas and/or at sites with land use compatibility issue, e.g. in close proximity to existing residential dwellings which may be subject to environmental nuisances caused by the open storage and port back-up uses. Applications will normally be rejected unless under exceptional circumstances.
 - (d) Any approved temporary use and development should not jeopardize the long-term planned development on the respective site/the surrounding area under the NDA and the applicant should be advised that the site would be required by the government at any time during the planning approval period for implementation of government projects
3. In assessing applications for open storage and port back-up uses, the other major relevant assessment criteria are also summarized as follows:
 - (a) the use of sites of less than 1,000 m² each for open storage uses and 2,000 m² each for port back-up uses in rural areas, is generally not encouraged, other than sites located in major corridors, industrial/godown/workshop areas, quarrying activities or where it is demonstrated that optimum use is made of the site. This is to prevent the further proliferation of small sites in rural areas, minimizing sprawl over countryside areas and reducing travel trips;
 - (b) port back-up sites and those types of open storage uses generating adverse noise, air pollution and visual intrusion and frequent heavy vehicle traffic should not be located adjacent to sensitive receivers such as residential dwellings, hospitals, schools and other

community facilities;

- (c) port back-up uses are major generators of traffic, with container trailer/tractor parks generating the highest traffic per unit area. In general, port back-up sites should have good access to the strategic road network, or be accessed by means of purpose built roads;
- (d) adequate screening of the sites through landscaping and/or fencing should be provided where sites are located adjacent to public roads or are visible from surrounding residential areas;
- (e) there is a general presumption against conversion of agricultural land and fish ponds to other uses on an ad hoc basis, particularly in flood prone areas or sites which would obstruct natural drainage channels and overland flow; and
- (f) for applications involving sites with previous planning approvals, should there be no evidence to demonstrate that the applicants have made any genuine effort to comply with the approval conditions of the previous planning applications, planning permission may be refused, or a shorter compliance period for the approval conditions may be imposed, notwithstanding other criteria set out in the Guidelines are complied with.

**Relevant extracts of the Town Planning Board Guidelines on
“Renewal of Planning Approval and Extension of Time for Compliance with Planning
Conditions for Temporary Use or Development”
(TPB PG-No. 34D)**

1. The criteria for assessing applications for renewal of planning approval include:
 - (a) whether there has been any material change in planning circumstance since the previous temporary approval was granted (such as a change in the planning policy/land-use zoning for the area) or a change in the land uses of the surrounding areas;
 - (b) whether there are any adverse planning implications arising from the renewal of the planning approval (such as pre-emption of planned permanent development);
 - (c) whether the planning conditions under previous approval have been complied with to the satisfaction of relevant Government departments within the specified time limits;
 - (d) whether the approval period sought is reasonable; and
 - (e) any other relevant considerations.
2. Under normal circumstances, the approval period for renewal should not be longer than the original validity period of the temporary approval. In general, the Board is unlikely to grant an approval period exceeding three years unless there are strong justifications and the period is allowed for under the relevant statutory plans. Depending on the circumstances of each case, the Board could determine the appropriate approval period, which may be shorter than the time under request.

Approval Conditions

- (1) Submission and/or implementation of landscaping/tree preservation proposals.
- (2) Submission and/or implementation of drainage proposal/drainage impact assessment/flood mitigation measures.
- (3) Revocation of planning approval if conditions not complied with by a given date/at any time during the approval period.
- (4) Reinstatement of the site to an amenity area upon expiry of planning permission.
- (5) Submission and/or implementation of proposals and/or provision of fire service installations/fire extinguisher/street fire hydrant or water tank.
- (6) The design and provision of the proposed vehicular access and its junction with Kung Um Road.
- (7) Maintenance of drainage facilities on the site.
- (8) No night-time operation and/or no operation on Sundays and public holidays.
- (9) No dismantling/repairing/spraying/cleansing/other workshop activities are allowed to be carried out on the site.
- (10) The setting back of the eastern part of the application site upon future implementation of PWP Item No. 22CD.
- (11) Submission of a record of the existing drainage facilities implemented on the site.
- (12) No medium or heavy vehicles or container vehicles/only light goods vehicles are allowed for the operation of the site.
- (13) The stacking height of containers stored on the site shall not exceed 3 units.
- (14) No vehicle queuing and no reverse movement of vehicles on public road(s) is allowed.
- (15) No dismantling or other workshop activities, except ancillary repairing or maintenance activities within Structures No. 4 and 5 on the site.
- (16) The provision of boundary fence on the site.
- (17) All existing trees within the site shall be maintained at all times.

