此文件在 收到。城市規劃委員會 只會在收到所有必要的資料及文件後才正式確認收到 申請的日期。

<u>Form No. S12A</u> 表格第 S12A 號

This document is received on 2024 -07- 11

The Town Planning Board will formally acknowledge the date of receipt of the application only upon receipt of all the required information and documents.

APPLICATION FOR

AMENDMENT OF PLAN UNDER SECTION 12A OF THE TOWN PLANNING ORDINANCE (CAP. 131)

根據《城市規劃條例》(第131章) 第12A條遞交的修訂圖則申請

Applicant who would like to publish the <u>notice of application</u> in local newspapers to meet one of the Town Planning Board's requirements of taking reasonable steps to obtain consent of or give notification to the current land owner, please refer to the following link regarding publishing the notice in the designated newspapers: https://www.tpb.gov.hk/en/plan application/apply.html

申請人如欲在本地報章刊登<u>申請通知</u>,以採取城市規劃委員會就取得現行土地擁有人的同意或通知現行土地擁有人所指定的其中一項合理步驟,請瀏覽以下網址有關在指定的報章刊登通知: https://www.tpb.gov.hk/tc/plan application/apply.html

General Note and Annotation for the Form

填寫表格的一般指引及註解

- * "Current land owner" means any person whose name is registered in the Land Registry as that of an owner of the land to which the application relates, as at 6 weeks before the application is made 「現行土地擁有人」指在提出申請前六星期,其姓名或名稱已在土地註冊處註冊為該申請所關乎的土地的擁有人的人
- & Please attach documentary proof 請夾附證明文件
- ^ Please insert number where appropriate 請在適當地方註明編號

Please fill "NA" for inapplicable item 請在不適用的項目填寫「不適用」

Please use separate sheets if the space provided is insufficient 如所提供的空間不足,請另頁說明

Please insert a 「 ノ」 at the appropriate box 請在適當的方格內上加上「 ノ」號

For Official Use Only 請勿填寫此欄	Application No. 申請編號	11 - VAL MA Y / I - CC / 7
	Date Received 收到日期	2024 -07- 1 1

- 1. The completed form and supporting documents (if any) should be sent to the Secretary, Town Planning Board (the Board), 15/F, North Point Government Offices, 333 Java Road, North Point, Hong Kong. 申請人須把填妥的申請表格及其他支持申請的文件(倘有),送交香港北角渣華道333號北角政府合署15樓城市規 劃委員會(下稱「委員會」)秘書收。
- 2. Please read the "Guidance Notes" carefully before you fill in this form. The document can be downloaded from the Board's website at http://www.tpb.gov.hk/. It can also be obtained from the Secretariat of the Board at 15/F, North Point Government Offices, 333 Java Road, North Point, Hong Kong (Tel: 2231 4810 or 2231 4835), and the Planning Enquiry Counters of the Planning Department (Hotline: 2231 5000) (17/F, North Point Government Offices, 333 Java Road, North Point, Hong Kong and 14/F, Sha Tin Government Offices, 1 Sheung Wo Che Road, Sha Tin, New Territories). 請先細閱《申請須知》的資料單張,然後填寫此表格。該份文件可從委員會的網頁下載(網址: http://www.tpb.gov.hk/),亦可向委員會秘書處(香港北角渣華道 333 號北角政府合署 15 樓 - 電話: 2231 4810 或 2231 4835)及規劃署的規 劃資料查詢處(熱線: 2231 5000) (香港北角渣華道 333 號北角政府合署 17 樓及新界沙田上禾輋路 1 號沙田政府合 署 14 樓)索取。
- 3. This form can be downloaded from the Board's website, and obtained from the Secretariat of the Board and the Planning Enquiry Counters of the Planning Department. The form should be typed or completed in block letters. The processing of the application may be refused if the required information or the required copies are incomplete.
 此表格可從委員會的網頁下載,亦可向委員會秘書處及規劃署的規劃資料查詢處索取。申請人須以打印方式或以正楷填寫表格。如果申請人所提交的資料或文件副本不齊全,委員會可拒絕處理有關申請。

Remark 備註

The materials submitted in this application and the Board's decision on the application would be disclosed to the public. Such materials would also be uploaded to the Board's website for browsing and free downloading by the public where the Board considers appropriate.

委員會會向公眾披露申請人所遞交的申請資料和委員會對申請所作的決定。在委員會認為合適的情況下,有關申請資料亦會上載至委員會網頁供公眾免費瀏覽及下載。

Warning 警告

Any person who knowingly or wilfully makes any statement or furnish any information in connection with this application, which is false in any material particular, shall be liable to an offence under the Crimes Ordinance. 任何人在明知或故意的情况下,就這宗申請提出在任何要項上是虛假的陳述或資料,即屬違反《刑事罪行條例》。

Statement on Personal Data 個人資料的聲明

1. The personal data submitted to the Board in this application will be used by the Secretary of the Board and Government departments for the following purposes: 委員會就這宗申請所收到的個人資料會交給委員會秘書及政府部門,以根據《城市規劃條例》及相關的城市規

劃委員會規劃指引的規定作以下用途:

- (a) the processing of this application which includes making available the name of the applicant for public inspection when making available this application for public inspection; and 處理這宗申請,包括公布這宗申請供公眾查閱,同時公布申請人的姓名供公眾查閱;以及
- (b) facilitating communication between the applicant and the Secretary of the Board/Government departments. 方便申請人與委員會秘書及政府部門之間進行聯絡。
- 2. The personal data provided by the applicant in this application may also be disclosed to other persons for the purposes mentioned in paragraph 1 above.

申請人就這宗申請提供的個人資料,或亦會向其他人士披露,以作上述第 1 段提及的用途。

3. An applicant has a right of access and correction with respect to his/her personal data as provided under the Personal Data (Privacy) Ordinance (Cap. 486). Request for personal data access and correction should be addressed to the Secretary of the Board at 15/F, North Point Government Offices, 333 Java Road, North Point, Hong Kong. 根據《個人資料(私隱)條例》(第 486 章)的規定,申請人有權查閱及更正其個人資料。如欲查閱及更正個人資料,應向委員會秘書提出有關要求,其地址為香港北角渣華道 333 號北角政府合署 15 樓。

APPLICATION FOR AMENDMENT OF PLAN UNDER SECTION 12A OF THE TOWN PLANNING ORDINANCE (CAP. 131)

根據城市規劃條例(第131章)第12A條遞交的修訂圖則申請

Development Proposal (only for indicative purpose) 擬議發展的發展計劃(只作指示用途)

Dear Sir/Madam,

Section 12A Planning Application - Request for Amendment to the Approved Cheung Chau Outline Zoning Plan No. S/I-CC/9 from "Residential (Group C) 6" Zone to "Residential (Group C) 9" Zone at Cheung Chau Inland Lot No. 4 RP, Fa Peng Knoll, Cheung Chau, Island

Pursuant to section 12A of the Town Planning Ordinance (CAP. 131), we act on behalf of our Client, *Combine Hero Properties Limited* ("the Applicant") to submit herewith a planning application for amendment of plan to the Town Planning Board to rezone the subject Lot ("the application site") from "Residential (Group C) 6" Zone to "Residential (Group C) 9" Zone on Approved Cheung Chau Outline Zoning Plan No. S/I-CC/9 for <u>Proposed House Redevelopment (New Territories Exempted Houses)</u>. In this connection, please find attached the following items for your onward processing:-

- i. 1 signed original copies of the duly completed Application Form (No. S12A);
- ii. 4 hard copies of the supporting Planning Statement with Appendices;
- iii. Signed original Authorisation Letter from the Applicant.
- iv. Documentary proof of Ownership Record from Land Registry dated 21.6.2022; and
- v. Particulars of Applicant.

Thank you for your kind attention and should you have any queries, please do not hesitate to contact our Miss Isa YUEN or Mr. Thomas LUK at 3180 7811.

Yours faithfully, For and on behalf of

Aikon Development Consultancy Limited

June 2024

EXECUTIVE SUMMARY

(In case of discrepancy between English and Chinese versions, English shall prevail)

This *Planning Statement* is submitted to the Town Planning Board ("the Board") under Section 12A of the Town Planning Ordinance to rezone the site at Cheung Chau Inland Lot No. 4 RP, Fa Peng Knoll, Cheung Chau, Island (hereinafter referred to as "the application site") from "Residential (Group C) 6" ("R(C)6") zone to "Residential (Group C) 9" ("R(C)9") zone (hereinafter referred to as "the proposed amendment") on the Approved Cheung Chau Outline Zoning Plan No. S/I-CC/9 (hereinafter referred to as "the Current OZP"). The proposed amendment is to facilitate the <u>Proposed House Redevelopment (New Territories Exempted Houses)</u> (hereinafter referred to as "the proposed redevelopment") on the application site, which covers an area of approximately 743.102 m² and fully owned by the Applicant. This *Planning Statement* serves to provide background information and planning justifications in support of the proposed redevelopment in order to facilitate the consideration by the Board.

The Applicant seeks the proposed amendment to reflect the long-established building status and to align the established redevelopment rights and entitlements since 1993 with the zoning restrictions on the Current OZP. It intends to enable the implementation of the proposed redevelopment in accordance with the Approved Building Plans in 1993, maintaining precisely the same development parameters approved.

The Applicant has intended to redevelop the application site for the proposed redevelopment since 1991, predating the gazettal of the First Cheung Chau Outline Zoning Plan in 2004 (hereinafter referred to as "the First OZP"). In 1992, a set of site formation plans in connection with the Lot was approved by the Building Authority. Subsequently, a set of building plans dated 11.1992 was approved by District Lands Office/Islands ("the Approved Building Plans") and a Certificate of Exemption for Building Works ("CoE(BW)") was issued in 1993, permitting the construction of six nos. of 3-storey New Territories Exempted Houses (NTEHs) on the application site. The Approved Building Plans and CoE, which remain valid and subsisting, have ascertained development rights for the construction of the six NTEHs, and sets out the redevelopment parameters permitted. Considering building plan approval has been sought and issuance of CoE(BW), in view of this, LandsD has further issued the Certificates of Exemption for Drainage Works ("CoE(DW)") in 2023, contingent upon fulfilling a condition related to obtaining planning permission under the Town Planning Ordinance.

The redevelopment parameters permitted under the Approved Building Plans since 1993, however, were not truly reflected by the permissible intensities under the First OZP and Current OZP since 2004. The application site has been zoned "R(C)6" with a maximum plot ratio of 0.2, a maximum site coverage of 20% and a maximum building height of 2 storeys (7.62m), leading to a discrepancy between the established redevelopment entitlements and permissible development intensity on the Current OZP. Subject to stringent statutory planning restrictions, the implementation of the proposed redevelopment is hindered despite being regarded as of right.

In this connection, the Applicant submits the current application to reflect the long-established building status and the redevelopment rights and entitlements prior to the gazattal of the First OZP, and to enable the implementation of the proposed redevelopment as originally intended.

地址 : 香港德輔道中 267-275 號龍記大廈 17 樓 1702 室

The proposed redevelopment in the current application that follows the Approved Building Plans in 1993, involves the demolition of existing houses and rebuilding of six nos. of 3-storey NTEHs, with a total Gross Floor Area of about 1,168.881m², a Plot Ratio of about 1.573, a Site Coverage of about 52.43% and a Building Height not exceeding 3 storeys or 8.23m (hereinafter referred collectively to "the proposed redevelopment parameters"). The configuration of the proposed redevelopment remains consistent with the Approved Building Plans since 1993 and the proposed redevelopment parameters do not exceed those approved by DLO/Is under CoE(BW).

The proposed amendment presents an opportunity to reconcile zoning restrictions under the Current OZP with the established redevelopment rights and entitlements under current planning regime. The proposed amendment is essential for the implementation of the proposed redevelopment by complying with relevant conditions imposed. In this connection, the Applicant submits the current application as a gesture of goodwill to facilitate timely implementation of the proposed redevelopment the soonest.

As detailed in this *Planning Statement*, the proposed amendment for proposed redevelopment is well justified on the grounds that: -

- (a) The proposed amendment aims to reflect the long-established building status and redevelopment rights and entitlements before the gazettal of the First OZP, and to reconcile zoning restrictions of the Current OZP with the permitted redevelopment entitlements;
- (b) The proposed amendment ensures compliance with conditions imposed by LandsD under the existing planning mechanism and facilitate timely implementation of the proposed redevelopment;
- (c) The nature and intensity of the proposed redevelopment fully aligns with the planning intention of "R(C)" for low-rise, low-density residential developments. The construction of six 3-storey NTEHs adheres to the principles of low-rise, low-density development, especially given that "House" use is always permitted under the Current OZP;
- (d) The proposed redevelopment at the application site is fully compatible with the surrounding environment, which is characterized by low-rise and low-density residential developments. The proposed redevelopment is considered logical and suitable at this specific locality and would help upgrade the existing environment to a more pleasant residential neighbourhood;
- (e) The proposed amendment would help unleash redevelopment potential of a longabandoned site and increase housing supply by optimising the use of valuable developable land;
- (f) The proposed amendment would facilitate the proposed redevelopment in timely addressing the building safety concerns at the application site;
- (g) The proposed redevelopment at the application site would only be financially justifiable if it exceeds the current permissible intensity which mirrors the existing intensity on the site, due to its remote location as well as high construction and demolition costs;

Address: Unit 1702, 17/F, Loon Kee Building, Nos. 267-275 Des Voeux Road Central,

Hong Kong

地址 : 香港德輔道中 267-275 號龍記大廈 17 樓 1702 室

- (h) The proposed redevelopment already demonstrated its technical feasibility in terms of building works, drainage and sewerage treatment and site formation works. Detailed submissions for the proposed redevelopment had ever been reviewed by pertinent authorities leading to the issuances of relevant Approved Building Plans, Approved Site Formation Plans, and CoEs;
- (i) The proposed redevelopment shall not pose any adverse impacts in terms of traffic, environmental, drainage, sewerage, landscape and visual aspects on the surrounding area, given the small scale of the proposed redevelopment and the thorough review processes conducted by relevant departments during the issuances of Approved Building Plans, Approved Site Formation Plans, and CoEs;
- (j) The proposed development would not induce adverse impact during construction and operation phases by following best practices and there will no intrusion to the greenbelt setting; and,
- (k) The approval of the current rezoning application will not set an undesirable precedent as the application should be assessed on its individual merits and specific considerations, which the proposed amendment initiates to implement a redevelopment with Approved Building Plans and already-issued CoEs under existing planning mechanism.

