**Proposed Temporary Warehouse for Storage of Exhibition Materials
and Construction Materials for a Period of 3 Years
at
Lots 751 & 752 (Part) in D.D. 119, Yuen Long, N.T.**

Annex 1 Drainage Assessment

A. Site particulars

- 1.1.1 The application site is abutting a local vehicular access leading to Kung Um Road. (Figure 1) It possesses an area of approximately 1,250m².
- 1.1.2 The application site had been hard paved. Similar warehouses were found to the south and west of the application site.

B. Level and gradient of the subject site & proposed surface channel

- 1.1.3 The subject site has been hard paved and occupied an area of approximately 1,250m². It has a gradient sloping from southwest to northeast from about +25.1mPD to +24.3mPD.
- 1.1.4 In order to follow the topography of the application site, the proposed surface channel will be constructed following the gradient of the site. As demonstrated in the calculation in Annex 1.3 hereunder, 300mm surface U-channel will be capable to drain the surface runoff accrued at the subject site.

C. Catchment area of the proposed drainage provision at the subject site

- 1.1.5 It is found that the land at the application site is comparatively higher than the adjoining land except to the higher land to the west. However, the surface runoff is flowing to the south instead of flowing to the site because the level to the south is lower than the application site. The land to the north, east and south of the site is lower than the application site. As such, no external catchment has been identified.

D. Particulars of the existing drainage facilities to accept the surface runoff collected at the application site

- 1.1.6 According to recent site inspection, a natural drain is found to the west of the site. (Figure 4)

1.2 Runoff Estimation & Proposed Drainage Facilities

A. Proposed drainage facilities

- 1.2.1 Subject to the above calculations, it is determined that 300mm surface U-channel which is made of concrete along the site periphery is adequate to intercept storm water passing through and generated at the application site (Figure 5).
- 1.2.2 The intercepted stormwater will then be discharged to natural drain to the west via the proposed 300mm surface U-channel outside the application site for dissipation. (Figure 5)
- 1.2.3 The calculations in Annex 1.3 shows that the proposed 300mm surface channel has adequate capacity to cater for the surface runoff generated at the subject site. A sand trap is proposed at the terminal catchpit.
- 1.2.4 All the proposed drainage facilities, including the section of surface channel proposed in between of the subject site to the open drain, will be provided and maintained at the applicant's own expense. Also, surface U-channel will be cleaned at regular interval to avoid the accumulation of rubbish/debris which would affect the dissipation of storm water.
- 1.2.5 Prior to the commencement of drainage works, the applicant will seek the consent of the District Lands Office/Yuen Long and the registered land owner for any drainage works outside the application site or outside the jurisdiction of the applicant.
- 1.2.6 The provision of the proposed surface U-channel will follow the gradient of the application site. All the proposed drainage facilities will be constructed and maintained at the expense of the applicant.
- 1.2.7 All proposed works at the site periphery would not obstruct the flow of surface runoff from the adjacent areas, the provision of trees and surface U-channel at site boundary is detailed hereunder:
 - (a) Soil excavation at site periphery, although at minimal scale, is inevitably for the provision of surface U-channel and landscaping. In the reason that the accumulation of excavated soil at the site periphery would obstruct the free flow of the surface runoff from the surroundings, the soil will be cleared at the soonest possible after the completion of the excavation process.
 - (b) No leveling work will be carried at the site periphery. The level of the site periphery will be maintained during and after the works. As such, the works at the site periphery would not either alter or obstructed the flow of surface runoff from adjacent areas.
 - (c) Some holes will be provided at the toe of hoarding so as to allow unobstructed flow of surface runoff to and from adjacent area.

Annex 1.3 Drainage Calculation for the Proposed Provision of Drainage Facilities at Subject Site

1. Runoff Estimation

1.1 Rational method is adopted for estimating the designed run-off

$$Q = k \times i \times A / 3,600$$

Assuming that:

- i. The area of the entire catchment is approximately 1,250m²; &
- ii. The application site is totally hard paved and therefore the value of run-off co-efficient (k) is taken as 1.