Applied use : Open Storage of Construction Materials / 2 Vehicle Parking

Dear TPB Members,

Despite the fact that the site has a long history of operation and approval was revoked a number of times, it took a considerable time for conditions of 973 to be fulfilled.

Members should inquire into the issues. In view of the planned residential developments in the Kung Um Road area operations that could impact air quality, cause contamination, etc, should no longer be tolerated.

Mary Mulvihill

Advisory clauses

- (a) to resolve any land issues relating to the development with the concerned owner(s) of the application site (the Site);
- (b) the Site should be kept in a clean and tidy condition at all times;
- (c) to note the comments of the District Lands Officer/Yuen Long, Lands Department that the Site comprises Old Schedule Agricultural Lots held under the Block Government Lease which contains the restriction that no structures are allowed to be erected without the prior approval of the Government. Lot No. 348 RP in D.D. 119 is covered by Short Term Waiver (STW) No. 4036 to permit structures erected thereon for the purpose of “Temporary Open Storage of Construction Equipment and Materials (Metal Scaffolding) and Container Site Offices Units with Ancillary Maintenance Workshop”. The STW holder(s) will need to apply to her office for modification of the STW conditions where appropriate and the lot owner(s) of the lot(s) will need to apply to her office to permit the structures to be erected or to regularise irregularities on site, if any. Besides, given the proposed use is temporary in nature, only application for regularisation or erection of temporary structure(s) will be considered. Applications for any of the above will be considered by her department acting in the capacity of the landlord or lessor at its sole discretion and there is no guarantee that such application will be approved. If such application is approved, it will be subject to such terms and conditions, including among others the payment of rent or fee, as may be imposed by her department;
- (d) to note the comments of the Commissioner for Transport that the local track leading to the Site is not under her purview. Consent of the owners/managing parties of the local track should be obtained for using it as the vehicular access to the Site. Sufficient space should be provided within the Site for manoeuvring of vehicles. No parking, queuing and reverse movement of vehicles on public road are allowed. An application to relevant government departments should be submitted to form new run-in/out, if any;
- (e) to note the comments of the Chief Highway Engineer/New Territories West, Highways Department that adequate drainage measures should be provided to prevent surface water running from the Site to the nearby public roads and drains. The access road connecting the Site with Shan Ha Road is not and will not be maintained by his office. His office shall not be responsible for maintaining any access connecting the Site with Shan Ha Road;
- (f) to note the comments of the Director of Environmental Protection that the relevant mitigation measures and requirements in the latest “Code of Practice on Handling the Environmental Aspect of Temporary Uses and Open Storage Use” should be followed to minimise any potential environmental nuisances on the surrounding area; and
- (g) to note the comments of the Project Manager (West), Civil Engineering and Development Department that based on the preliminary project boundary of the proposed Yuen Long South (YLS) Development, the southern part of the Site falls within the boundary of the proposed YLS Development – Stage 3. The YLS Development would provide land to meet the medium to long term housing needs of Hong Kong and the detailed implementation programme with phasing and packaging of works for YLS Development – Stage 3 is being formulated. Besides, the northern part

of the Site falls within the boundary of YLS Development – Stage 2 Phase 2. The land resumption and clearance programme of the project is subject to Executive Council's authorisation on land resumption and Finance Committee's funding approval of the project. Land clearance operation is tentatively targeted to commence in 2024. Thus, no substantial works shall be carried out in view of the planned YLS Development – Stage 2 Phase 2.