In view of the above and the list of detailed planning justifications in this Planning Statement, the Board is respectfully requested to give favorable consideration to the proposed amendment.

行政摘要

(如內文與其英文版本有差異,則以英文版本為準)

申請人根據《城市規劃條例》第 12A 條向城市規劃委員會(「城規會」)遞交是次修訂規劃地帶的規劃申請。是次規劃申請地點位於長洲花坪長洲內地段第 4 號餘段(以下簡稱「申請地點」).建議將申請地點由《長洲分區計劃大綱核准圖編號 S/I-CC/9》(以下簡稱「現行大綱圖」).已劃作「住宅(丙類)6」地帶修訂為「住宅(丙類)9」地帶(以下簡稱「擬議修訂」)。擬議修訂旨在促進申請地點上作擬議屋宇重建(新界豁免管制屋宇)(以下簡稱「擬議重建」)。申請地點佔地約 743.102 平方米·完全為申請人所有。此規劃報告書將提供是次申請的背景資料及規劃理據予城規會考慮。

申請人提出擬議修訂是為了反映自 1993 年以來長期確立的建築狀態及重建權益,讓已確立的重建權益與現行大綱圖的分區限制協調一致。同時以便在申請地點的擬議重建能夠按照 1993 年所核准建築圖則進行,並保持所批准的發展參數。

申請人自 1991 年,早於 2004 年公佈的首張長洲分區計劃大綱圖前(以下簡稱「首張大綱圖」),已有意在申請地點作擬議重建。1992 年,屋宇署批准了申請地點的地盤平整工程圖則。及後,建築圖則被地政署核准(以下簡稱「核准建築圖則」),而建築工程的豁免證明書(以下簡稱「建築工程豁免證明書」)亦於 1993 年發出,允許在申請地點上建造六棟三層高的新界豁免管制屋宇。其有效的核准建築圖則及豁免證明書,確立了有關六棟新界豁免管制屋宇的發展權益並列明重建參數上限。由於建築圖則已獲批准,而豁免證明書仍然有效,鑑於此,地政署在 2023 年進一步發出了渠務工程的豁免證明書,附帶要滿足規劃許可的條件。

然而·1993 年核准建築圖則所允許的重建參數並未真正反映在首張和現行大綱圖上所允許的發展密度上。申請地點被劃為「住宅 (丙類)6」地帶·最大地積比率為 0.2 倍·最大上蓋面積為 20%·最大建築高度為 2 層 (7.62 米)·以致重建權益與現行大綱圖的分區限制中所允許的發展密度存在差異。儘管被視為合法·但申請地點受到嚴格的法定規劃限制·最終阻礙了擬議重建的實施。

就此,申請人提交當前申請,以反映在首張大綱圖公告前己確立的建築狀態和重建權益,並使擬議重建能夠按照最初的意圖實施。擬議重建涉及拆除現有的屋宇,並重建六棟三層高的新界豁免管制屋宇,總建築面積約為 1,168.881 平方米,地積比約為 1.573,佔地面積約為 52.43%,建築高度不超過三層或8.23 米(以下簡稱「擬議重建參數」)。擬議重建的空間佈局與 1993 年的核准建築圖則完全一致,而擬議重建參數亦不多於當時屋宇及地政署和地政署所批准的發展參數上限。

擬議修訂提供了機會,以讓在當前規劃機制下,讓該大綱圖的分區限制與己確立的重建權益協調一致。 擬議修訂亦有助申請人遵守相關條件,對實施擬議重建至關重要。因此作為善意表示,申請人提交當前 申請以便盡早落實擬議重建。

Address: Unit 1702, 17/F, Loon Kee Building, Nos. 267-275 Des Voeux Road Central,

Hong Kong

地址 : 香港德輔道中 267-275 號龍記大廈 17 樓 1702 室

Tel 電話: (852) 3180 7811 Email 電郵: info@aikon.hk Fax 傳真 : (852) 3180 7611 Web 網址: www.aikon.hk Aikon Development Consultancy Ltd. 毅勤發展顧問有限公司 此規劃報告書提供規劃理據,詳列如下:

- (一) 擬議修訂旨在反映申請人在首張大綱圖刊憲前·早已確立的建築地位和所享有的重建權益·並將 現行大綱圖的分區限制與現有的重建權益協調一致;
- (二) 擬議修訂可確保在現行規劃機制下·配合和滿足地政署所定的附帶條件·以有助及早落實擬議重建:
- (三) 擬議重建在性質及密度上完全符合「住宅(丙類)」地帶發展低層、低密度住宅發展的規劃意向。 擬議重建中所興建的六幢三層高的新界豁免管制屋宇,符合低層、低密度發展的原則,尤其是考 慮到在現行大綱圖下,「屋宇」用途是經常准許的;
- (四) 擬議重建能與周圍以低層和低密度發展為特徵的住宅環境完全兼容。擬議重建在該地點被認為是 合理和適宜的。擬議重建也將有助於提升現有環境,作為舒適宜人的住宅社區;
- (五) 擬議修訂將有助釋放廢棄已久的建築物和地塊的重建潛力·並可善用珍貴的可發展土地·增加房屋供應;
- (六) 擬議修訂有助推動擬議重建以及時解決現時在申請地點的樓宇安全問題;
- (七) 由於申請地點位置極為偏遠·擬議重建涉及龐大的建築成本·因此只有在超過現行大綱圖中允許 的發展限制、容許擬議重建參數的情況下·才於財政上具合理理由進行重建;
- (八) 擬議重建在建築工程、渠務和地盤平整方面已證明技術上可行,因有關當局和部門已詳細審閱擬 議重建計劃的文件,並頒發了豁免證明書及批准建築圖則;
- (九) 鑑於擬議重建規模細小,而有關部門在簽發豁免證明書及批准建築圖則時已進行詳細的審核程序,因此擬議重建不會對周邊地區的交通、環境、排水、排污、樹木及景觀造成不良影響;
- (十) 擬議重建在施工和運營過程中將遵循最佳實踐,不會引起不利影響,並且不會入侵綠化地帶;及,
- (十一) 批准目前的改劃用途地帶申請不會開立不良先例,因為有關申請應按其個別優點和具體考慮因素來評審,而擬議修訂是為了在現有規劃機制下落實已獲批准的建築圖則。

基於擬議發展附合所有的規劃考量因素,申請人懇請城規會委員給予考慮並批准是次規劃申請。

1. INTRODUCTION

1.1 Purpose

- 1.1.1. This *Planning Statement* is submitted to the Town Planning Board ("the Board") under Section 12A of the Town Planning Ordinance (TPO) in support of an application (hereinafter referred to as "the current application") for rezoning the site at Cheung Chau Inland Lot No. 4 RP, Fa Peng Knoll, Cheung Chau, Island (hereinafter referred to as "the application site") from "Residential (Group C) 6" ("R(C)6") zone to "Residential (Group C) 9" ("R(C)9") zone (hereinafter referred to as "the proposed amendment") on the Approved Cheung Chau Outline Zoning Plan No. S/I-CC/9 (hereinafter referred to as "the Current OZP") for Proposed House Redevelopment (New Territories Exempted Houses) (hereinafter referred to as "the proposed redevelopment").
- 1.1.2. The application site has a total area of approximately 743.102m². The location of the application site is shown on **Figure 1** whilst **Figure 2** indicates the private lot that the application site involves. The application site is currently zoned "R(C)6" on the Current OZP gazetted on 24.09.2021 (**Figure 3** refers). The proposed redevelopment involves the demolition of existing houses and rebuilding six nos. of 3-storey New Territories Exempted Houses ("NTEHs") with a plot ratio of about 1.573, a site coverage of about 52.43% and a maximum building height of 3 storeys (8.23m) (hereinafter collectively referred to as "the proposed redevelopment parameters").
- 1.1.3. Aikon Development Consultancy Limited has been commissioned by *Combine Hero Properties Limited*, also the registered landowner of CCIL No.4 RP (hereinafter referred to as "the Applicant") to prepare and submit the current application and his behalf.

1.2 Rationale Behind the Current Application

- 1.2.1 The Applicant has all along intended to redevelop the application site (formerly erected by residential dwellings) for the proposed redevelopment since 1991, predating to gazettal of the First Cheung Chau Outline Zoning Plan in 2004 (hereinafter referred to as "the First OZP").
- 1.2.2 In 1991, a set of site formation plans in relation to the redevelopment proposal of six NTEHs on the application site was submitted. The proposal was considered satisfactory and subsequently approved by Building Authority on 20.3.1992 (hereinafter referred to as the "Approved Site Formation Plans") (see **Appendix 1**).
- 1.2.3 Application for Certificate of Exemption ("CoE") for Building Works was made on to Buildings and Lands Department (BLD) pursuant to the Buildings Ordinance (Application to New Territories) Ordinance, Cap 121. A set of building plans dated 27.11.1992 in relation to the redevelopment proposal of six NTEHs on the application site was approved by the District Lands Office/Islands ("DLO/Is") on 7.1.1993 ("the Approved Building Plans") (see Appendix 2). The Approved Building Plans that are with exactly the same parameters as proposed in the current application, have been registered in Land Registry under memorial no. 18090700230022 and 23021700570012 dated 07.09.2018 and 17.02.2023

respectively.

- 1.2.4 With the Approved Building Plans, a Certificate of Exemption in respect of Building Works ("CoE(BW)") was issued to the Applicant on 12.1.1993 (see **Appendix 3**) with no stipulation of validity period.
- 1.2.5 The CoE(BW) that was issued from the provisions of the Building Ordinance (Cap. 123) and the regulations made thereunder in relation to building works were subject to the following conditions:
 - The six buildings when constructed, will each be a building of not more than 3 storeys and of a height of not more than 8.23m, and will each have a total roofed-over area not exceeding 65.03m; and
 - The thickness of each load-bearing wall (a) shall, in the case of a load-bearing reinforce concrete wall be not less than 175mm; (b) or of the lowest storey shall, in the case of a load-bearing brick wall be not less than 340mm; and (c) of any high storey shall, in the case of a load-bearing brick wall to be not less than 225mm.
- 1.2.6 Due to financial constraints and a lack of compromise among shareholders, the proposed redevelopment was put on hold. The Applicant was awaiting a favourable economic environment to reactivate and commence the proposed redevelopment. The Approved Building Plans and CoE(BW), which does not specify a validity period, remain valid and in effect.
- 1.2.7 There have been **no planning restrictions for the application site until the gazettal of Outline Zoning Plan** in 2004. On 18.6.2004, the draft Cheung Chau OZP No. S/I-CC/1 (hereinafter refer to as "the First OZP") was gazetted and the application site was zoned "Residential (Group C)6". Under the First OZP, the application site is subject to a maximum plot ratio of 0.2, a maximum site coverage of 20% and a maximum building height of 2 storeys (7.62m). According to the Notes of the Current OZP, it is stipulated that no new development, or addition, alteration and/or modification to or redevelopment of an existing building shall result in a total development and/or redevelopment in excess of the maximum plot ratio, site coverage and building height specified, or the plot ratio, site coverage and height of the existing building, whichever is the greater. The permissible redevelopment parameters of the application site are not reflected in the First OZP and the application site is subject to planning restrictions since.
- 1.2.8 In 2021, the Applicant approached the LandsD and expressed their intention to proceed with the redevelopment of CCIL No. 4 RP, apply for a CoE for Drainage Works ("CoE(DW)"). LandsD has subsequently issued the CoE(DW) on 18.1.2023 (see **Appendix 4**). The CoE(DW) is subject to three conditions, and "Condition (c)" in particular provides that "no works of any kind should commence until planning permission has been issued under the Town Planning Ordinance, Chapter 131 for the proposed redevelopment of six New Territories Exemption House in accordance with the Certificate of Exemption in respect of the building works of the above lot issued on 12 January 1993." Acknowledging the need to fulfil additional requirements, particularly with the re-introduction of conditions related to Building Works in the CoE(DW), the Applicant sought legal advice regarding the imposition

of Condition (c) by the LandsD.

- 1.2.9 In sum, it is evident that there are existing Approved Building Plans for the proposed redevelopment which were issued along with the CoE(BW) since 1993. The CoE(BW) has ascertained development rights for the construction of the six NTEHs and sets out the maximum development parameters, with a total Gross Floor Area of not more than 1,170.54m², total Built-over area not more than 390.19m² and Building Height not exceeding 3 storeys or 8.23m ("hereinafter refer to as" the permitted development parameters"). The proposed development for rebuilding six 3-storey NTEHs, with Gross Floor Area of about 1,168.881m², Plot Ratio of about 1.573, Site Coverage of about 52.43%, and Building Height not exceeding 3 storeys or 8.23m, are in compliance with the entitlements established under the CoE(BW).
- 1.2.10 While LandsD has further issued the CoE(DW) in 2023, this is contingent upon fulfilling a condition related to obtaining planning permission under the Town Planning Ordinance. The application site is subject to stringent development restrictions due to the subsequently introduced planning control in 2004. The Applicant is deeply concerned that the established redevelopment rights and entitlements being deprived as the redevelopment parameters permitted under the CoE(BW) were not truly reflected by the permissible intensities under the First OZP and Current OZP, resulting in discrepancy between redevelopment rights/entitlements and permissible development intensity on the Current OZP. Subject to stringent statutory planning restrictions, the implementation of the proposed redevelopment is hindered despite being regarded as of right.
- 1.2.11 In this regard, the Applicant is submitting the current application to reflect the long-established building status and the redevelopment rights and entitlements predating the gazettal of the First OZP. The proposed amendment aims to enable the implementation of the proposed redevelopment as originally intended. The proposed redevelopment, in the current application that entirely follows the Approved Building Plans, involves demolishing existing houses and rebuilding six 3-storey NTEHs, with Gross Floor Area of about 1,168.881m², Plot Ratio of about 1.573, Site Coverage of about 52.43%, and Building Height not exceeding 3 storeys or 8.23m. The configuration of the proposed redevelopment remains consistent with the Approved Building Plans since 1993 and the proposed redevelopment parameters do not exceed the permissible development parameters approved.
- 1.2.12 The proposed amendment presents an opportunity to reconcile zoning restrictions under the Current OZP with the established redevelopment rights under the current planning regime. The proposed amendment is essential for the implementation of the proposed redevelopment by complying with relevant conditions imposed. In this connection, the Applicant submits the current application as a gesture of goodwill to facilitate the timely implementation of the proposed redevelopment the soonest.