$$\text{Difference in Land Datum} = 25.1\text{m} - 24.3\text{m} = 0.8\text{m}$$

$$L = 52\text{m}$$

$$\therefore \text{Average fall} = 1\text{m in } 65\text{m}$$

According to the Brandsby-Williams Equation adopted from the "Stormwater Drainage Manual – Planning, Design and Management" published by the Drainage Services Department (DSD),

$$\text{Time of Concentration (t}_c\text{)} = 0.14465 [L / (H^{0.2} \times A^{0.1})]$$

$$t_c = 0.14465 [52 / (1.54^{0.2} \times 1,250^{0.1})]$$

$$t_c = 3.38 \text{ minutes}$$

With reference to the Intensity-Duration-Frequency Curves provided in the abovementioned manual, the mean rainfall intensity (i) for 1 in 50 recurrent flooding period is found to be 300 mm/hr

$$\text{By Rational Method, } Q = 1 \times 300 \times 1,250 / 3,600$$

$$\therefore Q = 104.17 \text{ l/s} = 6,250 \text{ l/min}$$

In accordance with the Chart or the Rapid Design of Channels in "Geotechnical Manual for Slopes", 300mm surface U-channel in 1:80 and 1:95 gradient is considered adequate to dissipate all the stormwater accrued by the application site. The intercepted stormwater will then be discharged to the natural drain to the west of the application site for dissipation.

Annex 2 Estimated Traffic Generation

2.1 The application site is abutting Kung Um Road. Having mentioned that the site is intended for warehouse for storage of construction materials and exhibition materials which is static in nature, traffic generated by the proposed development is extremely insignificant.

2.2 The estimated average traffic generation and traffic generation rate at peak hours are as follow:

| Type of Vehicle | <u>Average Traffic Generation Rate</u> (pcu/hr) | <u>Average Traffic Attraction Rate</u> (pcu/hr) | <u>Traffic Generation Rate at Peak Hours</u> (pcu/hr) | <u>Traffic Attraction Rate at Peak Hours</u> (pcu/hr) |
|---------------------|--|--|--|--|
| Light goods vehicle | 0.38 | 0.38 | 0 | 0 |

