**SCHEDULE OF AMENDMENTS TO
THE APPROVED MA ON SHAN OUTLINE ZONING PLAN NO. S/MOS/22
MADE BY THE TOWN PLANNING BOARD
UNDER THE TOWN PLANNING ORDINANCE (Chapter 131)**

I. Amendments to Matters shown on the Plan

- Item A – Rezoning of a site to the east of Cheung Muk Tau Village from “Green Belt” (“GB”) to “Residential (Group A)11” (“R(A)11”) with stipulation of building height restriction.
- Item B1 – Rezoning of a site to the west of Cheung Muk Tau Village from “GB” to “R(A)11” with stipulation of building height restriction.
- Item B2 – Rezoning of a strip of land abutting Ma On Shan Bypass and to the further west of Cheung Muk Tau Village from “GB” to an area shown as ‘Road’.
- Item C – Rezoning of a site at the lower and northern end of Ma On Shan Tsuen Road from “GB” to “Government, Institution or Community” (“G/IC”) with stipulation of building height restriction.
- Item D – Rezoning of a site at the lower end and on the eastern side of Ma On Shan Tsuen Road from “GB” to “R(A)11” with stipulation of building height restriction.
- Item E – Rezoning of a site at the lower end and on the western side of Ma On Shan Tsuen Road from “GB” to “G/IC” with stipulation of building height restriction.
- Item F – Rezoning of a site at the upper end and on the eastern side of Ma On Shan Tsuen Road from “GB” to “G/IC” with stipulation of building height restriction.
- Item G – Rezoning of a site at the upper end and on the western side of Ma On Shan Tsuen Road from “GB” to “Residential (Group B)6” (“R(B)6”) with stipulation of building height restriction.
- Item H – Rezoning of a site to the south-east of Chevalier Garden from “GB” to “Other Specified Uses” annotated “Sewage Treatment Works”.

II. Amendment to the Notes of the Plan

- (a) Incorporation of the plot ratio restriction for the new “R(A)11” sub-area in the Remarks of the Notes for the “R(A)” zone.
- (b) Addition of a remark in the Notes for the “R(A)” zone to specify that in determining the maximum plot ratio for the “R(A)11” sub-area, any floor space that is constructed or intended for use solely as public vehicle park and

Government, institution or community (GIC) facilities, as required by the Government may be disregarded.

- (c) Revision to the Notes for the “R(A)” zone to incorporate ‘Public Vehicle Park (excluding container vehicle) (on land designated “R(A)11” only)’ under Column 1, and to correspondingly replace ‘Public Vehicle Park (excluding container vehicle)’ under Column 2 by ‘Public Vehicle Park (excluding container vehicle) (not elsewhere specified)’.
- (d) Incorporation of the plot ratio restriction for the new “R(B)6” sub-area in the Remarks of the Notes for the “R(B)” zone and addition of a remark in the Notes for the “R(B)” zone to specify that in determining the maximum plot ratio for the “R(B)6” zone, any floor space that is constructed or intended for use solely as GIC facilities as required by the Government may be disregarded.
- (e) Revision to the Notes for the “R(B)” zone to incorporate ‘Social Welfare Facility (on land designated “R(B)6” only)’ under Column 1, and to correspondingly replace ‘Social Welfare Facility’ under Column 2 by ‘Social Welfare Facility (not elsewhere specified)’.
- (f) Deletion of ‘Market’ from Column 1 of the Notes for the “Commercial” and “Other Specified Uses” annotated “Railway Station and Public Transport Interchange with Commercial/Residential Development” zones, and from Column 2 of the Notes for the “Comprehensive Development Area”, “R(B)” and “Village Type Development” zones.
- (g) Revision of ‘Shop and Services’ to ‘Shop and Services (not elsewhere specified)’ in Column 2 of the Notes for the “R(A)” and “G/IC” zones.

Town Planning Board

16 October 2020

**List of Representers in respect of
the Draft Ma On Shan Outline Zoning Plan No. S/MOS/23**

Representation No. TPB/R/S/ MOS/23-	Name of Representer
R1	Cherry Chan
R2	Jenny Cheung
R3	Wong TM
R4	Cheryl Doblado Elegado
R5	Hui Yan Lung Eric
R6	To Kar Man Angela
R7	Shum Ho Yuen
R8	Jacobsen Nicholas Brandon
R9	Ma Muk Yan
R10	Ng Sik Ying
R11	Peggy Ma
R12	Man Yuk Ha
R13	Wong Shuk Ying Judith
R14	Wan Che Wai
R15	Shek Wan Cheung
R16	Hwang Shou Hwa
R17	Lo W Y
R18	Shek Ho Ming
R19	P Lui

Representation No. TPB/R/S/ MOS/23-	Name of Representer
R20	Carly Liu
R21	T Y Chang
R22	Y Y Tsang
R23	Chan Lzumi
R24	張月娥
R25	Lo H N
R26	姚鳳玲
R27	Yang Qian Yu
R28	Tai Yan Tung
R29	Lee Wai Hong
R30	Lam Kan
R31	Chin Yi Man
R32	Chan Ming Chu
R33	Lee Che Leung
R34	Ng Yun Ho
R35	Ms. Lottle
R36	Tai Ching Yip
R37	勞銳民
R38	Chin Chan Chuen
R39	Mak Ka Hung
R40	Ng Siu Tim
R41	Yuen Wang Fai

Representation No. TPB/R/S/ MOS/23-	Name of Representer
R42	黃逸朗
R43	Association for Geoconservation, Hong Kong
R44	Kadoorie Farm and Botanic Garden

Draft Ma On Shan Outline Zoning Plan No. S/MOS/23 (Draft OZP)
Summary of Representations and Government Departments' Responses

	Major Grounds and Proposals of Representations	Responses of Government Departments
<u>Supportive Representations</u>		
A1	There is still shortage in public and private housing. There should be more public housing supply and also a balance for public housing and private housing.	The supportive views are noted.
A2	The amendment sites with building height (BH) restrictions stipulated are appropriate for the proposed housing developments, but the development should not be too intensive.	
A3	The Government should improve associated supporting facilities such as commercial centre and transport infrastructure.	
A4	The proposed development, which does not involve huge cost, is an efficient and more environmental-friendly way to increase housing supply compared with reclamation.	
A5	Infrastructural development can help boost the economy and provide employment opportunities.	
A6	Item H is supported as a city has to keep on developing and improving.	

	Major Grounds and Proposals of Representations	Responses of Government Departments
<u>Adverse Representations and Representations Providing Views</u>		
B Development Options for Increasing Housing Supply		
B1	<p>The proposed amendments are not in line with the Final Report of the Task Force on Land Supply (TFLS) and not in line with the principles of “caring for the environment for balanced development” and the recommendation of “not to explore development at the periphery of Country Park”. The Government should first develop high-density public housing in sizable sites, planned New Development Areas (NDAs), brownfield sites and reclamation sites. Opportunities for development at Fanling Golf Course, idle/under-utilised sites and through urban redevelopment should also be explored first.</p>	<p>Inadequate housing supply is an issue of great public concern. Increasing overall housing land supply is the fundamental solution to the housing supply problem. According to the Long Term Housing Strategy (LTHS) Annual Progress Report 2020, the Government has been adopting a multi-pronged approach progressively to identify and form land based on the eight priority land supply options recommended by the TFLS, including developing brownfield sites and Fanling Golf Course in the short to medium term and NDAs and reclamation outside Victoria Harbour in the medium to long term. Other measures to increase housing land supply will continue to be explored and pursued concurrently by the Government.</p> <p>That said, the Government still has to press ahead with the various ongoing land supply initiatives to increase and expedite housing land supply in the short-to-medium term. Amongst others, various land use reviews are conducted on an on-going basis, including reviews on the Government land currently vacant, under Short Term Tenancies or different short-term or government uses, as well as the reviews on “Green Belt” (“GB”) sites.</p> <p>The Engineering Feasibility Study (EFS) for the seven “GB” sites identified confirmed that there is no insurmountable technical problem and unacceptable impacts for the proposed housing developments and their associated infrastructure and facilities at</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>these sites. To meet the acute housing need of the society, it is considered that the seven “GB” sites under amendments are suitable for housing developments and their associated infrastructure and facilities. Due considerations have been given to sustainable development and environmental conservation with a view to addressing the needs of different strata of society in the EFS. The recommendation of “not to explore development at the periphery of Country Park” by TFLS is noted and the sites under rezoning are all located outside the Country Park.</p>
B2	<p>The Government should identify suitable sites for housing developments, rather than developing unsuitable sites with technical constraints at huge infrastructural and time costs as well as imposing impact on the locality, in return for the small amount of flat production. In fact, some 330ha of land suitable for 316,000 public housing units has been identified to come on stream in the coming 10 years. The proposed developments are not quick-fix solutions, and would delay the short-to-medium term housing supply.</p>	<p>The EFS has confirmed that there is no insurmountable technical problem for the four proposed housing developments and their associated infrastructure and facilities. The sites identified for proposed housing developments will provide a total of 6,180 public housing units and 1,040 private housing units, which will be completed tentatively in phases from 2030.</p> <p>The 330ha of land identified for public housing in the next 10 years as stated in the Chief Executive’s 2020 Policy Address has included Sites A and B1. Although the first population intake for Site D is expected in 2032/33 which is beyond 10-year time, there is a need to produce land in a sustainable manner given the lead time involved in undertaking study, conducting consultation and going through statutory procedures in order to cater for the long-term demand of housing land.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
B3	Proposed developments are not in line with the planning intention of “GB” zone and the planning guidelines to promote conservation of the environment, namely the Town Planning Board Guidelines No. 10 (TPB PG-No. 10) regarding development within “GB” zone and Chapter 10 of Hong Kong Planning Standards and Guidelines (HKPSG) on Conservation.	<p>In order to build up land reserve to meet housing and other development needs, the Government has carried out the review of “GB” sites since 2012 in two stages. In the first stage of “GB” review completed in 2012, the Planning Department (PlanD) mainly identified and reviewed areas zoned “GB” that are devegetated, deserted or formed. With the completion of the first stage of “GB” review, the 2013 Policy Address announced that PlanD was conducting the next stage of “GB” review, with the purpose of releasing more sites for housing development. The second stage of “GB” review considered those vegetated “GB” sites with a relatively lower buffer or conservation value and adjacent to existing transport and infrastructure facilities.</p> <p>Under the said “GB” sites review, seven “GB” sites in Ma On Shan New Town, which are close to existing transport node, partly formed/deserted and have low buffer/conservation value, have been identified for development of housing and associated supporting Government, institution and community (GIC) facilities. The EFS with technical assessments on the potential traffic, infrastructural, environmental, ecological, landscape, heritage, geotechnical, drainage, sewerage, visual and air ventilation impacts etc. have been undertaken to ascertain the feasibility of these sites for developments and has confirmed that no insurmountable problem are envisaged.</p> <p>Under the EFS, Preliminary Environment Studies (PES) including ecological impact assessment (EcoIA) have been carried out. The EcoIA concluded that the overall ecological impact, including both</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>direct and indirect impact on habitats and species of conservation interest, was considered not significant. Good site practices are recommended to minimise the potential impacts to local ecology during construction stage. At the detailed design stage, Preliminary Environmental Review (PER) will be conducted to further confirm the ecological impact and propose appropriate mitigation measures if considered necessary.</p>
B4	<p>The amendment sites do not meet the criteria under the 2-stage review of “GB” zone. Although some of the amendment sites are farmlands and occupied by squatters, they are relatively compatible with the surrounding “GB” zone, and all these sites are still performing good buffer functions, given the close proximity to Country Park and Site of Special Scientific Interest (SSSI). The buffer between the developments in the Ma On Shan Area and the adjacent Ma On Shan Country Park will be lost. Further, the amendment sites are isolated from existing road and not easily accessible to development areas or transport nodes.</p>	<p>Under the “GB” sites review, sites that are devegetated/ deserted/ formed, having relatively lower buffer or conservation value and adjacent to existing transport and infrastructure facilities were selected for consideration of their suitability for development. The amendment sites under Items A and B1 being close to existing built-up area of Ma On Shan and about 400 to 700 m from the MTR Wu Kai Sha Station as well as the amendment sites under Items C to G being at the fringe of Ma On Shan town area, accessible by Ma On Shan Tsuen Road (MOST Road), partly formed, outside Ma On Shan Country Park and having relatively lower buffer/ conservation value meet the selection criteria for a review. An EFS has been conducted and confirmed that these sites are technically feasible for housing and associated infrastructural developments.</p> <p>As all these sites do not encroach onto Ma On Shan Country Park, SSSI, any recognised site of conservation importance or ecologically important streams, with the adoption of appropriate mitigation measures and good site management, the overall ecological impact is considered insignificant. Moreover, as indicated in the EcoIA under the EFS, the proposed developments are located at the fringe of</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		vegetated area or existing developed area, and thus the impact resulted from fragmentation of habitats is considered insignificant. The buffer value of “GB” zone will not be undermined.
B5	The proposed developments would set undesirable precedents for similar approaches to develop the “GB” zone and periphery of Country Park, resulting in development pressure on the surrounding areas of the amendment sites and Country Parks being encroached by urban development. Rezoning applications from “GB” to “Commercial” and various “Residential” zones in a similar context have been rejected / partially agreed by the Town Planning Board (the Board) previously mainly on the grounds that (i) “GB” zone serves as a green and visual buffer amidst the existing developed areas, and the integrity of the “GB” zone serving as buffer between Country Park and New Town should not be compromised; (ii) the proposal will cause adverse impacts; and (iii) approval of the application will set undesirable precedent.	As mentioned in the above response to B4, the amendment sites are selected based on the criteria of “GB” sites review and their technical feasibility for housing and associated infrastructural developments have been confirmed in the EFS.
B6	Given the slow growth of usual population and the large amount of private housing and Subsidised Sale Flat in Ma On Shan, there is no imminent need for more private housing. It is expected that the proposed private housing at Site G would be unaffordable to many people and would not help address the housing problem.	There is a need for the Government to maintain a healthy and stable development of the private residential property market. The Government will continue to increase both land and housing supply to meet demand of private housing. While the Board plays a role in ensuring appropriate land for housing and other development needs, housing prices are subject to market forces.

	Major Grounds and Proposals of Representations	Responses of Government Departments
B7	There is no strong justification for private housing development at Site G but not public housing. Clearance of the existing settlements for developing luxurious housing will create another housing problem for the grassroots.	<p>Site G, located at the upper part of MOST Road, and with its flat topography, good accessibility, government land status implying a shorter lead time for flat production, is considered suitable and technically feasible for housing development as confirmed under the EFS. Given its upper hill location, the site is more suitable for private housing instead of public housing which is generally high in development intensity. A plot ratio (PR) of 3.6 is proposed for the site making reference to the medium-density private housing development (i.e. “Residential (Group B)5” (“R(B)5”) zone in Lok Wo Sha) rezoned in 2014 in Ma On Shan town area, in order to optimise the use of scarce land resources at the fringe of existing built-up area.</p> <p>Site G is entirely on Government land and scattered with structures. Given the location, avoiding such structures will substantially affect the housing production. As advised by Lands Department (LandsD), if clearance of existing structures is unavoidable, the Government will offer compensation, Ex-gratia Allowances and/or rehousing arrangements to the eligible affected parties in accordance with the prevailing policies.</p>
B8	There are still a lot of vacant housing units in Ma On Shan and provision of more housing is unnecessary.	According to the Rating and Valuation Department, by the year-end of 2020, the private housing in Sha Tin has a vacancy rate of 3.2%, which is lower than the overall figure of 5.2% for Hong Kong. Besides, there has been a strong demand for public rental housing, with an average waiting time of general applicants who had been housed in the previous 12 months being 5.8 years as at the end of March 2021.

	Major Grounds and Proposals of Representations	Responses of Government Departments
C	Development Intensity	
C1	<p>(i) The surrounding developments such as Symphony Bay Villa Rhapsody and the Entrance have a much lower plot ratio than the proposed developments at Sites A and B1. PR higher than 5 would only be adopted in areas near the major transport node.</p> <p>(ii) The respective PRs of 6.8 and 3.6 for the proposed development at Sites D and G are similar to high-rise or medium-rise development in the development core of Ma On Shan, and are not compatible with the environment along MOST Road.</p>	<p>As announced in the 2014 Policy Address, the Government considers that except for the north of Hong Kong Island and Kowloon Peninsula, which are more densely populated, it is feasible to generally increase the maximum domestic plot ratio currently permitted for the other density zones in the territory by around 20% as appropriate. Furthermore, in view of the increasing acute demand for public housing, the Executive Council agreed in December 2018 to allow further increase of domestic plot ratio for public housing sites by 10% (i.e. up to 30% in total) where technically feasible.</p> <p>The EFS conducted for the amendment sites has concluded that there is no insurmountable technical problem for the proposed housing developments (at a PR of 6.8 for public housing developments and a PR of 3.6 for the private housing development) and their associated infrastructure and facilities.</p>
C2	In view of the previous policy of increasing living space, as well as the importance of lowering housing and population density in Hong Kong as demonstrated by the SARS epidemic and COVID-19 pandemic, the proposed development is a step backwards.	With a view to enhance livability whilst ensuring efficient utilisation of scarce land resources, proper design features, such as building separations of 15m wide, minimization of podium bulk with ground coverage of no more than 65% as well as provision of greenery of at least 20% with an overall target of 30% etc. will be adopted according to the EFS.

	Major Grounds and Proposals of Representations	Responses of Government Departments
D	Traffic and Transportation	
	<i>Road Transport Network to Urban Areas</i>	
D1	<p>The critical road links/junctions to urban areas are already saturated and the congestion will be worsened with the proposed amendments. Congestion at any one of the critical road links/junctions will result in queuing back and congestion of the local transport network. The traffic problems should be resolved first before proceeding with new housing developments.</p> <p>The proposed traffic improvements are minor in nature and cannot address the traffic problems of Ma On Shan fundamentally. Major road improvement works such as Trunk Road T4 and widening of Tate's Cairn Highway, Sha Tin Road, Lion Rock Tunnel are insufficient and cannot address the traffic problems timely. The bottlenecks will still exist at the tunnel portals.</p>	<p>Preliminary Traffic and Transportation Impact Assessment (PTTIA) has been conducted to assess the impacts on the existing road links and junctions within the Area of Influence (AOI) due to the proposed housing developments.</p> <p>The assessment results have indicated that some existing road junctions would operate over/close to its capacity in the design year 2035, namely Chak Cheung Street/Science Park Road roundabout, the junction of Sai Sha Road/Kam Ying Road, and junction of Sai Sha Road/Nin Wah Road/Nin Fung Road. Road improvement works on such critical junctions, including altering Chak Cheung Street/Science Park Road roundabout to a signalized-controlled junction, providing an additional traffic island at the junction of Sai Sha Road/Kam Ying Road, and widening the approaching arms to the junction of Sai Sha Road/Nin Wah Road/Nin Fung Road are recommended.</p> <p>For the major road links, the result indicated that volume to capacity (v/c) ratio of the section of Tate's Cairn Highway (southbound) near A Kung Kok will be increased to 1.19 during morning peak in design year 2035. The Government will implement improvement measures at this section of road by widening it from three lanes to four lanes and alleviating the v/c ratio to 0.88. With the above-mentioned improvement measures, except for the Tate's Cairn Highway across Shing Mun River (i.e. T6 Bridge) where the travelling speed is</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>forecasted to be slightly slowed down by the design year 2035, all critical road links and junctions will operate within their capacities. The Transport Department (TD) has no objection to the findings of the PTTIA. For T6 Bridge, the Government will investigate the improvement measures and consult the public in due course.</p> <p>Outside the AOI, CEDD has started the road widening works of Tai Po Road (Sha Tin Section) and is conducting an investigation study on the construction of Trunk Road T4, with a view to improve the traffic conditions of the roads connecting the New Territories East and Kowloon:</p> <p>(i) <u>Widening of Tai Po Road (Sha Tin Section)</u></p> <p>About 1.1 km section of Tai Po Road (Sha Tin Section) between Sha Tin Plaza near Sha Tin Rural Committee Road and Man Wo House of Wo Che Estate near Fo Tan Road is being widened from a dual two-lane carriageway to a dual three-lane carriageway. The construction commenced in July 2018 for scheduled completion in 2023. The road widening works will help divert traffic travelling between Sha Tin and Kowloon to the Eagle's Nest Tunnel and the Sha Tin Heights Tunnel, thereby improving the traffic conditions of the Lion Rock Tunnel and the Tate's Cairn Tunnel.</p> <p>(ii) <u>Trunk Road T4</u></p> <p>The purpose of the Trunk Road T4 project is to provide a dual two-lane carriageway connecting Sha Tin Road and Shing</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>Mun Tunnel Road/Tsing Sha Highway. Vehicles can then travel between Ma On Shan and Tsuen Wan/West Kowloon via Trunk Road T4 directly without going through the local roads in Sha Tin district, including the Chak Cheung Street/Science Park Road roundabout. The new trunk road will help improve the traffic conditions of the roads connecting the New Territories East and Kowloon. The investigation study is expected to be completed by December 2021.</p> <p>In the long run, TD and the Highways Department (HyD) commenced the Strategic Studies on Railways and Major Roads beyond 2030 (RMR2030+) in the end of 2020 separately to explore the layout of railway and major road infrastructure of Hong Kong (including New Territories East), and to conduct preliminary engineering and technical assessments for the alignments and supporting facilities, so that the planning of large-scale transport infrastructure will complement or even reserve capacity to meet the long-term development needs of Hong Kong.</p>
D2	<p>The following traffic improvement measures should be implemented first:</p> <p>(i) An exclusive lane from T6 Bridge (northbound) to Tolo Highway (southbound), such that vehicles to Fo Tan could bypass the 3 roundabouts at the interchange near MTR University Station, should be provided.</p>	<p>(i) According to the PTTIA, with the proposed mitigation measure of converting the existing Chak Cheung Street/Science Park Road roundabout junction to a signalized-controlled junction, the concerned junction would have sufficient capacity to cater for traffic generated by the proposed housing developments, i.e. no significant traffic impact is envisaged for the vehicles travelling from T6 Bridge (northbound) to Fo Tan.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
	<p>(ii) The merging point of Ma On Shan Road (southbound) (2-lane) and T6 Bridge (southbound) (2-lane) at Tate's Cairn Highway (southbound) (3-lane) should be widened to relieve traffic congestion from Ma On Shan to Sha Tin.</p> <p>(iii) More lanes should be provided for Ma On Shan Road outside MTR Tai Shui Hang Station, as well as Tate's Cairn Highway through merging with A Kung Kok Street.</p> <p>(iv) Suggest to build a new tunnel connecting Ma On Shan and Lam Tin/Kwun Tong to avoid the traffic congestions at Diamond Hill and Kwun Tong Bypass.</p>	<p>(ii), (iii) According to the PTTIA, the Government will implement improvement measures for the section of Tate's Cairn Highway (southbound) near A Kung Kok by widening it from three lanes to four lanes. The v/c ratio of the concerned road link will be reduced to 0.88. Traffic impact at the merging point of Ma On Shan Road and T6 Bridge can thus be addressed.</p> <p>(iv) Response to D1 regarding RMR2030+ is relevant to the suggestion on the planning of large-scale transport infrastructure.</p>
D3	Housing development in the New Territories without corresponding provision of local employment opportunities would worsen the traffic congestion at peak hours.	<p>The issue of imbalance in home-job spatial distribution is well noted in the ongoing "Hong Kong 2030+: Towards a Planning Vision and Strategy Transcending 2030" (Hong Kong 2030+), a study jointly undertaken by the DEVB and PlanD to update the territorial development strategy of Hong Kong. To address the issue, Hong Kong 2030+ strives to bring jobs closer to homes through planning of more strategic employment-related land uses in new growth areas.</p> <p>Besides, retail and G/IC facilities proposed in the housing developments will provide local employment opportunities.</p>
D4	Low-density development would attract high-income households which tend to commute by private car.	As advised by CEDD, traffic generated from the proposed medium-density private housing site has been taken into account in the PTTIA.

	Major Grounds and Proposals of Representations	Responses of Government Departments
		The results indicated that with the proposed traffic mitigation measures, the proposed housing developments would not induce insurmountable problem to the transport network. TD has no adverse comment in this regard.
<i>Comprehensiveness of Traffic Impact Assessment</i>		
D5	<p>(i) The additional traffic flow from the committed developments in Ma On Shan (including Kam Fai Court, Kam Chun Court, Yan On Estate Phase 2, residential development at Wu Kai Sha, Cheung Muk Tau), Shap Sz Heung and Pak Shek Kok, as well as those from Sai Kung, Tai Po and the North should also be taken into account.</p> <p>(ii) Data for the two-way traffic of A Kung Kok Street has not been provided in the traffic impact assessment (TIA) to reflect the actual traffic condition.</p>	<p>(i) As advised by CEDD, the additional traffic generated by the mentioned planned / committed developments have been taken into account in the traffic forecasts. TD has no adverse comment in this regard.</p> <p>(ii) A Kung Kok Street is a local distributor with two-way traffic. The result of PTTIA forecasted that the v/c ratio of A Kung Kok Street will be 0.81 and 0.66 during the morning peak and afternoon peak respectively which implied that the road link can operate within its capacity. Nevertheless, a detailed traffic survey and road link capacity assessment will be conducted in the detailed design stage to further review and update the current and forecast traffic condition. Traffic improvement measures, if necessary, will also be formulated during the detailed design stage.</p>
<i>Parking Provision</i>		
D6	Several car parks under STT have been rezoned for housing developments in the earlier years without reprovision afterwards. The parking provision in Ma On Shan is insufficient, and should be reviewed upon promulgation of the updated parking standard of the HKPSG.	As advised by Housing Department (HD), parking provision of the proposed public housing developments will be provided in accordance with the prevailing HKPSG. In any event, the parking requirements will be reviewed and determined on a case-by-case basis by TD.