1.3 Objective

- 1.3.1 The current application strives to achieve the following objectives: -
 - (a) To reflect the long-established building status of the application site and respect the

- development rights and entitlements bestowed upon the Applicant prior to the gazettal of the First OZP and to reconcile zoning restrictions of the Current OZP with the redevelopment rights and entitlements;
- (b) To ensures compliance with condition imposed by LandsD under the existing planning mechanism and facilitate timely implementation of the proposed redevelopment;
- (c) To redevelop the long-abandoned application site which has long been paved for residential development, into a more pleasant residential use aligning with the planning intention;
- (d) To optimize the utilization of developable land in Cheung Chau and increase housing supply, while ensuring no adverse impact on the surrounding environment.

1.4 Structure of the Planning Statement

1.4.1 This Planning Statement is divided into 6 chapters. **Chapter 1** is the above introduction outlining the purpose and background of the current application. **Chapter 2** gives background details of the site in terms of the current land use characteristics, neighboring developments. **Chapter 3** offers the planning context of the proposed redevelopment. **Chapter 4** presents the details of the proposed amendment and **Chapter 5** introduces the development proposal of the proposed redevelopment. A full list of planning justifications is given in **Chapter 6** whilst **Chapter 7** provides a concluding remark for the proposed redevelopment under the proposed amendment.

2. SITE PROFILE

2.1 Location and Current Condition of the Application Site

- 2.1.1 The application site is located at the south-eastern part of Cheung Chau, near Fa Peng Knoll at the upland area of the island. As shown on **Figures 1** and **2**, access to the site is available via local tracks branching off from Don Bosco Road to the west and Ming Fai Road to the north.
- 2.1.2 The application site has a total area of approximately 743.102m². As shown on **Figure 2** and **Illustration 1**, the application site is currently partly occupied by two existing buildings (i.e. two dilapidated houses with building heights of about 3m to 7m), which are in existence long before the gazettal of the First OZP on 18.6.2004 (**Figure 3** and **4** refers). Part of the application site is covered by vegetation in poor health, with no mature trees present. The application site's configuration remains unchanged, and the site characteristic has continued since it came into existence.

2.2 Surrounding Land Uses in the Vicinity

- 2.2.1 The application site is predominately surrounded by low-rise, low density residential developments typically ranging from 2-3 storeys high and is nestled within a greenery setting. The subject locality of the application site is considered as rural landscape character (refer to Illustration 2-I to Illustration 2-IV). To the north and northwest of the application site are some low-rise and low-density residential developments and government, institution, and community (GIC) uses, i.e. Fa Peng Knoll, Bethany Lodge and Seaview Garden of 1-3 storeys high. Further west of the application site are some residential developments and Work in Progress (WIP) site also for low-rise residential development.
- 2.2.2 To the immediate south of the application site is a private lot (i.e. CCIL No. 52) also owned by the Applicant. The eastern and further southern side of the application site is a continuous coastline facing Sham Shui Pai. In general, the application site that is located at the eastern coastal fringe of Cheung Chau is surrounded by low-density developments and rural landscape.

2.3 Land Status

- 2.3.1 The subject lot involves an area of about 743.102m², which shares the same boundary as the concerned "R(C)6" zone on the Current OZP. The subject lot is formerly part of Cheung Chau Inland Lot No. 4, which is a New Grant lot held under Government Lease. As shown in the Land Registry record, the subject lot has been held by the Applicant since 1990.
- 2.3.2 In 1993, the Applicant obtained CoE(BW) from LandsD, which permits the construction of six nos. of NTEHs of not more than 3 storeys of a height of not more than 8.23m and will each have a total roofed-over area not exceeding 65.03m. The issuance of CoE(DW) Works by LandsD also implies a general approval from LandsD, and the proposed redevelopment should comply with the Lease.

3. PLANNING CONTEXT

3.1 The Current OZP

- 3.1.1 The application site is zoned as "R(C)6" on the Current OZP gazetted on 14.9.2021. The Notes of the Current OZP stipulates that "Residential (Group C)" zone is intended primarily for low-rise, low-density residential developments where commercial uses serving the residential neighbourhood may be permitted on application to the Town Planning Board. According to the Notes of the "R(C)" zone of the OZP, 'House' use is a Column 1 use which is always permitted.
- 3.1.2 According to the Notes for R(C), "No new development, or addition, alteration and/or modification to or redevelopment of an existing building shall result in a total development and/or redevelopment in excess of the maximum plot ratio, site coverage and building height specified below, or the plot ratio, site coverage and height of the existing building, whichever is the greater", and according to the remarks for R(C)6, the maximum plot ratio is 0.2, maximum site coverage is 20% and the maximum building height is 2 storeys (7.62m).
- 3.1.3 While minor relaxation may be considered by the Board, considering the proposed redevelopment parameters exceed about 20% of the stipulated restrictions, in this connection, the Applicant seeks amendment of plan to implement the proposed redevelopment.

3.2 Similar Planning Application

3.2.1 There are similar applications for plan amendments on the Current OZP.

Case No.	Proposed Amendment	Decision
Y/I-CC/2	Rezoning from "Government,	Approved/Agreed by Rural & NT
	Institution or Community(4)" to	Planning Committee on 21.06.2013
	"Residential(Group C) 7"	
Y/I-CC/6	To rezone the application site	Approved/Agreed by Rural & NT
	from "Residential (Group C) 5" to	Planning Committee on 28.10.2016
	"Residential (Group C) 8"	

In 2016, a proposed amendment (No. Y/I-CC/6) aimed to rezone a site at Cheung Chau Inland Lot No. 21 & Ext. and 47 and Adjoining Government Land, from "Residential (Group C) 5" to "Residential (Group C) 8 for private residential development. During the 555th meeting of the Rural and New Town Planning Committee (RNTPC), the termed District Planner Officer elaborated on the background of the subzones of R(C), it was explained that "...Given the long history of Cheung Chau, the designation of different "R(C)" subzones, i.e. from "R(C)1" to "R(C)8" with a PR ranging from 0.2 to 1 and a BH of about 2 to 3 storeys high, was to reflect the development intensity of the existing residential developments and to respect the permissible development parameters under the land

leases." The amendment was subsequently approved on 28.10.2016 and the development commences with site formation works underway.

3.2.3 It is worth noting that the application site was discussed during the 555th meeting of the RNTPC, in relation to the rezoning application No. Y/I-CC/6 and its potential implication on the nearby "R(C)" sub-zones if the application was approved. According to the meeting minutes, it is noted that " ... a number of "R(C)6" sub-zones with a PR of 0.2 were located to the west of the site, and most of the buildings within those sub-zones were dilapidated and abandoned. It was possible that the landowners of those sub-zones would apply for rezoning to increase the development intensity upon redevelopment." and "...since their site areas were small, it was foreseeable that the increase in development intensity of those sites would not have a significant impact...". In this regard, approval of the proposed amendment should not create significant impact to the surrounding development or overstrain overall infrastructural capacity of Cheung Chau.

4. PROPOSED AMENDMENT TO THE CURRENT OZP

4.1 Proposed Amendment to the Current OZP

- 4.1.1 This application proposes to rezone the application site from "R(C)6" zone to "R(C)9" zone on the Approved Cheung Chau Outline Zoning Plan No. S/I-CC/9 for Proposed House Redevelopment (New Territories Exempted Houses).
- 4.1.2 The proposed amendment involves the following items to the Approved Cheung Chau Outline Zoning Plan No. S/I-CC/9:-
 - To rezone Cheung Chau Inland Lot No. 4 RP, Fa Peng Knoll, Cheung Chau, Island from "R(C)6" zone to "R(C)9" zone.
 - To impose the development restrictions of a maximum plot ratio of 1.58, a maximum site coverage of 52.43% and a maximum building height of 3 storeys (8.23m or +64mPD).
- 4.1.3 The proposed Schedule of Uses and development restrictions for the "R(C)9" zone have been enclosed in **Appendix 5**. The proposed amendment will allow the relevant Government departments to properly control the land use, development intensity and layout of the proposed redevelopment by imposing developments restrictions.

Aikon Development Consultancy Ltd. 毅勤發展顧問有限公司

5. THE DEVELOPMENT PROPOSAL

- 5.1 Proposed Site Layout, Major Development Parameters and Operation
- 5.1.1 The proposed redevelopment involves the demolition of existing houses and rebuilding six nos. of 3-storey NTEHs with a Plot Ratio of about 1.573, a Site Coverage of about 52.43%, and Building Height not exceeding 8.23m at the application site.
- 5.1.2 The Applicant who obtained Approved Building Plans along with CoE(BW), intends to redevelop the application site in accordance with the Approved Building Plans in 1993 (Appendix 2 refers). The configuration and parameters of the proposed redevelopment would be the Master Layout Plan and perspective drawings illustrating the development scheme, floor plans and section drawings of the proposed redevelopment are shown in Appendix 6.
- 5.1.3 The six 3-storey NTEHs will be arranged in a configuration around a central courtyard, with the main entrance located at the north of the application site. The entrance will seamlessly connect to the local pathway to the north and link to Don Bosco Road.
- 5.1.4 The total gross floor area (GFA) of the proposed redevelopment is about 1,168.881 m², which corresponds to a plot ratio of about 1.573. The proposed 3-storey NTEHs will be about 8.23m tall and the building height is about +63.916mPD. The floor-to-floor height for each NTEH is about 2.7m. Each house will feature an independent staircase and access.
- 5.1.5 The proposed redevelopment will accommodate about 18 households, totaling approximately 54 persons. To harmonize with the surrounding landscape, the architectural design will utilize a light-tone color scheme, aiming to avoid visual intrusion. The proposed redevelopment would incorporate sufficient landscaping, with a view to enhancing screening and integrating with the natural surroundings. Following the issuance of CoE(DW), there will be six septic tanks and soakage pits within the application site to effectively manage sewage treatment.
- 5.1.6 The proposed development parameters are summarized in **Tables 1** and **Table 2** and **3** encapsulates the covered area and GFA breakdown of the proposed redevelopment.

Table 1: Major Development Parameters of the Proposed Redevelopment

	Accountable Development Parameters*
Site Area	About 743.102 m ²
Site Courses	About 52.43%
Site Coverage	(Covered Area of about 389.627m ²)
Plot Ratio	About 1.573
GFA	About 1,168.881m ²
Number of House	Total 6
Number of Storeys	Not more than 3 Storeys
Building Height	Not more than 8.23m
	About +63.916mPD

^{*} balcony of House A, House B-1, House B-2, House C-1, House C-1, House D are exempted

Table 2: Covered Area Breakdown of the Proposed Redevelopment

	Covered Area (About) *
House A	65.028 m ²
House B - 1	65.018 m ²
House B - 2	65.018 m ²
House C - 1	65.016 m ²
House C - 2	65.016 m ²
House D	64.531 m ²
Total	389.627 m ²

^{*} balcony of House A, House B-1, House B-2, House C-1, House C are exempted

Table 3: GFA Breakdown of the Proposed Redevelopment

	GFA (About) *
House A	195.084 m ²
House B - 1	195.054 m ²
House B - 2	195.054 m ²
House C - 1	195.048 m ²
House C - 2	195.048 m ²
House D	193.593 m ²
Total	1,168.881 m ²

^{*} balcony of House A, House B-1, House B-2, House C-1, House C-1, House D are exempted

5.2 Access to the Application Site

- 5.2.1 There is no vehicular access in Cheung Chau and the application site is subject to topographic constraint, as such, provision of an Emergency Vehicular Access (EVA) with a minimum width of 4.5m render impracticable.
- 5.2.2 The application site is accessible via an existing path with an average width of 2m. The

existing path has been in place and has served the existing houses at the application site and connected to a local track and surrounding residential developments, including Fa Peng Knoll and Bethany Lodge (see **Illustration 2-II**). The proposed redevelopment would continue to make use of existing path and local track as major access.

5.3 Demolition of the Existing Buildings and Construction Works

- 5.3.1 To facilitate the proposed redevelopment, the existing houses at the application site will need to be demolished. The demolition process will adhere to best practices on-site to prevent any adverse impacts on the environment. All demolition activities, including debris storage and the handling of construction equipment and materials, will be confined within the application site, ensuring **no disturbance to the surrounding greenbelt setting**. The applicant is fully committed to safeguarding the integrity of the existing green belt.
- 5.3.2 During both the demolition and subsequent construction phases, existing local track and path will be utilized for the transportation of materials and equipment. Following the usual construction practice in Cheung Chau, the construction materials would be transported from the existing pier at the western coast of the island and transported to the application site with village vehicle. With a view to minimizing disruption to local infrastructure while optimizing resource usage, transportation trip rates will be closely monitored to minimize impacts on surrounding developments. As per Cheung Chau's customary practices, construction debris and waste will be transported by village vehicles to Cheung Chau Transfer Facility located at the north-western part of the island (see Illustration 3).

5.4 Environmental Considerations

Air Quality

- 5.4.1 Given the limited site area and the small scale of the proposed development, and the construction materials would be handled by village vehicles, it is estimated that the maximum number of construction/dump trucks on-site at a time is about 3 to 4. No excavation of land is anticipated for the proposed redevelopment. There is a minimum 20m distance between construction works area and the nearest ASRs (i.e. Fa Peng Knoll). Enveloped by dense vegetation that shield the proposed redevelopment from the surroundings, significant air quality impact is not anticipated.
- 5.4.2 While foundation and building works during the construction period would be anticipated, dust emission associated with these construction works will be limited to localised at-grade construction works. By complying with the Air Pollution Control (Construction Dust) Regulation with the implementation of sufficient dust suppression measures and good site practices, adverse air quality impact generated from the construction of the proposed redevelopment is not anticipated. The future construction of the proposed development will adopt the precast & prefabricated elements as far as applicable to minimise any unfavourable environmental impacts. Relevant government departments will be consulted upon the commencement of the proposed development. To further control dust and gaseous emissions during construction, it is recommended that specific mitigation measures be included in the contractor specifications for

implementation by the contractors involved in the project:

- Wetting by water spraying or dust suppression chemical on dusty material before loading and unloading, stockpile of dusty materials, area where breaking, excavation or earth moving activities works is carried out, and unpaved main haul road;
- Providing effective dust screens, sheeting or netting to enclose any scaffolding built around the perimeter of a building;
- Covering or sheltering any stockpile of dusty materials;
- Disposing of any dusty materials collected by fabric filters or other pollution control system in totally enclosed containers.
- Covering of dust load on vehicles before they leave the site;
- Providing water spraying system where available and applicable;
- Vehicle engines are turned off when they are not in use.
- 5.4.3 The requirements stipulated in the Air Pollution Control (Non-road Mobile Machinery) (Emission) Regulation and Air Pollution Control (Fuel Restriction) Regulations (i.e. use of ultra-low sulphur diesel) would be fulfilled to minimize the exhaust emissions from construction plants and machineries, as far as applicable. As a result, the gaseous emissions from construction plant and equipment will be minor and are not expected to cause any significant adverse air quality impacts.
- 5.4.4 No adverse odour impact is envisaged during operation phase, the septic tanks and soakage pits have been designed and sized appropriately based on the anticipated wastewater flow and loading to ensure efficient treatment and minimise the potential for odour generation. A regular maintenance and desludging program will be implemented to ensure the septic tanks are functioning properly and the accumulated sludge is removed at appropriate intervals, so as to prevent the buildup of organic matter and the subsequent generation of odorous compounds. In addition, the proposed redevelopment will include suitable landscaping and planting at the periphery to mitigate any residual odour impacts.
- 5.4.5 It is worth noting that the application site is currently zoned as "Residential (Group C) 6", and the redevelopment or construction of residential dwellings is permitted without the requirement of undertaking an environmental assessment. The proposed redevelopment is intended for the residential use, with a similar profile to the existing buildings on-site and surrounding residential developments. Therefore, it should align with the planning intention and shall not create any adverse environmental impacts during construction and operation phase, considering its nature and scale. Nonetheless, the applicant will ensure good site practices and implement suitable mitigation measures with a view to minimising any potential air quality impact.

