- 1.1.1 The application site had been paved and occupied an area of about 1,020m<sup>2</sup>.
- 1.1.2 The application site will be occupied for three warehouses for storage of electronic goods. Warehouse were found to the south, north, west and east of the application site.

**B. Level and gradient of the application site & proposed surface channel**

- 1.1.3 The lowest point of the site is at the southeastern part which is about +16.1mPD. The highest point of the site is at the southwestern part which is about +16.5mPD.

**C. Catchment area of the proposed drainage provision at the application site**

- 1.1.4 According to Figure 4, it is noted that the land to surrounding the application site commands a lower level or about the same level as the application site except to the west of the application site. As such, an external catchment has been identified and shown in Figure 4.

**D. Particulars of the existing drainage facilities to accept the surface runoff collected at the application site**

- 1.1.5 As shown in Figure 4, an existing 2.5m wide and 2m deep open drain is found to the east of the application site. The surface runoff collected at the application site would be dissipated to the said open drain. No site formation will be carried out at the application site and the flow of surface runoff at the application site is currently dissipated to the said open drain.

## 1.2 Runoff Estimation

1.2.1 Rational method is adopted for estimating the designed run-off

$$Q = k \times i \times A / 3,600$$

Assuming that:

- i. The area of the entire catchment is approximately 3,020m<sup>2</sup>; (Figure 4)
- ii. Though the catchment is predominant rural in character, it is assumed that the value of run-off co-efficient (k) is taken as 1.

$$\text{Difference in Land Datum} = 17.9\text{m} - 16.1\text{m} = 1.8\text{m}$$

$$L = 91\text{m}$$

$$\therefore \text{Average fall} = 1.8\text{m in } 91\text{m} \text{ or } 1\text{m in } 50.56\text{m}$$

According to the Brandsby-Williams Equation adopted from the "Stormwater Drainage Manual – Planning, Design and Management" published by the Drainage Services Department (DSD),

$$\text{Time of Concentration (t}_c\text{)} = 0.14465 [ L / (H^{0.2} \times A^{0.1}) ]$$

$$t_c = 0.14465 [ 91 / (1.98^{0.2} \times 3,020^{0.1}) ]$$

$$t_c = 5.15 \text{ minutes}$$

With reference to the Intensity-Duration-Frequency Curves provided in the abovementioned manual, the mean rainfall intensity (i) for 1 in 50 recurrent flooding period is found to be 275mm/hr

$$\text{By Rational Method, } Q_1 = 1 \times 275 \times 3,020 / 3,600$$

$$\therefore Q_1 = 230.69 \text{ l/s} = 13,841.67 \text{ l/min} = 0.23\text{m}^3/\text{s}$$

In accordance with the Chart or the Rapid Design of Channels in "Geotechnical Manual for Slopes", for an approximate gradient of about 1:100 and 1:200 in order to follow the gradient of the application site, 450mm surface U-channel is considered adequate to dissipate all the stormwater accrued by the application site and adjacent land.

## 1.3 Proposed Drainage Facilities

1.3.1 Subject to the calculations in 1.2 above, it is determined that proposed 450mm concrete surface U-channel at gradient of about 1:100 & 1:200 along the site periphery is adequate to intercept storm water passing through and generated at the application site (Figure 4).

- 1.3.2 The collected stormwater will then be discharged to the existing open drain to the east of the application site. Sand trap or alike will be provided at the terminal catchpit before the stormwater is discharged to the public drainage.
- 1.3.3 All the proposed drainage facilities will be provided and maintained at the applicant's own expense. Also, sand trap and surface channel will be cleaned at regular interval to avoid the accumulation of rubbish/debris which would affect the dissipation of storm water.
- 1.3.4 All the proposed drainage facilities will be constructed and maintained at the expense of the applicant.
- 1.3.5 All proposed works at the site periphery would not obstruct the flow of surface runoff from the adjacent areas, the provision of trees and surface channel at site boundary is detailed hereunder:
- (a) Soil excavation at site periphery, although at minimal scale, is inevitably for the provision of surface channel and landscaping. In the reason that the accumulation of excavated soil at the site periphery would obstruct the free flow of the surface runoff from the surroundings, the soil will be cleared at the soonest possible after the completion of the excavation process.
  - (b) In view of that soil excavation may be continued for several working days, surface channel will be dug in short sections and all soil excavated will be cleared before the excavation of another short section.
  - (c) No leveling work will be carried at the site periphery. The level of the site periphery will be maintained during and after the works. As such, the works at the site periphery would not either alter or obstructed the flow of surface runoff from adjacent areas.
  - (d) Some openings will be provided at the toe of site hoarding so as to allow unobstructed flow of surface runoff from adjacent area.