	Major Grounds and Proposals of Representations	Responses of Government Departments
		The Government will continue to optimise the use of land resources to provide public car-parking spaces in suitable G/IC facilities and public open space. The Government plans to provide a public car park in the planned Amenity Complex in Area 103 in Ma On Shan.
<i>Public Transport Services</i>		
D7	<p>There is a mismatch of public transport services to the demands of residents in Sha Tin and Ma On Shan:</p> <p>(i) The bus route planning is not convenient to the residents.</p> <p>(ii) Despite the phased opening of the Tuen Ma Line (TML), railway service cannot fully replace road transport and to alleviate the traffic congestion, as many of the residential estates in Ma On Shan are not near to railway stations.</p>	<p>TD has been continuously enhancing the existing bus service network, and planning bus routes and adjusting bus services for developing and newly-developed districts so as to cater for the passengers' demands.</p> <p>TD will also closely monitor the public transport services in a timely manner so as to meet the commuting demand from the new population intake.</p>
D8	<p>Bus termini should be provided at Cheung Muk Tau and Shap Sz Heung, and the Nai Chung Bus Terminus should be expanded for providing more bus routes in the area. The progress and details of the two public transport interchanges for the comprehensive development at Shap Sz Heung are still uncertain.</p>	<p>The Sai Sha Road widening project has included the provision of a public transport terminus at Nai Chung including the reprovisioning of the existing Nai Chung Bus Terminus. As requested by TD, a covered transport interchange will be provided in the comprehensive development at Shap Sz Heung so as to facilitate passengers in the district to interchange for public transport. TD will closely monitor the public transport services in a timely manner so as to meet the commuting demand from the new population intake. Moreover, as advised by CEDD, the bus layby along the proposed access road for Sites A and B1 has the capacity to accommodate three buses serving as terminal facilities.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
D9	<p>The problem of over-capacity of East Rail Line (ERL) and TML have been neglected. It will be aggravated by the proposed housing developments and other developments in Kwu Tung North, Fanling North and Queen's Hill, as well as the increase in passengers upon future extension of these railway lines and the change from 12 to 9 carriages for East Rail Line. It is still uncertain when the Shatin-Central Line (SCL) and TML will be completed.</p>	<p>The result of PTTIA indicated that the proposed housing developments would generate 2,144 patronage/hour (Sites A and B1) and 2,257 patronage/hour (Sites D and G) peak boardings public transport trips at the morning peak. It is estimated that about 55% of the public-transportation demand would be bus-to-rail. With the conservative approach of a loading density of 4 passengers/m² instead of 6 passenger/m² assessment adopted in evaluating the impact of the proposed housing developments on the ERL and TML, there will be only an addition of 5 patronage/cart and 2.2 patronage/cart to ERL and TML respectively due to the proposed developments and TD has no adverse comment.</p> <p>As advised by the Railway Development Office (RDO) of HyD, the new 9-car trains are replacing the existing 12-car trains for the East Rail Line (ERL) progressively. The diversion effect of TML Phase 1 helps to relieve the congestion of the critical link between Tai Wai and Kowloon Tong. The MTR Corporation Limited (MTRCL) estimated that the diversion effect will be more significant with the full line opening of TML (i.e. completion of Kai Tak to Hung Hom section of SCL) in June 2021.</p> <p>As to whether the target commissioning date for "Hung Hom to Admiralty Section" of the SCL could be maintained as the first quarter of 2022, HyD has urged the MTRCL to expedite its relevant assessment on the commissioning date for "Hung Hom to Admiralty Section" and investigate and implement feasible delay recovery measures. The Government would closely monitor the progress of the</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		completion of the project by MTRCL.
D10	<p>Suggestions for improvement of railway services:</p> <p>(i) Suggest extending TML to Cheung Muk Tau, Sai Sha and Shap Sz Heung to serve the additional population in future.</p> <p>(ii) The northern exit of MTR Tai Shui Hang Station and the southern exit of MTR Heng On Station should be built to encourage commuting of local residents by railway.</p>	<p>(i) HyD commenced the “Strategic Study on Railways beyond 2030” in the end of 2020. HyD will examine the layout of the proposed railway network in Hong Kong, as well as to conduct preliminary technical assessments on proposed railway alignment and associated facilities, in order to ensure that the planning of large-scale transport infrastructure will meet the needs for the long-term land use developments of Hong Kong.</p> <p>(ii) As advised by RDO of HyD, according to the current mechanism, planning and implementation of the station modification works are under MTRCL's own strategy and fund. Any suggestions of additional exit in MTR Tai Shui Hang Station and MTR Heng On Station by the public could be conveyed to MTRCL direct.</p>
<i>Traffic Impact in the Vicinity of Sites A and B1</i>		
SD1	<p>Nin Fung Road is only a single dual-carriageway originally designed to serve Symphony Bay and Cheung Muk Tau Village only. With an increase in traffic flow at the construction and the operation stages (from some 70 vehicles per hour to nearly 700 vehicles per hour at peak hours), significant traffic impact on the local road network is anticipated:</p>	<p><u>Construction Stage</u></p> <p>As advised by CEDD, it is anticipated that with implementation of proper traffic management measures such as controlling the number of construction vehicles and access points, the existing local road network near Site A and B1 would have sufficient capacities during the construction stage. Detailed assessment would be conducted at the detailed design Stage.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
	<p>(i) It would be difficult for private cars, shuttle buses and school buses from Symphony Bay to enter Nin Fung Road, and may even result in traffic accidents.</p> <p>(ii) The proposed dedicated left turn entry lane at the Nin Fung Road arm of the Sai Sha Road/ Nin Wah Road/ Nin Fung Road Roundabout would not help the right-turn entry lane traffic for eastbound trips towards Sai Kung and the traffic at the afternoon peak hours. Alternatively, the proposed access road for Sites A and B1 should connect to Sai Sha Road direct bypassing Nin Fung Road and the aforesaid roundabout.</p> <p>(iii) No road improvement measure for Nin Fung Road concerning pedestrian safety was proposed in spite of the huge traffic flow in future.</p> <p>(iv) Cheung Muk Tau Village will become a major pedestrian thoroughfare for a significant portion of the residents of Sites A and B1 walking to/from the MTR Wu Kai Sha Station and the bus stops along Sai Sha Road, causing disturbance to the villagers.</p>	<p><u>Operation Stage</u></p> <p>(i) The assessment results of the PTTIA indicated that the access road near Symphony Bay to Cheung Muk Tau Village will operate within its capacity after population intake of the proposed housing developments and TD has no adverse comment.</p> <p>(ii) For the junction of Sai Sha Road/ Nin Wah Road/ Nin Fung Road, enhancement work has been proposed in widening the approaching arm of Sai Sha Road (westbound) and Nin Fung Road (northbound) under the PTTIA. The Ratio of Flow to Capacity (morning peak) would then be reduced from 1.10 to 0.82 while that of afternoon peak would be 0.78, hence no undesirable performance for aforementioned junction during both morning and afternoon peaks would be resulted after the proposed housing developments. TD has no adverse comment.</p> <p>(iii) CEDD will further explore and study the improvement measures of Nin Fung Road regarding pedestrian safety, including but not limited to pedestrian crossing, during the detailed design stage.</p> <p>(iv) The proposed footpath along the access for Sites A and B1 would be connected to the existing Nin Fung Road and a single track access road near Cheung Muk Tau Village. As advised by CEDD, this new footpath of 2.75m wide on both sides is anticipated to be the major pedestrian route for the residents from Site A and B1 walking to/from Sai Sha Road connecting to the MTR Wu Kai Sha Station.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
<i>Traffic Impact on MOST Road</i>		
SD2	<p>(i) <u>Construction Stage</u></p> <p>The proposed improvement of MOST Road will cause significant disruption, pollution and damage to this sole access road to the upper village of Ma On Shan at the construction stage, which is crucial for local residents and large number of visitors to the upper part of Ma On Shan Tsuen and Ma On Shan Country Park.</p> <p>(ii) <u>Operation Stage</u></p> <p>Widening of the MOST Road is inadequate to accommodate the traffic associated with the proposed developments along MOST Road, as well as the pick-up/drop-off activities of private cars at the proposed school of Site E considering its inconvenient location. Congestion at Hang Hong Street Roundabout will be intensified as a result. Besides, the width and gradient of the MOST Road is still not suitable for large vehicles.</p>	<p>(i) <u>Construction Stage</u></p> <p>As advised by CEDD, during the upgrading works of MOST Road, appropriate temporary management measures including temporary traffic diversion schemes will be adopted to ensure that the access to Ma On Shan Tsuen and Ma On Shan Country Park will be maintained to minimize the traffic impact on visitors and local residents, which will be proposed at the detailed design Stage.</p> <p>(ii) <u>Operation Stage</u></p> <p>As advised by CEDD, road safety, topography, turning space and gradient have been taken into consideration in the preliminary design of the upgrading of MOST Road which can accommodate large vehicles including 12.8m-long double-decker buses.</p> <p>To cater for the demand of the proposed housing developments (Site D) and proposed school (Site E), a pair of over 70m laybys (excluding taper) to accommodate four 12.8m buses and two 19-seats green minibus, a taxi stand of 25m and a general layby of 50m were proposed under the PTTIA. In addition, sufficient car-parking spaces and laybys for school bus and private car will be provided within the proposed school in accordance with the HKPSG.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		For the performance of the junction at MOST Road and Hang Hong Street, the PTTIA indicates that it will operate within the capacity in Year 2035 and TD has no adverse comment. Moreover, as advised by CEDD, it will be enhanced by widening the exit arm at MOST Road to provide sufficient turning space for 12.8m-long double-decker buses.
SD3	Sites C to G are only served by one access, without the provision of lift tower, footbridge system and bus terminus. Any obstruction of MOST Road such as landslides will render these sites inaccessible by emergency vehicles.	<p>As advised by CEDD, the proposed profile for the upgraded MOST Road with a width of 7.3m to 7.9m is up to the standard stipulated in Transport Planning and Design Manual. The provision of emergency vehicular access for the proposed developments will also comply with the standard as stipulated in the Code of Practice for Fire Safety in Buildings 2011 under the Building (Planning) Regulation 41D which is administered by the Buildings Department (BD). Fire Service Department and Hong Kong Police Force have been consulted and have no adverse comments in this regard.</p> <p>Moreover, subject to the findings of the detailed Natural Terrain Hazards Study to be conducted, appropriate mitigation measures such as debris barriers along boundaries of the sites and at the respective discharging points of the natural drainage lines or topographic depressions to meet the latest geotechnical works standard and to minimise the risk of natural terrain hazard would be adopted.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
<i>Suggestion on Improvement of MOST Road</i>		
SD4	It is suggested to widen MOST Road and to reduce its gradient to facilitate visitors to Ma On Shan Country Park and Ma On Shan Iron Mine. Pedestrian footpath and cycle track are also proposed along the improved MOST Road to minimise conflicts of vehicular and cycle/pedestrian traffic.	As advised by CEDD, the upgraded MOST Road will have an improved gradient of 7.5% to 10% and with footpath on both sides to improve the safety for vehicles and pedestrian. However, cycle track will not be provided in view of road safety consideration.
E Environmental Aspect		
<i>Environmental Assessment</i>		
E1	No Environmental Impact Assessment (EIA) or independent environmental assessment has been conducted. Also, the proposed traffic improvement measures are not all covered in the PES.	<p>Based on the information provided in the PES, Environmental Protection Department (EPD) advised that the proposed developments would unlikely constitute a Designated Projects (DPs). The DP status will be further reviewed at the detailed design stage.</p> <p>PES has been prepared under the EFS covering both the proposed housing developments and the associated infrastructure and works. The PES concluded with the implementation of the proposed mitigation measures, no insurmountable environmental impacts are envisaged. Nevertheless, detailed assessment will be carried out during the detailed design stage. The PES were agreed by EPD. In any case, the project proponent for the road improvement works has to ensure that the proposed works will comply with relevant legislation and criteria for environmental protection and pollution control.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
<i>Environmental Impact at Construction and Operation Stages</i>		
E2	<p>(i) There are concerns on the environmental impacts generated by the construction works of the proposed housing developments and their associated infrastructural works (such as road and utility works), including vibration, noise, dust and air quality impact from site formation and earthworks, foundation works, retaining wall construction, construction traffic, equipment and plant.</p> <p>(ii) During the operation stage, the massive increase in population and associated traffic generated will lead to air, water, noise and light pollution, particularly the well-lit facades of residential towers, resulting in adverse ecological impacts.</p>	<p>The environmental impacts during both construction and operation stages of the development have been assessed in the PES. The PES concluded that with the implementation of the proposed good site practices and proposed mitigation measures, no insurmountable environmental impacts would be envisaged. Detailed assessment will be conducted in the detailed design stage and EPD has no adverse comment on the PES:</p> <p>(i) According to the PES, the proposed good site practices and recommended mitigation measures to be implemented at the construction stage of the project would include use of quiet Powered Mechanical Equipment (PME) and installation of temporary noise barriers and acoustic fabric to minimize the noise impacts arising from the construction, installation of temporary drainage pipes to control site run-off, and regular water, covering open stockpiles and washing wheels of construction vehicles to reduce dust emissions.</p> <p>(ii) According to the PES, mitigation measures proposed during the operation phase include discharging of all waste water from the development into the public sewers and prohibition of discharging into the nearby watercourses, and adoption of low noise road surface materials for the proposed access roads to minimise the potential traffic noise impacts.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>According to the ecological impact assessment (EcoIA) conducted under the PES and as agreed by Agriculture, Fisheries and Conservation Department (AFCD), no avifauna or mammal species of conservation interest was recorded in proximity of the proposed developments. Although lighting and human disturbance would affect the foraging behaviour of adjacent avifauna and mammal, the habitats in the vicinity is not considered as important site for them and these disturbances are considered to be only on a short-term basis as avifauna and mammal species will adjust their foraging area. Furthermore, with the adoption of appropriate mitigation measures as proposed by CEDD and HD, such as minimising light spill and glare from street lighting, review of the housing design to minimise light spill including avoidance of unnecessary external lighting at the detailed design stage, the ecological impact of lighting during operation stage is considered not significant.</p>
<i>Comments on Sites D, E and G</i>		
SE1	Some units at Sites D and E will still be subject to noise level exceeding 70 dB. Acoustic window is effective in mitigating noise impacts but is at the expense of air ventilation and the living quality of residents.	<p>As advised by EPD, acoustic windows shall be designed to meet the natural ventilation requirement stipulated in Building (Planning) Regulations for residential developments. By properly positioning the openings of inner window with the outer window, it can reduce noise entering indoor while allowing air flow into the room via the air gap between the two layers of windows.</p> <p>As advised by HD, at detailed design stage of the proposed public housing development, different methods including block orientation, screen wall etc., apart from acoustic window/balcony will be</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>considered to mitigate noise impact to the site.</p> <p>As stated in the PES, to mitigate the road traffic noise impact on the proposed school at Site E, noise barrier and low noise road surface material would be proposed for the upgraded MOST Road. Furthermore, as advised by EPD, Architectural Services Department (ArchSD) or the sponsoring body of the school to be identified in future will provide noise mitigation measures, including acoustic insulation where all direct noise mitigation measure are exhausted for the proposed school.</p>
SE2	The proposed residential development at Site G with a BH of 250mPD will be subject to aircraft noise considering its location along the flight path.	<p>Civil Aviation Department (CAD) is conscious of any possible noise impact that aircraft operations may have on local communities and has implemented a number of aircraft noise mitigating measures based on the international guidelines, aiming at mitigating noise impact caused by the aircraft without compromising aviation safety.</p> <p>Amongst various noise mitigation measures, the adoption of Continuous Descent Approach for aircraft arriving from northeast would minimize the aircraft noise impact on the overflying areas, including Ma On Shan, where possible. As aircraft on Continuous Descent Approach flies at higher altitudes, noise experienced in areas such as Ma On Shan is expected to be lowered.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
F	Ecological Aspect	
	<i>Policy on Nature Conservation</i>	
F1	<p>There is a lack of holistic policy for environmental conservation. The Government should put forward comprehensive nature conservation policy under which “GB” zone and Country Park are considered as a whole. The increase in population will also generate impact on the Country Park given the lack of supporting facilities/measures.</p>	<p>Country Parks have been designated under the Country Parks Ordinance for the purposes of nature conservation, countryside recreation and outdoor education. As for “GB” zone, it is a zoning designation under the Town Planning Ordinance primarily intended for defining the limits of urban and sub-urban development areas by natural features and to contain urban sprawl as well as to provide passive recreational outlets. There is a general presumption against development within this zone.</p> <p>As detailed in the response to B4 above, seven “GB” sites in Ma On Shan New Town have been identified for development of housing and associated supporting GIC facilities under the two-stage “GB” sites review. Under the EFS, PES including EcoIA have been carried out. The EcoIA concluded that the overall ecological impact, including both direct and indirect impact on habitats and species of conservation interest, was not significant. The proposed developments have avoided recognised sites of conservation importance including Ma On Shan Country Park. Mitigation measures and good site practices are recommended to minimise and address the potential impacts, including disturbance impacts, on local ecology during both construction and operation stages. In the detailed design stage, PER will be conducted to further confirm the ecological impact and propose appropriate mitigation measures if considered necessary. Due considerations have been given to strike a balance between conservation and development with a view to addressing the</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>needs of different strata of society.</p> <p>In consideration of the limited species of conservation interest recorded within or close to the Works Limit, the human disturbance already in existence and the scale of development, the small increase in physical disturbance is not anticipated to induce significant adverse impacts on the nearby habitats within the Study Area (i.e. 500m from works limit).</p>
F2	<p>The proposed amendments have not taken into consideration or complied with the directions of Hong Kong 2030+ and the Biodiversity Strategy and Action Plan (BSAP), in particular Action Areas 1 and 2. Further, the proposed amendments breached the Convention on Biological Diversity Article 8(e).</p>	<p>Hong Kong 2030+ proposed the territorial spatial strategy to guide the planning, land and infrastructural development for Hong Kong. While it is suggested to enhance livability in the compact built environment of Hong Kong, adequate and timely creation of land and space is also needed to meet future demand. During the development process, due regards should be paid to environmental considerations.</p> <p>As advised by AFCD, “GB” zone is not regarded as “Protected Area” under Action Area 1 of BSAP. The BSAP consists of 23 broad actions encompassing 67 specific actions with well-defined deliverables. It would be inappropriate to take the BSAP actions out of context and use them as benchmarks or targets for assessing compliance.</p> <p>AFCD also advised that the Convention on Biological Diversity (CBD) is an international treaty on the conservation of biodiversity, the sustainable use of its components, and fair and equitable sharing of benefits deriving from the use of genetic resources. In general, Parties to the CBD are required to adopt measures for protecting</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>biodiversity with regard to the CBD's provisions as far as possible and as appropriate in light of specific local circumstances. A number of the Articles of the CBD (including Article 8) do not impose absolute or immediate obligations, but call for discretions.</p> <p>For the proposed developments, EcoIA conducted under the EFS has indicated that no unacceptable ecological impact will be resulted.</p>
<i>Distance from Country Park and Potential Impact</i>		
F3	<p>The proposed housing development and associated infrastructural works are at close proximity to the Ma On Shan Country Park, with their works limit closer to or overlapping with the boundary of the Country Park (such as the proposed service reservoirs at Site F), which is totally unacceptable. They would cause irreversible impact not only on the sites but also on the surrounding areas including the Ma On Shan Country Park.</p> <p>Sites A, B1, C to G consist of a variety of natural features including well-wooded areas and plantation, which are ecologically connected to the surrounding woodlands within "GB" zone and even Ma On Shan Country Park. Old and valuable trees and rare species should not be the only consideration, as damage to the buffer at the fringe of woodland would also lead to ecological impact on the habitat at the core of the woodland.</p>	<p>The proposed housing developments and their associated infrastructure and facilities fall outside Ma On Shan Country Park and there is no direct impact on the Ma On Shan Country Park. The EFS conducted for the proposed developments has also confirmed that there is no insurmountable technical issues and no unacceptable impacts. Under the EFS, an EcoIA has been conducted with reference to the Annex 8 and Annex 16 of the Environmental Impact Assessment Ordinance – Technical Memorandum (EIAO-TM) to assess the potential direct and indirect impacts (including human disturbances) from the proposed developments. The Study Area covers 500m from the Works Limit and has taken into account the ecological connection of the amendment sites to Ma On Shan Country Park.</p> <p>According to the EcoIA, part of the works limit of Sites A, B1, D and F and the associated infrastructure for the proposed developments consist of woodland which are functionally linked to Ma On Shan Country Park, Ma On Shan SSSI and some other habitats.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>Considering that the loss of woodland due to the proposed developments will result in “moderate” ecological impact, appropriate mitigation measures such as on-site preservation with protection and compensation and provision of woodland compensation areas with equivalent or higher ecological function will be adopted. Detailed proposals will be submitted by project proponent to AFCD for approval.</p> <p>With the implementation of the proposed mitigation measures by the project proponent, the on-site preservation and provision of compensatory woodlands and the adoption of good site practices, the residual ecological impact (including indirect impacts on woodlands and the Ma On Shan Country Park) due to the proposed developments are considered to be acceptable. AFCD has no adverse comment in this regard.</p>
F4	The proximity of the amendment sites to the Ma On Shan Country Park was downplayed in the Paper submitted to Development and Housing Committee (DHC) of Sha Tin District Council (STDC), while AFCD and Country and Marine Parks Authority have not been consulted on the STDC Paper.	Response to F3 above regarding impact on Ma On Shan Country Park are relevant. AFCD has been consulted on the PES under the EFS regarding the EcoIA and the proposed amendments to the approved OZP, and has no adverse comment. The DHC Paper has reflected the findings of the EFS including the EcoIA.
F5	“Country Parks Planning An Introduction” prepared by the former Country Park Authority in 1988 has already noticed that development on the fringe of the Country Parks might have a visual or environmental impacts upon them. In this	As advised by AFCD, the quoted principle from the working paper entitled “Country Parks Planning An Introduction” applies to the assessment and control of developments within Country Parks.

	Major Grounds and Proposals of Representations	Responses of Government Departments
	regard, assessment is normally extended for about 1km outside the Country Park boundary (or to the nearest major road if this is within 1 or 2 km), and the Country Parks Authority is in a position to make recommendation to the Buildings Department (BD) and LandsD concerning development on the fringe of the Country Parks.	
F6	The loss of buffer between urban development and countryside will result in more conflicts between human and wildlife.	<p>According to the findings of the EcoIA, while the increased human disturbance may result in potential indirect impacts, many of the recorded species are highly mobile and/or tolerant of human disturbance. Any resulting impacts are unlikely to have a significant effect on the population numbers of wildlife, therefore the impact on wildlife is considered as negligible and AFCD has no adverse comment. Nevertheless, appropriate mitigation measures have been proposed for the operation phase under the EcoIA as follows:</p> <ul style="list-style-type: none"> (i) Slopes together with the planting strip / retaining wall / chain link fence along the works limit would represent barriers to restrict residents from accessing the nearby habitats and hence minimise physical disturbance. (ii) The existing MOST Road forms a barrier to the wildlife and animal is susceptible to road kill. While the upgrading works of MOST Road would not significantly increase this risk, it provides a good opportunity for enhancement by introducing wildlife crossing system along the upgraded MOST Road to reduce the risk. (iii) Adoption of low noise road surface material and outdoor lighting control to minimize noise and light disturbance.

	Major Grounds and Proposals of Representations	Responses of Government Departments
<i>Impact on Wildlife / Vegetation / Ecosystem / Biodiversity</i>		
F7	<p>(i) The proposed development would pose direct impacts on both the streams/watercourses and their riparian vegetation. Some of the affected streams are natural and have densely vegetated riparian zones. Even for modified streams, most of them retained a natural bottom substrate.</p> <p>(ii) The woodlands within the works limit of the amendment sites are of “moderate” or “moderate to high” ecological value. They are mature enough to provide foraging and roosting grounds for various forest birds and other wildlife. Typical woodland dependent bird species (such as <i>Pnoepyga pusilla</i> (小鷦鷯), <i>Stachyridopsis ruficeps</i> (紅頭穗鷯), <i>Spilornis cheela</i> (蛇鷯)) were recorded in/near the amendment sites and/or the connected woodland.</p> <p>(iii) The plantation habitats identified have high potential to become further mature and increase in ecological value if sufficient time is allowed for natural succession. In terms of flora, mature trees and native self-seeded species (such as <i>Aporosa dioica</i> (銀柴), <i>Ficus variegata</i> (青果榕), <i>Sterculia lanceolata</i> (假蘋婆), <i>Zanthoxylum avicennae</i> (簕欖花椒)) and species of conservation interest (such</p>	<p>(i) According to the EcoIA, the streams/ water courses/ modified watercourses which may be directly affected within the works limit have ecological values ranging from “low” to “moderate”. Most of the affected streams/ watercourses/ modified watercourses are seasonal and do not support diverse riparian vegetation and fauna species. Taking into account the nature of the works involved, species diversity of the watercourses and minimisation and avoidance of direct impacts to the watercourses with aquatic fauna species of conservation interest, the overall direct impact is “low” to “low to moderate”. With the implementation of mitigation measures by the project proponent including maintaining surface runoff feed to the habitat through by-pass drainage system, re-provision / diversion of the stream / watercourse and green channel design to maximize the ecological opportunities in the diverted session, the residual impact of the loss of streams/ watercourses/ modified watercourses due to the project is considered to be acceptable and AFCD has no adverse comment.</p> <p>(ii) According to the EcoIA, only part of the works limit of Sites A and B1 and the associated infrastructure and upgrading works of MOST Road (i.e. to the north of Site G) consist of woodlands of “moderate” ecological value, while part of the works limit of Site D and small portion of the works limit of Site F and the upgrading works of MOST Road consist of</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
	<p>as <i>Euonymus tsoi</i> (長葉衛矛), <i>Gnetum luofuense</i> (羅浮買麻藤), <i>Pavetta hongkongensis</i> (香港大沙葉), <i>Aquilaria sinensis</i> (土沉香), <i>Cibotium barometz</i> (金毛狗), <i>Rhododendron simsii</i> (紅杜鵑), <i>Diospyros vaccinioides</i> (小果柿)) are recorded. In terms of fauna, <i>Turdus cardis</i> (烏灰鵲) and <i>Larvivora sibilans</i> (紅尾歌鵲) are recorded in the Plantation next to Site D.</p>	<p>woodland of “moderate to high” ecological value. These woodlands have been subject to constant traffic and human disturbance and most of the species recorded were common species. Considering aforementioned habitat value and species diversity and the size of woodland loss, the loss of woodland due to the proposed developments will result in “moderate” ecological impact. With the mitigation measures for the loss of woodland due to the proposed developments, the residual impact on the woodlands is considered acceptable and AFCD has no adverse comment. The mitigation measures include:</p> <ul style="list-style-type: none"> - Detailed vegetation survey of the affected woodland would be conducted and a mitigation plan with mitigation strategies (such as on-site preservation with protection and compensation) will be submitted by the project proponent to the AFCD for approval before commencement of site works. - Detailed Woodland Compensation/ Enrichment Plan would be submitted by project proponent to AFCD for approval. Habitat compensation will be provided in a “no net loss” and “like for like” basis as far as practicable, or by providing a compensation area with equivalent or higher ecological function. Appropriate planting works will be arranged to form both on-site and off-site Woodland Compensation Area after the works.