Water Quality

- 5.4.6 Adequate consideration is given to any potential impacts on water quality that may arise from the proposed development.
- 5.4.7 The regulation of water quality in Hong Kong is governed by the Water Pollution Control Ordinance (Cap 358), 1980 ("WCPO"). The territorial waters of Hong Kong have been divided into ten Water Control Zones (WCZ) and four supplementary water control zones.

The application site lies within the Southern WCZ. The discharge of effluents is subject to regulation under the WPCO. The Technical Memorandum on Standards for Effluents Discharged into Drainage and Sewerage Systems, Inland and Coastal Waters (TM-DSS) gives guidance on the permissible effluent discharges based on the type of receiving waters (foul sewers, stormwater drains, inland and coastal waters). These limits ensure that the physical, chemical, and microbial quality of the effluents is controlled. Any sewage generated from the proposed construction and operational activities must meet the standards for effluent discharges into the foul sewers, inland waters, and coastal waters of the Southern WCZ, as specified in the TM-DSS.

- 5.4.8 Water sensitive receivers ("WSRs") are defined as those users/occupants of the aquatic/marine environment whose use of the environment could be impaired as a result of the proposed development. The proposed development in located in a rural area of Cheung Chau and does not fall within water gathering grounds. No WSRs including water intakes, ecological valuable locations, country parks, water gathering grounds, beaches or water uses for agriculture within 300m radius of the proposed redevelopment.
- 5.4.9 During the construction phase, surface runoff and drainage shall be avoided or minimised with the implementation of mitigation measures and good site practices outlined in ProPECC PN 2/23 which shall include but not limited to the following:
 - Protecting exposed soil surface by paving as practical to reduce the potential of soil erosion;
 - Covering the open stockpiles of construction materials on site with tarpaulin or similar fabric during rainstorms. Measures should be taken to prevent the washing away of construction materials, soil, silt or debris into any drainage system;
 - Planning ahead the temporary site drainage management and wastewater treatment system for collection, treatment, reuse and discharge of surface runoff and wastewater before the construction works start as far as practicable;
 - Debris and rubbish generated on site shall be collected, handled, and disposed of properly.
- 5.4.10 In addition, regarding sewage, portable toilets for construction workers on-site and good site practice would be adopted to avoid any adverse environmental impacts.
- 5.4.11 In conclusion, for construction phase, since there is no WSRs identified and does not involve any marine works, it is unlikely that the proposed development will have adverse water quality impact, given good site practices properly implemented on site by Contractor. For operation phase, with implementation of proper pre-treatment facilities as presented in section 5.4.9 and good management measures, the potential water quality impact is anticipated to be insignificant.

5.5 Provision of Drainage Facilities

5.5.1 Positioned on the hillside of southeast Cheung Chau, the application site naturally facilitates the flow of rainwater downhill to the sea. The application site has been paved and remains flat, with no history of flooding issues. Considering the small scale of the proposed redevelopment, no adverse drainage impact is anticipated by the proposed

redevelopment. Nonetheless, the proposed redevelopment will incorporate sufficient drainage facilities on-site (**Appendix 7** refers) and the detailed design of drainage would be submitted with building plans in later stage.

5.6 Provision of Sewerage Facilities

- 5.6.1 As there is no public drains and sewers in the vicinity, the proposed redevelopment includes the construction of six septic tanks and soakage pits (hereinafter referred to as "STS system") on the application site to manage sewage effectively. With a CoE(DW) issued in 2023, the proposed STS system have been reviewed by relevant government departments, ensuring adequacy for sewage treatment.
- 5.6.2 The proposed STS system has a about 80m clearance distance from the waterbodies to the east and south of the Application Site, clearance distance as stated in ProPECC PN 1/23. The STS system would be checked, maintained and sufficient distance is maintained to ensure compliance to the repaired, if necessary, before and during the operation of the proposed redevelopment. No adverse sewage impact arising from the proposed redevelopment is anticipated on the surroundings.
- 5.6.3 Upon completion of construction work of the STS systems, the Authorised Person/Registered Structural Engineer/Registered Professional Engineer will certify and submit a completion report according to the requirement stipulated under CoE(DW).

5.7 Landscape Treatment

- 5.7.1 A tree survey has been carried in June 2022 and a total of 5 nos. of trees were identified within the application site (see **Appendix 8**).
- 5.7.2 As refer to **Appendix 8**, the existing trees within application site are common tree species in Hong Kong and there are no mature trees identified (i.e. DBH more than 800mm) within the application site. The existing trees on the application site are generally in fair and poor health condition with low amenity value. As some area within the application site will be occupied by the proposed development and site formation works should be carried out, the 5 nos. of trees will be affected by the site formation works and building works inevitably. Considering trees in conflict with the proposed development are not with high amenity value and are in poor form and health, they proposed to be felled.
- 5.7.3 Nevertheless, in order to improve the landscape quality of the area, proper landscaping would be carried out and a conceptual landscape plan is presented in **Appendix 9**. It is proposed that species suitable for the location would be planted and selection of plant combination will be added providing visual gradation of the proposed development. The proposed planting will help to promote a tranquil and harmonious environment for users and provide visual amenity to the surrounding environment.
- 5.7.4 Upon approval of the proposed amendment, a full tree felling application in accordance with LAO Practice Note No. 2/2020 "Tree Preservation and Tree Removal Application for Building Development in Private Projects Compliance of Tree Preservation Clause under Lease" shall be undertaken and submitted to the relevant Government departments for approval, if deemed necessary.

5.8 Visual Context and Visual Impacts

- 5.8.1 The proposed redevelopment consists of six NTEHs with building height at about +63.916mPD, will share a similar height profile with the existing buildings (about +62.13 mPD). The proposed redevelopment with a building height of about 8.23m, which are in form of standard NTEH, are considered small scale and minimal when compared to nearby residential developments. Therefore, adverse visual impact is not anticipated.
- 5.8.2 Located at the knoll of southwest Cheung Chau, the application site is enveloped by vast dense vegetation and trees, shielding it from public view. (see **Illustration 4**). Compared to the nearby GIC facilities, namely Caritas Chan Chun Ha Field Studies Centre, Caritas Jockey Club Ming Fai Camp and Oi Fai Camp, the scale of the proposed redevelopment is minimal, hence no visual obstruction is created (**Illustration 2-I** refers).
- 5.8.3 The current locality of the application site constitutes a rural landscape character, with key visual elements comprising low-rise and low-density building blocks (low-rise residential development and GIC facilities). Within the application site, there are two dilapidated houses and majority of the area is covered by vegetation without mature trees presented. The existing visual quality of the application site could be regarded as low on average. Upon redevelopment, the application site could be restored to a pleasant low-rise residential development, which is more welcoming and aligns with the planning intention.
- 5.8.4 Additionally, sensitive design measures would be incorporated, primarily involving the use of light colour tones for the building façade to better integrate with the existing landscape. Vegetation within the application site will be provided to the extent possible to provide adequate screening effects.

5.9 Fire Safety Considerations

5.9.1 With site and topographic constraints, the provision of an EVA with a minimum width of 4.5m renders it impracticable. To ensure fire safety, the proposed development will opt for fire safety alternatives whenever necessary.

5.10 Implementation of the Proposed Development

- 5.10.1 Upon the approval of this s.12A rezoning application under the Town Planning Ordinance, the Applicant will be able to comply condition (c) under the CoE(DW) as required by Lands Department.
- 5.10.2 Considering the site formation for the proposed development does not meet the exemption criteria or the associated conditions set out in PNAP APP-56, the Applicant will submit the proposed works to Building Department for approval in the standard manner prior to commencement of site formation works. The proposed works submission should include ground investigation, retaining wall design, drainage plan (stormwater). The proposed works submission will comply with relevant requirements and to be circulated to the relevant department for review. The applicant has appointed

a registered structural engineer (RSE) to prepare relevant submissions and manage the project.

5.10.3 The Applicant will implement the proposed redevelopment strictly according to the Approved Building Plans.

6. PLANNING JUSTIFICATIONS

6.1 Reflecting the Long-Established Building Status and Respecting Redevelopment Rights and Entitlements

- 6.1.1 As outlined in the background, there is existing Approved Building Plans for the proposed redevelopment with the proposed redevelopment parameters, which were issued along with the CoE(BW) in 1993 pursuant to the Buildings Ordinance (Application to New Territories) Ordinance, Cap 121. The CoE(BW) has ascertained development rights for the construction of the six NTEHs and set out the entitlements. However, the long-established building status and the redevelopment rights and entitlements were not taken into account in the formulation of the First OZP, leading to a discrepancy between redevelopment rights/entitlements and zoning restrictions of the Current OZP. The application site, which is constrained by OZP zoning restrictions, cannot meet the permissible development intensity agreed upon by the Building and Lands Authority. This ultimately hinder the implementation of the proposed redevelopment.
- 6.1.2 The proposed amendment aims to accurately reflect the long-established building grounds and redevelopment rights/entitlements bestowed upon the Applicant prior to the gazettal of the First OZP. The proposed amendment seeks to emend zoning restrictions under the current planning regime and enable the alignment between permissible intensity under the Current OZP and the said redevelopment rights/entitlements.
- 6.2 Ensuring Compliance with the Condition Imposed and to Timely Effect the Approved Redevelopment
- 6.2.1 The proposed amendment is essential to ensures compliance with the condition stipulated by LandsD and facilitate the realization of the proposed redevelopment within existing planning mechanism. The agreement of the proposed amendment would allow implementation of the proposed development without further delay.
- 6.2.2 The proposed amendment under R(C)9 is *specifically tailored to accommodate the redevelopment rights/entitlements* of the proposed redevelopment, which the proposed redevelopment parameters and configuration are exactly the same as that in the Approved Building Plans since 199. This tailored approach ensures that the regulatory framework appropriately supports and enables the lawful realization of the project.
- 6.3 In Line with Planning Intention of R(C) Zone in Developing Low-Rise, Low Density Residential Developments
- 6.3.1 As presented in the general planning intention of the explanatory statement of the Current OZP, it is elaborated that "...future growth, primarily in the form of infill developments/redevelopments, is mainly confined to the existing village and other residential clusters...". While there are two existing houses on-site await redevelopment opportunity, the proposed amendment allows the application site to continue its residential purpose with new development form as NTEHs, aligning with the general planning intention of the Current OZP.

Aikon Development Consultancy Ltd. 毅勤發展顧問有限公司

- 6.3.2 The subject "R(C)" zone is intended primarily for low-rise, low-density residential developments. According to the Notes for the "R(C)" zone of the Current OZP, 'House' is a Column 1 use which is always permitted. **The proposed development for rebuilding six 3-storey NTEHs is in line with the "House" use**. The proposed redevelopment that are in form of standard NTEH, which are low-rise and low density, are considered appropriate.
- According to the 555th meeting minutes of the RNTPC for a proposed amendment (No. Y/I-CC/6) in 2014 to the west of the application site, the termed DPO has gave a brief introduction of the planning considerations in designating the "R(C)" sub-zones. It is expounded that "Given the long history of Cheung Chau, the designation of different "R(C)" sub-zones, i.e. from "R(C)1" to "R(C)8" with a PR ranging from 0.2 to 1 and a BH of about 2 to 3 storeys high, was to reflect the development intensity of the existing residential developments and to respect the permissible development parameters under the land lease". Considering the proposed amendment is to reflect the actual status of the site and respect the permissible development parameters and entitlements, the proposed amendment is considered in line with the planning intention of "R(C)" zone.

6.4 Compatible with the Surrounding Land Use Characteristics and Upgrading the Existing Environment

- 6.4.1 The application site is currently occupied by two dilapidated houses and surrounded by low-rise and low-density development in the vicinity. The proposed redevelopment for six 3-storey NTEHs with a plot ratio of about 1.573 would not result in bulky residential structures and is **entirely compatible to the scale of the adjoining low-rise residential developments to its north and west.** Compared to the surrounding residential environment, the Fa Ping Knoll and Seaview Garden involves a larger footprint than the proposed redevelopment. There is also working-in progress residential development to the south of the application site.
- 6.4.2 Located at Fa Peng Knoll where there is abundance of greenery, the proposed redevelopment fit in well with the surrounding natural environment without an overbearing development intensity. In general, the proposed redevelopment is considered not incompatible with the surroundings.
- 6.4.3 Furthermore, the proposed redevelopment that **replaces the existing ruined structures**, would transform the application site to a more pleasant residential use aligning with the planning intention and compatible with surrounding residential neighbourhood.

6.5 Unleash Development Opportunities and Optimize the Use of the Application Site

6.5.1 The existing dilapidated houses on-site have long been abandoned and awaiting opportunities for redevelopment as low-rise and low-density residential development, as stipulated in the current OZP. Being the sole registered owner of the application site, the Applicant is willing to invest in better utilising the land for redevelopment instead of being neglected and left vacant. The proposed redevelopment as low-rise and low-density NTEHs is considered the best option in capitalising development potential and allow efficient use

of scarce land resources. The proposed amendment with the proposed redevelopment parameters would provide additional housing supply and make efficient use of developable land in Cheung Chau, which is in line with government policy and hence has planning merits.