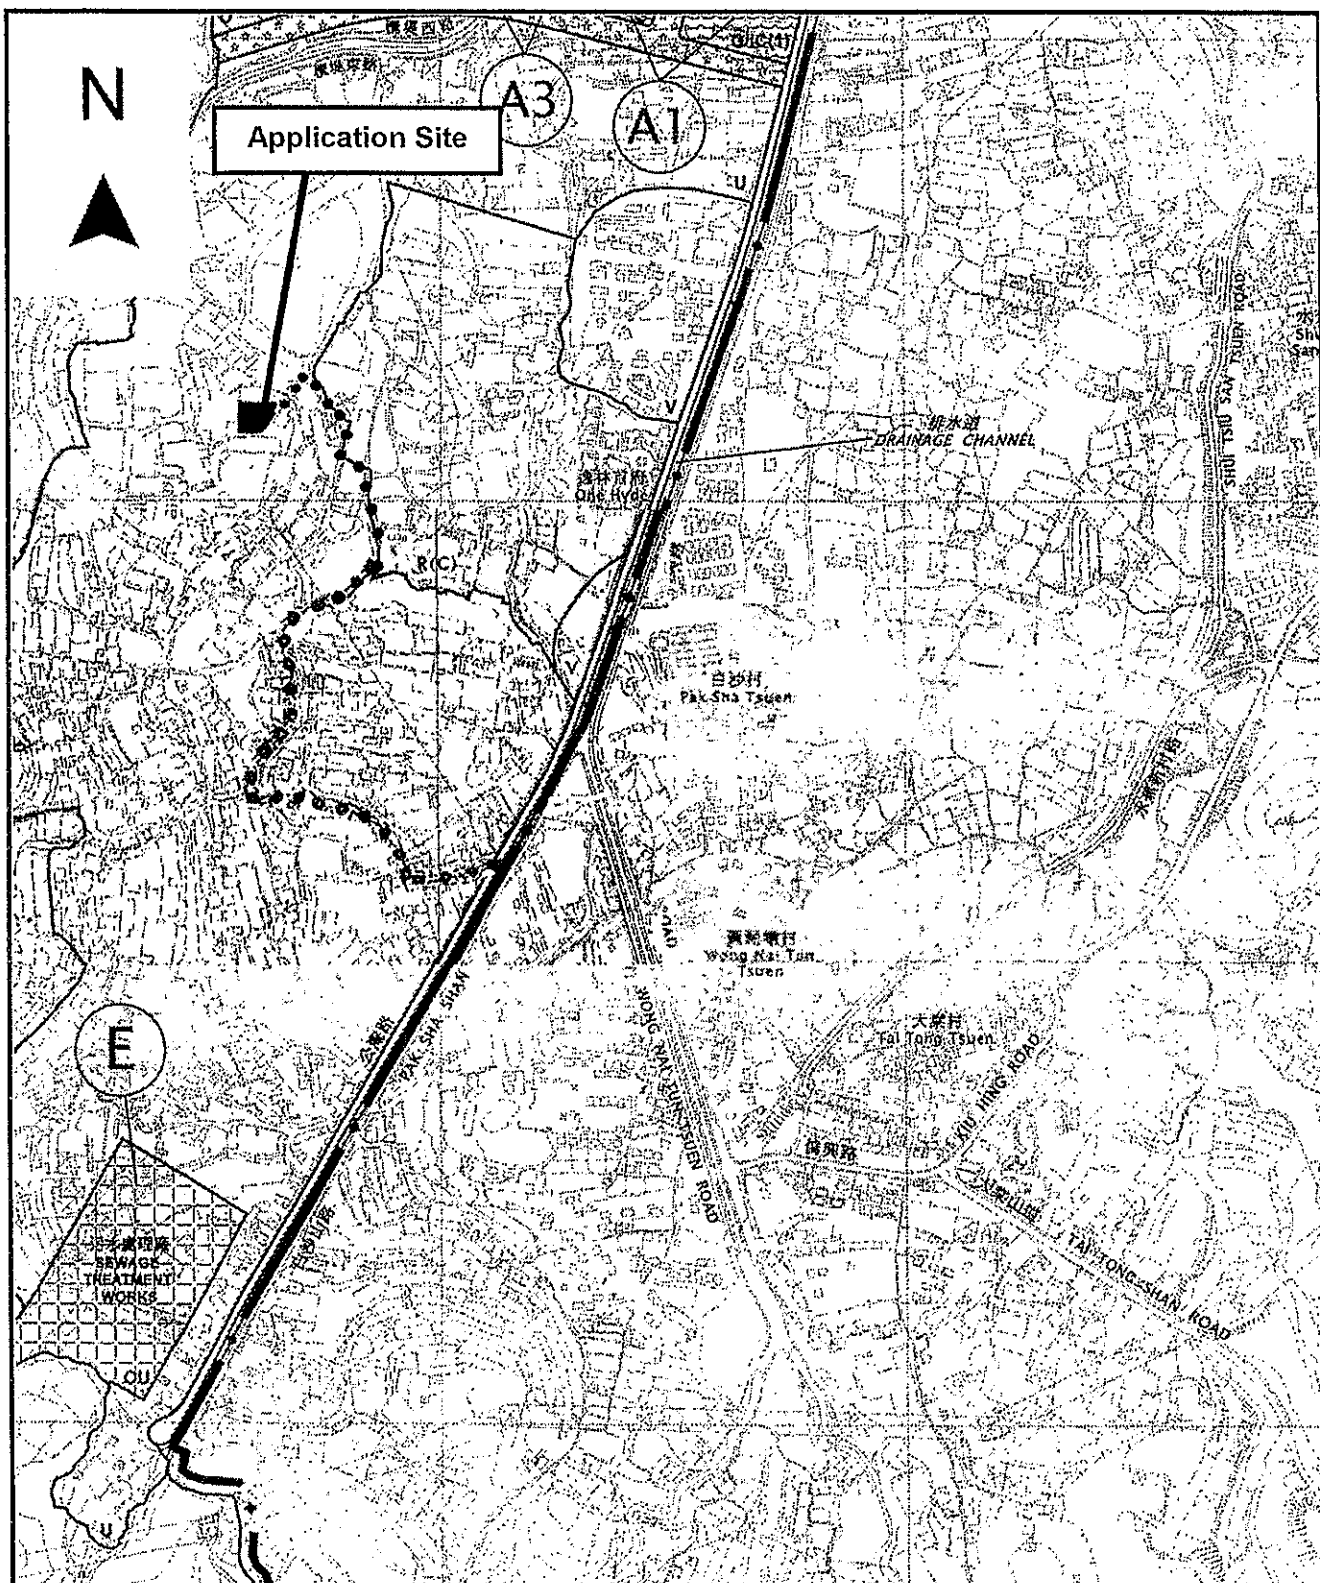

Note 1: The opening hour of the proposed development is restricted to 9:00 a.m. to 5:00 p.m. from Mondays to Saturdays. No operation will be held on Sundays and public holidays.