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>As advised by AFCDD, for the mentioned bird species, <i>Pnoepyga pusilla</i> (小鷦鷯) and <i>Stachyridopsis ruficeps</i> (紅頭穗鷯) were recorded deep inside the Woodland and remote from the works limit while there is no record on <i>Spilornis cheela</i> (蛇鷯) inside the study area. For <i>Pnoepyga pusilla</i>, the indirect impact on this species was considered as insignificant. For <i>Stachyridopsis ruficeps</i>, it has wide range of habitat and less sensitivity to human disturbance. Taking into account its mobility, the potential impact on this species is also insignificant. Good site practice and management and installation of site hoardings will be implemented to minimise the indirect impact on these bird species during the construction phase. Detailed ecological survey will be conducted by the project proponent in the detailed design stage to further ascertain the potential impact on these bird species and specific mitigation measures will be formulated if necessary.</p> <p>(iii) All mentioned flora species were recorded within the Plantation habitats in the Study Area. The species of conservation interest recorded in the plantation habitats within the Works Limit are <i>Gnetum luofunse</i> (羅浮買麻藤), <i>Cibotium barometz</i> (金毛狗), <i>Aquilaria sinensis</i> (土沉香) and <i>Diospyros vaccinioides</i> (小果柿). Among the mentioned species, the rarity of <i>Gnetum luofunse</i> is “very common” while the others are “common”. Although these species would be in direct conflict with the proposed</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>developments, they are only present at low abundance within the Works Limit and are commonly found in other areas outside the Works Limits. In this regard, impact on these species was considered to be “low to moderate”. On the other hand, <i>Euonymus tsoi</i> (長葉衛矛), <i>Pavetta hongkongensis</i> (香港大沙葉) and <i>Rhododendron simsii</i> (紅杜鵑) were recorded outside the Works Limit and will not be affected by the proposed works. As for the native species mentioned (i.e. <i>Aporosa dioica</i> (銀柴), <i>Ficus variegata</i> (青果榕), <i>Sterculia lanceolata</i> (假蘋婆), <i>Zanthoxylum avicennae</i> (簕欖花椒)), they are recorded within the works limit and are not classified as species of conservation interest.</p> <p>The ecological value of plantation within Sites A and B1 is considered as “low” in view of its dominance by cultivated exotic tree species with limited ecological value to native fauna and frequent human disturbance. The ecological impact on plantation for Sites A and B1 is “low” taking into account the small area of plantation loss, absence of species of conservation interest from plantation and the low ecological value of plantation. For Sites C to G, although the habitat is supporting four plant species of conservation interest, most of these plantation areas have certain degree of human disturbance, the ecological value and impact are both considered as “low to moderate”. AFCD has no adverse comment on the above findings. As advised by CEDD, in order to reduce the plantation area to be affected, the</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>boundaries of the development sites have been refined during the course of the assessment. Detailed vegetation survey will be conducted at the detailed design stage to further ascertain the potential impact to the species of conservation interest and formulate specific mitigation measures on the principles of avoidance, transplantation and compensation. For the avifauna species <i>Turdus cardis</i> (烏灰鶇) and <i>Larvivora sibilans</i> (紅尾歌鶇), they are not considered to be species of conservation importance and were not recorded in the Study Area of EcoIA.</p>
F8	<p>The proposed housing developments and associated infrastructural works will require felling of about 2,780 trees, including mature trees and native species (such as <i>Ormosia semicastrata</i> (軟莢紅豆), <i>Alangium chinense</i> (八角楓), <i>Mallotus paniculatus</i> (白楸)) and species of conservation interest (such as <i>Ixonanthes reticulata</i> (黏木), <i>Aquilaria sinensis</i> (土沉香), <i>Gnetum luofuense</i> (羅浮買麻藤), <i>Cibotium barometz</i> (金毛狗))</p>	<p><i>Alangium chinense</i> (八角楓), <i>Mallotus paniculatus</i> (白楸), <i>Ixonanthes reticulata</i> (黏木), <i>Aquilaria sinensis</i> (土沉香), <i>Gnetum luofuense</i> (羅浮買麻藤), <i>Cibotium barometz</i> (金毛狗) are recorded within the works limit. <i>Ixonanthes reticulata</i>, <i>Aquilaria sinensis</i>, <i>Gnetum luofuense</i>, <i>Cibotium barometz</i> are considered to be species of conservation interest. As advised by CEDD, the proposed works would not be in direct conflict with the mentioned <i>Ixonanthes reticulata</i> (黏木) according to the EFS. Nevertheless, a detailed vegetation survey would be carried out in the detailed design stage. For the other mentioned species within the works limit, although they will be in direct conflict with the proposed developments, they are only present at low abundance within the works limit and are commonly found in other areas outside the works limits. In this regard, the impact to these species was considered to be “low to moderate”. On the other hand, <i>Ormosia semicastrata</i> (軟莢紅豆) is recorded outside the Works Limit.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>Although approximately 2,780 existing trees will be affected by the proposed developments, the affected trees are of common species and do not include Old and Valuable Tree or tree of large size. As confirmed by CEDD, to compensate the direct loss of woodland due to the proposed developments, woodland compensation at a ratio of at least 1:1 with approximately 2,900 trees and shrubs is proposed with reference to the Development Bureau Technical Circular (Works) (DEVB TC(W)) No. 4/2020 – Tree Preservation. The species used will be native species, compatible with the surrounding landscape as far as practicable, and could enhance the vegetation diversity of the local environment. Habitat compensation will be provided in a “no net loss” and “like for like” basis as far as practicable, or by providing a compensation area with equivalent or higher ecological function. CEDD also advised that the nursery and planting of the compensatory trees will be carried out in parallel with the implementation of the proposed housing developments and an establishment period of three to five years will be allowed after tree-planting. According to the EcoIA, the residual direct impact of habitat loss due to the proposed developments is considered to be minor and acceptable with the implementation of woodland compensation. AFCD and Chief Town Planner/Urban Design and Landscape (CTP/UD&L) of PlanD have no adverse comment. Detailed tree survey will also be conducted by the project proponent in the detailed design stage to further ascertain the potential impact to the species of conservation interest and formulate specific mitigation measures as appropriate. Detailed Woodland Compensation/ Enrichment Plan would also be submitted by the project proponent to AFCD for</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		approval.
F9	<p>The habitat of species of conservation interest (<i>Plestiodon elegans</i> (麗紋石龍子)) and many other wild animals (including Red Muntjac (赤麂), Leopard Cat (豹貓), Masked Palm Civet (果子狸), Chinese Porcupines (箭豬), Eurasian Wild Pig (野豬), Brown Cattle (黃牛), Chinese Pangolin (穿山甲)) would be adversely affected by the proposed developments.</p>	<p>As advised by AFCD and CEDD, <i>Plestiodon elegans</i> (麗紋石龍子), Red Muntjac (赤麂), Leopard Cat (豹貓), Masked Palm Civet (果子狸), Chinese Porcupine (箭豬) and Chinese Pangolin (穿山甲)) are considered to be species of conservation importance. <i>Plestiodon elegans</i> was found within the Study Area but outside the works limit, and has high degree of mobility. Thus, no direct impact on <i>Plestiodon elegans</i> due to the proposed developments is anticipated. For the other species of conservation interest mentioned by the representers, none of them have been recorded within the Study Area during the survey. Considering that the proposed developments will not encroach onto any part of Ma On Shan Country Park, the direct impact to these species is negligible.</p> <p>For the Eurasian Wild Pig (野豬) and Brown Cattle (黃牛), they have a wide distribution in Hong Kong. They could utilize wide range of habitats throughout Ma On Shan Country Park and therefore the indirect impact to these species was considered insignificant.</p> <p>AFCD advised that there is no additional finding of fauna species of conservation importance within the Study Area further to those identified under the PES according to its record. As advised by CEDD, detailed ecological survey will be conducted by the project proponent at the detailed design stage.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
F10	Ecological impact on the natural slopes as a result of the extensive slope stabilization and mitigation measures for housing developments and road works.	As advised by CEDD, the extent of cut slopes will be reduced as far as practicable by suitable design so as to minimize the ecological impact. Mitigation measures such as compensatory tree planting and climber planting on new man-made engineering slopes and retaining walls will be adopted.
<i>Comprehensiveness of Ecological Impact Assessment</i>		
F11	The number of trees and their conservation value may be under-estimated in the preliminary tree survey. Some young trees with diameter at breast height of less than 95mm would not be reflected in the Tree Survey Report. <i>Ixonanthes reticulata</i> (黏木) is spotted but it is not mentioned in the preliminary tree survey.	<p>As advised by AFCD, preliminary tree survey which is a broad-brush tree survey is aimed to identify all tree groups within the Study Area for the purpose of landscape assessment. Under the EcoIA, vegetation surveys have also been conducted to characterize vegetation types and record the dominant and notable plant species, their conservation status in Hong Kong and relative abundance within the study area. The survey methodology adopted is widely employed in different environmental impact assessment studies, and AFCD have no adverse comment on it.</p> <p>As stated in the EcoIA, for the flora species of conservation interest in direct conflict with proposed works, they are only present at low abundance within the Works Limit and are commonly found in other areas outside the Works Limits. The impact on these species is considered as “low to moderate”. As advised by CEDD, the proposed works would not be in direct conflict with the <i>Ixonanthes reticulata</i> (黏木) according to the EFS. AFCD has no adverse comment on the above findings. As advised by CEDD, detailed vegetation survey will also be conducted by the project proponent in the detailed design stage. For any <i>Ixonanthes reticulata</i> found within the works limit, the</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		first priority is to assess the impact of works on individual plants. In case retention is not feasible, transplantation would be considered as far as practicable based on individual plant's health condition and suitability for transplanting in accordance with government's legislation, technical circulars, guidelines, and specialists' advice.
F12	Besides, a few more species which were not recorded in the ecological surveys conducted for the PES have been found, such as woodland dependent <i>Spilornis cheela</i> (蛇鵰), <i>Turdus cardis</i> (烏灰鶇), <i>Lexias pardalis</i> (小豹律蛺蝶), <i>Junonia lemonias</i> (蛇眼蛺蝶) and <i>Symbrenthia lilaea</i> (散紋盛蛺蝶).	<p>Under the EcoIA, all the mentioned avifauna and butterfly species are not recoded during the preliminary ecological surveys conducted between August 2015 and April 2019. Besides, only avifauna <i>Spilornis cheela</i> (蛇鵰) is considered as species of conservation importance.</p> <p>AFCD has no adverse comment on the survey methodology adopted for avifauna and butterfly which is often employed in different environmental impact assessment studies. As advised by CEDD, detailed ecological survey will be conducted by the project proponent at the detailed design stage.</p>
Mitigation Measures		
F13	Compensation for the loss of habitat and vegetation is inadequate. While transplantation of trees should be considered first, and old trees with historical values should be preserved as far as practicable, the existing mechanism for tree compensation and transplantation and greenery in future development site still would not re-create a habitat of equivalent ecological value and integrity. There is no planning gain from the massive loss of high quality landscape.	<p>In view of the acute housing demand, there is a need to strike a balance between development and conservation. The EFS for the Ma On Shan housing sites has confirmed that no insurmountable technical problems and unacceptable impacts are envisaged for the proposed housing developments and their associated infrastructure and facilities.</p> <p>As indicated in the EcoIA, to address the loss of habitat and vegetation, habitat/ woodland compensation would be provided in a</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		“no net loss” and “like for like” basis as far as practicable, or by providing a compensation area with equivalent or higher ecological function which is based on Annex 16 of EIAO-TM. AFCD have no adverse comment. The tree compensation measures are detailed in response to F8.
F14	The proposed translocation and provision of wildlife crossing system after destruction of the woodland and habitat would not help mitigate the loss of species.	As advised by CEDD, to mitigate the ecological impact to the fauna species, a Translocation Plan with details on capture methodology, programme and receptor would be proposed and submitted to AFCD for approval. The wildlife crossing system is an enhancement measure to reduce road kill of wildlife on MOST Road and AFCD has no adverse comment.
<i>Impact on Wildlife / Vegetation / Ecosystem / Biodiversity for Sites A and B1</i>		
SF1	The ecological value of the habitats within works limit of Amendment Items A and B1 is regarded as “moderate” while the orchard, marsh and woodland actually possess potential ecological value for wildlife. In particular, the proposed development will have significant adverse impacts on the marsh at Site B1 and the species depending on this habitat, including <i>Eleocharis equisetina</i> (木賊荸薺), which is an uncommon native wetland species.	<p>According to the EcoIA, the ecological value of Orchard near Site A is considered as “low”. Although it has potential for enhancement in ecological value for wildlife, the current habitat has low flora and fauna diversity with no species of conservation interest, and this type of habitat is common in Hong Kong and highly recreatable. With compensatory planting proposed as mitigation, no significant residual impact will be resulted.</p> <p>While the ecological value of Marsh near Site B1 is considered as “moderate” according to the EcoIA, the proposed access road has avoided the majority of the marsh. To protect an uncommon native wetland species <i>Eleocharis equisetina</i> (木賊荸薺) recorded at the marsh, isolation between the construction site and the marsh is</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>proposed to avoid disturbance or contamination of the marsh water. For individuals of <i>Eleocharis equisetina</i> which will be directly affected by the proposed works, transplantation to the adjacent unaffected marsh area as far as practicable is proposed. Besides, new drainage system will be implemented to ensure the natural water supply to the marsh habitat will not be adversely affected.</p> <p>Regarding the Woodland habitat, response to F7 above is relevant.</p> <p>AFCD has agreed with the above findings.</p>
<i>Impact on Wildlife / Vegetation / Ecosystem / Biodiversity for Sites C to G</i>		
SF2	Sites C to G and the associated access road proposed is located at close proximity to the Ma On Shan SSSI, which is a unique shrubland providing a unique habitat. Unique species including rare Orchid, ferns, Red Muntjac (赤麂), East Asian Porcupine (東亞豪豬) and Eurasian Wild Pig (野豬) can be found. The proposed developments will result in reduction of buffer for the SSSI from land development, and adverse impact on the biodiversity of Ma On Shan.	As advised by AFCD, the Ma On Shan SSSI is of floristic interest with a number of rare plants. The proposed housing developments and their associated infrastructure and facilities will not encroach onto the SSSI, and hence there will not be any direct impact on the SSSI. Besides, as the shortest distance of the works limit from the SSSI is about 330 m, no significant indirect impact on the SSSI is anticipated.
SF3	Tree felling for widening of MOST Road will lead to soil degradation and flood risk in downstream.	According to CEDD, detailed ground investigation will be conducted at the detailed design stage to determine the ground condition of the proposed roadworks and slope stabilization works. A slope drainage

	Major Grounds and Proposals of Representations	Responses of Government Departments
		system will also be designed to catch the surface runoff within the road reserve area. Therefore, adverse geotechnical and drainage impacts are not envisaged.
G Landscape Character		
G1	The “GB” sites are scenic landscapes which are integrated with the scenery of the adjacent Country Park. The proposed developments and associated infrastructure will spread the development footprint of Ma On Shan over the Ma On Shan Bypass into “GB” areas. The significant change of the countryside character of the Ma On Shan upland valley as a result will have widespread implications on the view and experience for visitors in the surrounding country park areas. Compensation for the loss of public enjoyment is inadequate.	<p>Landscape Assessment (LA) has been conducted under the EFS to confirm that the overall residual landscape impacts of the proposed housing development are acceptable with mitigations during the construction and operation phases. Amenity planting, greening and sensitive design in relation to the local context will help integrate the proposed developments into the surrounding “GB”. CTP/UD&L of PlanD considered that no significant impact on Ma On Shan Country Park is envisaged.</p> <p>Regarding the landscape impact on the route to Ma On Shan Country Park, with the adoption of mitigation measures including compensatory and amenity planting, the LA indicated that the residual impact for the section of upgraded MOST Road from Sites C to G would be “moderate” upon Day 1 of completion of the development and subsequently alleviated to “slight” when the compensatory and amenity planting are established upon Year 10 from the completion of the development. CTP/UD&L of PlanD has no objection to the findings of the LA.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
<i>Landscape Resources at Sites A and B1</i>		
SG1	<p>(i) Site A and the associated access road proposed would encroach on an orchard with various fruit trees species cultivated by the villagers.</p> <p>(ii) The entire stand of pine trees at Site B1, which was a popular woodland setting for TV and film productions in the past and helped to supplement the income of some villagers, would be felled.</p> <p>(iii) Site B1 and the associated access road proposed would encroach on a small wetland area, which was the last vestige and remnant of rice cultivation.</p>	<p>(i), (ii) While the mentioned Orchard and the stand of pine trees would be unavoidably be affected respectively by the proposed housing developments at Site A and Site B, amenity tree planting and shrub planting will mitigate to some extent the loss of the vegetation and reduce the significance of landscape impacts from “substantial” to “moderate” upon completion of the proposed housing developments, and subsequently to “slight” when the amenity trees and shrub planting are established upon Year 10 from the completion of the developments according to the LA. CTP/UD&L of PlanD has no adverse comment in this regard. As Orchard habitat and the stand of pine trees are common habitats with no species of conservation interest, their ecological values are both considered as “low” according to the EcoIA. AFCD has no adverse comment in this regard.</p> <p>(iii) The proposed developments has avoided the majority (about 0.9ha) of the wetland (total area of about 1.1ha) to the west of Cheung Muk Tau Village. While a small portion of the wetland (about 0.2ha) will unavoidably be affected by the proposed development, the landscape and ecological impacts are considered as “Moderate” according to the LA and EcoIA. As advised by CEDD, appropriate mitigation measures will be adopted to minimize potential indirect impacts on the rest of the wetland, including but not limited to a new drainage system to ensure the natural water supply to the wetland</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		habitat will not be adversely affected. AFCD and CTP/UD&L of PlanD have no adverse comment in this regard.
H	Geotechnical and Construction Aspects	
H1	Detailed geotechnical investigations have not been conducted for the amendment sites. As indicated in the Enhanced Natural Terrain Landslide Inventory (ENTLI), 5 landslides have been recorded at Sites A and B1, 70 landslides have been recorded at Sites D and E, which were located on colluvial deposit, while 27 landslides have been recorded at Site G. These sites are not suitable for housing development. Otherwise, natural terrain mitigation measures at huge cost will be required, and future users and residents may have to bear the huge cost of slope repairing and maintenance.	<p>As advised by CEDD, preliminary geotechnical appraisal (GA) including a review of the natural terrain hazards, has been conducted for the concerned sites. According to the GA, 102 landslides within the study area of the proposed development sites A, B1, D, E and G were observed from aerial photographic records in the past 80 years. These landslides are confirmed to be small in scale.</p> <p>According to the GA, the proposed site formation and infrastructure works are considered geotechnical feasible, and no insurmountable issue is anticipated from the geotechnical aspect. Adequate hazard mitigation measures such as providing rigid barrier, flexible debris barrier and check dam have been proposed based on the preliminary analysis. The Geotechnical Engineering Office (GEO) of CEDD has no adverse comment. The appraisal has also concluded that the cost estimation for the proposed mitigation measures above-mentioned are deemed reasonable.</p> <p>Detailed site investigation and natural terrain hazard study will be conducted to formulate the detailed design including the proposed site formation works and the necessary natural terrain hazard mitigation works for the proposed developments, and to update the construction cost at the subsequent stage.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
<i>Geotechnical and Construction Issues at Specific Sites</i>		
SH1	The potential existence of fault line and shear zone at Sites A and B1 as stated in the Government's consultancy report would pose difficulty on the construction and lead to high construction cost and long construction period.	According to the GA, Sites A and B1 may be traversed by faults or shear zones. Nonetheless, the proposed developments at both sites are considered geotechnically feasible; and the potential existence of fault line and shear zone are considered surmountable and GEO of CEDD has no adverse comment. Detailed field mapping and adequate ground investigations will be carried out in the detailed design stage to identify the suspected fault/shear zones for developing an optimal housing development layout, and to accurately quantify the risk and costs.
SH2	Concern on the ground borne vibration from piling activities which has a strong possibility of damaging the village houses of Cheung Muk Tau.	As advised by CEDD and HD, the foundation works and building works of the proposed development will be carried out in accordance with the Building (Construction) Regulations with monitoring points installed during piling construction to ensure its compliance.
SH3	The geological condition for Sites C to G is potentially unstable as a result of the mining excavations in the past. It is estimated that 12 million tons of iron ore were extracted from the 5 underground mining levels, equivalent to a dimension of 130m x 100m x 127m. The proposed development will affect the stability of the stratum of Ma On Shan but no geotechnical investigation has been conducted.	As advised by CEDD, the former Ma On Shan Mine was located in uphill area and partly in the form of open mining and partly through underground mining operations. It falls outside of the study area of Sites C to G. The ground condition of the development sites and the structural integrity of nearby buildings and structures including those of the former Ma On Shan Mines will be examined through detailed field mapping and adequate ground investigations during the Investigation, Design and Construction stage of the developments. CEDD and HD also advised that the proposed developments will be designed in accordance with the information revealed from the ground investigation and the Code of Practice for Foundation, to

	Major Grounds and Proposals of Representations	Responses of Government Departments
		address the site specific condition, and to ascertain a stable site formation platform for piling works. Suitable construction methods and mitigation measures, if required, will also be formulated. GEO of CEDD has no adverse comment.
SH4	Sites C to G are located within Strategic Cavern Area (SCVA) No. 19 where numerous caverns are in existence underground.	As advised by GEO of CEDD, Ma On Shan falls under the Government's Cavern Master Plan (CMP). The CMP delineates SCVAs that are well placed for rock cavern development and provides general guidelines on project planning and implementation. The government's policy on rock cavern development and relevant information about the SCVA No.19 have been taken into account for the proposed developments. According to the GA, there is no adverse geotechnical impact arising from the proposed developments, and detailed site investigation will be conducted to confirm the detailed design on site formation and infrastructure works.
I Risk Assessment		
I1	Ma On Shan Water Treatment Works (MOSWTW) is a potentially hazardous installation (PHI) and sizable development are normally not approved in the vicinity (i.e. Sites A and B1) according to the HKPSG.	<p>The MOSWTW is classified as a PHI under HKPSG. As Sites A and B1 fall within the consultation zone of MOSWTW, a hazard assessment on the MOSWTW has been conducted under the EFS to evaluate the risk acceptability of the proposed sites due to operations of the MOS WTW in accordance with relevant criteria under the HKPSG and EPD has no adverse comment.</p> <p>The risk assessment on the overall risk level for both construction and operation phases of Sites A and B1 has been conducted. It is</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		concluded that the overall risk due to the proposed developments will remain in the 'As Low As Reasonably Practicable' region as stated under the HKPSG, and the proposed developments will not lead to an unacceptable overall risk.
I2	There is a high pressure pipeline of town gas close to Sites B1 and D. Quantitative Risk Assessment (QRA) should be conducted to evaluate the potential risk and determine the necessary mitigation measures.	<p>A full QRA has been carried out under the EFS for the proposed developments to assess the risks associated with the operation of high pressure town gas pipeline in the vicinity of Sites B1 and D (running underneath Ma On Shan Bypass and along MOST Road). It is concluded that the change in population due to the proposed developments would not present unacceptable risks to the overall population around Ma On Shan and Electrical and Mechanical Services Department (EMSD) has no adverse comment.</p> <p>As advised by EMSD, future project proponent will be required to observe EMSD's requirements on the "Avoidance of Damage to Gas Pipes 2nd Edition" during the construction phase of the proposed developments.</p>
J Visual Impact		
J1	The green panorama of Ma On Shan is enjoyed by residents of Ma On Shan, Sha Tin and Tai Po, and hikers and cyclers around Plover Cove. The importance of keeping the green panorama intact is neglected.	Under the EFS, visual assessments has been conducted for the proposed public housing developments at Amendment Items A, B1, D and G in accordance with TPB Guideline No. 41 on Submission of Visual Impact Assessment for Planning Applications to the Town Planning Board (TPB PG-No. 41). Given the high mountain backdrop from about 400mPD to 600mPD and the maximum building height (BH) of the proposed building blocks of about

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>165mPD to 250mPD, the assessments have concluded that the proposed housing developments would not affect the overall integrity of the Ma On Shan ridgeline. CTP/UD&L of PlanD considered that the findings of the visual assessments has reasonably demonstrated the visual impacts of the proposed developments.</p> <p>The scale and layout of the proposed developments are formulated with due consideration to site context, site configuration and height restrictions. The proposed developments will be optimizing flat production while minimizing the visual impact through architectural design or arrangements and landscaping measures. Mitigation measures including building separations, are also proposed to reduce visual and ventilation impacts to achieve better visual permeability.</p> <p>Moreover, compensatory planting and greening will help alleviate the inevitable vegetation loss due to the housing platform construction and integrate the proposed developments into the Ma On Shan Country Park and most of the surrounding “GB” zone which would remain intact. The visual assessments have indicated that the overall visual impacts of the proposed developments are considered as “moderately adverse” when viewed from some of the viewing points. CTP/UD&L of PlanD considered that the assessments have reasonably conducted according to the TPB PG-No. 41. Albeit of the visual impact, the proposed developments are in line with the housing policy which optimize the land use and increase housing land supply for both public and private housing developments.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
J2	The extensive mitigation measures required against natural terrain hazard would result in adverse visual impact.	As advised by CEDD, practical landscape treatments such as greening for vertical retaining walls and hydroseeding for modified slopes will be proposed as effective measures to reduce the visual nuisance of the proposed engineering structures. Further detailed measures will be reviewed and formulated at the detailed design stage.
J3	Potential obstruction to the view of other residential developments.	<p>The viewing points (VPs) under the visual assessments were selected taking into account criteria such as visual sensitivity, local significance and accessibility, as well as other local and district planning considerations etc. CTP/UD&L of PlanD considered that the selection of VPs is generally in line with the requirements as set out in the TPB PG-No. 41.</p> <p>According to para. 4.5 of TPB PG-No. 41, in the highly developed context of Hong Kong, it is not practical to protect private views without stifling development opportunity and balancing other relevant considerations. In the interest of the public, it is far more important to protect public views, particularly those easily accessible and popular to the public or tourists. Visual assessment should primarily assess the impact on sensitive public viewers from the most affected VPs.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
<i>Concerns on Specific Sites</i>		
SJ1	<p>(i) Proposed developments at Sites A and B1 are totally incompatible with the developments of Cheung Muk Tau Village, Symphony Bay and the surrounding environment. Permanent and significant adverse impacts on the natural lighting, as well as the visual aspects on the ridgeline of Ma On Shan mountain range, in particular the Hunch Backs are anticipated.</p> <p>(ii) The visual impact caused by the proposed developments at Sites A and B1 would be more significant from some other vantage points.</p>	<p>(i) In view of the acute housing demand, a balance between different considerations including development intensity and visual impact has to be struck. As stated in the visual assessment, a varied BH profile is adopted for the proposed developments at Sites A and B1 to avoid fragmentation of the existing transitional landscape from the highly urbanized Ma On Shan township (such as Lake Silver with BH of 185mPD) to the rural village type area (such as Symphony Bay with BH ranging from about 38mPD to 59mPD and Cheung Muk Tau Village), and to alleviate the potential visual impacts.</p> <p>According to visual assessment for Sites A and B1, VPs of Sensitive Public Viewers within Visual Envelop include VP from hikers at Ma On Shan, visitors at Nai Chung Beach and Ma On Shan Bypass sitting out area, road users of Sai Sha Road and travellers at Nai Chung Bus Stop. The residual impacts from these VPs are “slightly or moderately” adverse with the adoption of the following recommended mitigation measures during design stage of the development:</p> <ul style="list-style-type: none"> - BH of the development carefully designed to avoid blockage of Ma On Shan Ridgeline; - follow Building Department’s APP-152 – Sustainable Building Design Guidelines to minimize building mass by avoiding continuous and wall-like development, and providing visual corridor between each building block to allow visual penetration and prevention of significant

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>visual obstruction;</p> <ul style="list-style-type: none"> - use of appropriate building materials and colours in built structures to reduce visual impact; and - provide air passageway of minimum 15m width in between major building blocks to provide air ventilation corridors within the development and form visual corridors to allow view passage and minimise visual obstruction. <p>Regarding the impact on the ridgeline of Ma On Shan mountain range, as stated in Response J1, given the height of the Ma On Shan ridgeline ranging from 400mPD to 600mPD and the height of the proposed residential development of about 165mPD to 250mPD, the overall integrity of Ma On Shan Ridgeline would not be significantly affected. As demonstrated by the photomontages of the visual assessment conducted for Sites A and B1, the current view to the Ma On Shan mountain range would be blocked partially as viewed from the key public VP at VP4 (road users of Sai Sha Road) as demonstrated in the photomontages under the visual assessment. To a certain extent, the anticipated obstruction would be alleviated by limiting the number of building blocks and providing building separations.</p> <p>Though natural lighting assessment is not required under the VIA, as confirmed by HD, sun-shadowing analysis and solar radiation analysis for the new public housing development</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>will be carried out during design stage to minimise the adverse impacts on natural lighting to the surroundings.</p> <p>(ii) The VPs under the visual assessments were selected taking into account criteria such as visual sensitivity, local significance and accessibility, as well as other local and district planning considerations etc. CTP/UD&L of PlanD considered that the selection of VPs is generally in line with the requirements as set out in the TPB PG-No. 41.</p>
SJ2	<p>Proposed development at Site D would result in sore-thumb development and is not in line with the stepped height profile of Ma On Shan. The site formation level of 75mPD is already higher than the heights of many buildings in Ma On Shan, and the proposed development at a BH of 225mPD is higher than Kam Ying Court by 65m. The forested mountain scenery, and the landscape of Ma On Shan Country Park and the mining settlements will be destroyed. The visual impact of the proposed development was downplayed in the feasibility studies as not as tall as the mountain behind.</p>	<p>As stated in RNTPC Paper No. 6/20, the development concept of Ma On Shan New Town has adopted a stepped height approach with BH generally increasing progressively from the waterfront to inland area/ hillside and decreasing progressively from the town centre and the eastern gateway node of MTR Wu Kai Sha Station towards the peripheries.</p> <p>The BH restriction for Site D situated at inland area/ hillside, is 225mPD. To the immediate north and east across Ma On Shan Bypass, the BH restriction decreases progressively towards the waterfront from 150mPD at Kam Ying Court, 130mPD at Saddle Ridge Garden to 110mPD at Villa Athena. Therefore, the proposed development at Site D is generally in line with the stepped height concept of Ma On Shan New Town by keeping taller buildings on the hillside and lower buildings towards the waterfront.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>According to the visual assessment for Site D, when viewed together with the high mountain backdrop of Ma On Shan ridgeline ranging from 550 to 600m in height, the proposed housing developments with BH of 225mPD will not affect the continuation of the ridgeline as illustrated in the photomontages for the key public VPs of VP4 (road users at Hang Hong Street Roundabout) and VP8 (recreational users of Pak Shek Kok Promenade).</p> <p>The design of the building blocks also allow greater flexibility in architectural and landscape design with wider building separation. As such, better visual permeability can be achieved. Moreover, other than compensatory planting, greening and sensitive design in relation to the local context will help integrate the proposed developments into the surrounding “GB” zone.</p>
SJ3	<p>(i) As there are no residential developments of similar BH in the surrounding, the proposed development at upper part of MOST Road and the section of elevated road leading to Site G are highly incompatible with the surrounding environment characterized by woodland, Ma On Shan Country Park and the heritage cluster of Ma On Shan Iron Mine. There would not be any gradation in height but only “sore-thumb” development given its location in the midst rather than the fringe of the “GB” zone. Significant visual impact on the surrounding ridgelines including Tiu Shau Ngam,</p>	<p>(i) According to the visual assessment for Site G, among the eight key public VPs, six of them will experience mostly “slight/slight to moderate” visual impact, only two of them (i.e. VP1 (Hikers from the southeast) and VP8 (Hikers at MOST Road) will experience a “moderate to significant” visual impact in view of the close viewing distance and the medium to high sensitivity of these two groups of viewers.</p> <p>During the preliminary design stage of Site G, suitable mitigation measures including avoidance of blockage of the Ma On Shan ridgeline, minimization of landscape fragmentation by locating the future development as close to</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
	<p>The Hunch Backs and Ma On Shan will be resulted.</p> <p>It is misleading to state that about 60% of height buffer has been allowed to preserve the ridgeline, as the highest point of the ridgeline (i.e. Ma On Shan) is used in the calculation, and it is uncertain why a benchmark of 60% is adopted.</p> <p>(ii) The view of the Country Park will be privatised with the proposed development at Site G.</p> <p>(iii) The proposed development at Site G will cast shadow and adversely affect the farming practice in the surroundings.</p> <p>(iv) The proposed elevated road leading to Site G will result in adverse visual impact.</p>	<p>existing major infrastructure, provision of visual corridors and use of appropriate building materials and colours in built structures are recommended under the visual assessment to minimize the visual impact to the identified key public VPs.</p> <p>During the construction and operation stage of Site G, mitigation measures including the provision of amenity planting of housing site, modified slopes and retaining structures, could also be adopted by private developers.</p> <p>Although the visual assessment for Site G has concluded that the overall visual impacts on the key public VPs are within the range of “moderately” adverse, the proposed development with a maximum BH of 250mPD would allow about 60% height buffer to preserve the ridgeline of Ma On Shan given that the ridgeline in the vicinity of Site G ranges from about 550mPD to 600mPD. The 60% buffer is not intended to serve as a benchmark but a general comparison between the heights of Ma On Shan ridgeline and the proposed maximum height of the development in Site G. CTP/UD&L of PlanD has reviewed and considered the findings of the visual assessment acceptable.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>(ii) The visual assessment of Site G has concluded that the proposed housing development would not affect the integrity of the Ma On Shan ridgeline, and slight to negligible visual impact towards the view of the Ma On Shan Country Park are observed at several public VPs during the operation phase of the proposed development.</p> <p>The scale and layout of the proposed developments are formulated with due consideration given to the site context, site constraints, geometry and height restrictions. The proposed developments will be optimising flat production while minimizing the visual impact through architectural design or arrangements and landscaping measures. Mitigation measures including building separations, are also proposed to reduce visual and ventilation impacts to achieve better visual permeability.</p> <p>Mitigation measure will also be proposed by private developers at the detailed design stage of the development to alleviate potential visual obstruction towards the Ma On Shan Country Park.</p> <p>(iii) Regarding the shadowing effect on farming practice in the surrounding areas, there is no urban design guideline in this relation. Nonetheless, the Practice Note for Authorized Persons, Registered Structural Engineers and Registered Geotechnical Engineers APP-152 on Sustainable Building</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>Design Guidelines published by BD has stipulated the requirement for building separation, which could minimize potential shadowing effect from the proposed development.</p> <p>(iv) As advised by CEDD, detailed design of the proposed elevated road leading to Site G will be subject to the vetting by the Advisory Committee on the Appearance of Bridges and Associated Structures (ACABAS). Design measures to blend in the elevated road with the surrounding environment, such as planting of climbers, will be further formulated at the detailed design stage.</p>
K Air Ventilation Impact		
K1	The proposed housing developments of over 40-storey at Sites A and B1 would result in adverse air ventilation impact.	<p>According to the Air Ventilation Assessment (AVA) under the EFS, the proposed developments at Sites A, B1, D and E would not incur adverse air ventilation impacts to the surrounding environment in consideration of the location of the existing built areas and the provision of good design features. Mitigation measures such as building separation of 15m wide aligning from NE-SW and NE-SE at Sites A and B1 respectively and aligning from ENE-WSW and SSE-NNW for Site D, as well as building setback from site boundary along Ma On Shan Bypass are proposed to promote wind penetration and to minimise the potential ventilation impacts.</p> <p>Located at the upper part of the MOST Road, Site G is planned for residential developments of about 18 to 27 storeys which will be subject to design review. At a higher site level between 140mPD and</p>
K2	<p>According to PlanD's Urban Climatic Map and Standards for Wind Environment promulgated in 2015, Sites C to G are located at the main air ventilated channel with downhill air movement for the urban area.</p> <p>Increase in artificial heat source and change in wind direction will have adverse impacts on the micro-climate of the countryside and thus on biodiversity, as well as the temperature adjustment through ventilation for the residents downhill.</p>	