6.6 Ensuring Building Safety

6.6.1 The existing houses have long been abandoned for an extended period, with severe dilapidation evident (see **Illustration 1-I**). As shown in illustration, these structures have deteriorated significantly, posing a risk to building safety. It is imperative to initiate timely redevelopment efforts, partially before the onset of rainy and monsoon reasons, to mitigate potential hazards. The proposed amendment provides a good opportunity to incentivise redevelopment to safeguard building safety.

6.7 Ensuring Financial Viability of the Proposed Development

6.7.1 The proposed redevelopment located at the knoll of Cheung Chau, demands substantial financial resources for site formation, demolition, and construction, coupled with significant time and human resources investments. However, the current plot ratio, which mirrors that of the existing houses, proves insufficient to fund the redevelopment project, resulting in the application site being abandoned for decades. Given the granted development rights and entitlements, the applicant is seeking a plan amendment to allow an increase in development intensity, thus enabling the financing of the proposed redevelopment.

6.8 Feasible Redevelopment with Approval Building Plans and CoEs

6.8.1 Apart from the fact the application site has been formed and paved for similar residential use, the proposed redevelopment exhibits technical feasibility in terms of building works, sewerage, drainage, and site formation works. Detailed submissions have been meticulously reviewed by pertinent authorities, leading to the granting of CoEs. The applicant will **strictly follow the Approved Building Plans for implementation**. To carry out site formation works, the Applicant will submit the proposed works to Building Department for approval in the standard manner prior to commencement of site formation works. The applicant has appointed a registered structural engineer (RSE) to prepare relevant submissions and manage the project. Considering site formation plans was previously approved, there is no insurmountable issue for the concerned site formation works.

6.9 No Intrusion to Greenbelt Setting and No Adverse Environmental Impact

- 6.9.1 As presented in section 5.3, the proposed redevelopment would adopt best on-site practice during demolition and construction phases. All construction works will be confined within the application site and there would be no disturbance to the surrounding greenbelt setting.
- 6.9.2 Good site practices and relevant guidelines, where applicable, would be strictly followed during construction phase and the Applicant is well prepared to implement mitigation measures to alleviate air quality impact during construction and operation phase where

- applicable. The future construction of the proposed redevelopment will seek to adopt the precast and prefabricated elements for the new buildings to minimise any unfavourable environmental impacts. Relevant government departments will be consulted upon the commencement of the proposed development. As the proposed redevelopment is non-polluting in nature, it shall not in any sense pose adverse noise or odour impact. Furthermore, the proposed redevelopment serving 18 additional household would not induce other significant adverse environmental impact.
- 6.9.3 Since there is no WSRs identified and does not involve any marine works, it is unlikely that the proposed development will have adverse water quality impact, given good site practices properly implemented on site by Contractor. For operation phase, with implementation of proper pre-treatment facilities as presented in section 5.4 and good management measures, the potential water quality impact is anticipated to be insignificant.

6.10 No Adverse Traffic, Visual, Landscape, Sewerage, Drainage and Infrastructure Impacts

- 6.10.1 From traffic point of view, as public vehicles were prohibited in Cheung Chau, future access of the residents will primarily be on foot. The residents will share the existing local roads (Don Bosco Road and Fa Ping Road) with nearby residential developments. Due to the small scale of the proposed redevelopment and about 18 more additional households, no adverse impacts in terms of traffic are anticipated.
- 6.10.2 From visual point of view, as illustrated in Illustration 2-II and 2-III, the application site is surrounded by dense vegetation, rendering it almost invisible from surrounding residential developments and public view. The surrounding residential development, namely, Fa Ping knoll, with their windows facing another side to the sea, should not be obstructed by the proposed redevelopment. Considered small scale of the proposed development, no visual intrusion is anticipated.
- 6.10.3 From landscape point of view, there are no mature trees within application site and the existing vegetation is in poor form and poor health. In this connection, there is no adverse impact from tree preservation point of view. Nevertheless, the applicant intends to plant species suitable for the location within the application site as far as applicable, aiming to achieve a better screening effect and harmonizing with the surrounding greenbelt setting.
- 6.10.4 The development of NTEHs is subject to the scrutiny by the LandsD. The prior issuance of CoEs, particularly regarding drainage, sewerage and site formation underscores the meticulous consideration given to drainage, sewerage and geotechnical factors.
- 6.10.5 From infrastructural capacity point of view, as presented in para. 3.2.3, the termed DPO mentioned that "...since their site areas were small, it was foreseeable that the increase in development intensity of those sites would not have a significant impact...". In this regard, approval of the proposed amendment should not create significant impact and overstrain overall infrastructural capacity. With insignificant increase in population, the proposed redevelopment is unlikely to overstrain the overall provision of open space and government, institution, and community facilities in Cheung Chau.

6.10.6 Given the small scale of the proposed redevelopment, and Approval Building Plan with CoE(BW), CoE(DW) have been obtained in prior, coupled with the thorough review and approval processes conducted by relevant departments, the proposed redevelopment is not anticipated to pose any adverse impacts on traffic, environmental, sewerage, drainage, visual or infrastructure aspects within the surrounding areas.

6.11 Not Setting an Undesirable Precedent considering individual merits and other specific considerations

6.11.1 Considering individual merits of the proposed amendment, it is considered as an exception to reflect the permissible development rights and respect existing entitlements under statutory planning framework. In addition, the proposed amendment is tailored made to the valid entitlement of the proposed redevelopment, hence approval of the current rezoning application would not set an undesirable precedent for other similar rezoning applications in the current OZP as the current application to the Board should be assessed on its individual merits and other specific considerations.

7 CONCLUSION

- 7.1.1 This Planning Statement is submitted to the Board under Section 12A of the Town Planning Ordinance to rezone the site at the application site from "R(C)6" zone to "R(C)9" zone on the Approved Cheung Chau Outline Zoning Plan No. S/I-CC/9. The proposed amendment is to facilitate the **Proposed House Redevelopment (New Territories Exempted Houses)** on the application site, which covers an area of approximately 743.102 m² and fully owned by the Applicant. The Planning Statement serves to provide background information and planning justifications in support of the proposed redevelopment in order to facilitate the consideration by the Board.
- 7.1.2 The Applicant seeks the proposed amendment to reflect the long-established building status and to align the established redevelopment rights and entitlements since 1993 with the zoning restrictions on the Current OZP. It intends to enable the implementation of the proposed redevelopment in accordance with the Approved Building Plans in 1993, maintaining precisely the same development parameters approved.
- 7.1.3 The Applicant has intended to redevelop the application site for the proposed redevelopment since 1991, predating the gazettal of the First OZP. In 1992, a set of site formation plans in connection with the Lot was approved by the Building Authority. Subsequently, the Approved Building Plans and a CoE(BW) was issued in 1993, permitting the construction of six nos. of 3-storey NTEHs on the application site. The Approved Building Plans and CoE, which remain valid and subsisting, have ascertained development rights for the construction of the six NTEHs, and sets out the redevelopment parameters permitted. Considering building plan approval has been sought and issuance of CoE(BW), in view of this, LandsD has further issued the CoE(DW) in 2023, contingent upon fulfilling a condition related to obtaining planning permission under the Town Planning Ordinance.
- 7.1.4 The redevelopment parameters permitted under the Approved Building Plans since 1993, however, were not truly reflected by the permissible intensities under the First OZP and Current OZP since 2004. The application site has been zoned "R(C)6" with a maximum plot ratio of 0.2, a maximum site coverage of 20% and a maximum building height of 2 storeys (7.62m), leading to a discrepancy between the established redevelopment entitlements and permissible development intensity on the Current OZP. Subject to stringent statutory planning restrictions, the implementation of the proposed redevelopment is hindered despite being regarded as of right.
- 7.1.5 In this connection, the Applicant submits the current application to reflect the long-established building status and the redevelopment rights and entitlements prior to the gazattal of the First OZP, and to enable the implementation of the proposed redevelopment as originally intended. The proposed redevelopment in the current application that follows the Approved Building Plans in 1993, involves the demolition of existing houses and rebuilding of six nos. of 3-storey NTEHs, with a total Gross Floor Area of about 1,168.881m2, a Plot Ratio of about 1.573, a Site Coverage of about 52.43% and a Building Height not exceeding 3 storeys or 8.23m. The configuration of the proposed redevelopment remains consistent with the Approved Building Plans since 1993 and the proposed redevelopment parameters do not exceed those approved by DLO/Is under CoE(BW).

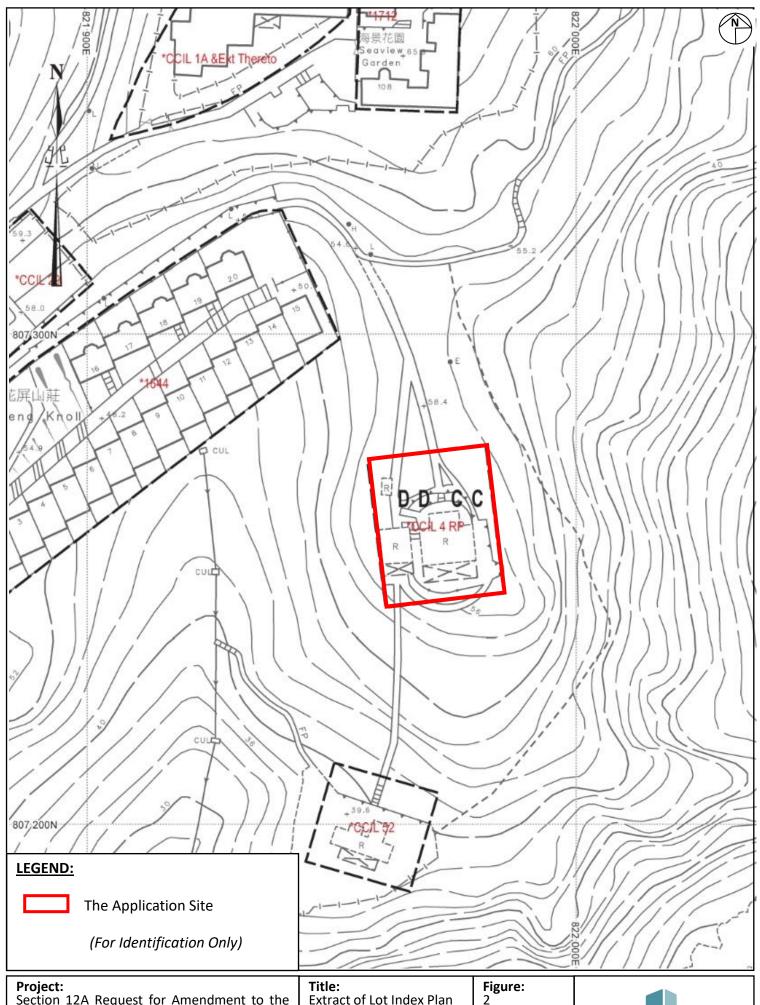

- 7.1.6 The proposed amendment presents an opportunity to reconcile zoning restrictions under the Current OZP with the established redevelopment rights and entitlements under current planning regime. The proposed amendment is essential for the implementation of the proposed redevelopment by complying with relevant conditions imposed. In this connection, the Applicant submits the current application as a gesture of goodwill to facilitate timely implementation of the proposed redevelopment the soonest.
- 7.1.7 As detailed in this *Planning Statement*, the proposed amendment for proposed redevelopment is well justified on the grounds that: -
 - a) The proposed amendment aims to reflect the long-established building status and redevelopment rights and entitlements before the gazettal of the First OZP, and to reconcile zoning restrictions of the Current OZP with the permitted redevelopment entitlements;
 - The proposed amendment ensures compliance with conditions imposed by LandsD under the existing planning mechanism and facilitate timely implementation of the proposed redevelopment;
 - c) The nature and intensity of the proposed redevelopment fully aligns with the planning intention of "R(C)" for low-rise, low-density residential developments. The construction of six 3-storey NTEHs adheres to the principles of low-rise, low-density development, especially given that "House" use is always permitted under the Current OZP;
 - d) The proposed redevelopment at the application site is fully compatible with the surrounding environment, which is characterized by low-rise and low-density residential developments. The proposed redevelopment is considered logical and suitable at this specific locality and would help upgrade the existing environment to a more pleasant residential neighbourhood;
 - e) The proposed amendment would help unleash redevelopment potential of a longabandoned site and increase housing supply by optimising the use of valuable developable land;
 - f) The proposed amendment would facilitate the proposed redevelopment in timely addressing the building safety concerns at the application site;
 - g) The proposed redevelopment at the application site would only be financially justifiable if it exceeds the current permissible intensity which mirrors the existing intensity on the site, due to its remote location as well as high construction and demolition costs;
 - h) The proposed redevelopment already demonstrated its technical feasibility in terms of building works, drainage and sewerage treatment and site formation works. Detailed submissions for the proposed redevelopment had ever been reviewed by pertinent authorities leading to the issuances of relevant Approved Building Plans, Approved Site Formation Plans, and CoEs;

- i) The proposed redevelopment shall not pose any adverse impacts in terms of traffic, environmental, drainage, sewerage, landscape and visual aspects on the surrounding area, given the small scale of the proposed redevelopment and the thorough review processes conducted by relevant departments during the issuances of Approved Building Plans, Approved Site Formation Plans, and CoEs;
- j) The proposed development would not induce adverse impact during construction and operation phases by following best practices and there will no intrusion to the greenbelt setting; and,
- k) The approval of the current rezoning application will not set an undesirable precedent as the application should be assessed on its individual merits and specific considerations, which the proposed amendment initiates to implement a redevelopment with Approved Building Plans and already-issued CoEs under existing planning mechanism.
- 7.1.8 In view of the above and the list of detailed planning justifications in this Planning Statement, the Board is respectfully requested to give favorable consideration to the proposed amendment.

來函檔號 Your Ref:

Mr. Thomas K.S. Ng. 31/F., 108 Gloucester Road, Hong Kong

Dear Sir,

Cheung Chau - C.C.I.L. 4 R.P. & 52

I refer to your application dated 10th January, 1992 (received on 13.1.92) for approval of proposals in respect of site formation

- 2. Your submission has been checked in accordance with the contents of Practice Note for Authorised Persons and Registered Structural Engineers 99 and on this basis I am satisfied that your proposals may be approved.
- 3. However, you are advised that such limited checking emphasises your duties and responsibilities to ensure full compliance with the Buildings Ordinance and I must stress the importance the Building Authority attaches to the proper assumption of this responsibility by Authorised Persons and Registered Structural Engineers. It is self-evident that any alteration to a building during erection or on completion in order to correct contravening building works costs money and causes delays. Where the Building Authority is of the opinion that there has been a failure in a statutory responsibility appropriate action may be taken.
- 4. Form 12 indicating approval to your proposals together with one set of plans is enclosed. Your client has been sent a copy of this letter but I would request that you ensure that the contents are understood by him.
- 5. This approval should not be deemed to confer any title to land or to act as a waiver of any term in any lease or licence. Section 14(2) of the Buildings Ordinance refers.
- All surplus copies of your building plans are returned herewith.