Note 2: The pcu of light goods vehicle is taken as 1.5.

Note 3: Morning peak is defined as 7:00a.m. to 9:00a.m. whereas afternoon peak is defined as 5:00p.m. to 7:00p.m.

2.3 As shown in the above estimation, it is estimated that the proposed development would not generate significant amount of traffic. It would not affect the traffic condition of Kung Um Road.

2.4 In association with the intended purpose, adequate space for manoeuvring of vehicle would be provided within the application site and queueing up of traffic would not be the result especially that the traffic generated is insignificant. The negligible increase in traffic would not aggravate the traffic condition of Kung Um Road and nearby road networks.

Dear Sir,

**Proposed Temporary Warehouse for Storage of Exhibition Materials
and Construction Materials for a Period of 3 Years at Lots 751 & 752
(Part) in D.D. 119, Yuen Long, N.T.**

Our response to the comments of the CE/MN, DSD is as follows:

| CE/MN, DSD's comments | Applicant's response |
|---|--|
| (i) According to Figure 4, para. 1.1.6 and 1.2.2 of Annex 1, please clarify and confirm the location of the existing natural drain; | Noted. Please refer to Figure 4. |
| (ii) Referring to para 1.2.1 and 1.2.2 of Annex 1, please note that Figure 5 is not attached in this drainage proposal for comments. | Noted. Please refer to Figure 4. |
| (iii) According to para 1.1.5 of Annex 1, it is mentioned that the adjoining land at western side of the application site is higher, however, the surface runoff is flowing to the south instead of flowing to the site. Please provide cross sections showing the existing and proposed ground levels of the captioned site with respect to the adjacent areas for review. | Noted. No site formation will be carried out. The cross sections showing the existing and ground levels of the captioned site with respect to the adjacent areas is shown in Figure 4. |
| (iv) Please provide a clear drainage plan showing both the existing and proposal drainage facilities with the ultimate discharge point (natural drain) for reference. | Noted. Please refer to Figure 4. |
| (v) The existing natural drain, to which the applicant proposed to discharge the stormwater from the subject site | Noted. |

| | |
|---|---|
| <p>was not maintained by this office. The applicant should identify the owner of the existing drainage facilities and obtain consent from the owner prior to commencement of the proposed works. In the case that it is a local village drains, DO/YL should be consulted.</p> <p>(vi) Further to (v) above, since there is no record of the said discharge path, please provide site photos to demonstrate its presence and existing conditions.</p> <p>(vii) The cover levels and invert levels of the proposed U-channels, catchpits/sand traps should be shown on the drainage plan.</p> <p>(viii) Sand trap or provisions alike should be provided before the collected runoff is discharged to the public drainage facilities.</p> <p>(ix) Standard details should be provided to indicate the sectional details of the proposed u-channels and the catchpit/sand trap.</p> <p>(x) The development should neither obstruct overland flow nor adversely affect existing natural streams, village drains, ditches and the adjacent areas, etc.</p> <p>(xi) The applicant should consult DLO/YL and seek consent from the relevant owners for any drainage works to be carried out outside his lot boundary before commencement of the drainage works.</p> | <p>As shown in Figure 4, the discharge path is a proposed 300mm surface U-channel connecting the application site and the existing natural drain. As such, there is no site photos showing its presence.</p> <p>Noted. Please refer to Figure 4.</p> <p>Noted. Please refer to Figure 4.</p> <p>Noted. | 4 | A/YL-TYST/1082 | Temporary Warehouse for Storage of Furniture with Ancillary Office for a Period of 3 Years | 23.7.2021 | (1) |

Rejection Reason:

- (1) The application involves previously revoked planning permissions due to non-compliance with the approval conditions. Approval of the application with repeated non-compliances would set an undesirable precedent for other similar planning permissions for temporary uses, nullifying statutory planning control.

Government Departments' General Comments

1. Land Administration

Comments of the District Lands Officer/Yuen Long, Lands Department (DLO/YL, LandsD):

- no adverse comment on the application.