	Major Grounds and Proposals of Representations	Responses of Government Departments
	Further, Sites C to G are located within the Urban Climatic Planning Zone 2, but the relevant requirements of the standard and planning measures have not been followed.	190mPD and with no blockage by other buildings in the surroundings, the potential air ventilation impact is minimized. In accordance with the Technical Circular No. 1/06 jointly promulgated by the then Housing, Planning and Lands Bureau and the then Environment, Transport and Works Bureau, AVA is not required for the proposed private housing development taking into consideration its development parameters.
K3	As the prevailing wind direction during the Summer typhoon period in Ma On Shan is southwest, gust wind is exceptionally strong at Sites D and G. The buildings thereat would have to be able to withstand typhoon gust wind 3 times that of the flat land in urban areas, resulting in much higher building cost.	<p>According to the findings of the AVA for Site D, the summer prevailing winds come from E, SSE, SSW and SW directions. Whether Sites D and G will be subject to exceptionally strong gust wind will be confirmed at the detailed design stage. Although a higher building cost might be resulted for the construction of the proposed buildings in order to withstand a greater gust wind, this is not uncommon to have hillside housing development under the multi-prone approach for housing, such as the public housing in Anderson Road Quarry site. A building design will be proposed in the detailed design stage to meet the latest building works standard. The proposed public housing development will be designed in accordance with the Code of Practice on Wind effects in Hong Kong, and construction cost will be estimated based on the findings of site investigation and structural design in the detailed design stage.</p> <p>Regarding the proposed development at Site G, relevant assessment will be conducted by the private developers in the detailed design stage of the development, if considered necessary.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
L	Heritage Aspect of Former Ma On Shan Iron Mine	
	<i>Impact on the Heritage Cluster of Former Ma On Shan Iron Mine</i>	
L1	<p>(i) The unique geological formation of Ma On Shan enabled the development of the iron mining industry. Established in the late Qing Dynasty, the Ma On Shan Iron Mine has historical importance related to the modern international, Chinese and local history, and has led to the establishment of the mining settlements. Proposed developments at Sites C to G as well as the associated infrastructural works will result in adverse impact on the geoheritage, character of Ma On Shan Tsuen and fragmentation of the heritage of Ma On Shan Iron Mine.</p> <p>(ii) A multi-dimensional “point-line-plane” approach should be adopted to conserve in-situ all the interrelated heritage resources scattering over the hillslope to maintain their integrity, authenticity and group value.</p>	<p>(i) According to the EFS, all the graded historic buildings in relation to Ma On Shan Iron Mine including Site Structures at Mining Settlement (Grade 3) in Shun Yee San Tsuen, Exterior walls of 110ML (Grade 2) and the Mineral Preparation Plant (Grade 3) will be preserved in-situ. The proposed developments and their associated infrastructure and facilities will not encroach onto any graded historic buildings/structures (except a pier of the Mineral Preparation Plant). A HIA will be required in the detailed design stage when detailed design is available to further develop the mitigation measures in consultation with AMO. The HIA report has to be submitted to the Antiquities Advisory Board (AAB) for deliberation and endorsement. Besides, as advised by CEDD, buffer zone will be set up between the construction activities and the historic structures as far as practicable and appropriate monitoring on vibration and settlement will also be carried out during construction stage. According to CEDD, significant adverse impacts on these graded historic buildings are not anticipated.</p> <p>(ii) AMO has taken a holistic approach in the grading assessment exercise (viz. the adoption of six assessment criteria including historical interest, architectural merit, group value, social value and local interest, authenticity, and rarity). Regarding</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>the “point-line-plane” approach, AMO has advised that the grading system for historic buildings is administrative in nature which does not affect the ownership, usage, management and development rights of the buildings/ structures graded. From the heritage conservation viewpoint, AMO is open to initiatives/ proposals from the owner /management party/ user bureau(x)/department(s) or future allocate(s) to reuse the graded historic buildings/ structures properly. AMO will offer technical advice and comment from the heritage conservation perspective on any works proposals arising from the renovation/ revitalization as well as repair and maintenance of the graded historic buildings/ structures. Besides, MOST Road will be upgraded to a 7.9m/7.3m wide single 2-lanes carriageway with 2.75m/2.0m wide footpath on both sides up to Site G, which can allow for better, widened and safer access to the historic buildings and mining sites.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
L2	<p>Established for over 70 years, Site G is the only settlement of Chiu Chow miners in Hong Kong which possesses unique culture and character of a mining settlement and is of intangible historical value. While the settlers subsequently switched to farming, they played an important role in serving the other mining settlements. The clearance of the old mining settlements will lead to destruction of the community and is a great loss of human history. Impact on intangible heritage should also be assessed.</p> <p>The structures in Shun Yee San Tsuen are Grade 3 historic structures but the settlement at Site G is not graded. The difference in nature between these two mining settlements is unclear.</p>	<p>As advised by AMO, the assessment of heritage value of historic buildings/structures are based on six criteria, namely (i) historical interest; (ii) architectural merit; (iii) group value; (iv) social value and local interest; (v) authenticity; and (vi) rarity.</p> <p>Based on these criteria, three historic buildings associated with the former Ma On Shan Iron Mine were accorded with grading by the Antiquities Advisory Board (AAB) in April 2016. They include (i) Exterior walls of 240 ML and 110 ML (Grade 2) (ii) Site Structures at Mining Settlement (Grade 3) in Shun Yee San Tsuen and (iii) Mineral Preparation Plant (Grade 3).</p> <p>According to AMO, Site Structures at Mining Settlement in Shun Yee San Tsuen refer to a group of miners' home units built in the 1960s as a result of the Lutheran missionaries' aid to rehouse some miners' families who had been made homeless by heavy rainstorms. As confirmed by AMO, no graded historic building or new item pending grading assessment by the AAB is situated within Site G. The Intangible Cultural Heritage Office (ICHO) of Leisure and Cultural Services Department (LCSD) also advised that no intangible cultural heritage (ICH) item on the current ICH inventory of Hong Kong is related to Site G.</p>
L3	<p>Ma On Shan Tsuen was listed in the "Cultural Heritage" section in the Explanatory Statement (ES) of the OZP, but subsequently excluded from the section in 2009 without any reason.</p>	<p>From 2009 onwards, only the graded historic buildings and Sites of Archaeological Interest within the Ma On Shan Planning Scheme Area would be listed in the "Cultural Heritage" section of the ES of the OZP. Similar amendments were made to the ES of other OZPs.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
<i>Heritage Conservation Policy</i>		
L4	The Government has not taken proactive conservation measures since the grading of these historic buildings, and tends to tone down their historical importance and the proximity of Sites D and E to the historic buildings.	<p>AMO has advised that the grading system for historic buildings is administrative in nature which does not affect the ownership, usage, management and development rights of the buildings/ structures graded. From the heritage conservation viewpoint, AMO is open to initiatives / proposals to reuse the above graded historic buildings / structures properly, and is pleased to offer technical advice and comment from the heritage conservation perspective on any works/ proposals arising from the renovation / revitalization as well as repair and maintenance of the graded historic buildings / structures. In response to revitalization scheme initiated by B/Ds, AMO as usual will advise relevant B/D to preserve the graded historic buildings/structures in-situ while exploring possible uses of the graded buildings/structures.</p> <p>The potential heritage impact and the grading and the location of the graded historic buildings/structures in relation to the former Ma On Shan Iron Mine in the surrounding areas of Sites D and E have been clearly indicated in the Rural and New Town Planning Committee (RNTPC) Paper No. 4/20 for proposed amendments to the Ma On Shan OZP, for the consideration of the RNTPC.</p>
L5	The increase in population will generate impact on the heritage cluster given the lack of supporting facilities/measures.	Under the established practice, should there be any government capital works project which may affect the graded historic buildings/structures, impact assessment of heritage is required under Development Bureau Technical Circular (Works) (DEVB TC(W)) No. 6/2009 “Heritage Impact Assessment Mechanism for Capital Works Projects”. Mitigation measures should be

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>recommended to safeguard the graded historic buildings/structures for endorsement of the Antiquities Advisory Board before implementation.</p> <p>Potential heritage impact of the proposed housing developments and their associated infrastructure and facilities has been assessed under the EFS. Findings showed that no graded historic buildings/structures (except a pier of the Mineral Preparation Plant) will be affected and no significant heritage impact is identified as detailed in the above responses to L1 above. Buffer zone, where practicable, will be incorporated to separate the graded historic buildings from the proposed developments, to mitigate any potential adverse impact.</p> <p>In consultation with AMO, CEDD will conduct a comprehensive HIA at the detailed design stage. Mitigation measures to alleviate any adverse heritage impact will be proposed if found necessary.</p>
<i>Impact on Historic Buildings</i>		
L6	The proposed improvement of MOST Road would result in direct impact on a pier of the Mineral Preparation Plant, which is a Grade III historic building. It is important to conserve the historic structure in-situ to maintain its authenticity and group value, and solution to conserve the pier should be explored.	According to the preliminary design in the EFS of the proposed developments, a pier of the Mineral Preparation Plant will be affected by the proposed alignment of the upgraded MOST Road. CEDD has advised that potential adverse impact on the pier will be further assessed and corresponding mitigation measures to conserve the pier will be formulated in the HIA to be conducted in the detailed design stage for the endorsement of the AAB.

	Major Grounds and Proposals of Representations	Responses of Government Departments
L7	Construction works such as piling, site formation and road works may affect the structural stability of the graded historic buildings, especially the 110ML Portal and Shun Yee Sun Tsuen. Some historic buildings are surrounded by the boundary of the works limit, but there is no detail on the protection for the historic buildings.	As advised by CEDD, buffer zone will be set up between the construction activities and the graded historic structures as far as practicable and appropriate monitoring on vibration and settlement will also be carried out during construction stage. HD, Water Supplies Department (WSD) and other relevant departments will carefully conduct foundation design and construction for the public housing developments and other supporting facilities based on site investigation reports, building structure and design etc. HD, WSD and other relevant departments will request the contractors to set up monitoring points for monitoring the impact of the construction work on the surrounding environment.
<i>Heritage Impact Assessment</i>		
L8	It is unacceptable that comprehensive HIA would only be conducted in the subsequent investigation and implementation stage, as this implies that all potential impacts on the historic buildings during the construction phase would be neglected. The following shortcomings of the study on heritage are also spotted: (i) Two additional concrete piers very near to the Mineral Preparation Plant are spotted. Although they are not graded, they should also form part of the Mineral Preparation Plant. They would be encroached by the road widening work, but no assessment has been conducted.	A HIA Checklist has been submitted by CEDD to AMO in accordance with the HIA mechanism stipulated in DEVB TC(W) No. 6/2009 for assessment of heritage impact during preparation of Technical Feasibility Statement in the project inception stage. CEDD will be required to conduct a HIA in the detailed design stage when detailed design is available to further ascertain the potential heritage impacts including the following issues, and to develop the mitigation measures. The HIA report has to be submitted to the AAB for deliberation and endorsement. (i) The additional piers mentioned are not graded historic buildings or items pending grading assessment by the AAB according to AMO. As advised by CEDD, the proposed alignment of the upgraded MOST Road would not be in direct conflict to these two ungraded structures due to level

	Major Grounds and Proposals of Representations	Responses of Government Departments
	<p>(ii) The Exterior Walls of 110ML have not been identified as “Graded Historic Buildings” in various figures of the EFS and the RNTPC Papers.</p> <p>(iii) The technical report has not indicated if there is any mining site within the works limit.</p>	<p>difference. Nevertheless, the proposed road alignment will be further reviewed upon HIA in order to minimize the potential heritage impact.</p> <p>(ii) According to the EFS, the impact on the Exterior Walls of 110ML have been assessed and they will be excluded from the works limit of the proposed developments. As advised by CEDD, appropriate settlement and vibration monitoring would be provided during construction stage.</p> <p>(iii) The comprehensive HIA to be conducted by CEDD in consultation with AMO in the detailed design stage will further review if there was any mining activities within the works limits.</p>
<i>Potential as Educational Resources and for Cultural / Green Tourism Development</i>		
L9	<p>The heritage sites of Ma On Shan Mine has the potential and should be considered as important educational resources and for local cultural / green tourism development. However, the proposed developments will undermine the local revitalization effort of Grace Youth Camp. The Government should reconsider incorporating Ma On Shan Iron Mine into the United Nations Educational, Scientific and Cultural Organization (UNESCO) Geo Park</p>	<p>According to the EFS, the proposed developments and their associated infrastructure and facilities will not encroach onto any graded historic buildings/structures in relation to the former Ma On Shan Iron Mine (except a pier of the Mineral Preparation Plant). The Lutheran Yan Kwong Church (i.e. Grace Youth Camp) (Grade 3 historic building) which is located at the upper part of Ma On Shan Tsuen, is at a distance away from the works limit and will not be affected.</p> <p>From the heritage conservation viewpoint, AMO is open to initiatives/ proposals from the owner/ management party/ user bureau(x)/ department(s) or future allocate(s) to reuse the graded historic buildings/ structures properly. AMO will offer technical</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>advice and comment from the heritage conservation perspective on any works proposals arising from the renovation/ revitalization as well as repair and maintenance of the graded historic buildings/ structures.</p> <p>As advised by AFCD, according to the UNESCO Global Geoparks Criteria, the geological heritage within a UNESCO Global Geopark should be verified with international geological significance. The former Ma On Shan Iron Mine does not seem to meet this criterion.</p>
M Compensation and Rehousing Arrangement		
<i>Clearance, Compensation and Rehousing</i>		
M1	The proposed development along MOST Road would result in extensive clearance of land but the extent has not yet been announced.	Compensation and rehousing, land clearance and related land matters are outside the scope of the OZP, which is to show the broad land use framework and planning intention for the amendment sites. The concerns of the affected stakeholders would be dealt with separately by the Government in firming up the implementation arrangements.
M2	The impact on villagers as a result of the proposed developments along MOST Road was not evaluated. The way of living of the villagers would be affected, and they requested to continue to reside in their village. The Government should proactively liaise and communicate with the affected residents on the rehousing arrangement to their satisfaction, such that they can receive reasonable compensation and have an improved living environment.	As advised by Lands Department (LandsD), in general, ex-gratia (EGAs) and rehousing arrangement would be offered to eligible residents, business operators and genuine farmers affected by clearance in accordance with the prevailing policies. Upon finalization of land requirement boundaries, the Government shall carry out the pre-clearance survey to register the affected residents within the project boundaries. The information so obtained will serve as a basis for assessment of eligibility for government's EGAs and rehousing arrangement for those residing/operating in the locality and are genuinely affected/to be cleared by the project. Regarding the

	Major Grounds and Proposals of Representations	Responses of Government Departments
		villagers' request to continue to reside in their village, second para. of the response to B7 above is relevant.
<i>Fung Shui</i>		
M3	the proposed access road for Sites A and B1 would cause unacceptable impacts to villagers' 'Feng Shui Dei' (風水地). Besides, the proposed developments will affect the fung shui of the existing graves to the east of Cheung Muk Tau and the fung shui of Sites F and G.	As advised by LandsD, the "Feng Shui Dei" (風水地) adjacent to Site A and Site B1 as shown on the figure of the representation are not recognized Fung Shui area. Nevertheless, the local communities may request for compensatory works which are claimed to be fung shui related when they are affected by the public works projects. As fung shui related compensatory works are intangible elements, each case would be considered on its own merits.
N Provision of GIC Facilities, Recreational Facilities/ Open Space and Other Supporting Facilities		
N1	<p>The need for the proposed school and the supporting pumping station and service reservoirs is doubtful:</p> <p>(i) With a decreasing birth rate and the inadequate admission of students, the need for the proposed primary school at Site E is doubtful apart from serving the proposed development at Site D.</p> <p>(ii) The need for the pumping station at Site C and the service reservoirs at Site F is doubtful apart from serving the proposed housing developments at Sites D and G, as Ma On Shan Service Reservoirs already have adequate capacity to serve the Ma On Shan area.</p>	<p>(i) Education Bureau (EDB) has advised that (i) under the established mechanism, the Government will reserve sites for school development when preparing town plans and planning large-scale residential developments having regard to the planned population intake and on the basis of the needs for community services. The subject school site was reserved in accordance with the above-mentioned mechanism. In addition, the provision of a primary school for the proposed housing developments would have the merit of minimizing the travelling time required of students residing there; and (ii) Land resources are valuable, and the construction or reprovisioning of primary and secondary schools involves substantial public expenditure. EDB has all along been prudent in its development of public sector school building</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>projects so as to commensurate with overall and district-specific needs, the steady development of the school sector, and at the same time enhancing schools' learning and learning environment. In this regard, EDB has been closely monitoring the changes in student population. Generally speaking, it is not unusual to observe student mobility within or after the start of a school year. In addition, the development of the COVID-19 epidemic has also affected the number of newly-arrived students and cross-boundary students joining local schools. According to prevailing mechanism, EDB will take into account factors including the planned development of the area concerned, the school-age population projections which are compiled based on the population projections updated regularly by the Census and Statistics Department and the projection of population distribution released by PlanD, the actual number of existing students and school places available at various levels, the prevailing education policies and other factors which may affect the supply and demand of school places, etc., before deciding whether it is necessary to allocate school premises for setting up a new school or reprovisioning of an existing school. In view of the latest downward trend of school-age population in the medium to long term, the needs of different districts vary. Apart from continuing to primarily consider reprovisioning use when launching new school premises for allocation in the future, EDB will also actively encourage School Sponsoring Bodies to apply for cross-district</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>reprovisioning of public sector schools in areas with surplus school places, in order to meet the demand for school places in new development areas, as well as to improve the learning and teaching environment of public sector schools at the same time.</p> <p>(ii) The EFS conducted for the amendment sites has concluded that there is no insurmountable technical problem for the proposed housing developments and their associated infrastructure and facilities. Given the acute housing shortage in Hong Kong, Sites D and G will provide a total of 2,700 public housing units and 1,040 private housing units to help address housing need to the short-to-medium term. As advised by CEDD, the proposed service reservoirs at Sites F is to meet the requirement of the minimum residual head to serve the housing developments, whereas the proposed pumping station at Site C is to provide sufficient feed to the proposed service reservoirs at Site F.</p>
N2	<p>(i) There is inadequate provision of GIC facilities and recreational facilities/open space in Ma On Shan, including hospital, community hall, elderly services (such as residential care home for the elderly (RCHE) and community care services facilities (CCS)), child care services (such as child care centre (CCC)). Opportunities to increase provision of community facilities should be explored.</p>	<p>(i) The existing and planned provision of GIC facilities (except for hospital, RCHE, CCS and CCC) and open space are generally adequate to meet the demand of the overall planned population in Ma On Shan in accordance with the requirements of the HKPSG.</p> <p>(ii) Food and Health Bureau (FHB) and Hospital Authority (HA) have advised that although hospital will be in deficit for the planned population in Ma On Shan, the provision of hospital</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
	<p>(ii) Furthermore, there is no concrete implementation programme for many planned GIC facilities and recreational facilities. Committed GIC facilities and recreational facilities/open space, including clinic, sports centres, CCS, RCHE and CCC, should be implemented first.</p>	<p>beds is assessed on a wider district basis and can be addressed by the provision in the adjoining area of Sha Tin. FHB and HA are going to implement the projects under the 10-year hospital development plan, including the redevelopment of Prince of Wales Hospital Phase II. Together with the Chinese University of Hong Kong teaching hospital and the extension of the Union Hospital, the provision of hospital beds in Ma On Shan is adequate to meet the future demand of the population in the long run.</p> <p>The Social Welfare Department (SWD) has advised that it has all along adopted a multi-pronged approach, and maintained close liaison with relevant government departments, to identify suitable accommodation for the provision of social welfare facilities, so as to meet the ongoing social welfare service needs of different districts. In view of the population-based planning standards for elderly and child care services, CCC, RCHE and CCS have been incorporated into the proposed public and/or private housing developments. In applying the standards, the distribution of social welfare facilities, the land supply in different districts, service demand as a result of the population growth and demographic changes as well as the provision of different social welfare facilities have to be considered. The HKPSG requirements are long-term targets toward which the provision of services and facilities would be adjusted subject to the consideration of the SWD and relevant departments concerned in the planning and development</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>process. PlanD and SWD will work closely together to ensure that additional GIC facilities will be included in new and redevelopment proposals from both public and private sectors.</p> <p>Regarding the implementation of the planned clinic in Ma On Shan, HA will continue to monitor the service utilization of the general outpatient clinics in Sha Tin district, and plan for the clinic development in due course. As for the implementation of the planned recreational facilities/open space, LCSD has advised that it has all along been following the priority set by the STDC to implement the projects of leisure and recreational facilities in Sha Tin District. Currently, LCSD is actively planning for the implementation of the Amenity Complex in Area 103 of Ma On Shan, which includes a sports centre to address local demand. LCSD has also recently completed the Hang Ming Street Sitting-out Area in Area 90 of Ma On Shan, which was open for public use in February 2021.</p>
N3	<p>The proposed housing sites are all located away from the Ma On Shan Town Centre and not well-served by shopping centre, market, and community, recreational and entertainment facilities. In particular, the sites along MOST Road will repeat the mistake of Shui Chuen O Estate of similar setting, which is surrounded by hills, and only accessible by a few public transport routes or via footbridge and lift from the MTR Station, and with inadequate elderly and childcare facilities.</p>	<p>As confirmed by HD, to serve the needs of the future residents as well as the Ma On Shan New Town, retail facilities (not more than non-domestic PR of 0.3) as well as a variety of social welfare facilities have been proposed in Sites A and B1 in Cheung Muk Tau and Site D along MOST Road. In response to EDB's advice, a primary school is also reserved at Site E to serve the future residents. Subject to detailed design, HD proposes to provide goods and daily necessities stores as well as food stores in the public housing development to serve the daily needs of the locals. Major shopping centres and</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		entertainment facilities (such as MOSTown and Double Cove Place), markets (such as markets at Heng On Estate and Wu Kai Sha) and recreational facilities (such as Ma On Shan Sports Centre and Ma On Shan Swimming Pool) are also easily accessible at the Ma On Shan Town Centre.
O Public Consultation		
O1	<p>Local consultation before gazettal of the draft OZP was inadequate. The proposed developments have not been accepted by local residents as well as the District Council. The Government attempted to proceed with the proposed developments without proposing solutions to the issues raised by STDC.</p> <p>The Government did not proactively address the public's concerns. Notification of the amendment of OZP was inadequate. Site notices should be posted in the vicinity of the amendment sites and MTR stations during the 2-month public exhibition period. There are only a short period of 2 months for submission of representation, and an exchange session of 1 hour after the gazettal of the draft OZP. Some villagers may not be able to express their views under the current consultation mechanism.</p>	<p>The established public consultation procedures for OZP amendments had been followed. Prior to the consideration of the proposed amendments to the approved Ma On Shan Outline Zoning Plan No. S/MOS/22 (approved OZP) by the Rural and New Town Planning Committee (RNTPC), PlanD and CEDD jointly reported the findings of the EFS to and consulted Sai Kung North Rural Committee (SKNRC), Development and Housing Committee (DHC) of STDC and Planning, Housing and Works Committee (PHWC) of Tai Po District Council (TPDC) on the proposed amendments to the approved OZP on 23.6.2020, 30.6.2020 and 3.7.2020 as well as 14.7.2020 respectively. A meeting with the representatives of Ma On Shan Tsuen has also been held on 13.7.2020 at the request of a STDC member. In response to the objecting motions passed by DHC of STDC and PHWC of TPDC, Development Bureau (DEVB) issued a letter to each of the Committees to further address their key concerns, explain the need for rezoning to meet the housing needs and inform both STDC and TPDC that the Government decides to continue with the proposed rezoning and submission to the RNTPC. The views and comments received have been duly relayed to the RNTPC upon submission of the proposed amendments to the approved OZP.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>The draft OZP incorporating the proposed amendments has been published for two months for representations and the representations have been published for three weeks for comment according to the provisions of the Town Planning Ordinance. Members of the public have been given the opportunity to provide views on the amendments. All valid representers and commenters have been invited to the Board to present their views. After hearing the representations and comments, the Board will decide whether to propose amendment(s) to the draft OZP to meet/partially meet the representation(s) in the manner proposed in the representation(s) or in other manner that the Board considers appropriate in meeting the representation(s).</p> <p>To address the concerns on the proposed developments, subsequent to the gazettal of the draft OZP, PlanD, CEDD, HD and LandsD attended an exchange session co-organised by Sha Tin District Office (STDO) and Ma On Shan South Area Committee (MOSSAC) on 10.11.2020, which was also attended by villagers of Ma On Shan Tsuen and STDC members. Comments received at the exchange session are attached in Annex VII for Members' reference.</p>
P	Others	
P1	Population policy is the crux of the housing problem of Hong Kong, as any increase in housing supply is quickly offset by the incoming population.	Population policy is outside the ambit of the Board.