- Pl. see attached sheet -

DLO/Islands

Yours faithfully,

Kenneth K.W. Iai.

for Building Authority for Building Authority

HNY/rl

BLND 194 (SL9-BOO) (Rev. 6/90)

- It is noted that you have amended the plans on 10th March,
 1992.
- 8. This approval is subject to the following conditions imposed under the Buildings Ordinance:

 - B) Section 17(1)7, prior to consent, stability analysis of the natural slopes affecting or affected by the building works should be submitted. Consent will not be given until the stability analyses show demonstration of compliance with Building (Construction) Regulation 20.
- 9. You are required to seek permission from the appropriate authority(ies) prior to commencement of works outside the lot boundaries.
- 10. The Chief Engineer/HK & Islands, DSD (Mr. W. L. Chan, tel. 805 6321) has commented that:
 - a) The proposed storm-water drains can only be connected to existing stream-course(s). The Authorised Person is required to identify those existing stream-course to which connection are proposed.
 - b) The proposed storm-water drains outside the lot boundary have to be constructed by the developer to current Government Standards and to the satisfaction of this Division.
- 11. The District Lands Officer/Islands (Mr. A.K.L. Lo, tel. 852 4284 has commented that:
 - a) The U-channel and footpath to be erected will affect the area held under a Government Land Licence No. C13244 for the purpose of cultivation only. An Application from the licensee is required before the proposed work can be considered further.
 - b) Part of the proposed works are carried on Government land. A special licence issued by this office is necessary.

- 12. The Project A nager (Mr. C. Kwok, Tel. No. 882 7237) has commented that:
 - a) A 225 U-channel at the south-western corner cutting across the slope near cut line V-V and U-U is undesirable.
 - b) Details of the discharges should be provided and the capacity of the stream course or valley at the north-eastern corner should be checked before connecting the outfall to it.
- 13. You are also advised to contact the Director of Agriculture & Fishing Department for the removal or cutting of the mature trees.

REMARKS ON SEPARATE SUBMISSIONS

- SITE FORMATION PLAN TO BE SUBMITTED SEPARATELY TO THE BUILDING AUTHORITY.
- 2 DRAINAGE PLANS TO BE SUBMITTED SEPARATELY WITH APPLICATION FOR CERTIFICATION OF EXEMPTION IN RESPECT OF DRAINAGE WORKS UNDER THE PROVISIONS OF B.O.(APPLICATION TO N.T.).
- APPLICATION FOR SHORT TERM TEMNICY IN RESPECT OF THE TWO PARCELS OF LAND FOR GARDEN AND AMENITY USE AS NOICATED ON THE BLOCK PLAN WILL BE SUBMITTED SEPARATELY IN DUE COURSE.

GENERAL NOTES

- 1. ALL BRICKWORK AND MASONRY TO BE BUILT IN 1 : 3 CEMENT MORTAR
- 2. ALL FOUNDATIONS TO BE REST ON SOLID GROUND (ON PILES IF NECESSARY)
- 3. ALL PARAPETS TO BE MIN. 1100H ABOVE FINISHED FLOOR LEVEL.

- 9. ALL DOUBNISONS SHOWN IN DRAWINGS ARE STRUCTURAL AND IN "mm".
- 10. THE WATER TANKS ON THE MAIN ROOF SHOULD NOT EXCEED $2.0\mathrm{m}^2$ in area and 1.22m in Height.
- 11. THE BUILDINGS ARE INDEPENDENT FROM ONE AND OTHER AND ARE NOT STRUCTURALLY CONNECTED.
- 12. NO EAVES TO BE PROVIDED AT ALL BUILDING.
- 13. ALL A/C HOOD SHOULD NOT EXCEED 0.61m IN DEPTH.
- 14. ALL LOAD BEARING WALL SHOULD NOT LESS THAN 175mm THK.
 AND NON LOAD BEARING WALL SHOULD 100mm THK.

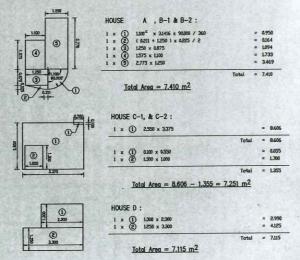

FIRE SERVICES REQUIREMENTS

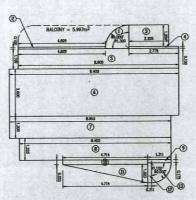

- PORTABLE FIRE EXTINGUISHERS SHALL BE OF THE TYPE AND CAPACITY AND BE PROVIDED AT POSITIONS AS INDICATED ON PLANS.
- 2 NO STORAGE OF DANGEROUS GOODS WITHOUT TO AUTHORITY OF THE DIRECTOR OF FIRE SERVICES.
- 3 BLECTRICAL CIRCUITS TO BE PROTECTED BY MINIATURE CIRCUIT BREAKERS IN UEU OF CONVENTIONAL RE-WIREABLE FUSES.
- ALL LUNKOS FOR ACOUSTIC AND THERMAL INSULATION PURPOSES IN DUCTINGS AND CONCEALED LOCATIONS SHALL BE OF CLASS 1 OR 2 FAITE OF SURFACE SPREAD OF FLAME AS PER BRITISH STANDARD 478 : PART 7: 1971 (REPAIRED 1987) OR ITS INTERNATIONAL EQUIVALENT, OR BE BROUGHT UP TO THAT STANDARD BY USE OF AN APPROVED FIRE RETARDANT PRODUCT.
- 5 ALL ISHNOS FOR ACUSTIC, THERMAL INSTALTION AND DECORATIVE PURPOSES WITHIN PROTECTED MEANS OF ESCAPE SHALL BE OF CLASS 1 OR 2 RATE OF SURFACE SPREAD OF FLAME AS PER BRITISH STANDARD 478: FART 7: 1971 (REVISED 1897) OR 115 MITERALTOMAL COMPLIANT, OR SE REPOLATE IN TO THAT STANDARD BY USE OF AN APPROVED FIRE RETARDANT PRODUCT.

JOB/141

Combine Hero Properties Ltd., c/o Prudential Surveyors International Ltd., 3101-3105 Dah Sing Financial Centra, 108, Gloucester Road, Hong Kong.

Dear Sirs,

Proposed Development Cheung Chau Inland Lot No. 4 R.P.

I refer to your application for development of the above lot.

I am pleased to advise that your development proposals in Drawing Nos. B1-B5 dated 27 November 1992 have been examined and are found acceptable. The Certificate of Exemption for building works is issued to you. One set of the submitted plan approved by District Lands Officer/Islands is returned herewith.

Regarding drainage work, you should contact the Drainage Services Department for connection to the public sewer in the usual manner. On completion of the new development, you should appoint a Chartered Surveyor to certify that the development is erected within the boundaries of the lot.

I must emphasize that unless the works complied with the lease condition, a Certificate of Compliance cannot be issued.

Yours faithfully,

for District Lands Officer, Islands

Dear Sirs,

Certificate of Exemption in respect of Building Works Cheung Chau Inland Lot No. 4 R.P.

This Certificate of Exemption is given pursuant to Section 5 of the Buildings Ordinance (Application to the New Territories) Ordinance (Chapter 121) to exempt the buildings to be erected on the above lot from the provisions of the Buildings Ordinance (Cap. 123) and the regulations made thereunder in relation to building works, subject to the conditions contained or referred to in the attached schedule and the terms and conditions governing the lot.

The Government reserves the right to revoke and cancel this Certificate in the event of any breach of any of the aforementioned conditions in which case you would be required to apply formally to the Building Authority for approval of plans. The Government may also be entitled to take enforcement action under the lease.

Yours faithfully,

(I. J. MacNaughton)

Dear Sirs,

Certificate of Exemption in respect of Drainage Works The Remaining Portion of Cheung Chau Inland Lot No. 4

This Certificate of Exemption is given pursuant to Section 6(b) of the Buildings Ordinance (Application to the New Territories) Ordinance, Chapter 121 to exempt the buildings to be erected on the above lot from the provisions of the Buildings Ordinance, Chapter 123 and the regulations made thereunder in relation to drainage works, subject to:

- compliance with the Drainage and Health Requirements for Village Type Houses at Annex I and the technical requirements as contained in the drawings EP 50/D1/5/01 and (a) EP 50/D1/5/02 of ProPECC PN 5/93 of Environmental Protection Department at Annex II, and that the septic tanks and soakage pit systems shall be constructed in the locations as indicated on the plan at Annex III;
- no works should commence until you have completed satisfactorily the site formation (b) works in pursuance of the Buildings Ordinance, Chapter 123. Upon completion of the site formation works, you should notify the Building Authority and apply for his acceptance of your completion of the site formation works. Prior to your commencement of drainage works, you should submit to this office the document showing the Building Authority's acceptance of your completion of site formation works; and
- no works of any kind should commence until planning permission has been issued under (c) the Town Planning Ordinance, Chapter 131 for the proposed redevelopment of six New Territories Exempted Houses in accordance with the Certificate of Exemption in respect of the building works of the above lot issued on 12 January 1993.

You are required to appoint an Authorized Person / Registered Structural Engineer / Registered Professional Engineer to monitor the construction of the septic tanks and soakage pit systems.

Upon completion of construction work of the septic tanks and soakage pit systems, the Authorized Person / Registered Structural Engineer / Registered Professional Engineer shall certify and submit to me a construction completion report as per the form at Annex IV.

The Government of the Hong Kong Special Administrative Region reserves the right to revoke and cancel this Certificate of Exemption should there be any breach of these requirements and in that event you would be required formally to submit plans to the Building Authority under the terms of the Buildings Ordinance, Chapter 123 in respect of the drainage works.

Yours faithfully,

(KFLING)

District Lands Officer, Islands

Encls.

Certificate No. IS/535/CC/IV/92(DW)

Drainage and Health Requirements for Village Type Houses

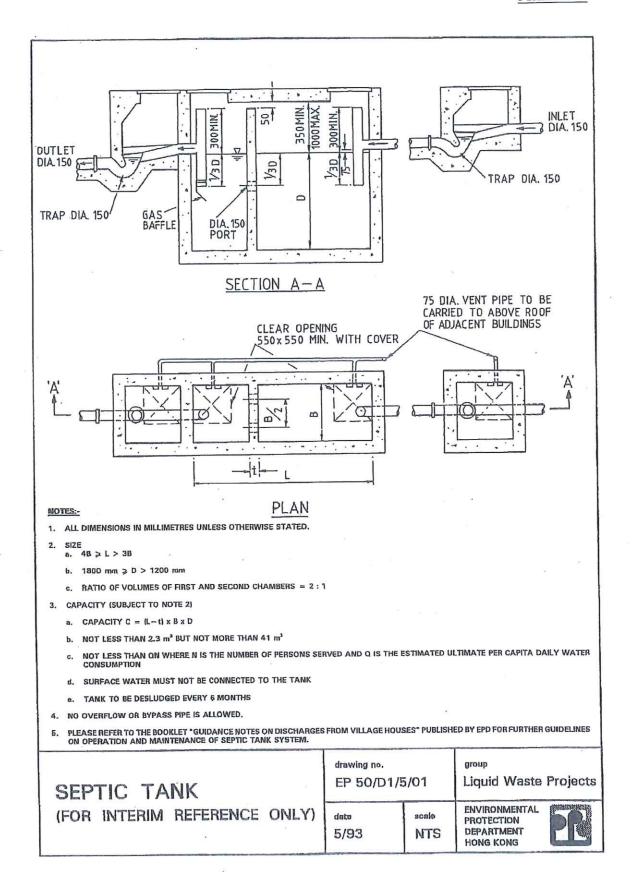

(for cases where EPD's ProPECC PN 5/93 for the construction of septic tank and soakage pit system is adopted)

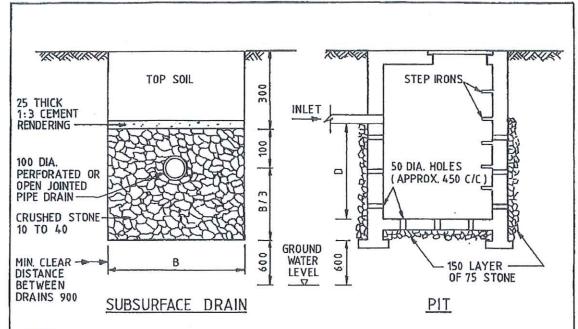

Under the N.T. Small House Policy every village type house shall be provided with soil fitment (i.e. water-closet fitment, trough water closet, urinal, slop sink, bidet or any similar fitment). There shall also be facilities for the proper disposal of soil (i.e. discharge from soil fitment) and waste (i.e. discharge from bath, lavatory basin, kitchen basin). In areas where there is public sewer provided for the carriage of foul water, soil and waste should be conducted to such public sewer (after being approved by the Building Authority). In areas where there is no such public sewer, private sewage disposal system should be constructed to dispose off soil and waste.

The septic tank shall be maintained in proper working order at all times by the house owner / occupier and periodic desludging should be carried out when required. If any septic tank is found to have discharged wastewater to the communal surface water drainage system or streams etc., enforcement action will be taken by Environmental Protection Department under the Water Pollution Control Ordinance, Cap. 358.

In addition to the above requirements it is recommended that :-

- (1) Kitchen accommodation shall be provided in the premises.
- (2) All internal wall surfaces of kitchen, bathroom and latrine accommodation should be imperviously tiled or surfaced with smooth impervious material to a height of not less than 1.22 metres.
- (3) Openings or windows which can be opened to the open air shall not be less than 1/10th of the floor area.