## Annex 2 Estimated Traffic Generation

- 2.1 As shown in Figure 2, the application site is accessible via a vehicular track leading from Kung Um Road. In view of that the site is intended for warehouse use, traffic generated by the proposed development would be insignificant.
- 2.2 The estimated average traffic generation and traffic generation rate at peak hours are as follow:

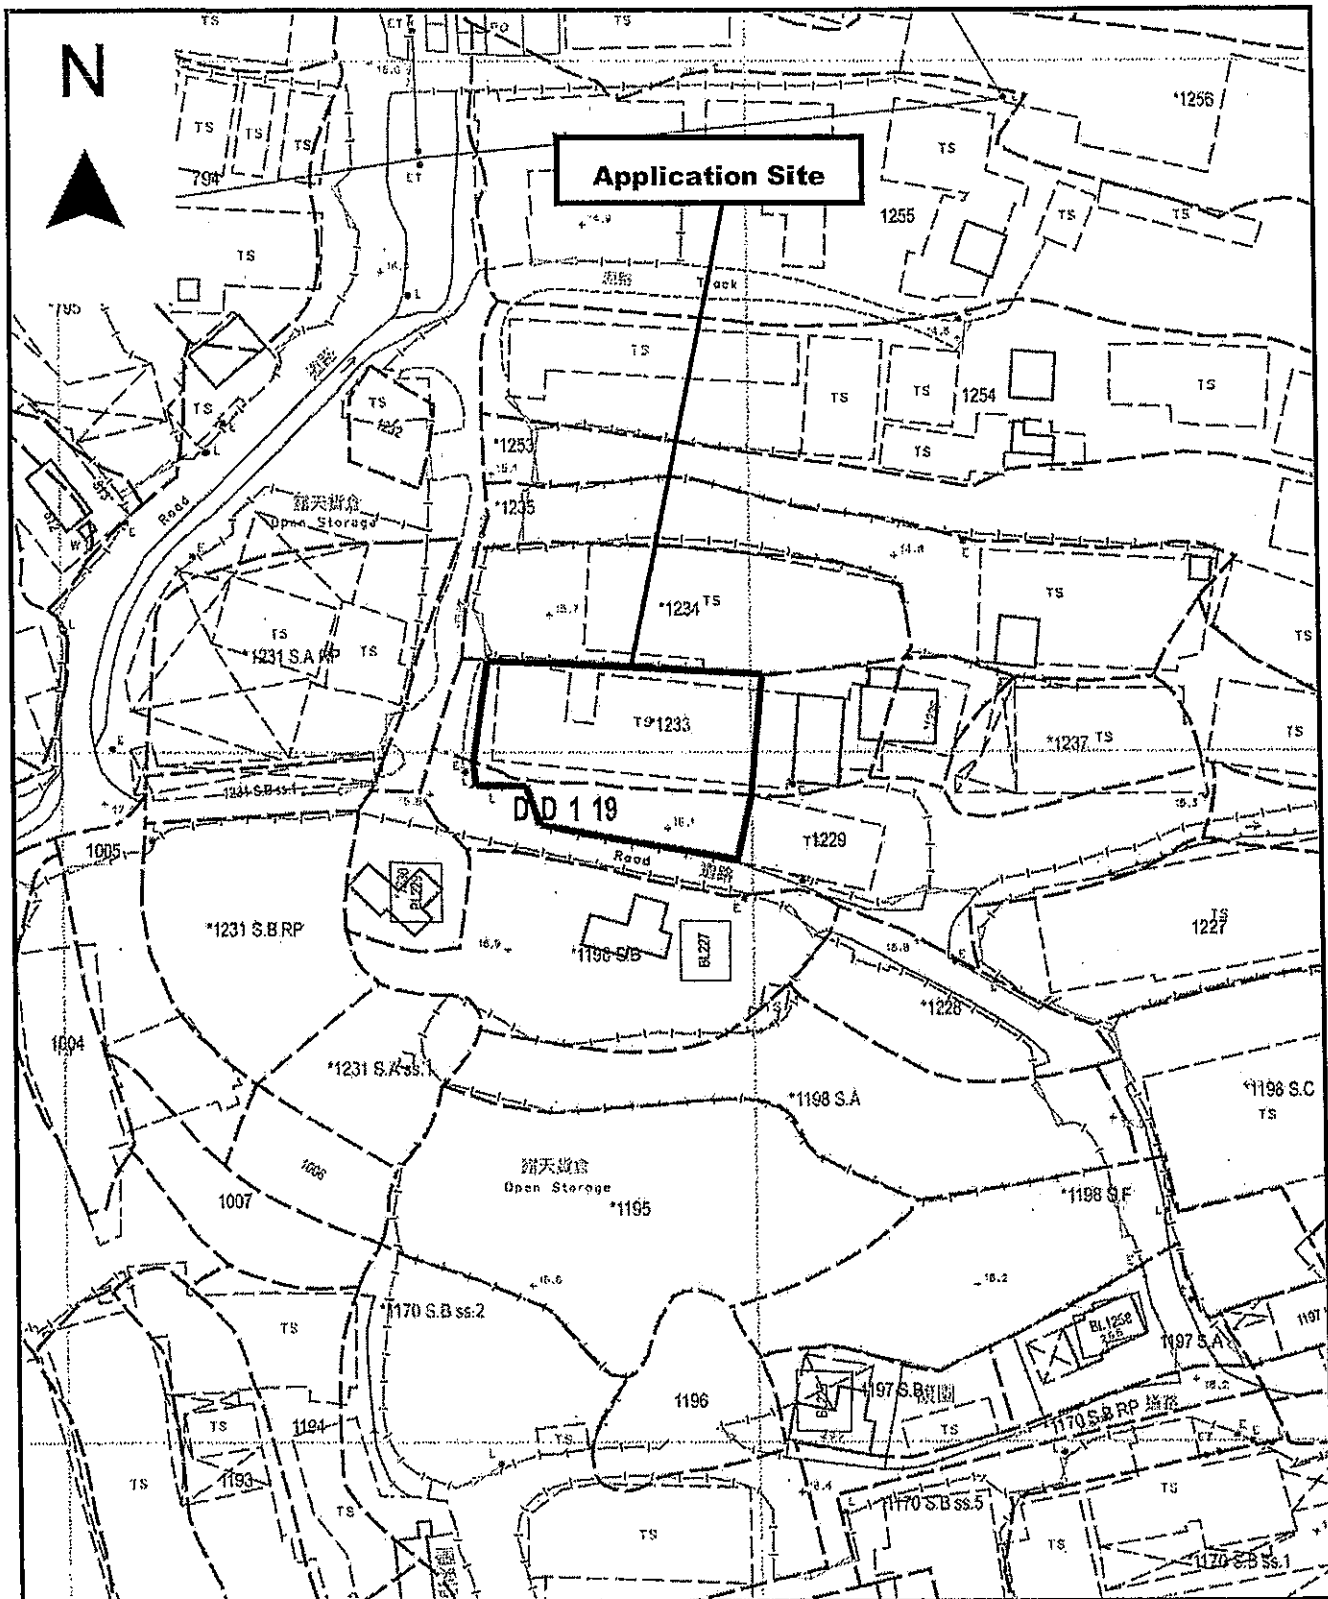

Type of Vehicle	Average Traffic Generation Rate (pcu/hr)	Average Traffic Attraction Rate (pcu/hr)	Traffic Generation Rate at Peak Hours (pcu/hr)	Traffic Attraction Rate at Peak Hours (pcu/hr)
Light goods vehicle (not exceeding 5.5 tones)	0.19	0.19	0	0

Note 1: The opening hour of the proposed development is restricted to 9:00 a.m. to 5:00 p.m. from Mondays to Saturdays. No operation will be held on Sundays and public holidays.