	Major Grounds and Proposals of Representations	Responses of Government Departments
P2	The increase in population from the proposed housing developments will create disturbance to the community. The large number of visitors along MOST Road during the weekends will also create security issue to the proposed private housing at Site G and disturbance to the proposed RCHE thereat.	There is a need to increase housing supply to address the housing shortage which is an issue of great public concern. With adequate supporting infrastructure and facilities, the EFS has confirmed that there is no insurmountable technical problem and unacceptable impacts from the proposed developments on the locality. The future housing site is expected to be clearly demarcated and well-designed and thus security issue/disturbance from the passersby is unlikely.
P3	The building height of the proposed residential development at Site G will affect aviation safety considering its location along the flight path.	As advised by CAD, the maximum level of the proposed development at Site G of not exceeding 250mPD will not exceed the "restricted height" as prescribed under the Hong Kong Airport (Control of Obstructions) Ordinance (Cap.301), which provides for the restriction of building height in the interest of aircraft safety.
P4	The proposed development is an act of collusion. To facilitate the proposed development under the approved planning application no. A/MOS/65, the developer will have to improve and widen MOST Road and the road scheme was gazetted 11 years ago. However, the road scheme was halted in 2015 upon the commissioning of consultancy study for housing development along MOST Road. The proposed development under the current OZP amendment will affect the implementation of the approved planning application no. A/MOS/65. It is suspicious that the undertaking of road improvement by the government is a transfer of benefit to private developer.	<p>The PTTIA under the EFS has identified several road improvement schemes for the proposed housing developments and GIC uses. The proposed upgrading works of MOST Road to be undertaken by the Government serve to accommodate the proposed developments at Sites C to G to ensure that no adverse traffic impact will be resulted.</p> <p>There is no collusion between the Government and the applicant of the approved planning application no. A/MOS/65. As advised by LandsD, both land exchange and the road scheme in relation to the approved planning application no. A/MOS/65 had not been approved.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
Q	Proposals from Representers	
	<i>In Relation to Sites A, B1 and C to G</i>	
Q1	“GB” sites in the surrounding of Ma On Shan Country Park should be preserved.	Second para. of the response to B3 above is relevant.
Q2	Future development in Ma On Shan should be in a lower density and clustered in areas with adequate and direct existing road connections, such as the area along the Ma On Shan Bypass, so as to reduce the need for infrastructural works and the impact on the natural environment.	<p>In view of the scarce land resources, there is a need to optimize site potential to address housing and other development needs of the community. The proposed development intensities for the housing developments confirmed by the EFS as technically feasible with no insurmountable problem are considered appropriate. PES conducted to assess the environmental impacts arising from the proposed housing developments on air quality, noise, water quality, waste management, ecology, cultural heritage and land contamination has concluded that no insurmountable environmental impact is anticipated at the sites for GIC and housing developments. The EcoIA included in the PES has also concluded that the overall ecological impact, including both direct and indirect impact on habitats and species of conservation interest, is considered not significant.</p> <p>As for the site along Ma On Shan Bypass and Ma On Shan Road (site area of about 24.6ha) and the site located on the slope to the immediate east of Park Belvedere (site area of about 4ha) proposed by the representers for future development, they are vegetated with part of the area identified for public housing development (i.e. “R(A)9” zone at Ma On Shan Road), which is currently under construction, part of the area occupied by the existing Ma On Shan</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		Freshwater Service Reservoir, and the remaining areas largely being steep slopes generally with gradient over 20°. Although slope with gradient over 20° is not an insurmountable development constraint, developing such areas is usually not cost-effective and/or technically difficult. Given the site constraints identified, housing developments on these alternative sites will have to be justified by relevant technical assessments.
Q3	The development density of housing development should be significantly reduced in order to minimize the environmental impacts and the pressure on the public facilities.	The EFS conducted for the Ma On Shan housing sites has confirmed that there is no insurmountable technical issues for the proposed housing developments and no unacceptable environmental impacts on the surrounding areas. Regarding GIC provision, response to N2 above is relevant.
Q4	The amendment sites shall be used for RCHE, CCC, clinic, hospital and provision of infirmary services instead.	A variety of social welfare facilities including RCHE and CCC have been incorporated in the indicative scheme of the housing sites under the EFS. The provision of welfare facilities may be adjusted subject to the advice from the SWD and other relevant departments concerned at the detailed design stage. For the provision of hospital/ clinic/ infirmary services, response to N2 above is relevant.
Q5	The amendment sites should be used for conservation of the mining sites and the mining settlements and promoting tourism development.	EFS has been conducted and confirmed that the amendment sites are suitable for housing developments and their associated facilities to meet the pressing housing needs. The amendment sites will not encroach onto the graded historic buildings/structures in relation to

	Major Grounds and Proposals of Representations	Responses of Government Departments
		the former Ma On Shan Iron Mine. AMO is open to and stands ready to provide technical advice on initiatives / proposals for conservation of the heritage resources.
<i>In Relation to Sites A and B1</i>		
SQ1	<p>Suggest to reduce the development intensity of Sites A and/or B1:</p> <ul style="list-style-type: none"> (i) Reduce the permissible PR/BH of Sites A and B1 to 50mPD to align with the surrounding environment. (ii) Sites A and B1 should be as “R(B)”, with permissible plot ratio of below 5 and building height of 100mPD so as to be compatible with the surrounding environment. (iii) The site area and scale of development of Site B1 should be reduced by 20% 	<p>In view of the acute housing demand, there is a need to optimize site potential for housing developments. The EFS conducted for the Ma On Shan housing sites has confirmed that there is no insurmountable technical issues for the proposed housing developments at Sites A and B1 and no unacceptable impacts on the surrounding areas.</p> <p>Visual assessments conducted has confirmed that the residual visual impacts for the proposed public housing developments at Sites A and B1, are slightly to moderately adverse with the adoption of appropriate mitigation measures and are considered acceptable.</p> <p>As such the proposed development intensity and building heights for Sites A and B1 are considered appropriate.</p>
SQ2	Proposed developments at Sites A, B1 and B2 should be relocated to the site in front of Yan On Estate, which is flat and enjoys better transport provision and facilities to meet the daily needs of the residents.	Response to SQ3 below is relevant.

	Major Grounds and Proposals of Representations	Responses of Government Departments
<i>In Relation to Sites C to G</i>		
<i>Sites C to G</i>		
SQ3	<p>Whilst the need for public housing is understood, the proposed private housing at Site G is not justified. The site zoned “GB” adjacent to Kam Chun Court represents a better alternative for public housing development, while the temporary works site of Sha Tin Cavern STW in Area 73 represents a suitable site for the proposed primary school. Besides, the existing service reservoirs should be sufficient to cater for the proposed developments. However, as there is a distance away from Sites D and G to the existing service reservoirs, new service reservoirs are needed. If Sites D and G are not to be developed, Sites C and F would not be required for the development of pumping station and service reservoirs.</p>	<p>The suggested “GB” site adjacent to Kam Chun Court / in front of Yan On Estate as an alternative for public housing development has an area of about 7.9 ha. The site is primarily vegetated with about 80% of its area covered by slopes with a gradient of over 20° , and is bounded by Kam Chun Court to the west, Ma On Shan Bypass to the north and steep terrain to the east and south. Having excluded the steep slopes with gradient over 20° , the site has an area of about 1.5 ha. Although slope with gradient over 20° is not an insurmountable development constraint, developing such area is usually not cost-effective and/or technically difficult. Relevant technical assessments will also have to be conducted to support the housing development at the suggested alternative site.</p> <p>The proposed alternative site for Site E for primary school development at the temporary works site of STCSTW in Area 73 has an area of about 3.8ha. After deducting the part of the site traversed by the existing highway in the form of elevated structures from north to south, the developable area is about 1.8ha. While traffic noise is an issue to be addressed, with its remote location to the new population at the public housing development at Site A, B1 and D, the merits of minimizing the travelling time of students residing nearby will no longer be maintained.</p> <p>The EFS conducted for the proposed housing developments and their associated infrastructure and facilities has concluded that there is no</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		insurmountable technical problem for the proposed housing developments and their associated infrastructures and facilities. As for the need for the proposed private housing at Site G, response to B7 above is relevant.
SQ4	The area from the uphill to the downhill along MOST Road, including some or all of the amendment sites thereat, should be protected as a heritage conservation area, for instance, to be rezoned to “Other Specified Uses” (“OU”) with annotation for conservation of the mining heritage, in order to revitalize the Iron Mine as a leisure and tourist spot, and to achieve synergy with Ma On Shan Country Park.	As regards conservation of historic buildings of former Ma On Shan Iron Mine, response to L1 above is relevant. An “OU” zoning to conserve the graded structures is considered not necessary at this stage.
<i>Sites D and E</i>		
SQ5	The Exterior Walls of 110ML, the Mineral Preparation Plant and the public housing development should be planned as a whole as “Hong Kong Mining Park” and public housing project for research and educational purposes and to promote the sense of belongings of the future residents.	HD will design and construct public housing taking into account the findings of the HIA endorsed by the AAB and the advice of AMO.
SQ6	Sites D and E should be rezoned as “SSSI” or “Recreational Open Space” for a Mining Museum and heritage trail to conserve the integrity of the Ma On Shan Iron Mine, to mitigate the terrain hazard and environmental issues as a result of the mining activities in the past, and for educational and local tourism development purposes as in Yim Tin Tsai.	The planning intention of “SSSI” zone is to conserve and protect the features of special scientific interest which are designated as SSSI, whereas the planning intention of “Open Space” is primarily for the provision of outdoor open-air public space for active and/or passive recreational uses serving the needs of local residents as well as the general public.

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>While there is no features of special scientific interest within Sites D and E, the proposed housing developments and their associated infrastructure and facilities will not encroach onto any graded historic buildings/structures (except a pier of the mineral preparation plant) or any features of special geological features. All the graded historic buildings in relation to the former Ma On Shan Iron Mine including Shun Yee San Tsuen (Grade 3), the Exterior Walls of 110ML (Grade 2) and the Mineral Preparation Plant (Grade 3) will be preserved in-situ. Response to L1(ii) above regarding the integrity of the former Ma On Shan Iron Mine is also relevant. EFS for Ma On Shan housing sites has confirmed that there is no insurmountable technical problem and no unacceptable impacts for Sites D and E to develop as public housing and school development respectively. Thus, the suggested “SSSI” or “Recreational Open Space” zoning for Sites D and E is not supported.</p> <p>AMO is open to and stands ready to provide technical advice on initiatives / proposals for conservation of the heritage resources.</p>
<i>Sites F and G</i>		
SQ7	It is proposed to have a new exhibition hall managed by AFCD at Site F. Site G should be the entrance to a new geological park considering its proximity to some important and special rocky landscape including Luk Chau Shan.	As advised by AFCD, according to the UNESCO Global Geoparks Criteria, the geological heritage within a UNESCO Global Geopark should be verified with international geological significance. The former Ma On Shan Iron Mine and Luk Chau Shan do not seem to meet this criterion.

	Major Grounds and Proposals of Representations	Responses of Government Departments
SQ8	A museum showcasing the history of Ma On Shan Iron Mine and a campsite for stargazing are proposed at Site F. Suggest to renovate the existing mining settlement at Site G and to promote a community with unique character. Reference can be made to “貓村” in Taiwan which can attract tourists and increase employment opportunities.	<p>According to the EFS, all the Site Structures at Mining Settlement of the former Ma On Shan Iron Mine (Grade 3) including Shun Yee San Tsuen and relevant structures at the upper part of Ma On Shan Tsuen will be preserved in-situ. As for Site G which is located on Government land and dotted with temporary structures, it is amongst the sites identified in Ma On Shan to meet the pressing housing needs in the short to medium terms. No graded buildings/structures or items pending grading assessment by the AAB is situated within Site G. EFS has been conducted for Site G and confirmed that the sites are suitable for housing development. Avoiding the structures at Site G will substantially affect the housing production.</p> <p>Site F is reserved for a salt water service reservoir and a fresh water service reservoir to support the developments at MOST Road. Subject to the detailed design of the service reservoirs and support from relevant policy bureau (where applicable), WSD can facilitate taking forward any appropriate proposals for gainful utilization of the space on the rooftops of the service reservoirs for suitable recreational and other activities.</p>
Site D		
SQ9	Site D should be rezoned to “G/IC” and annotated “Public Residential Care Home for the Elderly” considering the lower mobility of the residents and the smaller traffic impact, the existing shortfall of RCHE, the need to accommodate the elderly in public housing who requires care services, and the release of public housing unit if the elderly population is relocated to RCHE.	A variety of social welfare facilities have been incorporated in the indicative scheme of the housing sites under the EFS, including a proposed RCHE in each of Sites A and G. The provision of welfare facilities may be adjusted subject to the advice from the SWD and other relevant departments concerned at the detailed design stage. Second para. of response to SQ15 below is also relevant.

	Major Grounds and Proposals of Representations	Responses of Government Departments
SQ10	With a site area of about 4.1 ha and well-served by public transport, Ma On Shan Recreation Ground is a better alternative for Site D. Three blocks of public housing can be provided with increased flat production at a shorter time and lower cost, together with a sports complex incorporating the existing sport facilities.	Ma On Shan Recreation Ground is zoned “Open Space” on the draft OZP and is mainly occupied by two soccer fields, two basketball courts, two tennis courts and a children playground. According to the Final Report of the Air Ventilation Assessment – Expert Evaluation for Ma On Shan Area (February 2009), Ma On Shan Recreation Ground falls within one of the air paths of the area. It forms part of an important air lung of the locality where various air paths converge. Moreover, Ma On Shan Recreation Ground partly falls within one of the three strips of open spaces to the north of Heng On Estate serving as green visual corridors to separate the high-density developments according to the Explanatory Statement of the draft OZP. Technical acceptability for development of housing with a scale comparable to that of Site D and sports complex for reprovisioning of the existing sports facilities at this location, as suggested by the representer, should be demonstrated by relevant technical assessments including traffic impact assessment, visual assessment and AVA, etc.

	Major Grounds and Proposals of Representations	Responses of Government Departments
<i>Site E</i>		
SQ11	<p>The Government should integrate the graded structures with the proposed public housing at Site D and proposed school at Site E, allowing the heritage sites to be learning grounds for the students and residents, as well as visitors to Ma On Shan Country Park. Site E and its surrounding heritage structures (including 110ML Portal and its associated structures, and the Mineral Preparation Plant and its related relics) to be rezoned as “OU (School cum Conservation Areas)”. The planning intention is to integrate the heritage structures into the design of the school site, enriching the learning environments of the students and allowing the heritage structures to perpetuate the values of the Ma On Shan Iron Mine landscape as a common inheritance of Hong Kong. All developments would require permission from the Town Planning Board. Its implementation would require collaboration between the government and interested NGOs, after the completion of the capital and rehabilitation works.</p>	<p>Site E, currently zoned “G/IC”, is reserved for the development of a primary school to support the new population nearby. According to the EFS, Sites D and E will not encroach onto any graded historic buildings/structures. As regard the integrity of the heritage cluster of former Ma On Shan Iron Mine and the design consideration at Site D, respective responses to L1(ii) and SQ5 above are relevant.</p> <p>According to EDB, as a general practice, the school design will be drawn up in consultation with the School Sponsoring Body (SSB) in future design stage to suit the school's operation needs as far as practicable. However, whether the heritage concept will be adopted in the school design to echo the surrounding heritage structures is subject to the acceptance of the SSB, environmental consideration and the overall design of the school. Besides, the heritage structures would not be integrated as part of the school site. Since a school building and a heritage structure have very different operational and design requirements, there would be adverse time and cost implications to the school building project as well as concerns from the SSB on school operation and management if the heritage structures were within the school site.</p> <p>Therefore, an “OU (School cum Conservation Areas)” zoning for Site E and its surrounding heritage structures is not supported.</p>
SQ12	<p>Provision of primary school in the district is sufficient and the site should be considered for others uses such as RCHE.</p>	<p>Regarding the need for provision of the primary school at Site E, response to N1 above is relevant. As for RCHE, relevant provisions have been incorporated in Sites A and G.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
<i>Site F</i>		
SQ13	Proposed service reservoirs at Site F can be accommodated in rock cavern.	The EFS for Ma On Shan housing sites has concluded that no insurmountable impact will be resulted from the proposed service reservoirs at Site F. As advised by CEDD, in view of the tight programme of the proposed housing developments and relatively small scale of the proposed service reservoirs at Site F, the development of rock cavern would not be time-efficient nor cost-effective.
<i>Site G</i>		
SQ14	The site should be rezoned to “R(C)”, with permissible plot ratio of below 3. Heritage and trees in Site G should be preserved and protected considering its location at the fringe of the Country Park.	<p>Regarding the development intensity and the visual impact of the proposed development at Site G, respective responses to C1 and SJ3 above are relevant</p> <p>A total of 246 trees were found at Site G based on the findings of the tree survey. The top three tree species are <i>Dimocarpus longan</i> (龍眼), <i>Schefflera heptaphylla</i> (鴨腳木) and <i>Litchi chinensis</i> (荔枝) which are common species and a <i>Ficus microcarpa</i> (細葉榕) on-site is proposed to be preserved. Compensatory planting will be provided and relevant tree preservation clauses would be incorporated in the land lease.</p> <p>As regards heritage aspect, AMO advised that no graded historic building or new item pending grading assessment by the AAB is situated within Site G. ICHO of LCSD also advised that no ICH item on the current ICH inventory of Hong Kong is related to Site G.</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
SQ15	Site G should be used for “Public Residential Care Home for the Elderly” considering the existing shortfall of RCHE and the lower mobility of the residents which would have smaller traffic impact.	<p>The EFS for the Ma On Shan housing sites has confirmed that there is no insurmountable technical problem and no unacceptable impact for Site G to be developed as private housing with a PR of 3.6, while a 150-place RCHE is proposed to be incorporated in Site G.</p> <p>SWD has advised that the proposed RCHE will be a subsidised Contract Home. According to the established practice, the service operator of the proposed RCHE would be selected by competitive bidding. In general, for the subsidised portion of the Home, the residents will only have to pay a fee fixed by the government (i.e. \$2,060 per month). For the non-subsidised portion, the residents have to pay the fee at a level agreed by the government.</p> <p>While various welfare facilities for the elderly will be provided in all four housing sites, another RCHE will be provided in Site A (apart from Site G).</p>
SQ16	The proposed housing development at Site G is preferred to be developed at the downhill area of Ma On Shan near the urban area.	The Government has been carrying out various land use reviews on an on-going basis. Suitable sites at the downhill area of Ma On Shan and Wu Kai Sha have been rezoned for public housing and private housing developments. To meet the pressing need for housing, Site G is one of the sites identified during the 2-stage “GB” review as suitable to be rezoned for housing development. The EFS for the Ma On Shan housing sites has demonstrated that no insurmountable impact will be resulted from the proposed housing development at Site G.
SQ17	Site G should be designated as Country Park.	The designation of Country Park falls outside the purview of the Board. AFCD has no comment on the proposal.

	Major Grounds and Proposals of Representations	Responses of Government Departments
R	Adverse Representations on Item B2	
R1	<p>(i) The subject road is ancillary to the proposed housing developments, and thus its rezoning should not be agreed before the housing development is widely agreed by the society.</p> <p>(ii) The footpath and roadside facilities cannot accommodate the traffic generated by the proposed housing developments, and would lead to illegal parking and adverse impact on the environment.</p>	<p>(i) Site B2 is located on Government land with roadside amenities and a footpath along Ma On Shan Bypass. It falls within the gazetted road works of "Sha Tin New Town, Stage 2 - Trunk Road T7" authorised in Gazette Notice 2236 dated 7.4.2000. The rezoning of the Site B2 from "GB" to an area shown as 'Road' is to reflect the existing as-built condition.</p> <p>(ii) The footpath is segregated from the Ma On Shan Bypass and the strip of roadside amenities by a noise barrier, implication on illegal parking is not anticipated and no adverse environmental impact will be resulted. Besides, it is expected that the subway across Ma On Shan Bypass near The Entrance instead of the twisted footpath in Site B2 will serve as the main pedestrian linkage between the proposed housing developments at Sites A and B1.</p>
T	Adverse Representations on Item H	
T1	There is no need to have the sewage treatment works facilities at Site H. There is already the Sha Tin Sewage Treatment Works (STSTW) near Ma On Shan.	<p>The rezoning procedure for the 98% of the Sha Tin Cavern Sewage Treatment Works (STCSTW) site falling on area covered by the Sha Tin OZP was completed in 2018. Opportunity is now taken to rezone the remaining 2% of the STCSTW site falling within the Ma On Shan OZP from "GB" to "OU(STW)" to rationalize the whole development boundary of the STCSTW.</p> <p>As advised by Drainage Services Department (DSD), Site H will be part of the secondary portal of the future STCSTW. The STCSTW</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>will allow the relocation of the existing STSTW into rock caverns, which will bring multi-fold benefits to the communities of Sha Tin and Ma On Shan, including environmental improvement.</p> <p>DSD has explained that the necessity of providing two portal areas, each connecting the main caverns complex via an access tunnel, is due to the need to cater for emergency situations. In case one of the portal areas or access tunnels is obstructed by accidents, the other portal area / access tunnel can serve as a safe passage for evacuating the personnel in the caverns, whilst firefighters can also make use of this alternative access to conduct rescue operation. Thus, the secondary portal area at Site H at Mui Tsz Lam Road is considered necessary. Besides, some facilities such as electrical substations and ventilation buildings are not suitable to be placed inside the caverns because of fire safety concerns, and have to be accommodated at Site H.</p>
T2	The proposed development at Site H would result in adverse landscape impact and irreversible impact on the "GB" zone, and worsen the odour impact.	<p>The construction and operation of the STCSTW Project is governed by an EP granted by EPD in 2017. Regarding the concerns on potential landscape impact, DSD advised that a tree survey was carried out as part of the EIA for STCSTW approved in November 2016 and further tree survey in the area was conducted in June 2020. Mitigation measures to minimise the landscape impacts, which include compensatory planting of native species within or adjacent to the site for the STCSTW for the loss of about 135 existing trees, which are of common species and generally in fair to poor condition, form and amenity value, as well as the design of the ancillary</p>

	Major Grounds and Proposals of Representations	Responses of Government Departments
		<p>buildings at the cavern portal area with landscape treatment to their façade to blend into the greenery of the surroundings, have been approved as part of the EIA.</p> <p>As for the concern on the potential odour impact, DSD advised that cavern is in fact an effective natural barrier to enclose the sewage treatment facilities which pose odour emission. Odour emitted from these facilities would be treated by deodourizing units before venting to the ambient via the ventilation shaft at a remote area on Nui Po Shan. In addition, negative pressure would be applied inside caverns preventing odour from leaking through the access tunnels. With these measures in place, the odour impact would be alleviated compared with the existing STSTW.</p>

Draft Ma On Shan Outline Zoning Plan No. S/MOS/23 (Draft OZP)
Summary of Comments on Representations and Government Departments' Responses

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
<u>Supportive Comments</u>		
A1	The proposed developments should be expedited to improve the living condition of the public. Brownfield development, as an alternative, is a lengthy process involving land resumption.	The supportive view is noted.
<u>Adverse Comments and Comments Providing Views</u>		
B Development Options for Increasing Housing Supply		
B1	The proposed amendments are not in line with the Final Report of the Task Force on Land Supply (TFLS). The proposed amendments are not in line with the principles of “caring for the environment for balanced development” and the recommendation of “not to explore development at periphery of Country Park”. The Government should first develop high-density public housing in sizable sites, planned New Development Areas (NDAs), brownfield sites and reclamation sites. Opportunities for development at Fanling Golf Course, idle sites and through urban redevelopment should also be explored first. Development of "Green Belt" (“GB”) sites should not be the first priority.	Response to B1 in Annex Va is relevant.

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
B2	The Government should not develop unsuitable sites with technical constraints at huge infrastructural and time costs as well as imposing impacts on the locality, in return for the small amount of flat production. There is no strong justification for the proposed developments at the subject amendment sites. The proposed developments are not quick-fix solutions, and would delay the short-to-medium term housing supply.	First para. of response to B2 and response to B4 in Annex Va are relevant.
B3	Proposed developments are not in line with the planning intention of “GB” zone.	First and second para. of response to B3 in Annex Va is relevant.
B4	The proposed amendments would set undesirable precedents for similar approaches to develop the “GB” zone and periphery of Country Park, resulting in development pressure on the surrounding areas of the amendment sites and Country Parks being encroached by urban development.	Response to B5 in Annex Va is relevant.
B5	There are other reasons accountable for the shortage of housing supply including the population policy, socio-economic problems and the lack of regulation on the soaring housing price.	While the Board plays a role in ensuring appropriate land for housing and other development needs, housing prices are subject to market forces, while population policy and socio-economic problems are affected or caused by other considerations.
B6	It is expected that the proposed private housing at Site G would be unaffordable to many people.	

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
B7	The recent figure published by Census and Statistics Department in 2020 reveals that it is the first time numbers of deaths in Hong Kong higher than births and the trend is expected to be continuous. The government should review the future housing demand to avoid oversupply.	According to the Long Term Housing Strategy, the Government updates the long term housing demand projection annually and presents a rolling 10-year housing supply target to capture social, economic and market changes over time, and makes timely adjustments where necessary. This supply target is determined by quantitative projections of different demand components. “Net increase in households” is one of the demand components and there are also other components including “households displaced by redevelopment” and “inadequately housed households”.
B8	The claim of the supportive representations that the rezoning can bring about economic benefits to the society is not justified. The current economic downturn is not solely due to housing problem, and will not be solved simply by pursuing housing and infrastructural developments. Conservation of the cultural heritage and natural resources of Ma On Shan to promote local tourism can also help create sustainable employment opportunities.	To meet the pressing need for housing, seven “GB” sites in Ma On Shan have been identified for development of housing and associated supporting GIC facilities. These sites do not encroach onto Ma On Shan Country Park, any recognized site of conservation importance or ecologically important streams, or any graded historic buildings/structures (except a pier of the mineral preparation plant). The proposed developments will not have significant adverse impact on the conservation of the cultural heritage and natural resources of Ma On Shan.
C Development Intensity		
C1	(i) The surrounding developments such as Symphony Bay Villa Rhapsody and the Entrance have a much lower plot ratio than the proposed developments at Sites A and B1. There are only several sites located near MTR Wu Kai Sha Station having a plot ratio (PR) higher than 5.	Response to C1 in Annex Va is relevant.

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
	(ii) The respective PRs of 6.8 and 3.6 for the proposed development at Sites D and G are similar to high-rise or medium-rise development in the development core of Ma On Shan, and are not compatible with the environment along MOST Road.	
C2	Proposed developments pose health concern as COVID-19 virus can be spread vertically.	Response to C2 in Annex Va is relevant.
D Traffic and Transportation		
<i>Road Transport Network to Urban Areas</i>		
D1	<p>The critical road links/junctions to urban areas are already saturated and the congestion will be worsened with the proposed amendments. Congestion at any one of the critical road links/junctions will result in queuing back and congestion of the local transport network.</p> <p>Major road improvement works such as Trunk Road T4 and widening of Tate's Cairn Highway, Sha Tin Road, Lion Rock Tunnel are insufficient and cannot address the traffic problems timely. The bottlenecks will still exist at the tunnel portals.</p>	Response to D1 in Annex Va is relevant.
D2	The lack of local job opportunities in Ma On Shan area leads to further overloading of the transport network.	Response to D3 in Annex Va is relevant.
D3	Low-density development would attract high-income households which tend to commute by private car.	Response to D4 in Annex Va is relevant.