2. Traffic

(a) Comments of the Commissioner for Transport (C for T):

- no adverse comment on the application; and
- the local track leading to the application site (the Site) is not under her purview.

(b) Comments of the Chief Highway Engineer/New Territories West, Highways Department (CHE/NTW, HyD):

- no adverse comment on the application.

3. Environment

Comments of the Director of Environmental Protection (DEP):

- no adverse comment on the application; and
- no environmental complaint concerning the Site received in the past three years.

4. Drainage

Comments of the Chief Engineer/Mainland North, Drainage Services Department (CE/MN, DSD):

- no objection in principle to the proposed development from a drainage point of view; and
- should the Town Planning Board (the Board) consider the application acceptable from the planning point of view, approval conditions requiring submission, implementation and maintenance of a revised drainage proposal to the satisfaction of the Director of Drainage Services or of the Board should be stipulated.

5. Fire Safety

Comments of the Director of Fire Services (D of FS):

- no objection in principle to the proposal subject to fire service installations being provided to his satisfaction.

6. Building Matters

Comments of the Chief Building Surveyor/New Territories West, Buildings Department (CBS/NTW, BD):

- no objection to the application.

7. Long Term Development

(a) Comments of the Chief Engineer/Cross-Boundary Infrastructure and Development, Planning Department (CE/CID, PlanD):

- the Civil Engineering and Development Department (CEDD) and PlanD jointly commissioned the “Planning and Engineering Study for Housing Sites in Yuen Long South (YLS) – Investigation”. According to the Revised Recommended Outline Development Plan of YLS promulgated in May 2020, the Site partly falls within an area zoned “Government” and “Residential – Zone 3”; and
- the objective of YLS is to transform the degraded rural land predominantly occupied by brownfield operations including open storage yards, warehouses and rural industrial uses into housing and other uses with supporting infrastructure and community facilities, and to improve the existing environment. It is noted that the application is for temporary use for a period of 3 years. In considering the application for temporary uses, due consideration should be given on the possible implication on land clearance which would affect the future implementation of YLS.

(b) Comments of the Project Manager (West), CEDD (PM(W), CEDD):

- no objection to the application.

8. District Officer’s Comments

Comments of the District Officer (Yuen Long), Home Affairs Department (DO(YL), HAD):

- his office has not received any comments from the locals.

9. Other Departments

- Chief Engineer/Construction, Water Supplies Department (CE/C, WSD) and Commissioner of Police (C of P) have no comment on the application.

Recommended Advisory Clauses

- (a) to resolve any land issues relating to the development with the concerned owner(s) of the application site (the Site);
- (b) to note the comments of the District Lands Officer/Yuen Long, Lands Department (DLO/YL, LandsD) that:
 - (i) the Site comprises Old Schedule Agricultural Lots held under the Block Government Lease which contains the restriction that no structures are allowed to be erected without the prior approval of the Government; and
 - (ii) the lots owner(s) will need to apply to her office to permit the structure(s) to be erected or regularise any irregularities on site, if any. Besides, given the proposed use is temporary in nature, only application for regularisation or erection of temporary structure(s) will be considered. Applications for any of the above will be considered by her department acting in the capacity of the landlord or lessor at its sole discretion and there is no guarantee that such application will be approved. If such application is approved, it will be subject to such terms and conditions, including among others the payment of rent or fee, as may be imposed by her department;
- (c) to note the comments of the Commissioner for Transport (C for T) that:
 - (i) consent of the owners/managing parties of the local track should be obtained for using it as the vehicular access to the Site; and
 - (ii) sufficient space should be provided within the Site for manoeuvring of vehicles. No parking, queuing and reverse movement of vehicles on public road are allowed;
- (d) to note the comments of the Chief Highway Engineer/New Territories West, Highways Department (CHE/NTW, HyD) that:
 - (i) adequate drainage measures should be provided to prevent surface water running from the Site to the nearby public roads and drains; and
 - (ii) the access road connecting the Site with Kung Um Road is not and will not be maintained by his office. His office should not be responsible for maintaining any access connecting the Site with Kung Um Road;
- (e) to note the comments of the Director of Environmental Protection (DEP) that:

the relevant mitigation measures and requirements in the latest “Code of Practice on Handling the Environmental Aspects of Temporary Uses and Open Storage Sites” should be followed to minimise any potential environmental nuisances on the surrounding area;
- (f) to note the general comments of the Chief Engineer/Mainland North, Drainage Services Department (CE/MN, DSD) and his technical comments on the submitted drainage proposal that:
 - (i) according to figure 4, para. 1.1.6 and 1.2.2 of Annex 1, the location of the existing natural drain should be clarified and confirmed;
 - (ii) referring to para. 1.2.1 and 1.2.2 of Annex I, Figure 5 is not attached in the submitted

drainage proposal for comment;