Note 2: The pcu of light goods vehicle is taken as 1.5.

Note 3: Morning peak is defined as 7:00a.m. to 9:00a.m. whereas afternoon peak is defined as 5:00p.m. to 7:00p.m.

- 2.3 In association with the intended purpose, adequate space for manoeuvring of exhibition materials would be provided and so queueing up of traffic would not be the result especially that the traffic generated is insignificant. The negligible increase in traffic would not aggravate the traffic condition of Kung Um Road and nearby road networks.

**Rejected Application**

	<b><u>Application No.</u></b>	<b><u>Proposed Use(s)</u></b>	<b><u>Date of Consideration (RNTPC)</u></b>	<b><u>Rejection Reason(s)</u></b>
1	A/YL-TYST/295	Temporary Marble Workshop for a Period of 3 Years	29.7.2005	(1), (2)

Rejection Reason(s):

- (1) The development was in close proximity to the residential structure to the immediate east of the site and there were residential structures along the access road leading to the site. There was insufficient information in the submission to demonstrate that the development would not have adverse environmental impact on the surrounding areas.
- (2) Approval of the application would set an undesirable precedent for other similar uses to proliferate into this part of the “Undetermined” zone on the Outline Zoning Plan. The cumulative effect of approving such similar applications would result in a general degradation of the environment of the area.

- no adverse comment on the application.

## **7. Long Term Development**

(a) Comments of the Chief Engineer/Cross-Boundary Infrastructure and Development, Planning Department (CE/CID, PlanD):

- the Civil Engineering and Development Department (CEDD) and PlanD jointly commissioned the “Planning and Engineering Study for Housing Sites in Yuen Long South (YLS) – Investigation”. According to the Revised Recommended Outline Development Plan of YLS promulgated in May 2020, the Site partly falls within an area zoned “Residential – Zone 2 (with commercial)” and “Government”; and
- the objective of YLS is to transform the degraded rural land predominantly occupied by brownfield operations including open storage yards, warehouses and rural industrial uses into housing and other uses with supporting infrastructure and community facilities, and to improve the existing environment. It is noted that the application is for temporary use for a period of 3 years. In considering the application for temporary uses, due consideration should be given on the possible implication on land clearance which would affect the future implementation of YLS.

(b) Comments of the Project Manager (West), CEDD (PM(W), CEDD):

- no objection to the application.

## **8. District Officer’s Comments**

**Recommended Advisory Clauses**

- (a) to resolve any land issues relating to the development with the concerned owner(s) of the application site (the Site);
- (b) to note the comments of the District Lands Officer/Yuen Long, Lands Department (DLO/YL, LandsD) that:
  - (i) the Site comprises Old Schedule Agricultural Lots held under the Block Government Lease which contains the restriction that no structures are allowed to be erected without the prior approval of the Government;
  - (ii) Lot No. 1229 in D.D. 119 is covered by Short Term Waiver (STW) No. 4282 to permit structure(s) erected thereon for the purpose of “Temporary warehouse and open storage of stage equipment”;
  - (iii) the Yuen Long South (YLS) Development Area programme should be taken into account when drawing up the STW boundary and layout of structures to be built on the Site; and
  - (iv) the STW holder(s) will need to apply to her office for modification of the STW conditions where appropriate and the lot owner(s) of the lot without STW will need to apply to her office to permit the structures to be erected or regularise any irregularities on site, if any. Besides, given the proposed use is temporary in nature, only application for regularisation or erection of temporary structure(s) will be considered. Applications for any of the above will be considered by her department acting in the capacity of the landlord or lessor at its sole discretion and there is no guarantee that such application will be approved. If such application is approved, it will be subject to such terms and conditions, including among others the payment of rent or fee, as may be imposed by her department;
- (c) to note the comments of the Commissioner for Transport (C for T) that:
  - (i) consent of the owners/managing parties of the local track should be obtained for using it as the vehicular access to the Site; and
  - (ii) sufficient space should be provided within the Site for manoeuvring of vehicles. No parking, queuing and reverse movement of vehicles on public road are allowed;