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
<i>Comprehensiveness of Traffic Impact Assessment</i>		
D4	The additional traffic flow from the committed developments in Ma On Shan (including Kam Fai Court, Kam Chun Court, Yan On Estate Phase 2, residential development at Wu Kai Sha, Cheung Muk Tau) and Shap Sz Heung should also be taken into account.	Response to D5(i) in Annex Va is relevant.
<i>Parking Provision</i>		
D5	Several carparks under STT have been rezoned for housing developments in the earlier years without reprovision afterwards. The parking provision in Ma On Shan is insufficient, and should be reviewed upon promulgation of the updated parking standard of the HKPSG.	Response to D6 in Annex Va is relevant.
<i>Public Transport Services</i>		
D6	<p>There is a mismatch of public transport services to the demands of residents in Sha Tin and Ma On Shan:</p> <ul style="list-style-type: none"> (i) The bus route planning cannot bring convenience to the residents. (ii) Despite the phased opening of the Tuen Ma Line, railway service cannot fully replace road transport and to alleviate the traffic congestion, as many of the residential estates in Ma On Shan are not near to railway stations. <p>The overall transportation service for Ma On Shan and Shap Sz Heung should be reviewed, and there should be a</p>	Response to D7 in Annex Va is relevant.

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
	plan and an implementation programme for rationalising the transport services of Ma On Shan. The full-day airbus service, which was a committed traffic mitigation measure for Yan On Estate, has not been implemented yet.	
D7	<p>Suggestions for improvement of public transport services:</p> <p>(i) Bus termini should be provided at Cheung Muk Tau and Shap Sz Heung, and the Nai Chung Bus Terminus should be expanded for providing more bus routes in the area. The progress and details of the two public transport interchanges for the comprehensive development at Shap Sz Heung are still uncertain.</p> <p>(ii) The northern exit of MTR Tai Shui Hang Station and the southern exit of MTR Heng On Station should be built to encourage commuting of local residents by railway.</p>	<p>(i) Response to D8 in Annex Va is relevant.</p> <p>(ii) Response to D10(ii) in Annex Va is relevant.</p>
<i>Traffic Impact on MOST Road</i>		
SD1	<p>(i) <u>Construction Stage</u></p> <p>The proposed improvement of MOST Road will cause significant disruption, pollution and damage to this sole access road to the upper village of Ma On Shan at the construction stage, which is crucial for local residents and large number of visitors to the upper part of Ma On Shan Tsuen and Ma On Shan Country Park.</p>	<p>(i) Response to SD2(i) in Annex Va is relevant.</p> <p>(ii) Response to SD2(ii) in Annex Va is relevant.</p>

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
	(ii) <u>Operation Stage</u> Widening of the MOST Road is inadequate to accommodate the (vehicular and pedestrian) traffic associated with the proposed developments along MOST Road.	
SD2	Sites C to G are only served by one access, without the provision of lift tower, footbridge system and bus terminus. Any obstruction of MOST Road such as landslides will render these sites inaccessible by emergency vehicles.	Response to SD3 in Annex Va is relevant.
<i>Suggestion on Improvement of MOST Road</i>		
SD3	The representer's suggestion of improving MOST Road with the incorporation of cycle track and footpath is not supported considering the environmental impact and development pressure that will be generated on the surrounding area.	Response to SD4 in Annex Va is relevant.
E	Environmental Aspect	
<i>Environmental Assessment</i>		
E1	The PES have greatly underestimated the irreversible adverse ecological, environmental and visual impacts associated with the rezoning proposal.	Based on the information provided in the PES, EPD advised that the proposed developments would unlikely constitute a DP under the EIAO. The DP status will be further reviewed at the detailed design stage.

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
		<p>PES has been prepared under the EFS covering both the proposed housing development and the associated infrastructure works. The PES concluded that with the implementation of the proposed mitigation measures, no insurmountable environmental impacts are envisaged. Nevertheless, detailed assessment will be carried out during the detailed design stage. The PES was agreed by EPD.</p> <p>Under the EFS, visual assessments for Sites A, B1, D and G have also been conducted and responses to SJ1 to SJ3 below are relevant.</p>
<i>Environmental Impact at Construction and Operation Stages</i>		
E2	<p>(i) There are concerns on the environmental impacts generated by the construction works of the proposed housing developments and their associated infrastructural works, including vibration, noise, dust and air quality impact from site formation and earthworks, foundation works, retaining wall construction, construction traffic, equipment and plant.</p> <p>(ii) During the operation stage, the waste pollution due to the increase in population will result in adverse ecological impact.</p> <p>(iii) The villagers of Shun Yee San Tsuen cannot enjoy the supply of natural water from upstream after the proposed developments.</p>	<p>(i) Response to E2(i) in Annex Va is relevant.</p> <p>(ii) According to the PES, the quantities of general refuse arising from the proposed housing developments would be low and thus no significant waste implication during the operation phase is anticipated. The refuse must be disposed at approved waste transfer or disposal facilities by refuse collection vehicle.</p> <p>(iii) As advised by CEDD, fresh water main is proposed along the upgraded MOST Road which can serve Shun Yee San Tsuen according to the EFS.</p>

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
F	Ecological Aspect	
	<i>Distance from Country Park and Potential Impact</i>	
F1	<p>The proposed housing development and associated infrastructural works are at close proximity to the Ma On Shan Country Park, with their works limit closer to or adjoining the boundary of the Country Park. They would cause irreversible impact not only on the sites but also on the surrounding areas including the Ma On Shan Country Park.</p> <p>Sites A, B1, C to G consist of a variety of natural features including well-wooded areas and plantation, which are ecologically connected to the surrounding woodlands within “GB” zone and even Ma On Shan Country Park. Old and valuable trees and rare species should not be the only consideration, as damage to the buffer at the fringe of woodland would also lead to ecological impact on the habitat at the core of the woodland.</p>	Response to F3 in Annex Va is relevant.
F2	Lightings of the proposed developments will attract insects and in turn bats to the residential area.	Appropriate mitigation measures will be adopted by CEDD and HD, such as minimising light spill and glare from street lighting, review of the housing design to minimise light spill including avoidance of unnecessary external lighting at the detailed design stage.

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
<i>Impact on Wildlife / Vegetation / Ecosystem / Biodiversity</i>		
F3	<p>The proposed housing developments and associated infrastructural works will require felling of about 2,780 trees, including species of conservation interest (such as <i>Ixonanthes reticulata</i> (黏木), <i>Rhododendron simsii</i> (紅杜鵑), <i>Aquilaria sinensis</i> (土沉香), <i>Gnetum luofuense</i> (羅浮買麻藤), <i>Diospyros vaccinioides</i> (小果柿) and <i>Cibotium barometz</i> (金毛狗)). There is no measures to protect these species in PES. It is also noted that the woodlands within the works limit of the amendment sites are of “moderate” or “moderate to high” ecological value and would be affected by the proposed developments.</p>	<p><i>Ixonanthes reticulata</i> (黏木), <i>Rhododendron simsii</i> (紅杜鵑), <i>Aquilaria sinensis</i> (土沉香), <i>Gnetum luofuense</i> (羅浮買麻藤), <i>Diospyros vaccinioides</i> (小果柿) and <i>Cibotium barometz</i> (金毛狗) are considered to be species of conservation interest. <i>Rhododendron simsii</i> are recorded outside the works limit while the other species are recorded within the works limit according to the EcoIA. As advised by CEDD, the proposed works would not be in direct conflict with the mentioned <i>Ixonanthes reticulata</i> (黏木) according to the EFS. Nevertheless, a detailed vegetation survey would be carried out in the detailed design stage. For the other mentioned species recorded within the works limit, although they will be in direct conflict with the proposed developments, they are only present at low abundance within the works limit and are commonly found in other areas outside the works limits. In this regard, the impact to these species was considered to be “low to moderate”.</p> <p>According to the EcoIA, part of the works limit of Sites A and B1 and the associated infrastructure and upgrading works of MOST Road (i.e. to the north of Site G) consist of woodlands of “moderate” ecological value, while part of the works limit of Site D and small portion of the works limit of Site F and the upgrading works of MOST Road consist of woodland of “moderate to high” ecological value. These woodlands have been subject to constant traffic and human disturbance and most of the species recorded were common species. Considering aforementioned habitat value and species diversity, the</p>

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
		<p>size of woodlands loss, the loss of woodland due to the proposed developments will result in “moderate” ecological impact. With the implementation of the mitigation measures by the project proponent, including detailed vegetation survey, mitigation plan and woodland compensation, the residual impact to the woodland loss due to the project is considered to be acceptable and AFCD has no adverse comment.</p> <p>As confirmed by CEDD, to compensate the direct loss of woodland due to the proposed developments, woodland compensation at a ratio of at least 1:1 with approximately 2,900 trees and shrubs is proposed with reference to the Development Bureau Technical Circular (Works) (DEVB TC(W)) No. 4/2020 – Tree Preservation. The species used will be native species, compatible with the surrounding landscape as far as practicable, and could enhance the vegetation diversity of the local environment. Habitat compensation will be provided in a “no net loss” and “like for like” basis as far as practicable, or by providing a compensation area with equivalent or higher ecological function. CEDD also advised that the nursery and planting of the compensatory trees will be carried out in parallel with the detailed implementation and an establishment period of three to 5 years will be allowed after planting. With the implementation of woodland compensation, the residual direct impact of habitat loss due to the proposed developments is considered to be minor and acceptable according to the EcoIA. AFCD and Chief Town Planner/Urban Design and Landscape (CTP/UD&L) of PlanD have</p>

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
		no adverse comment. Detailed tree survey will also be conducted in the detailed design stage to further ascertain the potential impact to the species of conservation interest and formulate specific mitigation measures as appropriate.
<i>Comprehensiveness of Ecological Impact Assessment</i>		
F4	The number of trees and their conservation value may be under-estimated in the preliminary tree survey. Some young trees with diameter at breast height of less than 95mm would not be reflected in the Tree Survey Report.	<p>As advised by AFCD, preliminary tree survey which is a broad-brush tree survey is aimed to identify all tree groups within the Study Area for the purpose of landscape assessment. Under the EcoIA, vegetation surveys have also been conducted to characterize vegetation types and record the dominant and notable plant species, their conservation status in Hong Kong and relative abundance within the study area. The survey methodology adopted is often employed in different environmental impact assessment studies, and AFCD have no adverse comment on it.</p> <p>As stated in the EcoIA, for the flora species of conservation interest in direct conflict with proposed works, they are only present at low abundance within the Works Limit and they are also commonly found in other areas outside the Works Limits. The impact on these species is considered as “low to moderate”. As advised by CEDD, detailed vegetation survey will also be conducted in the detailed design stage.</p>
F5	The baseline ecological surveys conducted at dry season and wet season are inadequate and some species observed by other green groups are not recorded.	AFCD has no adverse comment on the survey methodology adopted in the ecological surveys, which is often employed in different environmental impact assessment studies. As advised by CEDD, detailed ecological survey will be conducted at the detailed design stage.

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
<i>Mitigation Measures</i>		
F6	Tree compensation cannot mitigate the ecological impact of the proposed developments, which is irreversible.	Response to F13 in Annex Va is relevant.
<i>Policy on Nature Conservation</i>		
F7	The proposed amendments have not taken into consideration or complied with the Biodiversity Strategy and Action Plan, and breached the Convention on Biological Diversity.	Second, third and fourth para. of response to F2 in Annex Va are relevant.
<i>Impact on Wildlife / Vegetation / Ecosystem / Biodiversity for Sites C to G</i>		
SF1	Sites C to G and the associated access road proposed is located at close proximity to the Ma On Shan SSSI, which is a unique shrubland providing a unique habitat. Unique species including rare Orchid, ferns, Red Muntjac (赤麂), East Asian Porcupine (東亞豪豬) and Eurasian Wild Pig (野豬) can be found. The proposed developments will result in reduction of buffer for the SSSI from land development, and adverse impact on the biodiversity of Ma On Shan.	Response to SF2 in Annex Va is relevant.

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
G	Landscape Character	
G1	The “GB” sites are scenic landscapes which are integrated with the scenery of the adjacent Country Park. The proposed developments and associated infrastructure will spread the development footprint of Ma On Shan over the Ma On Shan Bypass into “GB” areas. The significant change of the countryside character of the Ma On Shan upland valley as a result will have widespread implications on the view and experience for visitors in the surrounding country park areas. Compensation for the loss of public enjoyment is inadequate.	Response to G1 in Annex Va is relevant.
H	Geotechnical Aspect	
H1	Detailed geotechnical investigations have not been conducted for the amendment sites. As indicated in the Enhanced Natural Terrain Landslide Inventory (ENTLI), 5 landslides have been recorded at Sites A and B1, 70 landslides have been recorded at Sites D and E, which were located on colluvial deposit, while 27 landslides have been recorded at Site G. These sites are not suitable for housing development. Otherwise, natural terrain mitigation measures at huge cost will be required, and future users and residents may have to bear the huge cost of slope repairing and maintenance.	Response to H1 in Annex Va is relevant.

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
I	Risk Assessment	
I1	The quantitative risk assessment (QRA) to evaluate the potential risk and determine the necessary mitigation measures for the high pressure town gas pipeline near to Sites B1 and D as mentioned by R5697 has not been included in the environmental impact assessment.	Response to I2 in Annex Va is relevant.
J	Visual Impact	
J1	The proposed housing developments would generate adverse visual impact on the surrounding areas. The stepped height approach of Ma On Shan New Town, with building height (BH) generally increasing from the waterfront to inland area and decreasing from the town centre and the eastern and western gateway nodes towards the peripheries, was not adhered to.	<p>Response to J1 in Annex Va regarding the assessment of the visual impacts of Sites A, B1, D and G is relevant.</p> <p>As for the stepped BH approach of Ma On Shan New Town, it is noted that existing buildings with BH between 101mPD to 150mPD occupy the major town proper, while the tallest buildings within height band of 150mPD or above are found in the town centre around MTR Ma On Shan Station (Sunshine City), at the hillside (Kam Ying Court) and MTR Wu Kai Sha Station (Lake Silver). The proposed housing developments at Sites A and B1 (both with BH restriction of 165mPD) located to the east of MTR Wu Kai Sha Station, and Site D (with BH restriction of 225mPD) and Site G (with BH restriction of 250mPD) which are located to the south of Kam Ying Court, will generally follow the stepped height concept of Ma On Shan New Town.</p>

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
J2	The extensive mitigation measures required against natural terrain hazard would result in adverse visual impact.	Response to J2 in Annex Va is relevant.
J3	Potential obstruction to the view of other residential developments.	Response to J3 in Annex Va is relevant.
<i>Concerns on Specific Sites</i>		
SJ1	<p>(i) Proposed developments at Sites A and B1 are totally incompatible with the developments of Cheung Muk Tau Village, Symphony Bay and the surrounding environment. Permanent and significant adverse impacts on the natural lighting, as well as the visual aspects on the ridgeline of Ma On Shan mountain range, in particular the Hunch Backs are anticipated.</p> <p>(ii) The visual impact caused by the proposed developments at Sites A and B1 would be more significant from some other vantage points.</p>	<p>(i) Response to SJ1(i) in Annex Va is relevant.</p> <p>(ii) Response to SJ1(ii) in Annex Va is relevant.</p>
SJ2	The proposed development at Site D at a BH of 225mPD is incompatible with the surrounding areas with few developments.	Response to SJ2 in Annex Va is relevant.

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
SJ3	<p>(i) As there are no residential developments of similar BH in the surrounding, the proposed development at upper part of MOST Road and the section of elevated road leading to Site G are highly incompatible with the surrounding environment characterized by woodland, Ma On Shan Country Park and the heritage cluster of Ma On Shan Iron Mine. Significant visual impact on the surrounding ridgelines including Tiu Shau Ngam, The Hunch Backs and Ma On Shan will be resulted.</p> <p>(ii) The proposed development at Site G will cast shadow and adversely affect the farming practice in the surroundings.</p>	<p>(i) Response to SJ3(i) in Annex Va is relevant.</p> <p>(ii) Response to SJ3(iii) in Annex Va is relevant.</p>
K Air Ventilation Impact		
K1	The proposed housing developments of over 40-storey at Sites A, B1 and G would result in adverse air ventilation impact.	Response to K1 regarding Sites A, B1 and G are relevant.

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
L	Heritage Aspect of Former Ma On Shan Iron Mine	
	<i>Impact on the Heritage Cluster of Former Ma On Shan Iron Mine</i>	
L1	<p>(i) The unique geological formation of Ma On Shan enabled the development of the iron mining industry. Established in the late Qing Dynasty, the Ma On Shan Iron Mine has historical importance related to the modern international, Chinese and local history, and has led to the establishment of the mining settlements. Proposed developments at Sites C to G as well as the associated infrastructural works will result in adverse impact on the geoheritage, character of Ma On Shan Tsuen and fragmentation of the heritage of Ma On Shan Iron Mine.</p> <p>(ii) A multi-dimensional “point-line-plane” approach should be adopted to conserve in-situ all the interrelated heritage resources scattering over the hillslope to maintain their integrity, authenticity and group value.</p>	<p>(i) Response to L1(i) in Annex Va is relevant.</p> <p>(ii) Response to L1(ii) in Annex Va is relevant.</p>

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
L2	Established for over 70 years, Site G is the only settlement of Chiu Chow miners in Hong Kong which possesses unique culture and character of a mining settlement and is of intangible historical value. While the settlers subsequently switched to farming, they played an important role in serving the other mining settlements. The clearance of the old mining settlements will lead to destruction of the community and is a great loss of human history. It is a waste of the previous research findings on the settlement at Site G and the opportunity for further study will also be lost.	<p>As detailed in the response to L2 in Annex Va, no graded historic building or new item pending grading assessment by the AAB is situated within Site G. The Intangible Cultural Heritage Office (ICHO) of Leisure and Cultural Services Department (LCSD) also advised that no intangible cultural heritage (ICH) item on the current ICH inventory of Hong Kong is related to Site G.</p> <p>The Chinese University of Hong Kong was supported by the Built Heritage Conservation Fund in 2018 to conduct a thematic research titled 'A Multi-dimensional "Point-line-plane" Approach for Industrial Heritage Conservation in Hong Kong: A Case Study of Ma On Shan Iron Mine' to study the built heritage in this area. The research report has not yet been finalised and will be submitted to the Advisory Committee on Built Heritage Conservation for endorsement. Upon endorsement, the research report will be shared with relevant departments for reference.</p>
L3	Ma On Shan Tsuen was listed in the "Cultural Heritage" section in the Explanatory Statement (ES) of the OZP, but subsequently excluded from the section in 2009 without any reason.	Response to L3 in Annex Va is relevant.

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
<i>Heritage Conservation Policy</i>		
L4	During 1996 to 2000, a total of 8,800 historical buildings were assessed by the AMO, 1,444 of which have been announced as graded historical buildings. However, the list of remaining historical buildings that have not been graded is not available to public. There is a lack of mechanism to protect the buildings with historical values but yet to be graded, including a number of sites in Ma On Shan Iron Mine.	As advised by AMO, apart from the three graded historic buildings/structures associated with the former Ma On Shan Iron Mine as mentioned in response to L1 above, there are no more buildings in Ma On Shan Tsuen in the list of New Items pending grading assessment.
L5	The Government has not taken proactive conservation measures since the grading of these historic buildings, and tends to tone down their historical importance and the proximity of Sites D and E to the historic buildings.	Response to L4 in Annex Va is relevant.
L6	The next-stage study on the “Conservation of Industrial Heritage of Ma On Shan Iron Mine” should commence as soon as possible	<p>As detailed in the response to L1(i) in Annex Va, the proposed developments and their associated infrastructure and facilities will not encroach onto any graded historic buildings/structures (except a pier of the Mineral Preparation Plant). A HIA will be required in the detailed design stage when detailed design is available to further develop the mitigation measures in consultation with AMO.</p> <p>From the heritage conservation viewpoint, AMO is open to conservation initiatives / proposals for these graded historic buildings / structures properly, and is pleased to offer technical advice and comment from the heritage conservation perspective on any works/</p>

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
		proposals arising from the renovation / revitalization as well as repair and maintenance of the graded historic buildings / structures. Second para. of the response to L2 above regarding an ongoing research on the built heritage related to former Ma On Shan Iron Mine is also relevant.
<i>Impact on Historic Buildings</i>		
L7	The proposed improvement of MOST Road would result in direct impact on a pier of the Mineral Preparation Plant, which is a Grade III historic building. It is important to conserve the historic structure in-situ to maintain its authenticity and group value, and solution to conserve the pier should be explored.	Response to L6 in Annex Va is relevant.
L8	Construction works such as piling, site formation and road works may affect the structural stability of the graded historic buildings, especially the 110ML Portal and Shun Yee Sun Tsuen. Some historic buildings are surrounded by the boundary of the works limit, but there is no detail on the protection for the historic buildings.	Response to L7 in Annex Va is relevant.

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
<i>Heritage Impact Assessment</i>		
L9	<p>Rezoning for Sites C to G should be subject AMO's inspection and verification of the historical buildings to avoid destruction by the proposed developments and associated works. A HIA should be included in the environmental impact assessment. The following shortcomings of the study on heritage are also spotted:</p> <p>(i) Some other structures related to the Ma On Shan Iron Mine are also found and may be affected by the proposed developments, including three ungraded piers of the Mineral Preparation Plant, toilet, tram repairing area, water tank, electricity supply facility and retaining wall along the slope near to the 110ML Portal and the Mineral Preparation Plant, and a section of the catchwater. In particular, the additional piers identified, though ungraded, should also form part of the Mineral Preparation Plant. They would be encroached by the road widening work, but no assessment has been conducted. The Government should suspend the rezoning, and review and assess the relevant historical buildings and structures comprehensively.</p> <p>(ii) Impact and conservation of the St. Joseph Church (Grade 2 historic building) at Ma On Shan Tsuen have not been mentioned by the Government.</p>	<p>A HIA Checklist has been submitted by CEDD to AMO in accordance with the HIA mechanism stipulated in DEVB TC(W) No. 6/2009 for assessment of heritage impact during preparation of Technical Feasibility Statement in the project inception stage. A baseline study on the potential heritage impact have been conducted under the PES. CEDD will be required to conduct a HIA in the detailed design stage when detailed design is available to further ascertain the potential heritage impacts including the following issues, and to develop the mitigation measures. The HIA report has to be submitted to the Antiquities Advisory Board for deliberation and endorsement.</p> <p>(i) As advised by AMO, all the mentioned structures are not graded historic buildings or items pending grading assessment by the AAB. Based on the information provided by the commenter, CEDD has advised that the alignment of the catchwater mostly falls outside the works limit while the other structures fall within the works limit. The proposed road alignment for upgrading of MOST Road will be further reviewed upon HIA in order to minimize the potential heritage impact.</p> <p>(ii) St. Joseph Church is located at the upper part of Ma On Shan Tsuen which is a distance away from the works limit and thus will not be affected by the proposed developments. Response to L5 above regarding the conservation of graded historic building is also relevant.</p>

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
Potential for Cultural / Green Tourism Development		
L10	The heritage sites of Ma On Shan Mine has the potential and should be considered for local cultural / green tourism development. The Government should reconsider incorporating Ma On Shan Iron Mine into the United Nations Educational, Scientific and Cultural Organization (UNESCO) Geo Park	According to the EFS, the proposed developments and their associated infrastructure and facilities will not encroach onto any graded historic buildings/structures (except a pier of the Mineral Preparation Plant). First para. of the response to L4 in Annex Va is relevant. On whether the former Ma On Shan Iron Mine should be incorporated into the UNESCO Geo Park, second para. of the response to L9 in Annex Va is relevant.
M Compensation and Rehousing Arrangement		
Clearance, Compensation and Rehousing		
M1	<p>(i) The public housing developments will displace others' homes.</p> <p>(ii) A landscape company in Ma On Shan Tsuen, providing planation and landscape services to hotel cooperates and visitors, will be seriously affected, as there is no sufficient space with fair rent to relocate their plants.</p>	<p>(i) For Sites A, B1 and D proposed for public housing, temporary structures are observed at Site D and are entirely located on Government land. Response to M1 and M2 in Annex Va is relevant.</p> <p>(ii) Similar to (i), eligible business operators would be offered ex-gratia allowance and the amount of which depends on the type and size of the business involved according to LandsD.</p>
Fung Shui		
M2	Impact on fung shui.	Response to M3 in Annex Va regarding fung shui related compensatory works is relevant.

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
N	Provision of GIC Facilities, Recreational Facilities/ Open Space and Other Supporting Facilities	
N1	With a decreasing birth rate and the inadequate admission of students, the need for the proposed primary school at Site E is doubtful apart from serving the proposed development at Site D.	Response to N1(i) in Annex Va is relevant.
N2	There is inadequate provision of GIC facilities and recreational facilities/open space in Ma On Shan, including hospital, community hall, elderly services (such as residential care home for the elderly and community care services facilities), child care services (such as child care centre).	Response to N2(i) in Annex Va is relevant.
N3	The proposed housing sites are all located away from the Ma On Shan Town Centre and not well-served by shopping centre, market, and community, recreational and entertainment facilities. In particular, the sites along MOST Road will repeat the mistake of Shui Chuen O Estate of similar setting, which is surrounded by hills, and only accessible by a few public transport routes or via footbridge and lift from the MTR Station, and with inadequate elderly and childcare facilities.	Response to N3 in Annex Va is relevant.

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
O	Public Consultation	
O1	<p>Local consultation before gazettal of the draft OZP was inadequate. The proposed developments have not been accepted by local residents as well as the District Council. The Government attempted to proceed with the proposed developments without proposing solutions to the issues raised by STDC.</p> <p>The Government did not proactively address the public's concerns. Notification of the amendment of OZP was inadequate. Site notices should be posted in the vicinity of the amendment sites and MTR stations during the 2-month public exhibition period. There are only a short period of 2 months for submission of representation, and an exchange session of 1 hour after the gazettal of the draft OZP. Some villagers may not be able to express their views under the current consultation mechanism.</p> <p>The planning system of Hong Kong is dominated by top leaders. Once they insist to implement a proposal, there is no turning back to resist their decision.</p>	Response to O1 in Annex Va is relevant.

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
O2	<p>Some of the representations do not have a full name. It is doubtful if they can be counted as a valid representation.</p> <p>Also, no strong justification was provided in the supportive representations, and such supporting reason as “Tewting” can be found. On the contrary, the adverse representations are justified by valid scientific grounds to illustrate the potential adverse impacts.</p>	<p>Under the Town Planning Ordinance, representations/comments/further representations shall be made in such manner as the Board requires. Submission of a representation should comply with the Town Planning Board Guidelines No. 29B (TPB PG-No. 29B) on Submission and Publication of Representations, Comments on Representations and Further Representations under the Town Planning Ordinance. Any representation which does not comply with any of the requirements may be treated as not having been made.</p> <p>The established public consultation procedures for OZP amendments had been followed. The proposed amendments to the approved OZP were incorporated into the draft OZP and published for exhibition for two months according to the provisions of the Town Planning Ordinance. Members of the public have been given the opportunity to make representations on the amendments and comment on the representations. The Board will then hold a hearing to hear and consider the representations and comments received in respect of the draft plan. All valid representers and commenters will be invited to attend the hearing. After hearing the representations and comments, the Board will decide whether to propose amendment(s) to the draft OZP to meet/partially meet the representation(s) in the manner proposed in the representation(s) or in other manner that the Board considers appropriate in meeting the representation(s).</p>

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
P	Others	
P1	Population policy is the crux of the housing problem of Hong Kong, as any increase in housing supply is quickly offset by the incoming population.	Response to P1 in Annex Va is relevant.
P2	The Ma On Shan Barbecue Area will be ‘privatised’ by the residents of at the proposed private housing at Site G.	The Ma On Shan Barbecue Area will not be affected by the proposed developments.
P3	The proposed development is an act of collusion. To facilitate the proposed development under the approved planning application no. A/MOS/65, the developer will have to improve and widen MOST Road and the road scheme was gazetted 11 years ago. However, the road scheme was halted in 2015 upon the commissioning of consultancy study for housing development along MOST Road. The proposed development under the current OZP amendment will affect the implementation of the approved planning application no. A/MOS/65. It is suspicious that the undertaking of road improvement by the government is a transfer of benefit to private developer.	Response to P4 in Annex Va is relevant.