- (iii) according to para. 1.1.5 of Annex I, it is mentioned that the adjoining land at western side of the Site is higher, however, the surface runoff is flowing to the south instead of flowing to the Site. Cross sections showing the existing and proposed ground levels of the Site with respect to the adjacent areas should be provided for review;
 - (iv) a clear drainage plan showing both the existing and proposed drainage facilities with the ultimate discharge point (natural drain) should be provided for reference;
 - (v) the existing natural drain proposed to discharge the stormwater from the Site was not maintained by his office. The owner of the existing drainage facilities should be identified and consent from the owner should be obtained prior to commencement of the proposed works. In the case that it is a local village drain, District Officer (Yuen Long) should be consulted;
 - (vi) further to (v) above, since there is no record of the said discharge path, site photos should be provided to demonstrate its presence and existing condition;
 - (vii) the cover levels and invert levels of the proposed U-channels, catchpits/sand traps should be shown on the drainage plan;
 - (viii) sand trap or provision alike should be provided before the collected runoff is discharged to the public drainage facilities;
 - (ix) standard details should be provided to indicate the sectional details of the proposed u-channel and the catchpit/sand trap;
 - (x) the development should neither obstruct overland flow nor adversely affect existing natural streams, village drains, ditches and the adjacent areas, etc; and
 - (xi) DLO/YL, LandsD should be consulted and consent from the relevant owners should be sought for any drainage works to be carried out outside your lot boundary before commencement of the drainage works;
- (g) to note the comments of the Director of Fire Services (D of FS) that:
- (i) in consideration of the design/nature of the proposal, fire service installations (FSIs) are anticipated to be required. Relevant layout plans incorporated with the proposed FSIs should be submitted to his department for approval;
 - (ii) the layout plans should be drawn to scale and depicted with dimensions and nature of occupancy, the location of where the proposed FSIs to be installed should also be clearly marked on the layout plans; and
 - (iii) if the proposed structure(s) is required to comply with the Buildings Ordinance (BO) (Cap. 123), detailed fire service requirements will be formulated upon receipt of formal submission of general building plans;
- (h) to note the comments of the Chief Building Surveyor/New Territories West, Buildings Department (CBS/NTW, BD) that:
- (i) the Site shall be provided with means of obtaining access thereto from a street and emergency vehicular access in accordance with Regulations 5 and 41D of the Building

(Planning) Regulations (B(P)R) respectively;

- (ii) the Site does not abut on a specified street of not less than 4.5m wide and its permitted development intensity shall be determined under Regulation 19(3) of the B(P)R at the building plan submission stage;
 - (iii) if the existing structures (not being a New Territories Exempted House) are erected on leased land without the approval of the Building Authority (BA), they are unauthorised building works (UBW) under the BO and should not be designated for any proposed use under the application;
 - (iv) for UBW erected on leased land, enforcement action may be taken by the BD to effect their removal in accordance with the prevailing enforcement policy against UBW as and when necessary. The granting of any planning approval should not be construed as an acceptance of any existing building works or UBW on the Site under the BO;
 - (v) before any new building works (including containers/open sheds as temporary buildings, demolition and land filling, etc.) are to be carried out on the Site, prior approval and consent of the BA should be obtained, otherwise they are UBW. An Authorised Person should be appointed as the co-ordinator for the proposed building works in accordance with the BO;
 - (vi) any temporary shelters or converted containers for office, storage, washroom or other uses considered as temporary buildings are subject to the control of Part VII of the B(P)R; and
 - (vii) detailed checking under the BO will be carried out at building plan submission stage;
- (i) to note the comments of the Project Manager (West), Civil Engineering and Development Department (PM(W), CEDD) that:

the Site falls within the boundary of the proposed Yuen Long South (YLS) Development – Stage 3. The YLS Development would provide land to meet the medium to long term housing needs of Hong Kong and the detailed implementation programme with phasing and packaging of works for YLS Development – Stage 3 is being formulated.