- (e) to note the comments of the Director of Environmental Protection (DEP) that:

the relevant mitigation measures and requirements in the latest “Code of Practice on Handling the Environmental Aspects of Temporary Uses and Open Storage Sites” should be followed to minimise any potential environmental nuisances on the surrounding area;

- (f) to note the general comments of the Chief Engineer/Mainland North, Drainage Services Department (CE/MN, DSD) and his specific comments on the submitted drainage proposal that:
- (i) the existing natural drain to which you proposed to discharge the stormwater from the Site was not maintained by his office. The owner of the existing drainage facilities should be identified and consent from the owner should be obtained prior to commencement of the proposed works. In the case that it is a local village drain, District Officer (Yuen Long) should be consulted;
  - (ii) further to (i) above, since there is no record of the said discharge path, site photos should be provided to demonstrate its presence and existing condition;
  - (iii) where walls or hoarding are erected or laid along the site boundary, adequate opening should be provided to intercept the existing overland flow passing through the Site;
  - (iv) the development should neither obstruct overland flow nor adversely affect existing natural streams, village drains, ditches and the adjacent areas, etc; and
  - (v) DLO/YL, LandsD should be consulted and consent from the relevant owners should be sought for any drainage works to be carried out outside your lot boundary before commencement of the drainage works;
- (g) to note the comments of the Director of Fire Services (D of FS) that:
- (i) in consideration of the design/nature of the proposal, fire service installations (FSIs) are anticipated to be required. Relevant layout plans incorporated with the proposed FSIs should be submitted to his department for approval;
  - (ii) the layout plans should be drawn to scale and depicted with dimensions and nature of occupancy, the location of where the proposed FSIs to be installed should also be clearly marked on the layout plans; and
  - (iii) if the proposed structure(s) is required to comply with the Buildings Ordinance (BO) (Cap. 123), detailed fire service requirements will be formulated upon receipt of formal submission of general building plans;
- (h) to note the comments of the Chief Building Surveyor/New Territories West, Buildings Department (CBS/NTW, BD) that:
- (i) the Site shall be provided with means of obtaining access thereto from a street and emergency vehicular access in accordance with Regulations 5 and 41D of the Building (Planning) Regulations (B(P)R) respectively;
  - (ii) the Site does not abut on a specified street of not less than 4.5m wide and its permitted development intensity shall be determined under Regulation 19(3) of the B(P)R at the building plan submission stage;
  - (iii) if the existing structures (not being a New Territories Exempted House) are erected on leased land without the approval of the Building Authority (BA), they are unauthorised building works (UBW) under the BO and should not be designated for any proposed use under the application;
  - (iv) for UBW erected on leased land, enforcement action may be taken by the BD to effect their removal in accordance with the prevailing enforcement policy against UBW as and

when necessary. The granting of any planning approval should not be construed as an acceptance of any existing building works or UBW on the Site under the BO;

- (v) before any new building works (including containers/open sheds as temporary buildings, demolition and land filling, etc.) are to be carried out on the Site, prior approval and consent of the BA should be obtained, otherwise they are UBW under the BO. An Authorised Person should be appointed as the co-ordinator for the proposed building works in accordance with the BO;
  - (vi) any temporary shelters or converted containers for office, storage, washroom or other uses considered as temporary buildings are subject to the control of Part VII of the B(P)R; and
  - (vii) detailed checking under the BO will be carried out at building plan submission stage;
- (i) to note the comments of the Project Manager (West), Civil Engineering and Development Department (PM(W), CEDD) that:

the Site falls within the boundary of the proposed YLS Development – Stage 3. The YLS Development would provide land to meet the medium to long term housing needs of Hong Kong and the detailed implementation programme with phasing and packaging of works for YLS Development – Stage 3 is being formulated.