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
Q Proposals from Commenters		
<i>In Relation to Sites A, B1 and C to G</i>		
Q1	The amendment sites should be used for conservation of the mining sites and the mining settlements and promoting tourism development.	Response to Q5 in Annex Va is relevant.
<i>In Relation to Sites C to G</i>		
<i>Sites C to G</i>		
SQ1	Whilst the need for public housing is understood, the proposed private housing at Site G is not justified. The site zoned “GB” adjacent to Kam Chun Court represents a better alternative for public housing development, while the temporary works site of Sha Tin Cavern STW in Area 73 represents a suitable site for the proposed primary school. The proposed pumping station and service reservoirs at Sites C and F, which are proposed only for supporting the proposed development at Site D, E and G, would no longer be required.	Response to SQ3 in Annex Va is relevant.
SQ2	The representers’ suggestion for developing residential care home for the elderly at the proposed housing site along MOST Road is not supported. Any large-scale development along MOST Road will require site formation works, resulting in adverse ecological and heritage impacts.	The EFS conducted has concluded that there is no insurmountable technical problem for the proposed housing developments and their associated infrastructures and facilities. In view of the scarcity of land resources, there is a need to well utilize the potential of the site to address housing and other development needs of the community. A variety of social welfare facilities including residential care home for

	Major Grounds and Proposals of the Comments on Representations	Responses of Government Departments
		the elderly have been incorporated in the indicative scheme of the housing sites under the EFS.
SQ3	Sites C to G should be revitalised as a cultural heritage precinct.	Response to Q1 above is relevant.
T	Adverse Representations on Item H	
T1	The Sha Tin Cavern Sewage Treatment Works (STCSTW) should not generate significant ecological impact.	According to the Drainage Services Department (DSD), as concluded in the EIA Report approved in November 2016, no adverse residual ecological impacts are expected from the relocation of STSTW to caverns project with the proper implementation of mitigation measures.

Sha Tin, Tai Po and North District

Agenda Item 6

Proposed Amendments to the Approved Ma On Shan Outline Zoning Plan No. S/MOS/22
(RNTPC Paper No. 4/20)

16. The Secretary reported that the proposed amendment items involved public housing developments by the Hong Kong Housing Authority (HKHA), which were supported by the Engineering Feasibility Study (EFS) conducted by the Civil Engineering and Development Department (CEDD) where Black & Veatch Hong Kong Ltd. (B&V) was one of the consultants of the study. The following Members had declared interest on the item:

- | | | |
|---|---|--|
| Mr Gavin C.T. Tse
(as Chief Engineer
(Works), Home Affairs
Department) | - | being a representative of the Director of Home Affairs as member of the Strategic Planning Committee and Subsidised Housing Committee of the HKHA; |
| Mr K.K. Cheung | - | his firm having current business dealings with HKHA and B&V; |
| Mr Conrad T.C. Wong | - | his firm having current business dealings with HKHA; |
| Mr L.T. Kwok | - | his serving organisation openly bid a funding from HKHA; and |
| Dr C.H. Hau | - | currently conducting contract research projects with CEDD. |

17. The Committee noted that according to the procedure and practice adopted by the Town Planning Board (the Board), as the proposed amendments, including that for public housing development, were the subject of amendments to the outline zoning plan (OZP) proposed by the Planning Department (PlanD), the interests of Members in relation to HKHA mentioned above on the item only needed to be recorded. As Mr K.K. Cheung and Dr. C.H. Hau had no involvement in relation to the amendment items, the Committee agreed that they could stay in the meeting.

Presentation and Question Session

18. The following representatives from PlanD, CEDD, Housing Department (HD) and the consultants were invited to the meeting at this point:

PlanD

- | | | |
|---------------------|---|---|
| Ms Jessica H.F. Chu | - | District Planning Officer/Shia Tin, Tai Po and North (DPO/STN); |
| Ms Hannah H.N. Yick | - | Senior Town Planner/Shia Tin, Tai Po and North (STP/STN); |
| Mr Adrian H.C. Lee | - | Town Planner/Shia Tin, Tai Po and North (TP/STN); |

CEDD

- | | |
|------------------|--|
| Mr Gabriel Woo | Project Team Leader/Housing (PTL/H), CEDD; |
| Mr Patrick Cheng | Senior Engineer/2 (SE/2), CEDD; |
| Mr Jack Lui | Engineer/3 (E/3), CEDD; |

HD

- | | |
|--------------|---|
| Ms Elim Wong | Senior Planning Officer/6 (SPO/6) (Atg), HD |
| Ms. Amy Ho | Senior Architect/20 (SA/20), HD |

The Consultants

- | | | |
|---------------|---|---------------------------|
| Mr Edwin Lo | } | B&V |
| Ms Eunice Lee | | |
| Mr Tony Lee | | |
| Mr Y.H. Hui | - | Ramboll Hong Kong Limited |

19. With the aid of a PowerPoint presentation, Ms Jessica H.F. Chu, DPO/STN, presented the proposed amendments as detailed in the Paper and covered the following main points :

Background

- (a) to meet the pressing need for housing land supply and associated supporting Government, institution and community (GIC) facilities, seven “Green Belt” (“GB”) sites at the fringe of Ma On Shan New Town had been identified. The two sites near the Cheung Muk Tau Village were proposed for public housing developments (Items A and B1). As for the other five sites along Ma On Shan Tsuen Road (MOST Road) (Items C to G), one at the lower end of the MOST Road was proposed for another public housing development with two nearby sites reserved for GIC uses to accommodate a water pumping station and a primary school, and the one at an the upper end of the MOST Road was for private housing development with a nearby site for service reservoir use;
- (b) the proposed housing developments would provide a total of about 6,180 public housing units and 1,040 private housing units to accommodate about 20,430 people;

Proposed Amendments to Matters shown on the OZP

- (c) Amendment Item A (about 1.46 ha) which involved rezoning of an area to the east of the Cheung Muk Tau Village, Sai Sha Road from “GB” to “Residential (Group A)11” (“R(A)11”) for public housing development with a maximum plot ratio (PR) of 6.8 and a maximum building height (BH) of 165mPD;
- (d) Amendment Items B1 (about 1.38 ha) and B2 (about 0.4 ha) involved rezoning of an area to the west of the Cheung Muk Tau Village, Sai Sha Road from “GB” to “R(A)11” to facilitate public housing development with a maximum PR of 6.8 and a maximum BH of 165mPD, and rezoning of a piece of land to the immediate west of Site B1 from “GB” to an area shown as ‘Road’ to reflect the existing as-built condition;
- (e) Amendment Item C (about 0.45 ha) involved rezoning of an area at the

lower end of MOST Road from “GB” to “Government, Institution or Community” (“G/IC”) with a maximum BH of 1 storey for a water pumping station;

- (f) Amendment Item D (about 2.26 ha) involved rezoning of an area at the lower end of MOST Road from “GB” to “R(A)11” with a maximum PR of 6.8 and a maximum BH of 225mPD for public housing development;
- (g) Amendment Item E (about 0.73 ha) involved rezoning of an area at the lower end of MOST Road from “GB” to “G/IC” with a maximum BH of 8 storeys for a 30-classroom primary school;
- (h) Amendment Item F (about 0.66 ha) involved rezoning of an area at the upper end of MOST Road from “GB” to “G/IC” with a maximum BH of 2 storeys for a fresh water service reservoir and a salt water service reservoir;
- (i) Amendment Item G (about 2.73 ha) involved rezoning of an area at the upper end of MOST Road from “GB” to “Residential (Group B)6” (“R(B)6”) with a maximum PR of 3.6 and a maximum BH of about 250mPD mainly for private housing development; and
- (j) Amendment Item H (about 0.49 ha) involved rezoning of an area along Mui Tsz Lam Road to the south of Chevalier Garden from “GB” to “Other Specified Use” annotated “Sewage Treatment Works” to rationalize the whole development boundary of the Sha Tin Cavern Sewage Treatment Works.

Proposed Amendment to the Notes and Explanatory Statement (ES) of the OZP

- (k) corresponding revisions to the Notes and ES had been proposed to take into account the proposed amendments and to follow the revised Master Schedule of Notes to Statutory Plans promulgated by the Board;

Technical Assessments

- (l) an EFS with technical assessments had been conducted by CEDD to assess the potential impacts arising from the seven proposed housing and GIC sites on traffic, environmental, water supply, drainage, sewerage, landscape, visual, air ventilation and other aspects. According to the findings, there was no insurmountable technical problem for development of the seven proposed housing and GIC sites;

GIC Facilities and Open Space

- (m) the existing and planned provision of GIC facilities and open space were generally adequate to meet the demand of the overall planned population in accordance with the requirements of the Hong Kong Planning Standards and Guidelines (HKPSG);
- (n) according to HKPSG, there would be shortfalls in the area in community care services facilities, residential care homes for the elderly (RCHE) and child care centres in the area. Relevant facilities had been incorporated into the proposed public and private housing developments. The actual provision would be subject to the consideration of the Social Welfare Department (SWD) in the planning and development process as appropriate;

20. Ms Jessica H.F. Chu, DPO/STN, also briefed Members on the consultation with the local communities. CEDD and PlanD jointly consulted the Sai Kung North Rural Committee (SKNRC) on 23.6.2020, the Development and Housing Committee (DHC) of the Sha Tin District Council (STDC) on 30.6.2020 and 3.7.2020, and the Planning, Housing and Works Committee (PHWC) of the Tai Po District Council (TPDC) on 14.7.2020 on the findings of the EFS and the proposed amendments to the Ma On Shan OZP. At the request of a STDC member, a meeting with the representatives of Ma On Shan Tsuen was held on 13.7.2020. Their main concerns were detailed in paragraph 11 of the Paper. DHC of STDC and PHWC of TPDC passed motions objecting to Amendment Items C to G and Amendment Items A and B1 respectively.

21. As the presentation by PlanD's representative had been completed, the Chairman invited questions from Members.

22. The Chairman and some Members raised the following questions:

Development Intensity

- (a) whether the proposed PR for the public and private housing developments, in particular the private housing development at Site G which was located at some distance from the town centre area was appropriate and comparable to other housing developments in Ma On Shan area;
- (b) whether Sites A and B1 could be linked up to maximize the site efficiency for development, and whether the area of both sites could be further enlarged to provide additional gross floor area;
- (c) whether the rezoning exercise would cause any impact on the function of "GB" zone, and whether there were other "GB" sites in the area that had been identified for rezoning in the next stage;

Traffic Aspect

- (d) noting that there was grave concern from district council members on the adverse traffic impact arising from the proposed housing developments, whether the proposed traffic improvement works were sufficient to cater to the increase in traffic flow;

Environmental and Ecological Aspects

- (e) whether ecological impact assessment (EcoIA) had been conducted in support of the proposed developments, and whether any species of conservation interest had been identified in the area;
- (f) details of Wildlife Crossing System Plan at MOST Road which was

mentioned in the Paper;

- (g) noting that about 2,780 trees would be removed and about 2,900 new trees were proposed in the compensatory planting under the current proposal to achieve a ratio of at least 1:1 in terms of number, whether the replanted trees had included the trees in the woodland compensation area;
- (h) whether temporary access road would be constructed during the construction stage, and whether such construction works had been included in the environmental studies;
- (i) whether the proposed developments would constitute a designated project under the Environmental Impact Assessment Ordinance (EIAO);

GIC Provision

- (j) noting that there would be shortfall of RCHE in the area, why the Integrated Family Service Centre, instead of RCHE, was proposed in Site D;
- (k) noting that a site was reserved for a primary school, whether the provision standard of schools was on a district/cluster basis; and

Heritage Aspect

- (l) whether the proposed developments would have impact on the existing heritage resources, and what the condition of the heritage resources in the vicinity of the development sites was.

23. In response, Ms Jessica H.F. Chu, DPO/STN, PlanD, and Mr Gabriel Woo, PTL/H, CEDD, made the following main points:

Development Intensity

- (a) the PR of the existing developments in Ma On Shan ranged from 1 to 5 generally descending from the town centre towards the waterfront to the north. As announced in the 2014 Policy Address, the government considered that except for the north of Hong Kong Island and Kowloon Peninsula, it was feasible to generally increase the maximum domestic PR by around 20% as appropriate in order to optimize land use. Furthermore, in view of the increasing acute demand for public housing, the Executive Council agreed in December 2018 to allow further increase of domestic PR for public housing sites by 10% (i.e. up to 30% in total) where technically feasible. Taking into account the policy directive and with due consideration of traffic and infrastructural capacity, the domestic PR of 6.5 and 3.6 were proposed for the public and private housing developments respectively, notwithstanding that the proposed housing sites were located at the fringe of the New Town. The current rezoning proposal for public housing sites had the highest PR amongst the existing public housing developments in the Ma On Shan area. The proposed private housing development with a PR of 3.6 at Site G was comparable to the medium-density development in the Ma On Shan town centre area;
- (b) the boundaries of Sites A and B1 were limited by the ‘village environs’ (‘VE’) of the Cheung Muk Tau Village to the north and the Permitted Burial Ground to the south. Extensions of the sites were also constrained by the 7.3m wide single 2-lane carriageway reserved to serve the future development to the north of Sites A and B1. Furthermore, there was a knoll situated between the two sites. To improve the permeability and air ventilation, a building separation of about 130m was proposed between Sites A and B1. The current site boundaries had already been maximized;
- (c) the “GB” zone in the area provided a buffer between built-up areas and the adjacent Ma On Shan Site of Special Scientific Interest and Ma On Shan Country Park, which were designated in 1976 and 1979 respectively. The subject sites were located at the fringe of the “GB” zone. Upon the

rezoning exercise, the overall area of “GB” zone on Ma On Shan OZP would be reduced from 405 ha to 394 ha (from about 49% to 48.4% of the Planning Scheme Area). There were no other “GB” sites identified for rezoning at the moment;

Traffic Aspect

- (d) a Preliminary Traffic and Transport Impact Assessment (PTTIA), covering the whole Ma On Shan area, had been conducted to assess the traffic and transport impact arising from the proposed housing developments. With the implementation of the proposed improvement works, including (i) provision of a new 7.3m wide single 2-lane carriageway to Sites A and B1; (ii) re-aligning and upgrading of the existing MOST Road to a 7.9m/7.3m wide single 2-lane carriageway; (iii) provision of new on-street lay-bys for bus/Green Minibus/taxi to cater to extra public transport services; (iv) implementing road improvement works on critical junctions including altering Chak Cheung Street/Science Park Road roundabout to a signalized-controlled junction, enhancing the method of control at the junction of Sai Sha Road/Kam Ying Road by providing an additional traffic island, widening the approaching arms to the junction of Sai Sha Road/Nin Wah Road/Nin Fung Road, and widening the exit arm at the junction of MOST Road and Hang Hong Street; and (v) widening a section of Tate’s Cairn Highway (South of Ma On Shan Road) from three lanes to four lanes, except for the Tate’s Cairn Highway across Shing Mun River (i.e. T6 Bridge) where traffic queue might occur at AM peak, it was anticipated that the proposed developments would not induce insurmountable problem to the traffic network from traffic point of view. For T6 bridge, the Government would investigate the improvement measures and would consult the public in due course. Furthermore, the on-going widening of Tai Po Road (Sha Tin Section) and the planned Trunk Road T4 would also improve the traffic conditions in the area;

Environmental and Ecological Aspects

- (e) an EcoIA for the proposed housing sites and their surrounding areas had been conducted to assess the ecological impact. The ecological value was relatively low as compared with the Ma On Shan Country Park located further uphill. Together with the implementation of the proposed mitigation measures and good site management, the overall ecological impact was considered insignificant;
- (f) the proposed upgrading works of MOST Road would be mainly confined to the existing road to minimize the adverse ecological impact as far as practicable. As advised by the Agriculture, Fisheries and Conservation Department (AFCD), Wildlife Crossing System Plan would be adopted at MOST Road to reduce the risk of road kill. The layout and arrangement would be further examined at the detailed design stage for AFCD's agreement;
- (g) to compensate for the loss of woodland, compensatory planting works would be arranged both on-site and off-site where appropriate. Various sizes of compensatory trees would be planted in various locations including the woodland compensation area, with a relatively long establishment period (i.e. 3 to 5 years) to allow time for the trees to grow. The number of replanted trees had included those planted in the woodland compensation areas. Further review and confirmation on the trees to be affected by the proposed developments would be conducted at the investigation and detailed design stage;
- (h) the provision of temporary access road near the MOST Road would be required and all related works would be undertaken within the proposed works area. The potential environmental impact during the construction stage had been taken into account in the Preliminary Environmental Studies (PES);
- (i) it is anticipated that the proposed development would not constitute a

designated project under the EIAO. Subject to a more comprehensive review on the design proposal in the detailed design stage, the Environmental Protection Department (EPD) would be consulted in respect of the implications of the proposed development under the EIAO;

GIC Provision

- (j) the government had adopted a multi-pronged approach to provide social welfare facilities. SWD had been maintaining close communication with departments concerned to identify suitable sites for social welfare facilities. One RCHE would be provided at Yan On Estate. SWD had proposed one RCHE at Site A and an Integrated Family Service Centre at Site D based on the anticipated need of the future households, while the actual provision of the type of facilities would be subject to SWD's review in the planning and development process as appropriate;
- (k) while the provision for schools formulated by the Education Bureau was based on a school net basis, the demand for and supply of primary schools was estimated by PlanD based on the coverage of OZP. For the Ma On Shan OZP, one primary school was required and it was proposed at Site E to serve the additional population in the area; and

Heritage Aspect

- (l) the majority of the heritage resources including Shun Yee San Tsuen (part of Site Structures at Mining Settlement, Ma On Shan Iron Mine (Grade 3 historic buildings)), structures at the 110ML portal (part of Exterior Wall of Mines 110ML and 240ML, Ma On Shan (Grade 2 historic buildings)) and most of the Mineral Preparation Plant structures (Grade 3 historic buildings) would not be affected as they were excluded and separated by a buffer zone from the engineering works areas for the proposed housing developments. Although a pier (part of the Mineral Preparation Plant (Grade 3 historic buildings)) might be affected by the proposed upgrading works of MOST Road according to the preliminary design, effort would be made by CEDD

to minimize the adverse impacts on it as far as practicable at the detailed design stage. Since the closure of the iron mine in 1976, the concerned structures had been abandoned and they were generally in poor conditions.

24. The Chairman then invited Members to give views on the proposed amendments to the Ma On Shan OZP.

25. A Member indicated support to all proposed amendment items, including Amendment Item G, in view of the persistent shortfall in both public and private housing units in Hong Kong. Nothing that the concerned sites were all within “GB” zone instead of country park area, the rezoning sites only accounted for a very small portion of the total area of “GB” zone on the OZP, and the Ma On Shan area was supported by existing and planned infrastructure, it was justified to rezone the sites for provision of more housing units and supporting GIC facilities.

26. Other Members in general supported Amendment Items A, B1, and D which would provide a total of about 6,180 public housing units to meet the pressing need for housing land supply. They considered that Sites A, B1 and D, being located at the fringe of the “GB” zone and in the proximity to existing roads, were suitable sites for public housing developments as technical assessments had been conducted, which showed that there was no insurmountable technical problem for housing developments on those sites. Two Members opined that it would be desirable to have Sites A and B1 be linked up and enlarged to maximize the site efficiency so as to provide more public housing units.

27. In response to a Member’s question on Amendment Item G, Ms Jessica H.F. Chu, DPO/STN said that according to the indicative scheme under the EFS, the proposed private housing development at Site G would provide about 1,040 flats in nine residential towers of about 18 to 27 storeys high. The proposed maximum PR was 3.6 and the maximum BH was 250mPD. The site was located at the upper end of MOST Road and dotted with buildings/structures. A Member noted that the site was located in the midst rather than at the fringe of “GB” zone. Another Member pointed out that the scale of the proposed development with a maximum PR of 3.6 and BH with about 18 to 27 storeys was in fact similar to the medium-density development in the Ma On Shan town centre area, and such development scale was considered not compatible with the surrounding environment at the

upper end of MOST Road. A Member was of the view that adverse visual and environmental impact would be envisaged and rezoning of the site for private development might set an undesirable precedent for similar housing proposal in the “GB” zone. Another Member expressed that in view of the visual concern, consideration could be given to enlarging the site to reduce the BH while maintaining the same development intensity, and that might result in a development were blending into the surrounding environment.

28. A Member asked if there were examples of other rezoning of “GB” sites similar to the site context of Site G. Ms Jessica H.F. Chu, DPO/STN said there was no such example in the Shatin and Tai Po district while she did not have information in hand regarding other districts. Another Member opined that in considering a rezoning proposal of a specific site, it would be important to ensure that the proposal would fit into the overall planning framework of a wider area. A Member said it was understandable that there was a need to identify suitable sites for housing development but there was concern on the overall impact of rezoning more and more “GB” sites. The same Member opined that the government should consider whether there would be a sunset clause for the current policy on rezoning of “GB” sites and maximizing development intensity to the meet the housing demand.

29. Noting that the proposed developments would not constitute a designated project under the EIAO, a Member had concern on the monitoring mechanism over the proposed environmental mitigation measures including the provision of Wildlife Crossing System and woodland compensation. The same Member advised that the government might consider establishing a committee to monitor the implementation of the proposed environmental mitigation measures, similar to the one set up under the Lok Ma Chau Spur Line project. In response, Mr Terence S.W. Tsang, Assistant Director (Environmental Assessment), EPD pointed out that although the proposed developments might not constitute designated projects under the EIAO, the project proponents would still be required to carry out necessary environmental assessments and design the projects in accordance with the Hong Kong Planning Standards and Guidelines and to implement mitigation measures identified therein. For private development, relevant requirements could be included in the lease conditions as appropriate. In response to the same Member’s enquiry on whether detailed tree survey at the development sites had been conducted, Mr Gabriel Woo, PTL/H, CEDD, said that broad brush tree group surveys were conducted in the EFS for the proposed developments, whilst

the individual tree survey would be carried out in the subsequent design and construction stage. The same Member was of the view that the information related to environmental assessment in the subject EFS, as compared with other EFS such as that for the proposed amendments to Tseung Kwan O OZP, was obviously insufficient.

30. Noting that there was strong local objection to the proposed amendment items including that from STDC, during the consultation process, a Member opined that the government should provide some benefit to the local residents to address their concerns, such as provision of more GIC facilities, in order to gain their support. A Member considered that opportunity should be taken to including RCHE in the new housing developments as far as practicable. Another Member suggested that the government should take the opportunity of the rezoning exercise to better preserve the heritage buildings/structures related to the previous mining activities in the vicinity of the rezoning sites.

31. The Chairman summed up Members' discussion and concluded that Members generally supported the proposed amendment items for public housing development (Amendment Items A, B1, and D), had no adverse comments on the proposed amendment items for water pumping station, primary school and service reservoir (Amendment Items C, E and F), and had no objection to Amendment Items B2 and H to reflect an existing road and to rationalize the boundary of the Sha Tin Cavern Sewage Treatment Works. However, some Members raised concerns on Amendment Item G in respect of its relatively high development intensity in the midst of "GB" zone near the Ma On Shan Country Park and the likely precedent effect on other similar proposals in the context of the overall planning framework of the Ma On Shan OZP.

32. The Chairman then sought Member's view on two possible way forward: (a) to proceed with all proposed amendment items for exhibition under section 5 of the Town Planning Ordinance (the Ordinance) for public inspection with a view to obtaining the public's views on the amendment items including Amendment Item G and to confirm or vary the amendments upon consideration of the representations and comments; or (b) to defer exhibition of the proposed amendments under the Ordinance pending the provision of supplementary information in relation to Amendment Item G from relevant government departments on how the rezoning would fit into the overall planning framework of the Ma On Shan OZP and examples of similar rezoning proposals within "GB" zone in other areas for

the Committee's consideration.

33. A Member opined that the government should take forward all proposed amendments, and considered that Amendment Item G would not set an undesirable precedent. The rezoning should proceed in view of the pressing demand for both public and private housing. Some Members, however, considered that the Committee should defer a decision on Amendment Item G pending submission of supplementary information for the Committee's consideration.

34. After deliberation, the Committee agreed that the proposed Amendment Items A, B1, B2, C, D, E, F and H to the approved Ma On Shan OZP No. S/MOS/22 as shown on the draft Ma On Shan OZP No. S/MOS/22A at Attachment II and its Notes at Attachment III were suitable for exhibition for public inspection under section 5 of the Ordinance, while the Committee decided to defer a decision on the proposed Amendment Item G pending submission of supplementary information from relevant government departments on how the proposed development at Site G would fit into the overall planning framework of the Ma On Shan OZP and examples of similar rezoning proposals within "GB" zones in other areas for its consideration. The Committee also decided to defer exhibition of the proposed amendments to the approved Ma On Shan OZP No. S/MOS/22 for public inspection under the Ordinance pending a decision on the proposed Amendment Item G.

[The Chairman thanked Ms Jessica H.F. Chu, DPO/STN, Ms Hannah H.N. Yick, STP/STN, Mr Ardian H.C. Lee, TP/STN, Mr Gabriel Woo, PTL/H, CEDD, Mr Patrick Cheng, SE/2, CEDD, Mr Jack Lui, E/3, CEDD, Ms Elim Wong, SPO/6, HD (Atg), Ms Amy Ho, SA/20, HD, Mr Edwin Lo, Ms Eunice Lee, Mr Tony Lee and Mr Y.H. Liu, for their attendance to answer Members' enquiries. They left the meeting at this point.]

[A short break of 5 minutes was taken at this point.]

~~Mr Conrad T.C. Wong having current business dealings with CLP.~~

33. The Committee noted that the applicant had requested deferment of consideration of the application and Mr Conrad T.C. Wong had tendered an apology for being unable to attend the meeting. As the interest of Dr Jeanne C.Y. Ng was direct, the Committee agreed that she could stay in the meeting but should refrain from participating in the discussion. As Mr K.K. Cheung had no involvement in the application, the Committee agreed that he could stay in the meeting.

34. The Committee noted that the applicant's representative requested on 4.9.2020 deferment of the consideration of the application for two months in order to allow time for preparation of further information to address departmental comments. It was the first time that the applicant requested deferment of the application.

35. After deliberation, the Committee decided to defer a decision on the application as requested by the applicant pending the submission of further information from the applicant. The Committee agreed that the application should be submitted for its consideration within two months from the date of receipt of further information from the applicant. If the further information submitted by the applicant was not substantial and could be processed within a shorter time, the application could be submitted to an earlier meeting for the Committee's consideration. The Committee also agreed to advise the applicant that two months were allowed for preparation of the submission of the further information, and no further deferment would be granted unless under very special circumstances.

Sha Tin, Tai Po and North District

Agenda Item 8

[Open Meeting]

Further Consideration of Proposed Amendments to the Approved Ma On Shan Outline Zoning Plan No. S/MOS/22

(RNTPC Paper No. 6/20)

36. The Secretary reported that the proposed amendment items involved public housing developments by the Hong Kong Housing Authority (HKHA), which were supported by the Engineering Feasibility Study (EFS) conducted by the Civil Engineering and Development Department (CEDD) where Black & Veatch Hong Kong Limited (B&V) was one of the consultants of the study. The following Members had declared interest on the item:

- | | |
|---|--|
| Mr Gavin C.T. Tse
(as <i>Chief Engineer</i>
(Works), <i>Home Affairs</i>
<i>Department</i>) | - being a representative of the Director of Home Affairs as member of the Strategic Planning Committee and Subsidised Housing Committee of the HKHA; |
| Mr K.K. Cheung | - his firm having current business dealings with HKHA and B&V; |
| Mr Conrad T.C. Wong | - having current business dealings with HKHA; |
| Mr L.T. Kwok | - his serving organisation made a bid for funding from HKHA; and |
| Dr C.H. Hau | - currently conducting contract research projects with CEDD. |

37. The Secretary reported that Mr Conrad T.C. Wong had tendered an apology for being unable to attend the meeting. The Committee noted that according to the procedure and practice adopted by the Town Planning Board (the Board), as the proposed amendments, including that for public housing development, were the subject of amendments to the outline zoning plan (OZP) proposed by the Planning Department (PlanD), the interests of Members in relation to HKHA mentioned above only needed to be recorded. As Mr K.K. Cheung and Dr. C.H. Hau had no involvement in relation to the amendment items, the Committee agreed that they could stay in the meeting.