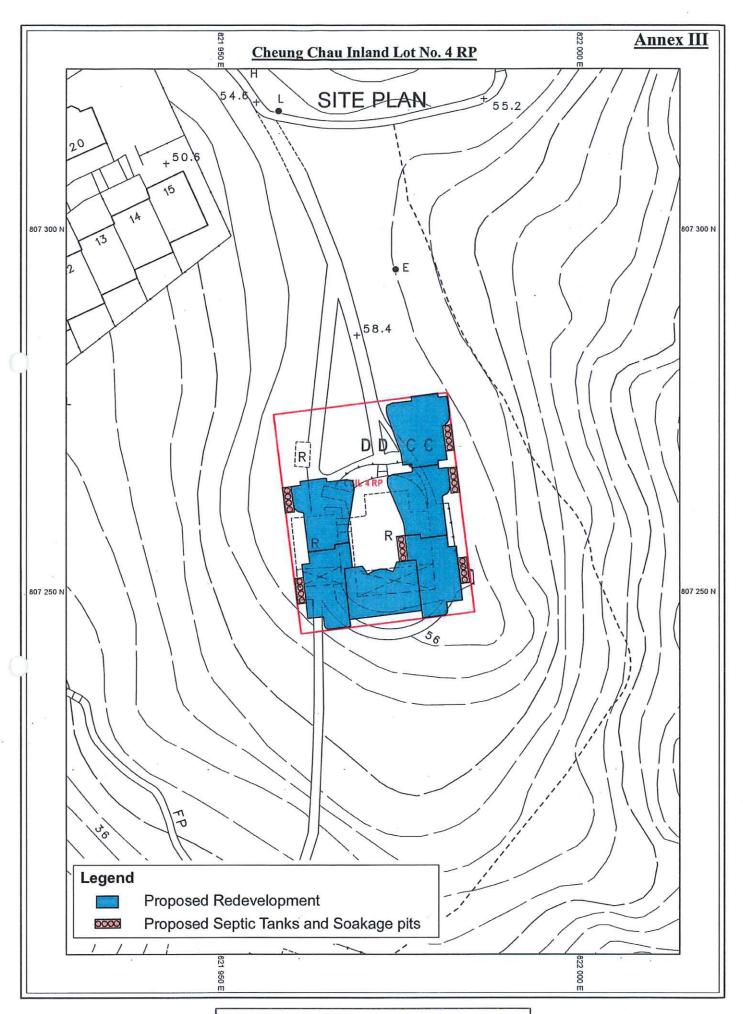

NOTES:-

- 1. ALL DIMENSIONS IN MILLIMETRES UNLESS OTHERWISE STATED
- 2. PERCOLATION TEST FOR DETERMINING ABSORPTION CAPACITY OF SOIL
 - B. EXCAVATE A HOLE 300 mm SQUARE TO THE SAME DEPTH OF THE PIT OR TRENCH.
 - b. FILL THE HOLE WITH APPROXIMATELY 150 mm OF WATER AND ALLOW TO SEEP AWAY COMPLETELY.
 - c. REFILL THE HOLE WITH WATER TO A DEPTH OF 150 mm AND OBSERVE THE TIME, IN MINUTES, FOR WATER TO SEEP COMPLETELY AWAY.
 - d. DIVIDE THE TIME BY 6 TO GIVE TIME TAKEN TO FALL 25 mm FOR USE IN TABLE BELOW.
- 3. ALLOWABLE LOADING OF SOAKAWAY SYSTEMS

This zone is intended primarily for low-rise, low-density residential developments where commercial uses serving the residential neighbourhood may be permitted on application to the Town Planning Board.

(Please see next page)

RESIDENTIAL (GROUP C) (Cont'd)

Remarks

(a) No new development, or addition, alteration and/or modification to or redevelopment of an existing building shall result in a total development and/or redevelopment in excess of the maximum plot ratio, site coverage and building height specified below, or the plot ratio, site coverage and height of the existing building, whichever is the greater:

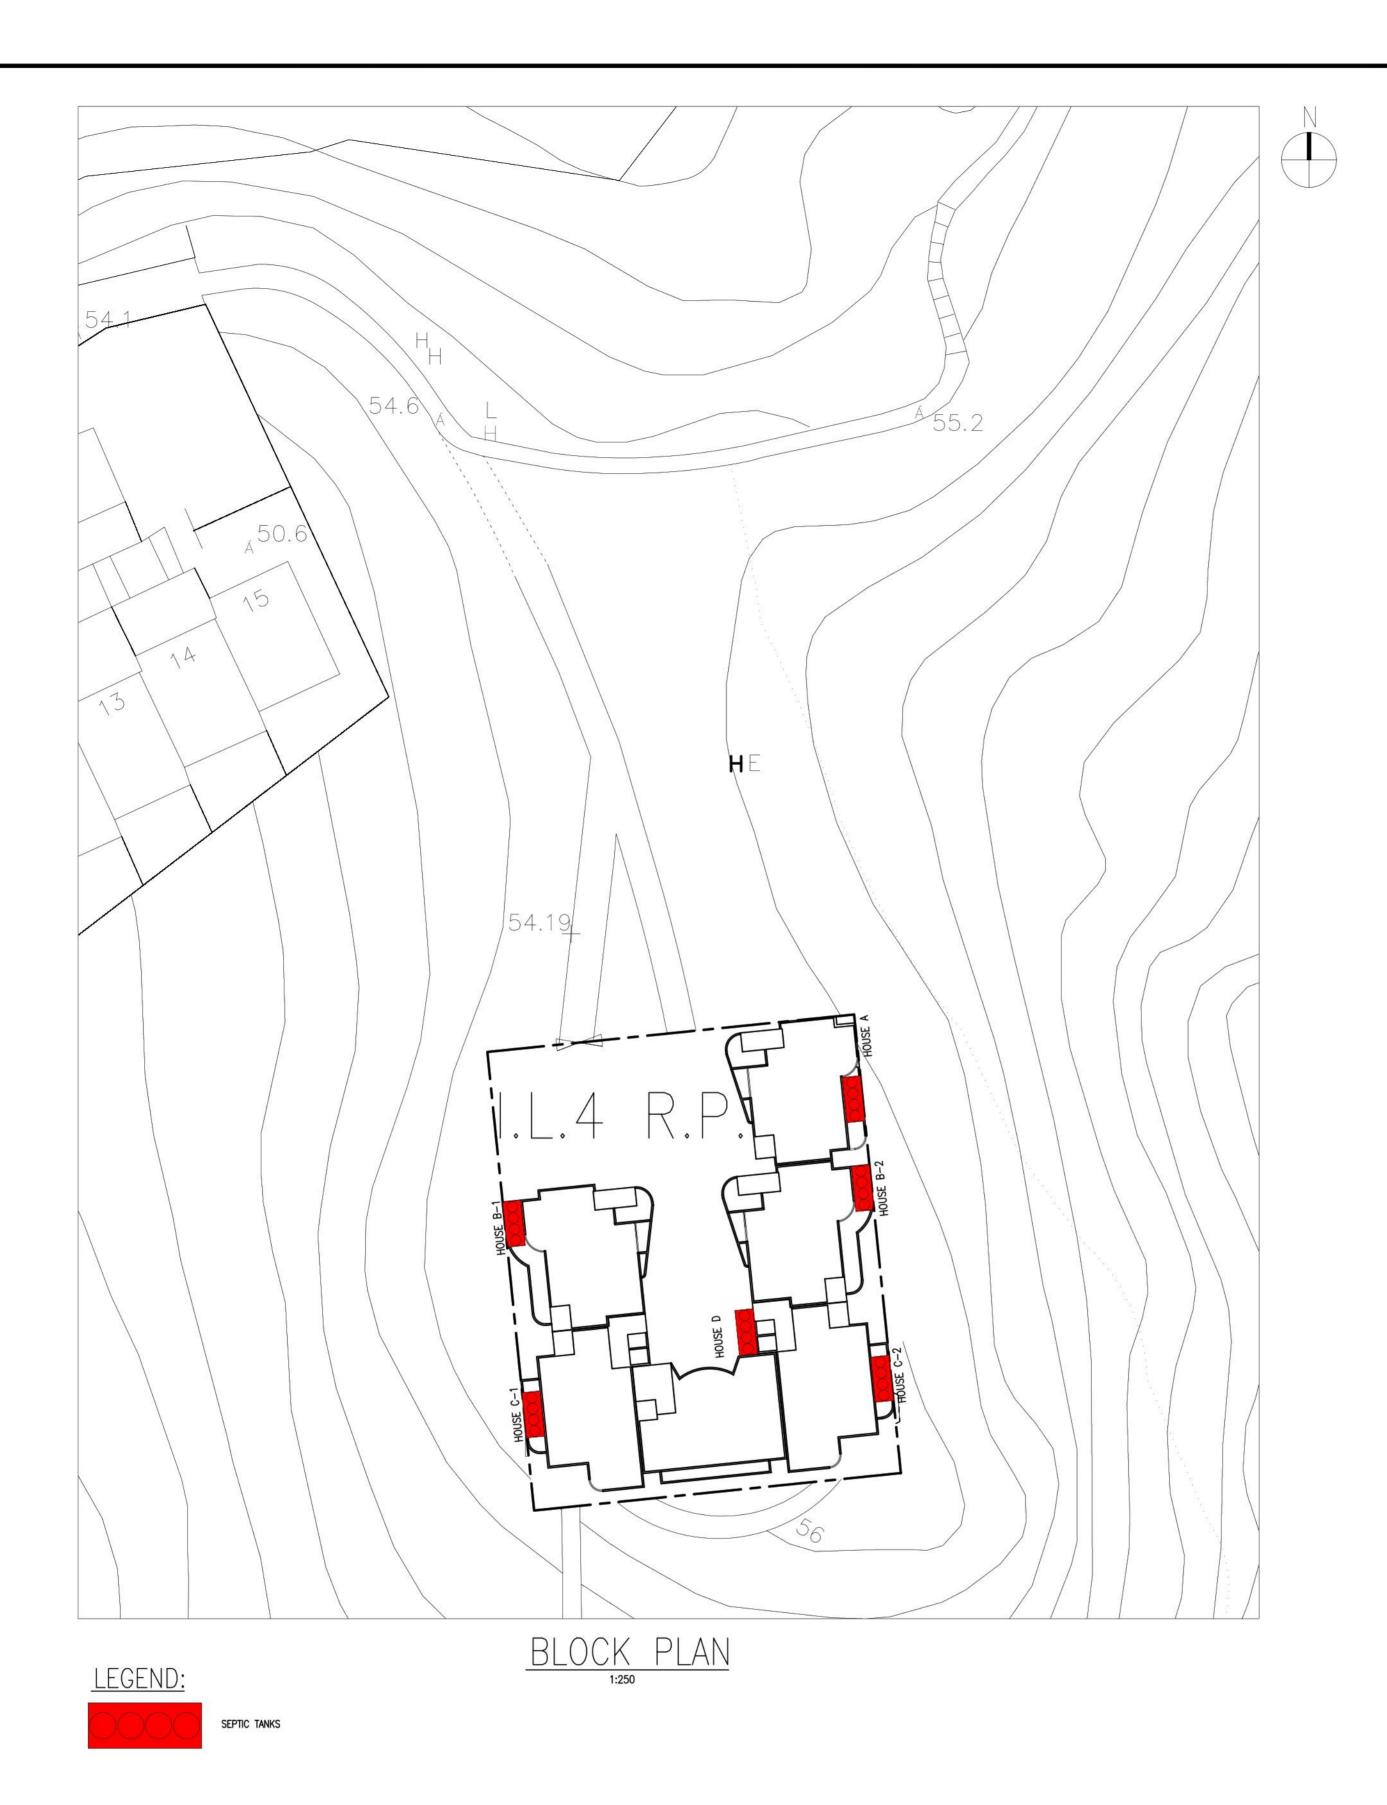

Sub-area	<u>Maximum</u>	<u>Maximum</u>	Maximum Building Height
	Plot Ratio	Site Coverage	
R(C)1	1	40%	3 storeys (8.23m)
R(C)2	0.7	40%	3 storeys (9m)
R(C)3	0.6	30%	3 storeys (9m)
R(C)4	0.6	30%	2 storeys (7.62m)
R(C)5	0.4	20%	2 storeys (7.62m)
R(C)6	0.2	20%	2 storeys (7.62m)
R(C)7	0.9	45%	2 storeys (7.62m)
R(C)8	0.8	40%	3 storeys
R (C)9	1.58	52.43%	3 storeys (8.23m or +64mPD)

- (b) In determining the relevant maximum plot ratio and site coverage for the purposes of paragraph (a) above, any floor space that is constructed or intended for use solely as plant room, caretaker's office and caretaker's quarters, or recreational facilities for the use and benefit of all the owners or occupiers of the domestic building or domestic part of the building, provided such uses and facilities are ancillary and directly related to the development or redevelopment, may be disregarded.
- (c) Based on the individual merits of a development or redevelopment proposal, minor relaxation of the plot ratio/site coverage/building height restrictions stated in paragraph (a) above may be considered by the Town Planning Board on application under section 16 of the Town Planning Ordinance.

Dear Sir/Madam,

Section 12A Planning Application - Request for Amendment to the Approved Cheung Chau Outline Zoning Plan No. S/I-CC/9 from "Residential (Group C) 6" Zone to "Residential (Group C) 9" Zone at Cheung Chau Inland Lot No. 4 RP, Fa Peng, Cheung Chau, Island

We refer to our submission dated 21.6.2024 (Ref.: ADCL/PLG-10288/L001), we would like provide the following item for your onward processing:-

- i. Replacement pages of the Application Form (No. S12A); and
- ii. Replacement pages of the Planning Statement.

It is clarified that the address for the proposed amendment is *Cheung Chau Inland Lot No. 4 RP, Fa Peng, Cheung Chau, Island.*

Thank you for your kind attention and should you have any queries, please do not hesitate to contact our Miss Isa YUEN or Mr. Thomas LUK at 3180 7811.

Yours faithfully, For and on behalf of

June 2024

EXECUTIVE SUMMARY

(In case of discrepancy between English and Chinese versions, English shall prevail)

This *Planning Statement* is submitted to the Town Planning Board ("the Board") under Section 12A of the Town Planning Ordinance to rezone the site at Cheung Chau Inland Lot No. 4 RP, Fa Peng, Cheung Chau, Island (hereinafter referred to as "the application site") from "Residential (Group C) 6" ("R(C)6") zone to "Residential (Group C) 9" ("R(C)9") zone (hereinafter referred to as "the proposed amendment") on the Approved Cheung Chau Outline Zoning Plan No. S/I-CC/9 (hereinafter referred to as "the Current OZP"). The proposed amendment is to facilitate the **Proposed House Redevelopment (New Territories Exempted Houses)** (hereinafter referred to as "the proposed redevelopment") on the application site, which covers an area of approximately 743.102 m² and fully owned by the Applicant. This *Planning Statement* serves to provide background information and planning justifications in support of the proposed redevelopment in order to facilitate the consideration by the Board.

The Applicant seeks the proposed amendment to reflect the long-established building status and to align the established redevelopment rights and entitlements since 1993 with the zoning restrictions on the Current OZP. It intends to enable the implementation of the proposed redevelopment in accordance with the Approved Building Plans in 1993, maintaining precisely the same development parameters approved.