38. The following representatives from PlanD, CEDD and the consultants were invited to the meeting at this point:

PlanD

- | | |
|---------------------|---|
| Ms Jessica H.F. Chu | - District Planning Officer/Shan Tin, Tai Po and North (DPO/STN); |
| Ms Hannah H.N. Yick | - Senior Town Planner/Shan Tin, Tai Po and North (STP/STN); |
| Mr Adrian H.C. Lee | - Town Planner/Shan Tin, Tai Po and North (TP/STN); |

CEDD

- | | |
|------------------|--|
| Mr Gabriel Woo | - Project Team Leader/Housing (PTL/H), CEDD; |
| Mr Patrick Cheng | - Senior Engineer/2 (SE/2), CEDD; |
| Mr Jack Lui | - Engineer/3 (E/3), CEDD; |

The Consultants

- | | | |
|---------------|-----------------------------|----------|
| Mr Edwin Lo | } | B&V; and |
| Ms Eunice Lee | | |
| Mr Tony Lee | | |
| Mr Y.H. Hui | - Ramboll Hong Kong Limited | |

39. With the aid of a PowerPoint presentation, Ms Jessica H.F. Chu, DPO/STN, presented the proposed amendments as detailed in the Paper and covered the following main points:

Background

- (a) on 21.8.2020, PlanD sought the Committee's agreement to the proposed amendments to the Ma On Shan (MOS) OZP No. S/MOS/22, which were to rezone seven "Green Belt" ("GB") sites at the fringe of MOS New Town for housing developments with supporting infrastructure and community facilities;
- (b) the Committee agreed to the proposed Amendment Items A, B1, B2, C, D, E, F and H to the approved MOS OZP, but decided to defer a decision on the proposed Amendment Item G pending submission of supplementary information from relevant government departments on how the proposed development at Site G would fit into the overall planning framework of the MOS OZP and examples of similar rezoning proposals within "GB" zones in other areas for its consideration;

Further Information in Response to Members' Concerns

Urban Design Framework of Ma On Shan New Town

- (c) the proposed housing site under Amendment Item G, with its site formation levels between 140mPD and 190mPD and maximum building height (BH) of 250mPD, would follow the stepped height concept of MOS New Town by keeping taller buildings on the hillside and lower buildings towards the waterfront;
- (d) Site G was located at the upper end of Ma On Shan Tsuen Road and was about 500m away from Heng On Estate which was zoned "Residential (Group A)";
- (e) the site was well-connected with the town centre by the existing Ma On Shan Tsuen Road, which would be re-aligned and upgraded to a 7.3m to 7.9m wide single 2-lane carriageway with a 2.0m to 2.75m wide footpath on both sides up to Site G;

- (f) a maximum plot ratio (PR) of 3.6 was proposed for the private housing site under Amendment Item G. The proposed housing site would pose moderately adverse visual impact at some viewpoints;
- (g) the proposed development with a maximum BH of 250mPD would be lower than the existing average ridgeline of the MOS Mountain to preserve the ridgeline and would not adversely affect the integrity of the MOS ridgeline;
- (h) no insurmountable technical concern was identified under the EFS to support a maximum PR of 3.6 and BH of 250mPD private housing development at the site;

Similar Rezoning Proposals within the “GB” Zone

- (i) since 2013, the rezoning of 38 “GB” sites on OZPs for residential purpose (including 24 for private housing and 14 for public housing) had been initiated;
- (j) for the 24 “GB” sites intended for private housing, 19 of them were successfully rezoned and five sites were not agreed by the Board/Committee;
- (k) the PRs proposed for 19 successfully rezoned sites (i.e. PR of 0.6 to 6.0) were either comparable to or higher than its nearby residential developments; and
- (l) the subject site was adjacent to the MOS Country Park separated by Ma On Shan Tsuen Road. Examples of existing residential developments adjoining Country Park included the Hong Kong Parkview surrounded by the Tai Tam Country Park, the Kornhill Development adjoining Tai Tam Country Park (Quarry Bay extension), and the Shui Chuen O Estate adjacent to MOS and Lion Rock Country Parks.

40. Some Members raised the following questions:

- (a) whether the application site was government land (GL);
- (b) clarification on the proposed development parameters at Site G; and
- (c) whether photomontages were available, showing MOS ridgeline as the backdrop, to facilitate assessment of the visual impacts generated by Amendment Item G.

41. Ms Jessica H.F. Chu, DPO/STN, made the following responses:

- (a) the application site was GL;
- (b) Site G was about 2.73 ha in site area and elongated in shape. According to the indicative scheme of the EFS, the proposed private housing development would have 9 residential blocks descending from south to north ranging from 18 to 27 stories and providing about 1,040 private housing units. A 150-place residential care home for the elderly was proposed to be incorporated at the northern portion of Site G. The development scheme was indicative only and would be subject to future developer's future design; and
- (c) by referring to the photomontages in the PowerPoint presentation, the proposed housing development would pose moderately adverse visual impact at certain vantage points according to the findings of the Visual Impact Assessment (VIA). A video clip showing the bird's-eye view of MOS was also played to indicate the location of Site G in relation to the developments nearby. The proposed housing development would be partially shielded off by the existing residential developments at certain vantage points and it would still be significantly lower than the existing average ridgeline of the MOS Mountain.

42. The Vice-chairman recalled that the main concern from Members at the last

meeting was to seek justifications on why Site G which was in close proximity to the MOS Country Park was selected. As PlanD's presentation had provided supplementary information to address Members' concerns, the Vice-chairman and a Member supported the proposed rezoning for private housing development.

43. A Member opined that Hong Kong Parkview was developed long ago under different planning contexts, and some Members also said that Hong Kong Parkview it was not a desirable location for residential development from planning perspective and this type of development should not be encouraged nowadays. On the other hand, a Member considered that the Shui Chuen O Estate was acceptable in terms of site context and scale of development, but Amendment Item G had a different site context and with a smaller scale of development.

44. A Member had reservation on Amendment Item G as the site was rezoned for private housing development and considered that the site context of Amendment Item G was not entirely similar to the previous examples presented by PlanD, including Shui Chuen O Estate which was a large-scale public housing development located in close proximity to existing new town development.

45. Another Member said, and a few other Members agreed, that while there was a dire need for public housing development, the demand for private housing development should not be overlooked as the housing needs of different sectors of the community should also be catered for. A Member agreed that all housing needs should be addressed but there was a concern on when public resources were used for private housing development. In this connection, the Member raised the following questions:

- (a) assessment criteria on whether a site would be suitable for public or private housing development; and
- (b) whether Site G would only be used for private housing development after being rezoned to "R(B)6".

46. Ms. Jessica Chu, DPO/STN, made the following responses:

- (a) with a view to maximising the utilisation of land resources, public housing sites would usually have a higher PR ranging from 5 to 6.5. Given the site context and considering the potential visual impacts, a PR of 3.6 was proposed for Site G which was more suitable for a medium density private residential development; and
- (b) while three sites (Amendment Items A, B1, and D) were proposed to be reserved for public housing developments, Site G was proposed for private housing development to cater for private housing demand. However, there was no statutory restriction on the housing type under the Note of the OZP for “R(B)6” zone. There had been precedent cases where sites originally planned for private housing developments were subsequently converted into public housing development.

47. Some Members maintained their views as expressed at the last meeting and did not support Amendment Item G since it was located far from MOS New Town and close to the fringe of the MOS Country Park. By rezoning Site G to “R(B)6”, the continuity of the subject “GB” zone would be disturbed and its function as a buffer between urban development and the country park would be adversely affected. Given the site was elongated in shape and situated at mid-slope, they considered the visual impacts were significant rather than moderate.

48. Two Members observed that at Site G should be subject to lower BH restriction as the site was located on a higher altitude further up the slope while its proposed BH restriction was similar to those existing residential development at the foot of the mountain. They recognised that rezoning ‘GB’ sites for housing development was always a trade-off and considered it was not a worthwhile trade-off as Amendment Item G could only produce 1,040 housing units. If the rezoning was to go ahead, consideration could be given to enlarging Site G for a larger-scale housing development.

49. In response to these Members’ suggestion and the Chairman’s request for clarification on the site context of Site G, Mr Gabriel Woo, PTL/H, CEDD, explained that Site G was located next to Ma On Shan Tsuen Road and most of the site was sparsely covered with vegetation with some licensed houses and squatters. The site boundary was

determined to keep the potential landscape impact to a minimum. On the other hand, the area to the southwest of Site G, as proposed by Members for expansion, was densely covered with bushes/trees. In terms of visual impact, while the site was elongated in shape, it would unlikely be seen from MOS promenade and MOS New Town as the existing housing developments in MOS District would block the view to most of the future development at Site G. Therefore, the visual impact of the site was considered moderate and acceptable by the VIA. He further remarked that the layout design in the EFS was only an indicative scheme based on a PR of 3.6, the future developer for the private housing development would most likely have a different design.

50. A Member opined that compromises would have to be made in view of increasing difficulties to identify suitable site for housing development. The same Member pointed out that the proposed private housing development of medium-density was not incompatible with the overall planning framework of the MOS area while another Member opined that the proposed rezoning site was compatible with the nearby residential developments. Other Members also agreed that Site G could be rezoned for private housing development as the visual impact was not unacceptable and no insurmountable impacts would be generated to the nearby residents.

51. The Chairman concluded that while some Members still had reservation, slightly more Members considered that the proposed uses and development intensity at Site G was compatible with the overall planning framework of the MOS area and the visual impact was not unacceptable. The Chairman said that if the Committee agreed to Amendment Item G, the proposed amendments, including those that were agreed at last meeting i.e. Amendment Items A to H, to the approved Ma On Shan OZP No. S/MOS/22 would be exhibited for public inspection under section 5 of the Town Planning Ordinance.

52. In response to a Member's concern on compensatory planting works, Ms. Jessica Chu, DPO/STN, said that a preliminary tree survey had been conducted by the consultant in EFS. Based on the findings of the tree survey, a total of 246 trees were found at Site G. The top three tree species were *Dimocarpus longan* (龍眼), *Schefflera heptaphylla* (鴨腳木) and *Litchi chinensis* (荔枝) which were common woods and a *Ficus microcarpa* (細葉榕) on-site was proposed to be preserved. Relevant tree preservation clauses would be incorporated in the land lease. The tree survey report, the landscape assessment report and

the preliminary environmental study report were deposited for Members' reference and accessible to the public. Further information on preliminary compensatory planting proposal would be provided as appropriate if the subject matter was to be discussed at the hearing of representations.

53. After deliberation, the Committee decided to :

- “(a) agree to the proposed Amendment Item G to the approved Ma On Shan Outline Zoning Plan (OZP) No. S/MOS/22;
- (b) agree that the revised draft Ma On Shan OZP No. S/MOS/22A at Attachment II in F-Appendix I (to be renumbered as S/MOS/23 upon exhibition) and its Notes at Attachment III in F-Appendix I are suitable for exhibition for public inspection under section 5 of the Town Planning Ordinance; and
- (c) adopt the revised Explanatory Statements (ES) at Attachment IV in F-Appendix I for the draft Ma On Shan OZP No. S/MOS/22A (to be renumbered as S/MOS/23) as an expression of the planning intentions and objectives of the Board for various land use zonings on the OZP and the revised ES will be published together with the OZP.”

54. Members noted that, as a general practice, the Secretariat of the Board would undertake detailed checking and refinement of the draft OZP including the Notes and ES, if appropriate, before their publication under the Ordinance. Any major revision would be submitted for the Board's consideration.

[The Chairman thanked Ms Jessica H.F. Chu, DPO/STN, Ms Hannah H.N. Yick, STP/STN, Mr Adrian H.C. Lee, TP/STN, Mr Gabriel Woo, PTL/H, CEDD, Mr Patrick Cheng, SE/2, CEDD, Mr Jack Lui, E/3, CEDD, Mr Edwin Lo, Ms Eunice Lee, Mr Tony Lee and Mr Y.H. Liu, for their attendance to answer Members' enquiries. They left the meeting at this point.]

[The meeting was adjourned for a short break of 5 minutes.]

**Summary of Views Received at the Exchange Session on 10.11.2020 co-organised by
Sha Tin District Office and Ma On Shan South Area Committee**

General Planning Issues and Site Selection

- The sites with high density development proposed are zoned “Green Belt” (“GB”) adjacent to the Country Park Area and SSSI, which is not in line with the Task Force on Land Supply (TFLS)’s recommendation on not pursuing development on the periphery of Country Parks. There is a lack of justification for the site selection. Alternative sites outside “GB” and further from the Country Park have not been considered.
- The government does not follow the established procedures of developing country park areas for the proposed rezoning.
- Doubt on the suitability of the amendment sites along Ma On Shan Tsuen Road considering their locations on sloped terrain and proximity to several streams.
- It was suggested that the area adjacent to Yan On Estate could be an alternative site to reduce the impact on the “GB” and Country Park.
- There is concern on the additional population and their impact on the provision of community facilities in Ma On Shan.
- The Site G is close to the starting point of hiking trail in Ma On Shan Country Park. There is concern on the disturbance to the public visiting the Country Park.

Traffic Impact

- The roads and transport network in Ma On Shan have been overloaded in rush hours and the over-capacity will be aggravated by the proposed rezoning. The government cannot address the traffic impact of the proposed rezoning with adequate measures.
- Constructed along the sloped terrain, Ma On Shan Tsuen Road is not convenient for public access to Sites D to G and may also pose threat of road safety. It was suggested that roads connecting Ma On Shan Tsuen should be widened with a reduced gradient to facilitate the public access and ensure the safety of road users.
- It was suggested to incorporate a cycle track and a pedestrian footpath along the improved Ma On Shan Tsuen Road to improve road safety.

Environmental Impact

- In view of the close proximity with Shun Yee Sun Tsuen, there are concerns on how to avoid potential disturbance to the villagers including traffic, noise, air and water pollution, and visual aspects.
- It was suggested to improve the noise barrier along the roads in Ma On Shan to minimize the noise impact to residents caused by increasing traffic flow.
- According to the representative from PlanD, a Preliminary Environmental Review will be carried out for the development of Ma On Shan Tsuen. This appears to be contradictory with the RNTPC Paper No. 6/20, which mentions that the proposed development would not constitute a designated project under the Environmental Impact Assessment Ordinance. The methodology of evaluating the ecological value and biodiversity in Ma On Shan is unclear.

Heritage Conservation

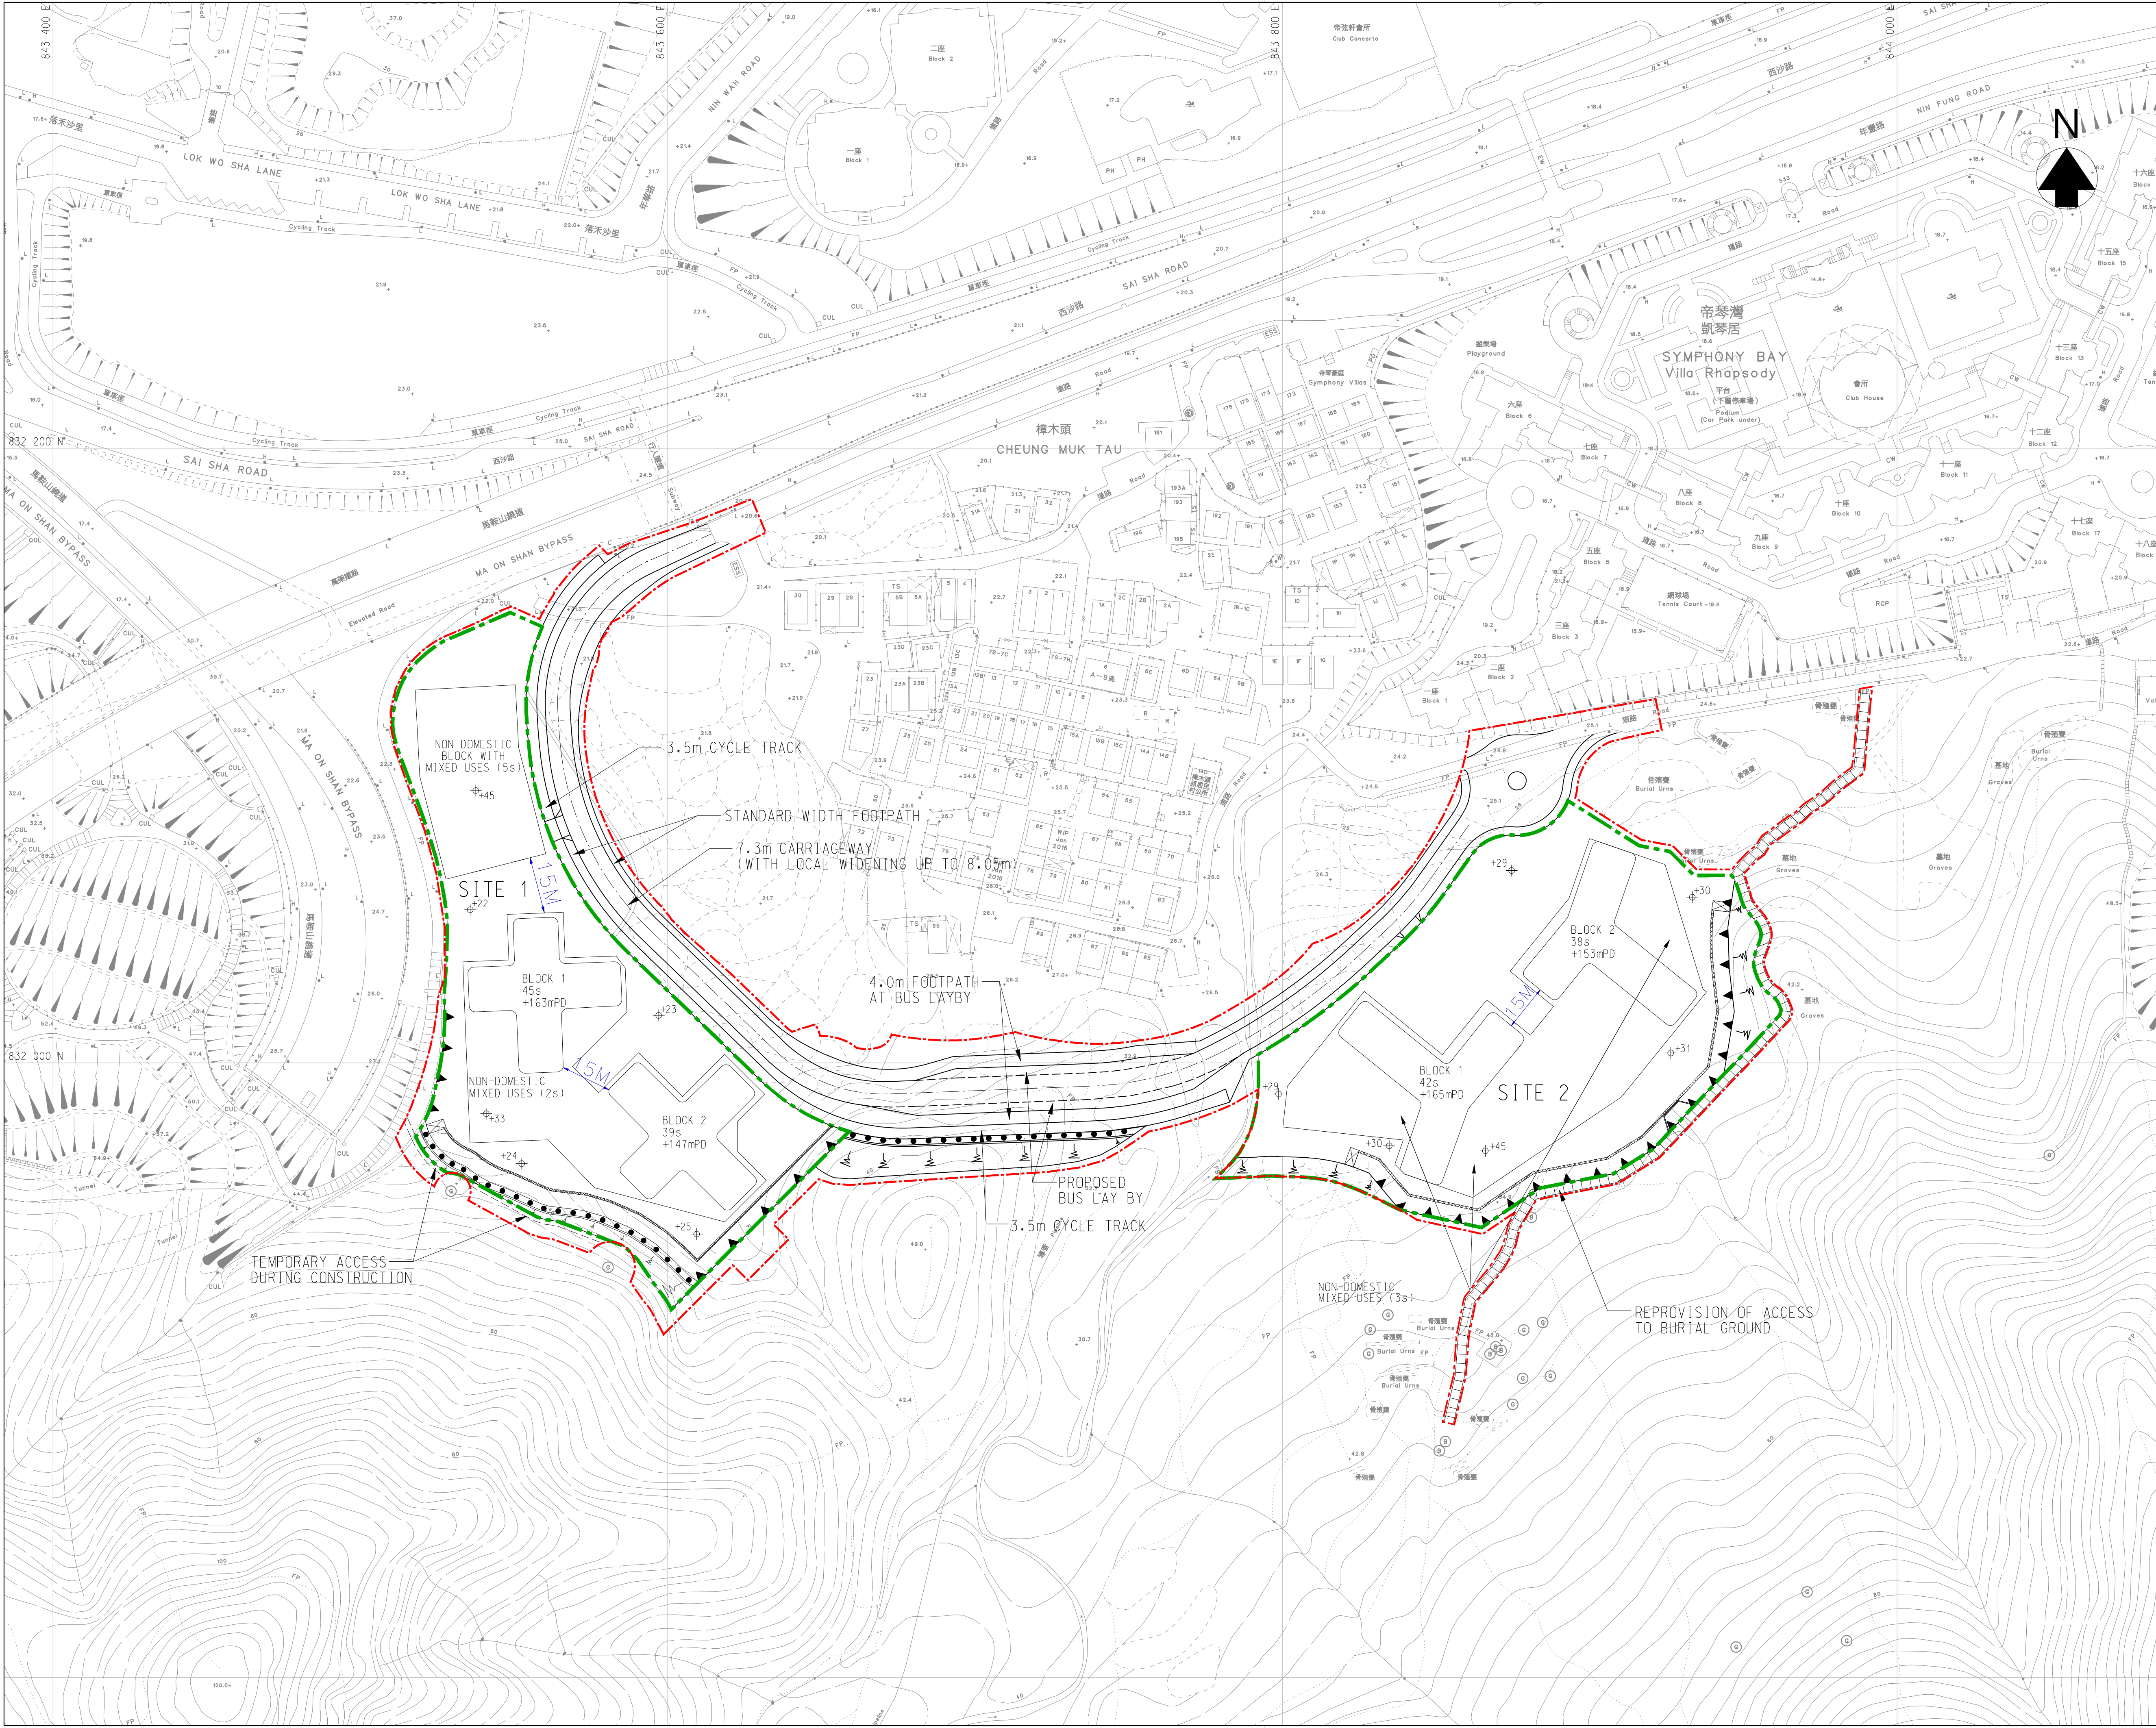

- Items D to G are located near the cultural heritage of Ma On Shan Mine including the 110 ML Portal and its associated structures, Shun Yee San Tsuen and the Mineral Preparation Plant. The government should put emphasis on conservation of cultural heritage in the meantime of development. There is a lack of protection measures for those historical structures.

Land Administration

- The government has not explained the details on land clearance and compensation for the proposed rezoning. There are concerns on the extent of squatters to be affected.
- Some villagers expressed their objection of land clearance, maintaining their stance of ‘no relocation or clearance’ (「不遷不拆」) since the removal of villages will destroy the social fabric and affect their way of life.

Suspicion of Collusion and Transfer of Benefits

- The land in the upper part of Ma On Shan Tsuen Road has been acquired by private developer. The proposed development at Sites C to G involves road improvement works as well as development of commercial and community facilities. With low demand of private housing units for Site G, it was suspicious that the proposed rezoning would lead to transfer of benefits to private developer by facilitating private development at the expense of public resources.

Type of Facilities	Hong Kong Planning Standards and Guidelines (HKPSG ¹)	HKPSG Requirement (based on planned population)	Provision		Surplus/ Shortfall (against planned provision)
			Existing Provision	Planned Provision (including Existing Provision)	
Integrated Family Services Centre	1 for 100,000 to 150,000 persons	2	2	3	+1
District Elderly Community Centres	One in each new development area with a population of around 170,000 or above	N.A.	1	1	N.A.
Neighbourhood Elderly Centres	One in a cluster of new and redeveloped housing areas with a population of 15,000 to 20,000 persons, including both public and private housing	N.A.	3	6	N.A.
Community Care Services Facilities	17.2 subsidised places per 1,000 elderly persons aged 65 or above	1,365 ³	203	491	-874 ⁴
Residential Care Homes for the Elderly	21.3 subsidised beds per 1,000 elderly persons aged 65 or above	1,691	88	548	-1,143 ⁴
Child Care Centre	100 aided places per 25,000 persons	972	105	305	-667 ⁵
Library	1 district library for every 200,000 persons	1	1	1	0
Sports Centre	1 per 50,000 to 65,000 persons	4	2	4	0
Sports Ground/ Sport Complex	1 per 200,000 to 250,000 persons	1	1	1	0
Swimming Pool Complex – Standard	1 complex per 287,000 persons	1	1	1	0

Note:

1. The planned population of Ma On Shan New Town would be about 243,000 persons. If including transients, the overall planned population is about 251,300. All population figures have been adjusted to the nearest hundred.
2. Provision of hospital services are assessed by Hospital Authority on a separate regional basis.
3. There is no rigid distribution between centre-based CCS and home-based CCS stated in the Elderly Services Programme Plan. Nonetheless, in general, 60% of CCS demand will be provided by home-based CCS and the remaining 40% will be provided by centre-based CCS.
4. As the revised standards reflect the long-term target towards which the provision of elderly services and facilities would be adjusted progressively subject to the consideration of the SWD in the planning and development process, it may not be appropriate to compare the standards with the provision of elderly services and facilities for the existing population. PlanD and SWD will work closely together to ensure that additional GIC facilities will be included in new and redevelopment proposals from both public and private sectors.
5. This is a long-term target and the actual provision would be subject to the consideration of the SWD in the planning and development process as appropriate. PlanD and SWD will work closely together to ensure that additional GIC facilities will be included in new and redevelopment proposals from both public and private sectors.

The requirements exclude planned population of transients.