The Applicant has intended to redevelop the application site for the proposed redevelopment since 1991, predating the gazettal of the First Cheung Chau Outline Zoning Plan in 2004 (hereinafter referred to as "the First OZP"). In 1992, a set of site formation plans in connection with the Lot was approved by the Building Authority. Subsequently, a set of building plans dated 11.1992 was approved by District Lands Office/Islands ("the Approved Building Plans") and a Certificate of Exemption for Building Works ("CoE(BW)") was issued in 1993, permitting the construction of six nos. of 3-storey New Territories Exempted Houses (NTEHs) on the application site. The Approved Building Plans and CoE, which remain valid and subsisting, have ascertained development rights for the construction of the six NTEHs, and sets out the redevelopment parameters permitted. Considering building plan approval has been sought and issuance of CoE(BW), in view of this, LandsD has further issued the Certificates of Exemption for Drainage Works ("CoE(DW)") in 2023, contingent upon fulfilling a condition related to obtaining planning permission under the Town Planning Ordinance.

The redevelopment parameters permitted under the Approved Building Plans since 1993, however, were not truly reflected by the permissible intensities under the First OZP and Current OZP since 2004. The application site has been zoned "R(C)6" with a maximum plot ratio of 0.2, a maximum site coverage of 20% and a maximum building height of 2 storeys (7.62m), leading to a discrepancy between the established redevelopment entitlements and permissible development intensity on the Current OZP. Subject to stringent statutory planning restrictions, the implementation of the proposed redevelopment is hindered despite being regarded as of right.

In this connection, the Applicant submits the current application to reflect the long-established building status and the redevelopment rights and entitlements prior to the gazattal of the First OZP, and to enable the implementation of the proposed redevelopment as originally intended.

1. INTRODUCTION

1.1 Purpose

- 1.1.1. This *Planning Statement* is submitted to the Town Planning Board ("the Board") under Section 12A of the Town Planning Ordinance (TPO) in support of an application (hereinafter referred to as "the current application") for rezoning the site at Cheung Chau Inland Lot No. 4 RP, Fa Peng, Cheung Chau, Island (hereinafter referred to as "the application site") from "Residential (Group C) 6" ("R(C)6") zone to "Residential (Group C) 9" ("R(C)9") zone (hereinafter referred to as "the proposed amendment") on the Approved Cheung Chau Outline Zoning Plan No. S/I-CC/9 (hereinafter referred to as "the Current OZP") for Proposed House Redevelopment (New Territories Exempted Houses) (hereinafter referred to as "the proposed redevelopment").
- 1.1.2. The application site has a total area of approximately 743.102m². The location of the application site is shown on **Figure 1** whilst **Figure 2** indicates the private lot that the application site involves. The application site is currently zoned "R(C)6" on the Current OZP gazetted on 24.09.2021 (**Figure 3** refers). The proposed redevelopment involves the demolition of existing houses and rebuilding six nos. of 3-storey New Territories Exempted Houses ("NTEHs") with a plot ratio of about 1.573, a site coverage of about 52.43% and a maximum building height of 3 storeys (8.23m) (hereinafter collectively referred to as "the proposed redevelopment parameters").
- 1.1.3. Aikon Development Consultancy Limited has been commissioned by *Combine Hero Properties Limited*, also the registered landowner of CCIL No.4 RP (hereinafter referred to as "the Applicant") to prepare and submit the current application and his behalf.

1.2 Rationale Behind the Current Application

- 1.2.1 The Applicant has all along intended to redevelop the application site (formerly erected by residential dwellings) for the proposed redevelopment since 1991, predating to gazettal of the First Cheung Chau Outline Zoning Plan in 2004 (hereinafter referred to as "the First OZP").
- 1.2.2 In 1991, a set of site formation plans in relation to the redevelopment proposal of six NTEHs on the application site was submitted. The proposal was considered satisfactory and subsequently approved by Building Authority on 20.3.1992 (hereinafter referred to as the "Approved Site Formation Plans") (see **Appendix 1**).
- 1.2.3 Application for Certificate of Exemption ("CoE") for Building Works was made on to Buildings and Lands Department (BLD) pursuant to the Buildings Ordinance (Application to New Territories) Ordinance, Cap 121. A set of building plans dated 27.11.1992 in relation to the redevelopment proposal of six NTEHs on the application site was approved by the District Lands Office/Islands ("DLO/Is") on 7.1.1993 ("the Approved Building Plans") (see Appendix 2). The Approved Building Plans that are with exactly the same parameters as proposed in the current application, have been registered in Land Registry under memorial no. 18090700230022 and 23021700570012 dated 07.09.2018 and 17.02.2023

4. PROPOSED AMENDMENT TO THE CURRENT OZP

4.1 Proposed Amendment to the Current OZP

- 4.1.1 This application proposes to rezone the application site from "R(C)6" zone to "R(C)9" zone on the Approved Cheung Chau Outline Zoning Plan No. S/I-CC/9 for Proposed House Redevelopment (New Territories Exempted Houses).
- 4.1.2 The proposed amendment involves the following items to the Approved Cheung Chau Outline Zoning Plan No. S/I-CC/9:-
 - To rezone Cheung Chau Inland Lot No. 4 RP, Fa Peng, Cheung Chau, Island from "R(C)6" zone to "R(C)9" zone.
 - To impose the development restrictions of a maximum plot ratio of 1.58, a maximum site coverage of 52.43% and a maximum building height of 3 storeys (8.23m or +64mPD).
- 4.1.3 The proposed Schedule of Uses and development restrictions for the "R(C)9" zone have been enclosed in **Appendix 5**. The proposed amendment will allow the relevant Government departments to properly control the land use, development intensity and layout of the proposed redevelopment by imposing developments restrictions.

Aikon Development Consultancy Ltd. 毅勤 發展顧問有限公司

6. PLANNING JUSTIFICATIONS

6.1 Reflecting the Long-Established Building Status and Respecting Redevelopment Rights and Entitlements

- 6.1.1 As outlined in the background, there is existing Approved Building Plans for the proposed redevelopment with the proposed redevelopment parameters, which were issued along with the CoE(BW) in 1993 pursuant to the Buildings Ordinance (Application to New Territories) Ordinance, Cap 121. The CoE(BW) has ascertained development rights for the construction of the six NTEHs and set out the entitlements. However, the long-established building status and the redevelopment rights and entitlements were not taken into account in the formulation of the First OZP, leading to a discrepancy between redevelopment rights/entitlements and zoning restrictions of the Current OZP. The application site, which is constrained by OZP zoning restrictions, cannot meet the permissible development intensity agreed upon by the Building and Lands Authority. This ultimately hinder the implementation of the proposed redevelopment.
- 6.1.2 The proposed amendment aims to accurately reflect the long-established building grounds and redevelopment rights/entitlements bestowed upon the Applicant prior to the gazettal of the First OZP. The proposed amendment seeks to emend zoning restrictions under the current planning regime and enable the alignment between permissible intensity under the Current OZP and the said redevelopment rights/entitlements.
- 6.2 Ensuring Compliance with the Condition Imposed and to Timely Effect the Approved Redevelopment
- 6.2.1 The proposed amendment is essential to ensures compliance with the condition stipulated by LandsD and facilitate the realization of the proposed redevelopment within existing planning mechanism. The agreement of the proposed amendment would allow implementation of the proposed development without further delay.
- 6.2.2 The proposed amendment under R(C)9 is *specifically tailored to accommodate the redevelopment rights/entitlements* of the proposed redevelopment, which the proposed redevelopment parameters and configuration are exactly the same as that in the Approved Building Plans since 1993. This tailored approach ensures that the regulatory framework appropriately supports and enables the lawful realization of the project.
- 6.3 In Line with Planning Intention of R(C) Zone in Developing Low-Rise, Low Density Residential Developments
- 6.3.1 As presented in the general planning intention of the explanatory statement of the Current OZP, it is elaborated that "...future growth, primarily in the form of infill developments/redevelopments, is mainly confined to the existing village and other residential clusters...". While there are two existing houses on-site await redevelopment opportunity, the proposed amendment allows the application site to continue its residential purpose with new development form as NTEHs, aligning with the general planning intention of the Current OZP.

Section 12A Planning Application No. Y/I-CC/7 - Request for Amendment to the Approved Cheung Chau

Ref.: ADCL/PLG-10288/L004

APPENDIX 1

PLANTING PROPOSALS

To compensate the loss of the **5** existing trees, **6** heavy standard trees with average DBH approx. 80mm, and **9** ornamental trees with average DBH approx. 75 mm are proposed to be planted. They will be planted at the peripheral common landscape areas within the site boundary. All these new trees within the application site will be maintained by the Applicant. The proposed planting species list is shown as follows.

Chinese Name	Botanic Name	Height x Spread x DBH (mm)	Spacing (mm)	Nos.
Heavy Standar	d Trees			
紫薇	Lagerstroemia indica	3000x1500x80	4000	3
細葉欖仁	Terminalia mantaly	4500x1500x80	4000	3
Ornamental Tr	ees			
桂花	Osmanthus fragrans	2750x1500x75	4000	9
Total				15

Upon the above, the compensation ratio in terms of quantity and quality is shown as follows:

Quantity of loss of trees:	5 nos.
Aggregate Loss of DBH:	0.74 m
Quantity of compensatory trees:	15 nos.
Quantity compensation ratio:	About 1:3
DBH compensation:	About 0.415
DBH compensation ratio	About 1:0.56

Detailed Departmental Comments

1. Land Administration

Comments of the District Lands Officer/Islands, Lands Department:

- (a) there are some ruined structures on the application site that are included in the Squatter Control Survey Records. These records will be deleted if the structures are demolished for the proposed development;
- (b) there are no conditions under the lease or imposed in the Certificate of Exemption (CoE) for building works and the CoE for drainage works specifying the balconies to be excluded from the gross floor area (GFA) and site coverage (SC) calculations. Yet, it is noted on the approved building plans that the balconies were excluded from the GFA and SC calculations; and
- (c) the Land Administrative Office (LAO) Practice Note No. 2/2020 as quoted in paragraph 5.7.4 of the Supplementary Planning Statement has been superseded by LAO Practice Note No. 6/2023.

2. **Building Matters**

Comments of the Chief Building Surveyor/New Territories East 1 and Licensing, Buildings Department:

in case the site formation proposal that is required to submit to Buildings Department for approval, detailed comment under Buildings Ordinance on such submission will be formulated at the formal submission stage. Your attention is also drawn to Practice Notes for Authorized Persons, Registered Structural Engineers and Registered Geotechnical Engineers APP-141 for the division of responsibility between Authorised Person, Registered Structural Engineer and Registered Geotechnical Engineer for the submission.

3. <u>Drainage and Sewerage</u>

Comments of the Chief Engineer/Hong Kong & Islands, Drainage Services Department:

the applicant is reminded to provide sand trap for the last catchpit to prevent sand, silt, cementitious materials or other objects from being washed down into the existing stormwater drainage system.

Comments of the Director of Environmental Protection:

- (a) the owner of the premises and septic tank and soakaway systems should be reminded not to discharge any sewage to existing storm drain/system from the proposed development. It is their duty and responsibility to provide proper facilities to treat all effluents and wastes generated as necessary and dispose of them in full compliance with the relevant legislative requirements; and
- (b) during the construction phase of the proposed development, the contractor shall be

reminded to observe the relevant environmental legislation and take necessary preventive measures to avoid polluting the surrounding environment. The construction waste (typically comprises rock, rubble, sand, concrete, asphalt, brick, tile, etc.) generated from the construction works should be properly disposed of at disposal facilities such as refuse transfer station in Cheung Chau. If the deposition of the construction waste at a private land lot is being considered, please be reminded that the Waste Disposal Ordinance (Cap. 354) requires a person to obtain the written permission of the owners and submit the proof using the specified form to the Environmental Protection Department (EPD) for acknowledgement before the deposition. Details of the statutory requirements and the found procedure can be the EPD's https://www.epd.gov.hk/epd/english/environmentinhk/waste/prob solutions/wdao.html

4. <u>Urban Design and Landscape</u>

Comments of the Chief Town Planner/Urban Design & Landscape, Planning Department:

- (a) optimization of native species to enhance biodiversity should be considered for the proposed development; and
- (b) the applicant should note that approval of the rezoning application by the Board does not imply approval of the trees works such as pruning, transplanting and/or felling under lease and/or Development Bureau Technical Circular (Works) No. 4/2020. The applicant is reminded to approach relevant authority/ government department(s) direct to obtain necessary approval on tree works.

Section 12A Rezoning Application - Request for Amendment to the Approved Cheung Chau Outline Zoning Plan No. S/I-CC/9 from "Residential (Group C) 6" Zone to "Residential (Group C) 9" Zone at Cheung Chau Inland Lot No. 4RP, Fa Peng Knoll, Cheung Chau, Island

Planning Intention

This zone is intended primarily for low-rise, low-density residential developments where commercial uses serving the residential neighbourhood may be permitted on application to the Town Planning Board.

(Please see next page)

RESIDENTIAL (GROUP C) (Cont'd)

Remarks

(a) No new development, or addition, alteration and/or modification to or redevelopment of an existing building shall result in a total development and/or redevelopment in excess of the maximum plot ratio, site coverage and building height specified below, or the plot ratio, site coverage and height of the existing building, whichever is the greater:

Sub-area	Maximum Plot Ratio	Maximum Site Coverage	Maximum Building Height
R(C)1	1	40%	3 storeys (8.23m)
R(C)2	0.7	40%	3 storeys (9m)
R(C)3	0.6	30%	3 storeys (9m)
R(C)4	0.6	30%	2 storeys (7.62m)
R(C)5	0.4	20%	2 storeys (7.62m)
R(C)6	0.2	20%	2 storeys (7.62m)
R(C)7	0.9	45%	2 storeys (7.62m)
R(C)8	0.8	40%	3 storeys
R (C)9	1.58	52.43%	3 storeys (8.23m or +64mPD)

- (b) In determining the relevant maximum plot ratio and site coverage for the purposes of paragraph (a) above, any floor space that is constructed or intended for use solely as plant room, caretaker's office and caretaker's quarters, or recreational facilities for the use and benefit of all the owners or occupiers of the domestic building or domestic part of the building, provided such uses and facilities are ancillary and directly related to the development or redevelopment, may be disregarded.
- (c) Based on the individual merits of a development or redevelopment proposal, minor relaxation of the plot ratio/site coverage/building height restrictions stated in paragraph (a) above may be considered by the Town Planning Board on application under section 16 of the Town Planning Ordinance.
